Zacapa, February 10, from New York, with 40 cases scrub brushes, 160 bundles handles, 45 crates tool handles, 122 pieces steel angles, 3,539 sacks oats for stock.

Cristobal, February 10, from New York, with 23,770 barrels cement for Atlantic Division; 116,600 bags cement for Pacific Division.

Allianca, February 10, from New York, with 29 pieces castings, 4 reels wire rope for Atlantic Division; 25 packages electrical material for Atlantic and Pacific Divisions; 11 cases machinery for Pacific Division; 1,121 pieces castings for Mechanical Division; 375 cases glassware, 32 cases drugs and sundries for Sanitary Department; 34 cases drill parts, 20 pieces chain, 7 casks chain, 30 crates iron valves, 526 pigs lead, 307 kegs bolts, 104 cases bolts, 106 kegs rivets, 34 barrels rosin, 48 crates ranges, 83 bundles corn brooms for stock; and a miscellaneous cargo, the whole consisting of 2,513 packages, weighing 264 tons.

OFFICIAL CIRCULAR.

Standard Envelopes.

CULEBRA, C. Z., February 11, 1911.

CIRCULAR No. 366-A:

1. The standard sizes of envelopes for use of the Isthmian Canal Commission and of the Panama Railroad Company shall be as follows:

No.	Size.
White.	
6½	3⅝ x 6½
9½	4⅛ x 9½
Manila.	
6¾	3¾ x 6¾
9½	4⅛ x 9½
11½	5 x 11½
12¼	9¼ x 12¼
15	10 x 15

2. On envelopes for the Isthmian Canal Commission, one form of printing shall be used for all departments and divisions. In the upper left hand corner: "Isthmian Canal Commission, Canal Zone—Official Business;" in the upper right hand corner: The penalty stamp.

3. The printing of addresses on envelopes shall be discontinued. For this purpose the Depot Quartermaster has been authorized to furnish, on requisition, rubber stamps containing the names and addresses of the departments and divisions desired.

4. All departments and divisions of the Isthmian Canal Commission using memorandum letter heads shall use a stock form (C. E. 292–d), printed on 8x5¼ paper of the same quality as the regular letter head (C. E, 292–a), and put up in pads of 50 sheets each.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending February 22, 1911, (75th meridian time):

DATE.	Low.	High.	Low.	High.
	A. M.	A. M.	M.	P. M.
February 16	......	5.45	12.00	6.07
			P. M.	
February 17	12.23	6.25	12.40	6.45
February 18	1.05	7.05	1.20	7.23
February 19	1.47	7.45	2.05	8.00
February 20	2.30	8.25	2.45	8.42
February 21	3.17	9.10	3.35	9.30
February 22	4.10	10.10	4.40	10.25

COMMISSARY DEPARTMENT.

Commissaries Closed on Washington's Birthday.

CRISTOBAL, C. Z., February 15, 1911.

CIRCULAR No. 269:

This store will be closed on Washington's Birthday, Wednesday, February 22, 1911.

Patrons will be guided accordingly in placing their orders.

JOHN BURKE, *Manager.*

Approved: EUGENE T. WILSON, *Subsistence Officer.*

The hours during which commissaries are open are as follows:

Cristobal and Culebra, 8 a. m. to 12.30 p. m.; 2 p. m. to 7 p. m.

All other commissaries, 8 a. m. to 1 p. m.; 3 p. m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning February 10.

FRESH MEATS.

	Price.
Mutton—Stewing, per pound	6
Shoulder, neck trimmed off, (4 lbs. and over), per pound	[illegible]
Entire forequarter (not trimmed) 10 pounds and over, per pound	8
Leg, (8 to 10 pounds), per pound	17
Cutlets, per pound	18
Short cut chops, per pound	20
Lamb—Stewing, per pound	6
Entire forequarter, neck trimmed off, per pound	9
Leg (5 to 8 pounds), per pound	20
Chops, per pound	24
Cutlets, per pound	24
Veal—Stewing per pound	8
Shoulder for roasting (not under 4 pounds), per pound	12½
Loin for roasting, per pound	19
Chops, per pound	24
Cutlets, per pound	28
Pork cuts, per pound	16
Beef—Suet, per pound	2
Soup, per pound	5
Stew, per pound	8
Corned, per pound	12, 14, 16
Chuck roast, (3 pounds and over), per pound	12
Pot roast, per pound	12½
Rib roast, second cut (not under 3½ pounds), per pound	16
Rib roast, first cut (not under 3 pounds), per pound	18
Sirloin roast, per pound	19
Rump roast, per pound	19
Porterhouse roast, per pound	20
Steak, Chuck, per pound	12½
Round, per pound	13
Rib, per pound	18
Sirloin, per pound	19
Rump, per pound	19
Porterhouse (not less than 1½lbs.) per pound	20
Tenderloin (Western) per pound	24
Tenderloin (Native) per pound	30

MISCELLANEOUS.

Livers—Beef, per pound	7
Calf, each	60
Half, each	30
Sausage—Pork, per pound	15
Bologna, per pound	10
Frankfurter, per pound	12
Lieberwurst, per pound	10
Sweet bread—Veal, per pound	1.20
Beef, per pound	25
Eggs, fresh, dozen	*29
½ dozen only	*16
Bluefish, fresh, per pound	16
Cod, fresh, per pound	10
Halibut, fresh, per pound	15
Oysters, in 1-qt. kegs, keg	50

POULTRY AND GAME.

Chickens—Fancy roasting, large, each	1.25
medium, each	1.00
Fowls, each	60, 70, 80, 90, 1 00
Ducks, large, each	1 30
medium, each	1.10
Broilers, each	60
Turkeys, per pound	28
Squabs, each	35
Rabbits, dressed, each	40
Pheasants, each	70, 1.00
Partridges, each	50
Grouse, each	85

CURED AND PICKLED MEATS.

	Price.
Ham—English York Cut, per pound	30
German, Westphalia, per pound	36
Sugar cured, per pound	18
Sliced, per pound	20
Half, for boiling, per pound	19
Boiled, per pound	25
Hocks, per pound	‡08
Picnic, Winchester, per pound	15
Bacon—Breakfast, whole piece, per pound	23
Breakfast, sliced, per pound	24
Beef, salt, family, per pound	9½
Pork, salt, family, per pound	14
Ox tongues, each	75
Pigs' feet, per pound	09
Tongues, per pound	14
Sliced Bacon in 1-lb tins, per tin	30
In 1-lb jars, per jar	30

DAIRY PRODUCTS.

Butter—Creamery special, per pound	*32
Cheese—Roquefort, per pound	38
Philadelphia Cream, cake	10
Young America, per pound	20
Swiss, per pound	26
Edam, each	1.00
Camembert, in large tins, tin	38
Camembert, in small tins, tin	14
Neufchatel, each	6
Gouda, per pound	34
Milk (Inspected or certified) per bottle	**25
(Pasteurized), bottle	**18
Buttermilk, bottle	**15
Ice cream, quart	‡25
Ice cream, ½-gallon	‡50

VEGETABLES AND FRUITS.

Beets, per pound	3
Celery, per head	6
Carrots, per pound	3
Cabbage, per pound	3
Cucumbers, per pound	10
Lettuce, per pound	15
½ pound	8
Onions, per pound	3½
Potatoes, white, per pound	2½
Sweet, per pound	2
Parsnips, per pound	3
Squash, per pound	4
Turnips, per pound	3
Yams, per pound	3
Apples, per pound	6
Cranberries, per pound	10
Grapes, per pound	16
Grapefruit, each	4
Lemons, dozen	24
Limes, per 100	80
Oranges, per dozen	12
Tangerines, each	2

COLON TO BARBADOS, CALLING AT TRINIDAD.

Clyde	R. M.	Tuesday	Feb. 28

The next sailing of the Leyland Line will be as follows: Memphian on or about February 18, for New Orleans via Kingston, Ja.

Hamburg-American steamers leave for New York every Tuesday at 10 a. m.; for Jamaica every fortnight, connecting there with steamers for all points in Cuba; for Port Limon every Tuesday, direct, or by way of Bocas del Toro.

Royal Mail steamers leave for New York on alternate Tuesdays at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursday at 3 p. m.; for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m., and for New York on Thursday at 11 a. m.

Sailings of the French line (Cié Générale Transatlantique) for Venezuelan ports, Martinique and Guadeloupe on the 3d and 20th of each month.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, FEBRUARY 22, 1911. No. 26.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting nformation, will receive attention unless signed with the ull name and address of the writer.

NOTES OF PROGRESS.

Acting Chairman's Report.

The report of the Acting Chairman of the Isthmian Canal Commission for the month of January is published in full in other columns of this issue of The Canal Record. It gives a detailed account of the progress of Canal work in all departments and divisions.

Reduction in Prices at Commissary.

A reduction in prices of staple articles at the commissaries has been made that will result in a net saving of $11,000 a month to the purchasing public. All tinned milk, of which 4,200 cases of 48 cans to the case are used each month, has been reduced from 10 to nine cents a tin; 5-pound bags of sugar, from 22 to 20 cents; American peas and corn, in tins, from 12 to 10 cents; fresh pork, from 16 to 14 cents a pound; fresh eggs, from 29 to 27 cents a dozen; working shirts and overalls, of which 12,000 are sold each month, reduced five cents a garment; and corresponding reductions have been made in many articles of wearing apparel.

Major Wendell L. Simpson, Assistant Purchasing Officer at New York, was on the Isthmus two weeks ago in consultation with the commissary on the purchase and delivery of supplies. He was accompanied by representatives of various firms in the States that supply goods to the commissaries, who wished to study local conditions, in order that their goods, and the packing of them, may conform with the requirements on the Isthmus.

Gatun Locks.

The placing of concrete in the third or lowest pair of locks at Gatun has been begun. Concrete work is in progress in all of the locks at Gatun, and the amount already placed, together with its proportion to the whole, is shown in a statement published elsewhere in this issue. On account of the unstable condition of the banks of the lower locks, where small slides have caused much inconvenience, the plan of construction during the dry season will be to complete the outer walls to a height of 25 feet in the places where the material is sliding, thus forming a retaining wall. The tracks for the cableways may then be extended the full length of the locks, and the walls may be completed during the next rainy season to their full height of 79 feet. The excavation in Gatun Locks is almost completed. All that remains to be taken out is a small amount of material in the northeast corner of the lower locks where a slide occurred recently.

It is expected that the first shipment of structural steel for the lock gates will arrive about April 1, and the preparations for handling it are advancing.

Apparatus for Lock Gate Construction.

Two 75-kilowatt motor-generator sets, with a switchboard for control of each, were received on the Isthmus on February 10. One of these sets will be placed in a substation at Gatun Locks, and the other in a substation at the Pedro Miguel Locks. They are furnished by the Commission in connection with the construction of the lock gates, and will operate on 25-cycle, 2200 volt energy transmitted from the power stations at Gatun and Miraflores. The motor-generators will convert the alternating current from the power houses to direct current at 220 volts for use on the various small tools required in the construction of the gates. In addition, the gate contractors will install, at their own expense, two motor-driven air compressors at each of the substations to operate the pneumatic tools.

Increase in Output of Porto Bello Crusher.

The increase in output of the crusher plant at Porto Bello, since the installation of the large No. 21 crusher, has made it possible to reduce the number of working hours each day from 16 to eight. In September, the day was reduced from 16 to 12 hours; in January, from 12 to 10, and on February 16, from 10 to eight hours. The output of the plant has increased from 150 cubic yards an hour to 300 cubic yards, and 70,000 cubic yards of crushed stone are now in storage at Gatun, a supply sufficient to last almost a month, even if no more rock was delivered there. A statement of the rock crushed during the week ending February 18, follows:

Date.	Hours worked.	Cubic Yards.
February 13	7:22	2,817
February 14	8:28	3,732
February 15	6:19	3,079
February 16	3:08	1,683
February 17	5:01	1,997
February 18	7:11	3,164
Total	37:29	16.472

Suction Dredging Near Mindi.

A trestle about 6,500 feet long has been completed at Mindi, parallel with and east of the Panama railroad, and it is now being filled with spoil from the excavation at Mindi and the locks. This fill will make a dike, behind which the suction dredge at work in the Canal channel between Mindi and Gatun Locks will pump about 4,000,000 cubic yards of material. The dredge *Sandpiper* is already excavating in this section, depositing its spoil on the flats between the dike which parallels the Canal in this place, and the Panama railroad. The pumping of the spoil back of the new dike will begin about March 1.

Gatun Filtration Plant.

The laying of concrete for the filter plant at Gatun has been begun, and the amount required will be about 1,200 cubic yards. The work includes the construction of a sedimentation basin about 75 feet square, of a filter house three stories high, and a clear water basin, with a capacity of about 225,000 gallons. The filter house will contain four rapid gravity sand filters on the first floor, an operating gallery on the second floor, and a storage room for materials on the third floor.

Cement Deliveries.

Commencing with the sailing of the cement ship *Cristobal* from New York about March 3, daily deliveries of cement to the Pacific Division will be reduced 800 barrels and deliveries to the Atlantic Division will be increased 500 barrels. Under the new arrangement, the Pacific Division will receive 2,700 barrels, and the Atlantic Division 3,500 barrels of cement per day. Five hundred barrels of the consignment to the Atlantic Division will be in bags. The deliveries to both divisions, beginning with the sailing of the *Cristobal*, will total 6,200 barrels per day, as compared with 6,500 barrels per day at the present time. Since January 19, 1911, the Pacific Division has been receiving on an average 4,281 barrels of cement daily and a considerable stock has been accumulated. On this account, in addition to serving the concrete mixing plants, and in order to ship empty cement bags to Colon, the division has been compelled to hold in service from 40 to 45 box cars. The matter of box car detention was recently made the subject of an investigation by a committee, consisting of Mr. S. B. Williamson, chairman; Messrs. W. J. Holmes and A. K. Stone, members, and the following recommendations were submitted, all of which have been approved by the Acting Chairman and Chief Engineer:

1. That as the detention of cars in the Pacific Division is primarily due to the irregular sailings of chartered cement steamers, thus causing a congestion in the shipments, the dates of their arrival be regulated, so that the Panama Railroad Company ship daily to the Pacific Division the approximate amount agreed upon.

2. That the Pacific Division be allowed to ship cars containing empty cement bags as soon as loaded, so that they may be stored in

NOTES OF PROGRESS.

(*Continued.*)

the Cristobal yard where there is more track room, and where, in cases of emergency, they can be unloaded on the docks to await the sailing of the *Ancon* or *Cristobal.* Hitherto, the Pacific Division has been required to hold these cars until the day previous to the sailing of one of these ships.

3. In order to provide against possible irregular deliveries in future, it was recommended that the Pacific Division increase its unloading forces temporarily, and that sheds, capable of holding one or two cars of cement, be erected at such of its mixing plants as are reasonably permanent, so that when a car shortage arises, these sheds may be utilized for supply purposes.

Gatun Dam Spillway.

Concrete was placed in the spillway of Gatun Dam during the week ending February 18, as follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
February 13............	254	17:00	2
February 14............	242	8:15	1
February 15............	336	17:30	2
February 16............	170	12:00	2
February 17............	332	17:00	2
February 18............	434	17:00	2
Total...............	1,768	88:45	1.83

After the sailing of the *Prinz August Wilhelm* from Colon on February 28, the steamers *Prinz Joachim* and *Prinz August Wilhelm* will call at Santiago de Cuba both outward and inward bound.

Canal Zone School Notes.

Two additional teachers have been engaged for the Canal Zone white schools. One has charge of the fourth grade, and one-half of the fifth, at the Ancon school; and the other, the third grade, and one-half of the fourth at the Cristobal school. The corps of teachers at the four largest schools now number, as follows: Gatun, 8; Ancon, 7; Empire, 6; Cristobal, 6. The total teaching force in the Canal Zone schools at present consists of 42 white, and 25 colored teachers. This is an increase over the last school year of six white, and four colored teachers. The enrollment also shows an increase. In January, 1911, it was: White, 1,048; colored, 1,209, a total of 2,257. In January 1910,, it was: White, 819; colored, 1,086; a total of 1,905. The January, 1911, enrollment shows an increase in the number of white scholars over the same month in 1910 of 229, and in the number of colored scholars of 123, a total of 352.

During the present school year, it is probable that steps will be taken looking to the establishnemt of suitable schools in the more important native communities in the Canal Zone. There are six or seven of these settlements, such as Majagual, situated on the trail from Mount Hope to Porto Bello; Cucaracha, near Culebra, and Las Sabanas, for which no school facilities have as yet been provided. The preliminary efforts will be confined to ascertaining, through the assistance of the police and revenue departments, the number of children of school age in each of these communities, and the amount of taxes paid. The places will then be visited by the Superintendent of Schools, or his representative, with a view of procuring information as to the actual requirements, including the necessary buildings, etc.

The school gardens for colored pupils, planted in 1910 at Balboa, Culebra, and Empire, have been continued. The one at Empire is especially prosperous, and, it is expected that $600, or more, in revenue will be derived from the sale of produce raised in it. The soil in the Culebra garden has not been brought to the same state of fertility as in the Empire garden, and it will be necessary to work and fertilize it for one or two more seasons before it can be made fully productive. At Balboa, the colored pupils are nearly all too small to work the garden successfully on their own account, and outside help, therefore, has had to be procured to carry it on.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 54 per cent of the concrete for the system of three twin locks at Gatun has been laid, the exact amount in place at the close of work on February 18, being 1,125,792¼ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending February 18, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily. and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Grand total......................	....	....	......	....	....	......	....	1,125,792¼

*The 291 yards shown for the portable mixers were reinforced concrete, and were placed on the following days: February 13tb, 101 yards; February 14th, 32 yards; February 15th, 37 yards; February 16th, 42 yards: February 17th, 43 yards; February 18th, 36 yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 65 per cent completed, 547,251 cubic yards, out of a total of 837,400, having been placed at the close of work on February 18. The record for each of the six 8- hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.						Large stone.	Total.
				2-cubic yard mixers.			½-cubic yard mixer.

MIRAFLORES LOCKS.

About 10 per cent of the concrete for the system of locks at Miraflores was in place on February 18, the total amount on that date being 134,684 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.										Total.
	2-cubic yard mixers.			½-cubic yard mixers.			¼-cubic yard mixer.

THE CIVIL ENGINEERS.

Program for Entertainment of Members of American Society.

A party consisting of one hundred members of the American Society of Civil Engineers, with a number of friends, will arrive on the Isthmus on March 9, and will be here until March 16. It will come in two sections, one by way of New Orleans, which will arrive at Colon in the morning on board a United Fruit Company ship, and the other by way of New York, which will also arrive on a United Fruit Company ship at 1 o'clock in the afternoon. A special train will leave Colon immediately after the arrival of the second ship, and the party first arriving will spend the interim in Cristobal, Colon, and Mount Hope. An outline of the program prepared for the entertainment of the engineers, follows:

Friday, March 10. Morning—Special train will leave Panama promptly at 8 o'clock. Enter Culebra Cut at the south end, pass through the 8½-mile Cut, and go out on the 95-foot berm at the north end. Cross the Chagres River on Gamboa bridge, and continue over the tracks of the relocated Panama railroad as far as New Frijoles. Return to Panama over the main line of the Panama railroad, making one stop en route at the principal manufacturing and repair shops of the Commission at Gorgona. Hotel Tivoli will be reached in time for lunch. Afternoon—Visits to Ancon Hospital and the Quartermaster's corral at Ancon.

Saturday, March 11. Morning—Special train will leave Panama at 8 o'clock for the Pacific Division, via Balboa, and will visit, in turn, the Agua Dulce pumping plant, hydraulic excavation in the Canal prism and Miraflores Locks, turbo-electric power plant at Miraflores, and Pedro Miguel Locks, thence over the main line of the Panama railroad to Culebra, where the main office building will be visited, and inspection made of relief maps and models of the locks and dam. Afterwards, Culebra Cut will be viewed from the top of the bank at Culebra. Train will bring party back to Hotel Tivoli in time for lunch. Afternoon—No special program. Evening—Dance and reception at the Hotel Tivoli.

NOTE—A trip to the Porto Bello rock quarry and crushing plant, and to the old town of Porto Bello, may be taken on Saturday, instead of the trip by special train through the Pacific Division scheduled above, if desired. Members of the Porto Bello party will leave Panama on regular train at 6.30 a. m., for Cristobal, and immediately upon their arrival at dock No. 13, will embark on a tug which will take them to Porto Bello and bring them back in time to catch the regular train which leaves Colon for Panama at 4.35 p. m.

Sunday, March 12—Trip will be taken to Taboga Island. Special train will leave Panama at 9.30 a. m., for Balboa, where the party will embark on tugs. Lunch will be served at the Commission's sanitarium on Taboga Island. Party will be returned to Hotel Tivoli in time for dinner. Evening—Concert by the I. C. C. Band at the Hotel Tivoli at 7.30 p. m.

Monday, March 13—Special train will leave Panama at 8 a. m., proceeding over the main line of the Panama railroad to Frijoles; thence over the tracks of the relocated Panama railroad to Gatun. Day to be spent at Gatun in viewing locks, dams, spillway, power plant, reservoir, etc. Lunch at the Gatun Hotel. Return to Hotel Tivoli for dinner.

Tuesday, March 14. Morning—Leave Panama by special train at 8 o'clock for Ancon quarry; thence to view operations on Balboa dump, and to inspect breakwater under construction to Naos Island. Return to Hotel Tivoli for lunch at 11.15 o'clcock. Afternoon—Special train will leave Panama at one o'clock for Balboa, where marine shops and docks will be inspected. Party will embark on tugs at 2 o'clock for inspection of Canal and dredging work between Agua Dulce, and the end of the Canal channel. Party will be landed at Balboa and returned to Panama by special train in time for dinner.

Wednesday, March 15. Morning—Leave Panama by special train at 8 o'clock going over the main line of the Panama railroad to Mindi, thence over the tracks of the Atlantic Division to the intersection of the French and American canals. After inspection of excavation work at Mindi, tugs will be boarded which will proceed down the American Canal, and up the French canal, returning to dock No. 11, Cristobal, where the party will land and take lunch at the Cristobal hotel. Afternoon.—Party may either visit Cristobal and Colon, take a trip to Toro Point, and inspect the construction of the breakwater there, or board the seagoing suction dredge *Caribbean*, and take a trip on it while it is working. The party going to Toro Point, or on the dredge *Caribbean*, will embark at dock No. 11 at 1 o'clock, and will be returned to Cristobal in time to take special train for Panama, which will leave dock No. 11, at 4.15 o'clock.

Thursday, March 16—Special train with entire party will leave Panama for Colon at 8 a. m.

Church Notes.

A ladies' auxiliary has recently been formed in connection with the Empire Christian League, the object being to assist in the care and adornment of the chapel. The auxiliary holds its meetings on the first and fourth Fridays in each month. Mrs. Philip Kelly is the president.

The members of the Ladies' Aid Society of the First Baptist Church, Empire, have formed a class for Bible study, which meets at the home of the pastor, the Rev. J. H. Coin, on Wednesday afternoons.

American Veterans of Foreign Service.

A meeting for the purpose of organizing a Post of American Veterans of Foreign Service will be held at the Cristobal Y. M. C. A., on Sunday morning at 10 o'clock, February 26. All honorably discharged soldiers, sailors and marines, who have served in Cuba, Porto Rico, the Philippines, Guam, and China during the period from April 21, 1905, to July 4, 1902, are eligible, and are urged to be present at this meeting.

Red Cross Ball.

As the result of the annual ball of the Canal Zone Red Cross, held at the Hotel Tivoli on the night of February 18, seventy-seven members have been added to the local organization, making a total of about 1,000, and $850 have been added to the treasury.

Revolver Match.

A revolver marksmanship match will be held at Culebra on March 19 to 26, inclusive, under the auspices of the Culebra Pistol Club, governed by the rules of the United States Revolver Association. It will be open to all comers; no entrance fee will be required, but contestants must use a Colt's revolver. A first prize, known as the Barham championship trophy—a 38-calibre, Colt's, officer's model, target revolver will be awarded for the best shooting. The match will consist of 30 shots at 20 yards at the American standard 20-yard target, any calibre and ammunition being permitted. The range will be open all day on the 19th and 26th, and from 12 to 2, and from 5 to 6.30 on week days. For additional information, address L. D. Cornish, Culebra, C. Z.

Obituary.

Henry G. Day, an American employed in the Atlantic Division, residing at Cristobal, died at Colon Hospital on February 16 of chronic nephritis. He was a native of Maryland, 37 years of age, single, and had been on the Isthmus since December 10, 1908. His cousin, John C. Day, lives at 547 Tenth street, Baltimore, Md.

E. H. Allison, an American employed in the transportation service of the Central Division, with residence at Gorgona, died at Ancon Hospital on February 19, after an illness of about six weeks. He was a native of Ohio, aged 50 years, and had been on the Isthmus four and a half years.

Civil Service Examinations.

Examinations are scheduled to be held for the Isthmian Canal Service, as follows: On March 5, for typewriter, and stenographer and typewriter; on March 12, for clerk. The next examinations to be held for typewriter, and for stenographer and typewriter will be about April 30, and for clerk, in October next.

Applications for examination on March 5 will be received only up to March 1, and for the clerk examination, only up to March 7.

All directions in application form and the Manual of Examinations concerning an examination applied for should be carefully followed before forwarding application to this office.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
Culebra, C. Z., February 17, 1911.

Married.

McGUIGAN-GALE—At the Ancon Catholic chapel, on Wednesday, February 15, 1911, Irene Gale of Vicksburg, Miss., to Joseph J. McGuigan of Wilkes-Barre, Pa., the Rev. Father Daniel Quijano officiating. Canal Zone residence, Ancon.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Bas Obispo, C. Z., on Sunday, February 26, 1911, at 6 p. m. The program, follows:

1 March—*Victorious Phalanx*..............Morse
2 Selection—*The Chocolate Soldier*...........Straus
3 Waltz—*Idle Hours*........................Wood
4 Overture—*Semiramide*....................Rossini
5 Intermezzo—*Silver Bell*..................Wenrich
6 March—*Tannhauser*......................Wagner
7 Medley Selection—*My Southern Rose*..Von Tilzer
8 Selection—*Carmen*..........................Bizet
9 March—*With Sword and Lance*............Starke

CHAS. E. JENNINGS, *Musical Director.*

The next concert will be gien at Gatun on Sunday, March 5, at 2 p. m.

Rainfall from February 1 to 18, 1911, Inclusive.

CANAL WORK IN JANUARY.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., February 15, 1911.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of January, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	65,889	1,601,107	64,434	1,731,430
Work excavation, wet	Cubic yards	520,181	10,672	469,053	999,906
Total work excavation	Cubic yards	586,070	1,611,779	533,487	2,731,336
Plant excavation, dry	Cubic yards	....	2,583	....	2,583
Plant excavation, wet	Cubic yards	38,251	....	....	38,251
Total plant excavation	Cubic yards	38,251	2,583	....	40,834
Total Canal excavation	Cubic yards	624,321	1,614,362	533,487	2,772,170
Material placed in dams	Cubic yards	430,682	....	113,928	544,610
Concrete laid	Cubic yards	75,429	....	62,531	137,960
Explosives used	Tons (Gross)	66.27	238.78	18.74	323.79
Rock drilled	Feet	79,683	437,798	53,333	570,814
Tracks removed	Miles	....	17.23	....	17.23
New tracks laid	Miles	2.63	25.06	2.29	29.98
Rock crushed	Cubic yards	84,072	456	69,325	153,853
Cement used	Barrels	77,578	78	63,932	141,588
New roads built	Miles	0.03	....	0.99	1.02
Water mains laid	Feet	14,922	4,472	333	19,727
Sewers laid	Feet	1,564	100	96	1,760
Open drains and ditches dug	Feet	8,260	23,662	24,629	56,551

Atlantic Division.

GATUN LOCKS.

Excavation—Shovel excavation during the month was carried on in the lower chamber, and on a hill north of the machine shop. This hill is being excavated in order to furnish impervious material for the back fill south of the intermediate gate of the upper lock. A total of 82,931 cubic yards of material was removed. Of this quantity, 24,678 cubic yards were excavated for back fill. On January 31, the total material removed amounted to 5,660,841 cubic yards, of which 4,904,162 cubic yards had been removed from the Canal prism. The shovel excavation in the locks was 96 per cent completed, and the channel excavation in the lower chamber 65 per cent completed.

Back Fill—Back filling behind the walls of the upper lock was continued, and was commenced behind the west wall of the middle lock. A total of 66,589 cubic yards was placed during January, increasing the total to 260,717 cubic yards. On January 31, the back fill was 21.64 per cent completed.

Receiving and Issuing Material—The receipts of material during the month exceeded the consumption, with the exception of sand, for which the consumption exceeded the receipts by 5,488½ cubic yards.

Mixing and Placing Plants—These plants were kept in satisfactory operation during the month. A second portable mixer was put into operation on the east side of the upper lock, and preparations were made for putting in a third mixer for working on the operating tunnels on the west wall. A fourth portable mixer was placed temporarily in the lower lock for building a strip of floor sufficiently wide for carrying a narrow gage trestle into the lower lock.

Power Plant and Pumps—The operation of the power plant and pumps during the month was satisfactory. The electric pumps were operated during the month by the electrical subdivision for pumping out the Mindi cut.

Iron and Steel Work—During the month, the setting of steel in Stoney gate valves was continued, and the setting of the sills for all gates of the upper lock was completed.

Concrete Work—There was a decrease of 8,293½ cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 25 working days was 2,916 cubic yards. The total amount of concrete placed during the month was 72,918½ cubic yards, including 4,972¼ cubic yards of large stone. The bucket measurement exceeded the place measurement by 359¼ cubic yards. Of the total concrete, 23,552½ cubic yards were placed in the upper lock, 42,238 cubic yards in the middle lock, and 7,128 cubic yards in the lower lock. The concrete work for the entire lock system was 51.6 per cent completed at the end of January.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS, GATUN LOCKS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.19	8.50
Average number of hours per day worked per strand of cableway laying concrete and large stone (actual working time)	8.00	....
Average number of mixers per day	6.00	2.00
Average hourly output per mixer, (actual working time) cu. yds.	58.44	60.53
Average amount of concrete and large stone laid per hour, per strand of cableway, (actual working time) cu. yds.	35.93	....
Large rock laid, cu. yds.	4,087¼	885
Concrete laid, cableways, cu. yds.	53,350	....
Concrete laid, derrick, cu. yds.	490	....
Concrete laid, derrick, crane and lift, cu. yds.	....	13,040
Concrete laid, portable mixers	....	1,425.5
Total amount concrete and large rock laid, cu yds.	57,927¼	15,350.5

Concrete from the auxiliary plant is placed by derricks, crane, and a lift. It is, therefore, impracticable to estimate the average amount placed per hour by each of these units.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 430,682 cubic yards, making the total amount in place 11,763,337 cubic yards.

Hydraulic Fill—The dredges increased the hydraulic fill by 211,992 cubic yards, borrow pit measurement. The total hydraulic fill in place on January 31 was 5,989,227 cubic yards.

Dry Fill—The material received from the Central Division, the locks, the spillway, and the plant excavation, amounting to 218,690 cubic yards, was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 5,774,110 cubic yards.

GATUN SPILLWAY.

Excavation—The material excavated during the month amounted to 5,636 cubic yards, increasing the total spillway excavation to 1,571,125 cubic yards.

Concrete—Work was continued on the construction piers of the spillway dam across the channel, 2,510 cubic yards of concrete being placed, which increased the total to 115,778 cubic yards.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea Level at Mindi—No material was excavated during the month. The opening made by dredge *No. 86* was closed, and pumping was started on January 15. By January 31, the water surface had been lowered to about elevation minus 34, and two steam shovels were made ready to start work.

Dredging from the Ocean to Mindi—Five dredges removed 346,433 cubic yards of earth and 43,865 cubic yards of rock from the Canal prism. In addition, the dredge *Caribbean* removed 35,054 cubic yards of earth from the channel leading to dock No. 14. The dredge *Mindi* removed 3,197 cubic yards of earth from in front of dock No. 3 at Gatun. On January 31st, 40 feet of water could be carried from zero to zero plus 3,500 feet; 30 feet to mile 5 plus 1,700 feet; 20 feet to mile 5 plus 2,440 feet, at the junction with the French canal.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working days—hours	
From 1st to 15th	12:00
From 16th to 31st	10:00
Average number of hours worked per day	
From 1st to 15th	8:62
From 16th to 31st	7:66
Average number of cubic yards per hour of working day	
From 1st to 15th	284.9
From 16th to 31st	331.9
Average hourly output for possible working time of 263 hours 5 minutes	320
Average number of cubic yards per working hour	
From 1st to 15th	396.4
From 16th to 31st	433.4
Total for month, cubic yards	84,072
Maximum day's output, cubic yards	4,255

SAND, STONE AND CEMENT SERVICE.

In connection with this service, plant steamed 10,535 miles, handled 740 barges, and carried about 2,690 passengers.

TORO POINT.

Colon Breakwater—At Toro Point, 44,941 cubic yards of material were excavated, of which amount 1,788 cubic yards were placed in track fill, and 43,153 cubic yards in breakwater fill. The double track trestle was extended 283.5 linear feet.

NOMBRE DE DIOS.

During the month, 55 barges, containing 28,486 cubic yards of sand, were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of January, the total amount of material excavated in the Central Division was 1,614,362 cubic yards, of which 456,002 cubic yards were classified as earth, and 1,158,360 cubic yards as rock. Of this quantity, 1,585,406 cubic yards were removed by steam shovels, 2,680 cubic yards by scraper, and 9,452 cubic yards by bucket cranes. Contractors removed 10,672 cubic yards by slucing, and 6,152 cubic yards by hand. Of the total, 1,590,297 cubic yards consisted of primary excavation for the Canal prism, 8,480 cubic yards permanent diversion useful after the Canal is completed, and 13,002 cubic yards of silt deposited in completed sections of prism. The total work excavation amounted to 1,611,779 cubic yards. In addition, 2,583 cubic yards of gravel were excavated outside of the Canal prism for ballast and concrete use.

The daily average number of steam shovels at work during the month was 47.68, and the total number of shovel days was 1,192, as compared with 45 58 shovels at work during the month of December, with 1,185 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W'k'g days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
Jan.....	1,461,389	1,128,835	332,554	46.68	25	1,252.30
1911:						
Jan.....	1,585,406	1,158,360	427,046	47.68	25	1,330 04

Rainfall at Empire: 1910, .70 ins.; 1911, .02 ins.

The above table shows the average output per shovel to be six per cent greater in January, 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in January, 1911—1,347,914 cubic yards—was the highest record in that section for the month of January, the previous high record for the month having been in January, 1910, when 1,323,693 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division was 97,125,018 cubic yards, and up to February 1, 1911, 69,404,634 cubic yards had been removed, leaving 28,720,378 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures it will be seen that 71.46 per cent of all excavation in the Central Division had been completed up to the close of the month of January, and 28.54 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of January operations was, as follows:

CULEBRA SECTION.

	Cubic Yards.
Completed....................	58,262,327
To be completed..............	25,924,397

CHAGRES SECTION.

Completed....................	11,142,307
To be completed..............	1,795,987

From the above figures it will be seen that the Culebra section, locally known as Culebra Cut, was 69.22 per cent completed, with 30.78 per cent to be completed; the Chagres section was 86.12 per cent completed, with 13.88 per cent to be completed.

During the month, 9,400 cubic yards of material were hauled from the Canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad in the vicinity of Pedro Miguel. The total amount of spoil from the Central Division used for this purpose at the close of the month was 3,742,574 cubic yards. The Central Division also delivered at Gatun 207,498 cubic yards of rock and earth for use in the construction of the dam, making the total for this purpose at the end of January 2,713 055 cubic yards.

The daily average number of laborers at work on the whole division during the month was 8,137, and the daily average number of gold employes 904.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 64,434 cubic yards.

Filling and Embankment—During January, no additional dry filling was added to the prism of the west dam at Pedro Miguel, the total amount of material in place at the close of the month remaining at 260,852 cubic yards, as previously reported. The back fill at Pedro Miguel was increased by 31,072 cubic yards, the total in place at the end of the month amounting to 61,159 cubic yards.

At Miraflores, 24,685 cubic yards were added to the dry fill in the toes, and 89,243 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month 634,548 cubic yards, and 383,955 cubic yards, respectively. The back fill was increased by 1,060 cubic yards, making the total amount in place at the end of the month 134,605 cubic yards.

PEDRO MIGUEL LOCKS.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)...	8.00	8.00
Average number of hours per day, per unit, worked laying concrete and large stone (actual working time)................	5.26	4.11
Average number of mixers per day.........................	2.72	1.60
Average hourly output per mixer (actual working time)........	Cu. Yds. 74.44	Cu. Yds. 37.84
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)......................	58.62	....
Large rock laid................	32.00	81.00
Concrete laid..................	30,810.00	7,590 00
Total concrete laid..........	30,842.00	7,671.00

*Auxiliary plant consists of three 2-cubic yard mixers, averaging 1.6 daily, and two locomotive cranes and three derricks averaging 2.6 units daily.

The excavation for the center wall in the forebay was completed, and the concrete work commenced. The laying of the tracks for the purpose of back filling the west wall was finished, and the work begun.

Concrete Work—The concrete work at Pedro Miguel for January showed a decrease of 3,871 cubic yards over the figures for December. The total amount placed was 38,513 cubic yards, including 113 cubic yards of large stone. The concrete was placed, as follows: 18,536 cubic yards in the center wall; 8,507 cubic yards in the west wall; 1,298 cubic yards in the west head wall; 9,706 cubic yards in the east wall; and 466 cubic yards in the floor. The dismantling of berm crane "G" for the purpose of moving it to Miraflores was commenced, it not being practicable to use the plant to its full capacity in the future, on account of the placing of the anchorage bolts and other iron work for the gates, together with the castings for the Stoney valves.

MIRAFLORES LOCKS.

Work on the west storage trestle at Miraflores was continued during the month, and the filling of the dike at the Agua Dulce pumping station was commenced.

Excavation—The hydraulic excavation plant was removed from the lower lock site, with the exception of two monitors and a relay pump, which are engaged in cutting out the barrier between the upper and lower lock sites. A steam shovel was employed in excavating an incline into the lower lock site, in order that the rock excavation by steam shovels can be commenced.

Concrete Work—The total amount of concrete and large stone laid was 24,018 cubic yards, as compared with 21,533 cubic yards during December. The concrete was placed, as follows: 7,482 cubic yards in the center wall; 14,611 cubic yards in the east wall; and 1,925 cubic yards in the floor.

OPERATION OF THE PERMANENT ANO AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)..	8.00	8.00
Average number of bours per day per unit, worked laying concrete and large stone (actual working time).............	7.48	6.18
Average number of mixers per day.........................	....	6.84
Average hourly output per mixer (actual working time)........	Cu. Yds.	Cu. Yds. 21.89
Average amount of concrete and large stone laid per hour per chamber crane (actual working time).....................	....	....
Large rock laid................	203.00	379.00
Concrete laid..................	11,310.00	12,126.00
Total concrete laid..........	11,513.00	12,505.00

Auxiliary plant consists of two 2-yard mixers, five ½-yard mixers, and one ½-yard mixer.

Placing plant consists of one berm crane operating one boom, and mixers dumping directly into forms also locomotive and cars carrying concrete from mixers to berm crane.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

Dredge.	Type.	Work.		Plant.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	
Cardenas..................	Dipper....	51,777	5,187	1,400	....	58,364	Place measurement
Marmot....................	Ladder....	....	....	186,136	....	186,136	Place measurement
Mole......................	Ladder....	10,123	2,128	....	....	12,251	Place measurement
Badger....................	Ladder....	33,623	24,128	....	....	57,751	Place measurement
Culebra...................	Suction....	252,844	....	....	....	252,844	Scow measurement
Total.....................	....	348,367	31,443	187,536	....	567,346	
Hydraulic excavation.....	....	*89,243	....	....	....	89,243	Place measurement
Grand Total..............	....	437,610	31,443	187,536	....	656,589	

*Excavated from lower lock site at Miraflores.

CHAMÉ SAND EXCAVATION.

Approximately 45,800 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY IMPROVEMENTS.

The reservoirs, water mains, sewers, and oil pipe lines were maintained, and work was continued on the municipal improvements in the city of Panama.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day	12:00
Average number of hours per day (actual working time)	9:01
	Cu. Yds.
Average amount crushed per hour of working day	231.08
Average amount crushed per working hour	307.79
Total output for the month	69,325.00

An additional force was put to work stripping, which will be continued throughout the dry season, as it is anticipated that during the dry season a sufficient amount of stone may be uncovered to last during the following rainy season. The 12-hour shift was continued during the month, but will probably be discontinued at the end of February, as it is expected that the storage trestles at Miraflores will be sufficiently filled by that time.

Relocation of Panama Railroad.

During the month, 251,793 cubic yards of material were excavated, making the total excavation at the close of the month 5,509,560 cubic yards, and 260,523 cubic yards of material were placed in embankment, making a total of 10,874,131 cubic yards used for this purpose.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by Shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			
Dec.	233,720	132,380	101,340	6.00	26	1,498
Jan.	206,334	102,104	104,230	8.24	25	1,002
1911:						
Jan.	251,175	162,390	88,785	6.00	25	1,676

During the month, 965 feet of temporary trestle were driven, and work on bridges and culverts was continued. The amount of permanent 70-pound track was increased during the month by 697 linear feet. At the end of the month, the total 70-pound and 90-pound permanent track amounted to 157,744 linear feet, and 18,997 linear feet, respectively. The total force averaged 1,875 men.

Quartermaster's Department.

Labor—On January 25, the total force employed by the Commission and the Panama Railroad Company was 37,271, an increase of 2,139 over the report for the last week in the previous month. The quarantine reports indicate that immigration has fallen off. Nearly 500 Spanish laborers secured releases from the district quartermaster at Cristobal during the past two months.

Material and Supplies—Effective January 1, 1911, the purchasing, handling and distribution of material for the Panama Railroad Company was transferred to the Commission, a charge of $6,000 per month being made by the Commission for this service. United States requisitions for the Panama railroad will be handled in the same manner as for a construction division of the Commission, and for the Departments of Sanitation and Civil Administration; stock material being issued from the Quartermaster's storehouses, and equipment and special material ordered on requisition through the main office of the Quartermaster's Department. The larger part of the stock now carried by the Panama railroad storehouse at Colon will be transferred to the Mount Hope depot, and the Panama railroad supplied therefrom, or by the local line storehouses of the Quartermaster's Department. Sufficient stock will be retained at the Panama railroad storehouse to meet the requirements of the Cristobal shops only.

During the past six months an investigation was made of the stock of repair parts at the various storehouses, the investigation covering air brake equipment, injectors and lubricators, steam shovel, locomotive, dredge, car and drill parts. Surpluses at the smaller storehouses have been turned in and stocks concentrated at Empire, Gorgona, and Mount Hope. This concentration will result in fewer orders in the future, and, on some classes of equipment, such as air brake parts, lubricators, injectors and their parts, the practical elimination of future orders, the present stock of this material on hand being probably sufficient until the completion of the work.

The total value of material received by the Commission during the month of January was less than during any previous month of the present fiscal year. The total weight of cargo, exclusive of lumber, cross-ties and piling, aggregated 44,549 tons. Yellow pine lumber was delivered in the amount of 1,977,175 feet, B. M., and Douglas fir timber in the amount of 2,051,780 feet, B. M. The value of all material received was $781,211.19.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels showed a net profit of $2,525.93. The operation of the Hotel Tivoli showed a net profit of $2,964.78, and there was a net profit on restaurants and penitentiary of $309.88. The net profit on subsistence operations was $5,800.59. During January, the sum of $1,728.14 was charged against the Hotel Tivoli for renewal and repairs to equipment.

Department of Civil Administration.

COURTS.

One civil case was disposed of in the Supreme Court of the Canal Zone; 11 civil and 42 criminal cases in the Circuit Courts, and 58 civil and 387 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS AND REVENUES.

Money order sales for January amounted to $413,964.14, and the fees to $1,828.06. Receipts from stamp and card sales, and newspaper postage aggregated $6,695.78. The total collection of revenues made by the division was $19,598.70, and the collection on account of court fines, costs, and fees, $2,067.83.

Twenty-five vessels entered at, and 22 vessels cleared from the port of Ancon; and 27 vessels entered at, and 25 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 384, of whom 355 were men and 29 women. Thirty-eight nationalities were represented.

The total number of arrests for the month is a decrease of 161, as compared with December. Eight convicts were committed to the penitentiary, and 13 were discharged, leaving 144 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,274.88, and the value of their work on the Canal Zone roads $2,083.90.

DIVISION OF FIRE PROTECTION.

Forty-four fires were reported in the Canal Zone during the month. This increase was partly due to the advent of the dry season, and the consequent number of small fires occurring along the railroad, traceable to sparks from locomotives. The estimated value of the property involved was: Commission, $194,869.11; Panama railroad, $17,272.35; private property, $1,000; total, $213,141.46. The damage to Commission property was $868.42; Panama railroad, $20; private property, $42; total, $930.42.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,186,922 gallons, and in Colon, 1,008,466 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The total enrollment in the white schools during the month was 1,048, and the average daily attendance 863.8, or 93 per cent of the enrollment; and in the colored schools the total enrollment was 1,209, and the average daily attendance, 626.6, or 80 per cent. Forty white and 24 colored teachers were employed in the division on January 31.

Department of Sanitation.

The total number of deaths from all causes among employes was 40. These were divided, as follows: From disease, 20, and from violence, 20, giving the general average per thousand of 5.07 and 5.07, respectively.

The annual average death rate per thousand among employes for the month of January in previous years since American occupation was, as follows:

1905	15.40
1906	40.93
1907	25.62
1908	12.72
1909	10.98

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and civil population, was 21.05.

The annual average death rate per thousand for the month of January among the same class of population for previous years was, as follows:

1905	46.50
1906	47.75
1907	35.12
1908	26.66
1909	22.86

Segregating the whites from the blacks, the annual average death rate per thousand from disease among the employes was: For whites, 1.89; blacks, 6.23, giving a general average of 5.07. For the same month during 1909, the annual average death rate per thousand from disease was: Whites, 9.93; blacks, 7.08, giving a general average of 7.89, and for the same month during 1910: Whites, 1.95; blacks, 8.91, giving a general average of 7.21.

Among employes during January, 1911, deaths from the principal diseases were, as follows: Typhoid fever, 1; tuberculosis, 8; chronic nephritis, 3; hæmoglobinuric fever, 2; and lobar pneumonia, 1, leaving a balance of five deaths from all other disesases, and 20 deaths from external violence.

No cases of yellow fever, smallpox, or plague were brought to, or originated on the Isthmus during the month.

Respectfully,
H. F. Hodges,
Acting Chairman and Chief Engineer.

OFFICIAL CIRCULARS.

Washington's Birthday.

Culebra, C. Z., February 15, 1911.

Circular No. 368:

Washington's Birthday, Wednesday, February 22, 1911, will be observed as a holiday in the Canal Zone, and, as far as practicable, all public business will be suspended on that day.

H. F. Hodges,
Acting Chairman.

Employes Warned from Drinking Water Drawn for Locomotives.

Culebra, C. Z., February 16, 1911.

Circular No. 369:

Attention is directed to the fact that the water drawn from the tanks supplying locomotives, especially the one located at Pedro Miguel, is not generally suitable for drinking, and the practice frequently observed of engine and train crews, and men on the dumps, drinking water drawn from locomotive tender tanks should be discontinued.

H. F. Hodges,
Acting Chairman and Chief Engineer.

Repairs to Vessels and Mechanical Equipment.

Culebra, C. Z., February 16, 1911.

Circular No. 343-a:

After March 1, 1911, repairs to all vessels and steamships on the Atlantic coast belonging to the Panama Railroad Company, individuals and companies, and repairs to all mechanical equipment, except hostling of and light running repairs to locmotives and light running repairs to cars, for departments and divisions of the Isthmian Canal Commission, the Panama Railroad Company, and for individuals and companies, in Colon, Cristobal and in the vicinity, will be done by the dry dock shops.

Mechanical work, except repairs to steam shovels, for the Panama railroad relocation will be done by the Mechanical Division.

Paragraph 6 of Circular No. 343 is hereby modified to read, as follows:

All repairs to air pumps, injectors, lubricators, air motors and hammers, angle cocks, triple valves, and air hose, that require machine work or the removal of the article from the equipment, and all except light running repairs to concrete mixers and pumps, and all spare parts and liners therefor, will be made at the Gorgona shops.

H. F. Hodges,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

No Reservations on U. F. Co. Steamers, March 16.

Culebra, C. Z., February 14, 1911.

Heads of Departments and Divisions:

Advice has been received from the agent of the United Fruit Company in Colon to the effect that the entire state room accommodations on steamships *Abangarez* and *Zacapa*, scheduled to sail from Colon to New Orleans and New York, respectively, on March 16, 1911, have been engaged by the American Society of Civil Engineers, in view of which no requests for the reduced rate will be issued from this office for these sailings.

C. A. McIlvaine,
Chief Clerk.

Misdirected Letters.

Ancon, C. Z., February 20, 1911.

The following insufficiently addressed letters originating in the United States and its possessions, have been received in the office of the Director of Posts and may be had upon the request of the addressee:

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

Gymnasium work began on Monday, February 13, and classes will meet every Monday and Wednesday evenings at 7.30 o'clock.

On March 3, the Culebra Glee Club will give a concert. Special trains will run from Culebra and Panama.

The Gorgona Dramatic Club will give an entertainment on March 14, and special trains will be run on that night also.

CULEBRA.

The following are the 200, or over, bowling scores for the week ending February 18: Hall, 223; Case, 214, 203; Huttlemeier, 213; Cushing, 208; Mengle, 203; Sickler, 200.

E. C. Howe will give an illustrated lecture on the "Everglades of Florida" on Friday evening, February 24.

The topic for the discussion club for Monday evening, February 27, will be "Social amusements" and "The city."

All players desiring to enter the chess tournament are requested to hand in their names to Mr. Stearns, or Mr. Dubois.

EMPIRE.

The members of the boys' department took a trip to the Mandingo River on Saturday, February 18. This trip was preliminary to the organization of the boy scouts at Empire on Monday, February 27.

The following events will constitute the group for which the physical director announces prizes, and the first series will be run on Thursday evening, February 23: Calisthenics, parallel bars, side horse, horizontal bar (high and low), potato race (8 and 17), standing broad jump, three standing broad jump, mat, rope skip, and relay.

The following high scores in bowling were made during the week: Peterson, 219, 221; Goolsby, 229, 215; Yount, 200.

GORGONA.

The latter part of November, 13 boys passed the "Tenderfoot" test for admittance to the Boy Scouts of America.

"Esmeralda" will be repeated on Friday evening, February 24.

CRISTOBAL.

The standing in the local duckpin bowling tournament is, as follows:

Team.	Played.	Won.	Lost.	Per cent.
Quartermaster's	9	7	2	777
Dry dock	9	4	5	444
Com.-Subsistence	9	4	5	444
Miscellaneous	9	3	6	333

The following matches were played last week:

Dry Dock.			
Claherty	82	78	99
Wheeler	87	82	88
Rosteck	83	70	80
Gibson	70	79	87
Adams	86	89	88

Total	444	417	442

The "Life problem" club, under the leadership of Judge Brown, will meet for its opening session on Wednesday, March 1, at 8 p. m., instead of Wednesday, February 22.

Mr. Selenkow, formerly of Gorgona, will give an exhibition "Punch and Judy show" at the Cristobal clubhouse on Saturday afternoon at 3.30 for the benefit of the children of Colon and Cristobal.

"Esmeralda," by the Gorgona Dramatic Company, will be produced at Cristobal on Friday, March 3.

GATUN.

In the duckpin handicap tournament each man will roll 30 frames with every other man, and the pinfall, according to difference in averages, will determine the winner. Gold medals are awarded for the highest pinfall, and for the largest number of games won; and silver medals for second number of games won and second pinfall. Two-thirds of the total number of games must be rolled to win a medal. There is no entry fee, but a charge of 10 cents will be made for each 30 frames to pay for the medals.

The Gorgona Dramatic Society will give a play at Gatun on February 27.

The discussion club will study "Problems of society and the home," on Sunday evening, February 26.

The Gatun Debating and Literary Society has elected the following officers: President, C. F. Young; vice-president, R. M. Roudabush; secretary, W. H. Brown; chairman of program committee, L. L. Gilkie. The club will meet every Wednesday night, and at the March meeting the question to be debated will be "The fortification of the Panama Canal." Mr. Brown will lead the discussion in favor, and Mr. Heiskell against. Mr. Young will give a talk on "The Philippines," and musical selections will be given. Any man in Gatun is eligible for membership in the society.

Gold medals have been presented to Mr. Barte and Mr. DeMoll for bowling, and to Mr. Durand for winning the three-cushion billiard match. Edward Atkins of the junior department rolled 258 in tenpins on February 16.

PORTO BELLO.

The following is the standing of the six leaders in the pool and checker tournaments:

Pool Tournament.

Name.	Played.	Won.	Lost.
Wallen	8	8	0
Tuttle	7	6	1
Millar	8	5	3
Beardsley	7	4	3
Hill	6	3	3
Carpenter	3	2	1

Checker Tournament.

Name.	Played.	Won.	Lost.
MacIntosh	10	10	0
Arden	8	7	1
Taylor, T	8	6	2
McDevitt	10	5	5
Tuttle	4	3	1
Taylor, J. B	4	2	2

BASEBALL.

A meeting of the executive committee of the Panama Canal Baseball League was held at Colon on Tuesday, February 21, and as a result, it will recommend to a general meeting of the league called for Wednesday, February 22, the termination of the present league season; the awarding of the pennant to the Commissary-Subsistence team, and the adoption of a new schedule to begin on Sunday, February 26, and to continue until Sunday, May 7, which provides for 12 games, inclusive of one holiday date, that of Good Friday. Inasmuch as the Gorgona and Marine teams have withdrawn from the league, it is probable that only four clubs will be represented, viz., Commissary-Subsistence, Ancon, Empire, and Atlantics.

The protest entered by the Commissary-Subsistence team in the game played with Empire on the Colon grounds on February 12, was sustained and the game has been thrown out. The game to have been played between Gorgona and the Marines at Empire on February 12, and the game scheduled between Empire and the Marines at Empire on February 19, are to treated as postponed games. The game scheduled between the Gorgona team and the Atlantics at Colon park on February 19, was forfeited to the Atlantics on account of the nonappearance of the Gorgona players.

RESULTS OF GAMES, FEBRUARY 19.

At Ancon—Ancon, 1; Commissary-Subsistence, 6.
At Empire—No game—postponed.
At Colon—Forfeited by Gorgona to Atlantics.

STANDING OF CLUBS.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending February 18, 1911:

Westlands, February 13, from Gulfport, with 53,250 lineal feet piling, untreated, 21,695 lineal feet, piling, creosoted, 14 barrels washers, 24 pieces washers for Atlantic Division; 12 barrels washers for Pacific Division; 125,773 feet, B. M. yellow pine lumber for stock.

Sibiria, February 13, from New York, with 200 barrels carbolic acid for stock.

Colon, February 16, from New York, with 22 cases crusher machinery, 6 pieces crusher machinery, 5 reels wire rope for Atlantic Division; 11 packages concrete machinery, 14 pieces rough castings, 28 cases rough castings for Central Division; 20 barrels fire brick, 6 buoys for Pacific Division; 1,156 pieces castings, 20 bales rubber hose for Mechanical Division; 15 crates ice chests for Sanitary Department; 5 cases butchers' aprons, 20 mounted grindstones, 5 barrels lye, 288 cases caustic soda, 85 kegs iron pipe-fittings, 312 kegs bolts, 10 cases drill machinery for stock; and a miscellaneous cargo, the whole consisting of 2,043 packages, weighing 282 tons.

Abangarez, February 16, from New Orleans, with 7 pieces cable chain for Central Division; 113 pieces castings, 267 crates fire brick for Mechanical Division; 2,411 bales prairie hay, 125 bundles cant hook handles, 197 barrels fire clay for stock.

Almirante, February 16, from New York, with 150 cases paint, 360 pails grease, 120 cases lubricating oil, 140 drums lubricating oil for stock.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending March 1, 1911, (75th meridian time):

DATE.	High.	Low.	High.	Low.	High.
	A. M.	A. M.	A. M.	P. M.	P. M.
February 23	......	5.15	11.25	5.50	11.40
			P. M.		
February 24	......	6.25	12.45	7.00	......
February 25	12.55	7.25	1.45	7.55	......
February 26	1.55	8,15	2.30	8.40	......
February 27	2.40	9.00	3.10	9.20	......
February 28	3.23	9.40	3.45	10.00	......
March 1	4.00	10.18	4.22	10.40	......

The following vessels arrived at and departed from the port of Balboa during the week ending February 18, 1911:

Arrivals—February 12, *Newport*, from San Francisco; February 13, *City of Para*, from San Francisco; February 14, *Ucayali*, from Callao; *Mackinaw*, from San Francisco; February 15, *Huasco*, from Callao; February 17, *Quito*, from Buenaventura and Tumaco.

Departures—February 11, *Pecton*, to Port Harford; February 12, *Manavi*, to Buenaventura; February 13, *Peru*, to Callao; February 14, *Melville Dollar*, to San Francisco; February 16, *Ecuador*, to Guayaquil

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line, the Panama Railroad Company's dates being subject to change:

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Cargo Cranes for Balboa Docks.

After a canvass of the bids in the office of the Assistant Chief Engineer, recommendation has been made that the contract for supplying and erecting eight cargo handling cranes on the steel dock at Balboa be awarded to the Cleveland Crane and Engineering Company of Wickliffe, Ohio, for approximately $91,500, the exact price to depend upon minor changes to be made by direction of the Commission. The first crane must be delivered within four months of the award of the contract, and all of them within eight months. The dock is being strengthened, so that it can support a concrete floor, and the eight new cranes which will take the place of ten 1½-ton cranes now installed there.

The new cranes will have a capacity of four tons each, and will be capable of taking general merchandise or lumber from the holds of vessels tied up at the dock and delivering it under cover on the dock. The boom must extend over the ship a distance of 40 feet from the center of the crane tower, and the crane must be capable of lifting a load of four tons a maximum distance of 90 feet at a speed of 300 feet per minute, carrying it along the boom at the rate of 600 feet per minute, and depositing it on the wharf, the whole operation to be completed in one minute. In addition to the cargo handling movement, the cranes will have a movement along the front of the dock at a speed of 100 feet per minute.

Balboa Notes.

The ladder dredge *Marmot*, which has been engaged in excavating the approach channel to the new Panama railroad freight dock at Balboa, has finished all the work it can do there economically for the present, and has been returned to the Canal prism. The suction dredge *Culebra* is being used to clean up the channel.

An old hulk, the *Panama*, a passenger steamer owned by the Pacific Steam Navigation Company, which has been lying at the Flamenco Island anchorage for the past 30 years, or more, used as a machine shop, laundry, and for other purposes, was recently towed to a position near the Union Oil Company's anchorage near Balboa. The change was made partly on account of the shoaling of the water at the former anchorage, and partly for better convenience.

Observation Platform at Culebra.

The erection of an observation platform for tourists, and others, who visit Culebra for the purpose of viewing the Cut, has been authorized. It will occupy a position on the west bank of the Cut almost directly back of the new Church of the Holy Redeemer, about 100 feet distant from the old main line track of the Panama Railroad, and will consist of a plank floor raised about 10 feet from the ground, surrounded by a railing. It will be 8 by 25 feet in size.

Medical Inspection of Schools.

Dr. A. J. Orenstein has been appointed medical inspector for the Canal Zone schools for a period of three months, during which he will devote all his time to a thorough examination of the physical condition of the pupils in the schools for white children.

Following an epidemic of *follicular conjunctivitis* (an inflammation of the outer membrane of the eye) in one of the schools in December, 1908, the district physicians were directed to make a monthly inspection of all the pupils, and good results were immediately noticeable. The work was incidental, however, to the regular work of the district physicians, no apparatus was available for eye and ear tests, and when the district work was heavy, the schools were neglected. Lack of uniformity in results characterized the inspection work, and the children who were backward in their studies, because of physical defects not entirely patent, were given little relief. In order to put the inspection on a thorough and systematic basis, it was placed under one physician on February 1. He had previously made a study of the methods used in the schools of Philadelphia, where a systematic inspection has been in effect since 1904.

New Resolution Enforcing Sanitary Regulations.

Increased powers have been given the health authorities in the city of Panama by resolution No. 19, approved by Governor J. A. Arango on February 3, 1911, which relates to the provisions of decree No. 40 of November 14, 1907, placing in effect the Executive Order of the Canal Zone Government amending Article 5 of the rules and regulations for the installation of water and sewers in the cities of Panama and Colon. The decree provided that in case property owners failed, or refused to make the proper installations upon written order of the Superintendent of Public Works within 30 days after receipt of notice, he might cause the work to be done, in which event, the expense would become a lien on the property, to be collected in the same manner as water rents.

The preamble to the resolution of February 3 sets forth that the provisions of the above decree are not being complied with as their nature requires, and, on this account, some of the districts of the city of Panama are in a condition detrimental to the public health. The resolution provides:

That on and after February 3 no building erected in a place accessible to a sewer and water main shall be occupied until proper connections have been made, and if such connections are not made within 60 days from February 3, the building shall be closed and remain vacant until the proper connections are made.

Freight by Panama Route.

Notice has been served on the Pacific Mail Steamship Company and the California-Atlantic Steamship Company (Bates & Chesebrough) that their traffic agreement with the Panama Railroad Company will be terminated 90 days after January 19. This step is taken, because experience under the new agreement shows that the Panama Railroad Company cannot handle freight, except at a loss, on the basis of 30 per cent of the rate between San Francisco and New York. No agreement, has been reached as to the division to be made after the expiration of the present agreement, but it has been suggested that 40 per cent of the rate would be acceptable to the Panama railroad.

Owing to the activity of the transcontinental railways, and the Hawaiian-American Steamship Company, the freight traffic by way of the Panama route reached such a low stage prior to 1909 that merchants on the Pacific coast demanded a lower rate on eastbound freight. In January, 1909, an agreement was made by which the eastbound rate was fixed at $8 per net ton, and the westbound at $9. The working agreement between the Pacific Mail Company and the Panama Railroad Company called for a division of 50 per cent of the rate to each company, the Pacific Mail Company to pay 80 cents per ton wharfage at Balboa, and 10 cents craneage, when the cranes were used. The Pacific Mail Company served notice that it could not continue under this contract, and on November 15, 1909, a new contract was entered into which fixed a basic rate of $8 per net ton on eastbound, and $9 on westbound cargo; gave the Pacific carrier 70 per cent of the rate, and waived all charges for craneage and wharfage at Balboa, and furnished coal at cost. On October 1, 1910, a similar agreement with the California-Atlantic Steamship Company became effective. The eastbound freight business between Pacific coast ports and Atlantic coast ports of the United States, in the four months ending October 31, increased 5,761 tons over the same period in 1909, when the amount was

NOTES OF PROGRESS.

(Continued.)

30,046 tons, while the receipts from this traffic decreased $7,629.27.

With the beginning of the service by the California-Atlantic Company, the Pacific Mail Company improved its service, and the ships of both lines came into Balboa with all the freight they could carry. The California-Atlantic Company began with three ships on the Pacific side and one on the Atlantic side, and has increased that number to eight ships on the Pacific side and three on the Atlantic. Both companies were notified at the beginning of the agreement that the Panama railroad could not handle more than 30,000 tons a month eastbound cargo on account of the limited handling facilities at Balboa and Cristobal-Colon. The coastwise freight eastbound, handled in the quarter ending January 31, 1909, and 1910, was:

Month.	1909	1910
	Tons.	*Tons.*
November	3,950	12,378
December	2,390	11,015
	1910	1911
January	1,758	10,609
Total	8,098	34,002

Both the handling facilities on the docks, and the freight carrying capacity of the railroad have been taxed by this increased business. The indications all point to a continued increase if the present agreement were to be maintained, because a shipment recently made of oranges and lemons from California to New York as ordinary freight, without cold storage, proved successful, the fruit arriving at its destination in good condition 23 days after leaving California. If fruit can be shipped in this way the possibilities of the trade are unlimited. For such service, the transcontinental railways charge from $28 to $30 per ton, whereas the basic rate of $8 per ton applies by the Panama route.

On November 23, 1910, the Hawaiian-American Steamship Company, which uses the Tehuantepec route, has 17 cargo steamers, with a total tonnage capacity of 170,000 in the Pacific coast, Hawaiian, and Atlantic coast trade, and is the largest line of steamers under the American flag, protested to the President that the rate made by the Panama railroad for Pacific carriers, via the Panama route, was not sufficient to pay actual cost of handling the cargo, and amounted to a discrimination against the Hawaiian-American Company.

Gatun Dam Spillway.

Concrete was placed in the spillway of Gatun Dam during the week ending February 25, as follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
February 20	316	17:00	2
February 21	336	14:00	2
February 22	Holiday		
February 23	368	17:00	2
February 24	358	16:00	2
February 25	316	17:00	2
Total	1,694	81:30	2

A committee, consisting of Mr. S. B. Williamson, Lieut.-Col. John L. Phillips, and Mr. J. R. Downes, has been appointed to consider the question of supplementing the present water supply from Rio Grande and Cocoli Lake.

Extradition to Canal Zone.

At the request of the Secretary of War, the Attorney General has rendered an opinion on the applicability of the United States extradition laws to the Canal Zone. The Attorney General is of the opinion, although holding that the matter is one for judicial determination, that none of the laws now in effect in the United States applies to the rendition of fugitives from justice from the Canal Zone. It is recommended that sections 1014 and 5278 of the Revised Statutes be extended by Congressional action to the Canal Zone, as was done in the case of the Philippines.

The sailing date of the *Ancon* from pier No. 11, Cristobal, has been set for Monday, March 6, 1911, at 3 p. m.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 55 per cent of the concrete for the system of three twin locks at Gatun has been laid, the exact amount in place at the close of work on February 25, being 1,141,830 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending February 25, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily. and the auxiliary plant 9 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*	*Cu. Yds.*

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The annual meeting of the Canal Zone Federation of Women's Clubs will be held in Gatun on Friday, April 21. It will mark the close of the fourth year of club work among the women in the Canal Zone.

A meeting of the art and literature department of the Cristobal Woman's Club was held on Thursday, February 23, the program consisting of papers on the chateaus of France. At the March meeting of the department there will be papers on the Napoleonic period, and the year's study on French art and history will conclude on April 30, with papers on the French Republic and its presidents.

The program of the Gatun Woman's Club on Friday, February 17, was in charge of the literature department. Papers on Washington and Lincoln were read by the members. The monthly business meeting was held on Friday, February 24.

The meetings of the Gorgona Woman's Club are held at the homes of the members. Papers on various topics are discussed. Beginning March 22, the club will hold a three days' exhibit of the Federation pictures, and at the meeting on March 23, a paper on art will be read.

At its meeting on March 8, the Paraiso Woman's Club will have as guest of honor, the president of the Canal Zone Federation. Mrs. C. G. Hennigh has been appointed chairman of the current events committee. A dance will be given toward the end of March.

The Gatun Sunshine Society held a tea and sale at the clubhouse the first week in February for the benefit of the Blind Babies' Home in New York, the institution in which the society is interested.

Church Notes.

One hundred and ten dollars was made at the entertainment given at Ancon hall by the Ladies' Aid Society of the Methodist Episcopal Church on February 21. The society will maintain two scholarships in the Methodist College in Panama, and will complete the interior decorations of the church.

At the election of officers for the Altar Society of St. Ferdinand's Church, Empire, held on February 21, Mrs. L. Ergenzinger was chosen president, Mrs. H. I. McGillicuddy vice-president, and Mrs. J. H. Westberg secretary.

During Lent, the meetings of the Woman's Guild of St. Luke's Church, Ancon, will be held in the Tivoli Hotel every Tuesday morning at 9.30 o'clock. Business meetings will be held on the first and third Tuesdays, and the alternate meetings will be for sewing. The chaplain will give an informal course of instruction on the doctrines, forms, and ceremonies of the church. No afternoon meetings will be held during the six weeks between March 1 and April 16.

Red Cross Ball.

The first annual ball of the Canal Zone Branch of the American National Red Cross Society was held at the Hotel Tivoli on February 18. Tickets were sold at $1.50 each to nonmembers, entitling the holders to admission to the ball and membership until November 1, 1911. To members, tickets were sold for 50 cents each. Seven hundred and sixty-eight new members were added to the local organization, making a total membership of about 1,000; and about $1,116 have been added to the treasury, of which sum about $384 will be sent to the treasurer of the national organization at Washington, D. C.

Through the courtesy of the Isthmian Canal Commission, the Hotel Tivoli, and the services of the Commission Band were made available; the Marine Band played by courtesy of the command at Camp Elliott; and special trains were furnished by the Panama Railroad Company.

The officers of the local organization wish to thank all committees and individuals who assisted in making the ball a success.

PERSONAL.

Colonel Geo. W. Goethals sailed from New Orleans on Saturday, and is due to arrive at Colon on March 2. During his visit to the United States, in addition to speaking before both houses of Congress, Justices of the Supreme Court, members of the Cabinet, and invited guests in the hall of the House of Representatives at Washington, Colonel Goethals gave illustrated addresses, or lectures. before the National Geographic Society of Washington; the Geographic Society of Philadelphia, at whose annual dinner he was the guest of honor; the University of Pennsylvania; the Engineers' Club of Philadelphia; the University of Virginia; the Ohio State University at Columbus, Ohio, and at New Orleans on the evening before he sailed. He was compelled, through lack of time, to decline invitations to deliver addresses before the Military Academy at West Point, the City Club of Boston, and the Western Reserve University at Cleveland, Ohio. He was also invited to visit San Francisco and deliver an address there.

Associate Justice Wesley M. Owen, accompanied by his family, sailed for the States on the *Advance* on February 28. On the expiration of his leave of absence his resignation as a justice of the Canal Zone Supreme Court will become effective. His residence will be at Le Roy, Ill.

Mr. T. B. Monniche, accompanied by Mrs. Monniche, sailed for the States on February 28, on the *Advance*, to be present in Washington to give information to bidders on the materials for the emergency dams.

Visit of Congressmen.

A large party of Congressmen, with their friends, will visit the Canal work immediately after the adjournment of Congress on March 3. They will spend about a week on the Isthmus, returning to New York on the *Colon*, which sails from Cristobal on March 19.

Case of Matthew H. Lough.

The Supreme Court handed down a decision on February 21, confirming the decision of the District Court, which found Matthew H. Lough guilty of involuntary manslaughter, and sentenced him to serve one year in Culebra penitentiary. On the night of August 15, 1910, Lough was engineer of locomotive No. 657, hauling a special freight train on the Panama railroad. At Bohio, his train ran into the rear end of another special freight, and the conductor, Elias C. Tinsley, was killed. Lough was charged with involuntary manslaughter, and was tried at Cristobal on September 15 and 16, before Justice Lorin C. Collins, who found that he had been criminally negligent in not heeding a double torpedo signal to slow down. Lough began serving his sentence at the penitentiary immediately after the Supreme Court made its decision. A number of employes, among them fellow transportation men, have signed a petition which will be presented to the Chairman on his return from the States, asking that Lough be pardoned.

Spanish War Veterans.

A camp of Spanish War Veterans is to be instituted at Gatun, in the lodge hall, on Sunday, March 5, at 2 p. m.

A large delegation of veterans have signified their intention of joining this movement, and those who have not done so, are requested to be present at that time, or communicate with CHARLES C. CAMERON.

Culebra, C. Z. February 24, 1911.

The first meeting of the United Spanish-American War Veterans was held in the Gatun lodge hall last Sunday. A temporary camp was established and temporary officers elected to arrange for the coming of the Commander-in-Chief, Col. Jacoby, who will install a permanent camp. The next meeting will be held in Gatun lodge hall on Sunday, March 5. All Spanish-American war veterans are invited to be present, bringing their credentials.

A. O. LUDWIG,
Temporary Adjutant.

Gatun, C. Z. February 26, 1911.

Obituary.

Mrs. Lavinia Strobridge, wife of F. C. Strobridge, an employe of the Panama Railroad Company at Colon, died at Colon Hospital on February 25. She was 45 years of age, was born in Shelbyville, Ky., and had been on the Isthmus three and one-half years.

EXECUTIVE ORDER

To Provide a Method of Executing and Recording Deeds, and to Repeal the Executive Order Dated March 12, 1907, Effective April 15, 1907, Relating to the Same Subject.

Article 1. No conveyance of immovable property or of an interest therein, or a mortgage thereon, shall be effective, except by an instrument in writing, executed and delivered between parties competent to contract, and sufficiently describing the property conveyed, or mortgaged, and signed by the person executing the same, or if he is not able to write he shall affix his mark thereto, —and duly acknowledge in accordance with the provisions of this Order, before some officer authorized to take acknowledgments, provided, however, that a copy of any instrument in writing, affecting immovable property in the Canal Zone, duly executed before a Notary Public in the Republic of Colombia prior to November 3, 1903, or in the Republic of Panama after said date, and authenticated by the Notary Public charged with the custody of the protocol containing the original deed from which the copy was taken, shall be valid and effective as a conveyance of the lands or interests in the lands therein described.

Article 2. The acknowledgments provided for in this Order shall be made in the manner and form provided for the husband's acknowledgment in the Executive Order of August 20, 1910, entitled "Executive Order.—Conveyance of Real Estate by Married Women."

Article 3. If for any reason the grantor in the instrument cannot appear before the officer authorized to take acknowledgments, the execution of such instrument must be attested by not less than two subscribing witnesses, and may be proven by the oath of one of the subscribing witnesses to such instrument, taken before any of the officers authorized to take acknowledgments, to the effect that he subscribed such instrument as a witness at the request of the grantor, who signed the same in his presence, or who acknowledged to him that he had signed the same, for the purposes and consideration therein expressed.

The certificate of acknowledgment shall be sufficient if it is substantially in the following form:

The.....................Judicial Circuit
Canal Zone.

Before me...
.................., in and for.........................,
in the Canal Zone, on this day personally appeared
....
known to me (or proven to me on the oath of.........
.................., a credible witness,) to be the person whose name is subscribed as a witness to the foregoing instrument, and after being duly sworn by me, on his oath deposes that he subscribed the same as such witness at the request of..............................,
the grantor named in the foregoing instrument, and that be saw the grantor execute the same (or that the grantor acknowledged to him that he had executed the same, as the case may be,) for the purposes and consideration therein expressed.

Given under my hand and seal of office this........
.... day of....................A. D. ......
....
....

Article 4. The officers authorized to take acknowledgments under this Order shall issue proper certificates of all acknowledgments taken or proven before them.

Article 5. The Clerk of the Circuit Court of the First Judicial Circuit of the Canal Zone shall be, *ex officio*, Registrar of Property of the Canal Zone, and it shall be his duty to record all instruments authorized to be recorded by this Order, or any other law or order of the Canal Zone, and presented to him for record, in a well bound book or books kept by him for that purpose, and he shall attach a certificate to each deed so recorded by him, which certificate shall state the date and hour of the filing of the instrument for record, as well as the book and page or pages of the record upon which the same is recorded; and shall be signed by him under his official title, and shall be impressed with his seal. The seal of the Registrar shall contain the words "Registrar of Property of the Canal Zone."

He shall keep an index, direct and cross, of the instruments recorded by him, which shall show the names of the grantor and grantee of each instrument recorded by him, and the date of the filing of the same, and the book and page or pages in which it is recorded.

Article 6. It shall be the duty of the Registrar of Property to keep a file docket wherein he shall note the filing of all instruments when presented to him for record, which docket shall contain the names of the parties to the instrument, the date of the same, and the date and hour of its filing in the Registrar's office; and all instruments shall be deemed to have been recorded from the time of such filing.

Article 7. No instrument in writing shall be admitted to record in the Registrar's office, except such as are acknowledged or authenticated in the manner provided for in this Order.

Article 8. The instruments described in Article 1 of this Order, and executed in conformity therewith, as well as the instruments described in the Executive Order of August 20, 1910, entitled "Executive Order.—Conveyance of Real Estate by Married Women," and executed in accordance therewith, shall be admitted to record in the Registrar's office.

Article 9. A copy of any notarial deed relating to property in the Canal Zone, taken from the records in the office of the Registrar of Property of Panama, or Colon, Republic of Panama, and recorded therein prior to February 26, 1904, and duly certified by the Registrar issuing the same, shall be recorded in the office of the Registrar of Property of the Canal Zone, in like manner as provided for deeds executed in the Canal Zone.

Article 10. In all cases in which Spanish documents are admitted to registration under the provisions of this Order, such documents shall be accompanied by English translations which shall be recorded with them.

Article 11. A copy of any final judgment or decree of a court of competent jurisdiction of the Canal Zone, vesting the title to immovable property, or any interest therein, in one or more of the parties to said judgment or decree, and duly certified by the clerk of the court in which the judgment or decree was rendered, as being a true copy of such judgment or decree as the same appears in the records of the court, shall be admitted to record in the Registrar's office in like manner as provided herein for deeds executed in the Canal Zone.

Article 12. A copy of a judgment or decree of a court of competent jurisdiction of the Republic of Panama, affecting immovable property situated in the Canal Zone, rendered prior to the 26th day of February, 1904, and duly certified by the clerk, or secretary, of the court rendering such judgment or decree, and by the judge thereof, when the signature of the said judge is authenticated by the Secretary of Foreign Relations of Panama, shall in like manner be admitted in the Registrar's office under the provisions of this Order.

Article 13. No deed or other instrument in writing affecting immovable property shall be valid against subsequent creditors of, or *bona fide* purchasers for value, without notice, from the owner of such property, unless the same shall have been recorded with the Registrar of Property of the Canal Zone.

Article 14. The Registrars' offices at Empire and Cristobal shall be discontinued on and after the date on which this Order goes into effect, and the books and records of immovable property in those offices shall be transferred to the Registrar's office hereby created, and shall become a part of the records of his office; and after this Order takes effect all deeds, or other instruments, required to be recorded by the provisions of this Order, or any other law or order of the Canal Zone, shall be recorded in the office of the Registrar herein provided for.

Article 15. The Registrar of Property shall be entitled to charge for his services rendered as Registrar, the following fees, United States currency:

For each instrument recorded, including his certificate thereto, ten cents per folio of one hundred words, but no charge shall be less than 50 cents for any one instrument.

For each certified copy issued by him of an instrument recorded in his office, including certificate thereto, 10 cents per folio of 100 words, but no charge shall be less than 50 cents for each copy thereof.

For searching his records and giving a certificate thereto of any fact or facts contained in his records, 50 cents for each certificate, provided that where more than one record book is searched, he may charge 25 cents for each additional book.

The fees so collected by the Registrar of Property shall be turned in by him to the Canal Zone Treasury.

Article 16. Any instrument in writing mentioned in Article 1 of this Order and duly acknowledged or authenticated in the manner therein described, and any deed or other instrument executed and acknowledged in accordance with the provisions of said Order of August 20, 1910, relating to conveyances by married women, may be used in evidence on the trial of any action or special proceedings without the necessity of proof of its execution unless such instrument is attacked for forgery by the affidavit of the adverse parties, provided, however, that such instrument shall not be admissible in evidence without proof of its execution unless the same or a copy thereof be filed with the clerk of the court wherein such action or special proceeding is pending, and due notice is given to the opposite party, or his attorney, at least three days before the trial of such action or special proceeding.

Article 17. A copy of any instrument duly recorded under the provisions of this Order and certified to by the Registrar in charge of the record, may be used in evidence in any judicial proceedings in like manner and effect as might be done with the original if produced, provided such certified copy is filed with the clerk of the court wherein the action or proceeding is pending, and due notice of the filing of such copy is given to the adverse party, or his attorney, at least three days before the trial or proceedings in which the said copy is to be produced in evidence.

Article 18. All orders or decrees and parts thereof in conflict with this Order are hereby repealed, and the Executive Order of March 12, 1907, effective April 15, 1907, relating to the execution and recording of deeds is also hereby repealed, provided, however, that this order shall not affect a deed or other instrument relating to immovable property executed pursuant to the said Order of March 12, 1907, prior to the date on which this Order shall take effect, and provided further that this Order shall not be construed to modify in any manner the Executive Order of August 20, 1910, relating to the conveyance of real estate by married women.

Article 19. This Order shall take effect 60 days from its date. Wm. H. Taft.

The White House,
February 2, 1911.
[No. 1295.]

PANAMA RAILROAD EARNINGS.

Traffic Operations of Both Railroad and Steamship Lines for Fiscal Year 1910.

The total earnings of the Panama Railroad Company, and the Panama Railroad Steamship Company, for the fiscal year ending June 30, 1910, according to the sixty-first annual report of the board of directors, recently issued, amounted to $6,100,788.83, as compared with $5,715,517.16 for the fiscal year 1909, an increase of $385,271.67. The operating expenses aggregated $4,358,426.92, as compared with $3,699,678.60 in 1909, an increase of $658,748.32, making a decrease in the earnings over operating expenses of $273,476.65. The net income for the twelvemonth was $1,254,777.80, as compared with $1,522,780.45 for the preceding period.

The total railroad earnings in 1910 were $4,224,062.28, as compared with $4,267,161.85 in 1909, a decrease of $43,099.57, or 1.01 per cent. The earnings of the railroad for the transportation of all kinds of traffic show the following decreases: Through commercial freight, $63,290.70, or 4.93 per cent; local Isthmian Canal Commission freight, $173,914.64, or 19.16 per cent, a total decrease of $237,205.34, or 10.82 per cent. The passenger earnings, including mails, baggage, treasure and express, increased $69,975.76, or 7.86 per cent; local commercial freight, $38,619.29, or 10.19 per cent; and miscellaneous earnings $85,510.72, or 10.61 per cent, a total increase of $194,105.77, or 9.35 per cent, making a net decrease in traffic earnings of $43,099.57, or 1.01 per cent, as compared with a net decrease for the previous year of $274,275.94, or 6.04 per cent.

The freight traffic from New York and gulf ports to South Pacific ports showed an increase of 795 tons; to San Francisco, 8,299 tons, and to Panama 11,893 tons; while to Central America and Mexico, there was a decrease of 2,056 tons. From Europe, freight shipments to South Pacific ports decreased 3,033 tons; to Central America and Mexico, 8,966 tons, and to San Francisco, 2,548 tons; while to Panama, there was an increase of 6,143 tons. To Europe, shipments from South Pacific ports decreased 5,115 tons; from Central America and Mexico, 20,787 tons; from San Francisco, 50 tons, and from Panama, seven tons. To New York and gulf ports, shipments from Central America and Mexico decreased 6,065 tons, but increased 4,444 tons from South Pacific ports; 24,754 tons from San Francisco, and 294 tons from Panama.

The freight carried over the railroad during the fiscal year 1910, including that of the railroad company, aggregated 1,272,217 tons of 2,000 pounds, or 40 cubic feet each, as compared with 1,160,304 tons during the preceding year, an increase of 9.65 per cent. The gross earnings per ton in 1910 averaged $1.92, as against $2.30 in 1909, a decrease of 16.52 per cent. The total revenue freight traffic over the road in 1910, including both merchandise and coal, was 1,238,381 tons, an increase of 118,200 tons, or 10.55 per cent, over 1909. The revenue therefrom was $2,372,571.94, a decrease from 1909, of $198,586.05, or 7.72 per cent. In addition to the above, 33,836 tons of company freight, 3,171 tons of mail and excess baggage, and 2,568 tons of express were carried, the amount of mail and baggage transported showing an increase of 271 tons, over 1909. The southbound freight tonnage was 77.96 per cent of the total, as compared with 72.29 per cent in 1909. The through freight traffic was 30.60 per cent of the total, as against 32.86 per cent the previous year. Coal, including that of the company, comprised 57.37 per cent of the southbound traffic, an increase of 4.74 per cent, over 1909.

A total of 627,397 first class passengers was carried in 1910, as compared with 555,908 in 1909, an increase of 12.86 per cent, and 479,586 in 1908. The number of second class passengers transported was 1,600,172, as compared with 1,328,390 in 1909, a gain of 20.46 per cent, and 906,059 in 1908. The total increase in passengers carried amounted to 343,271, or 18.22 per cent. The passenger earnings increased from $669,933.54 in 1909, to $739,757.58 in 1910, or 10.42 per cent. The revenue from through passengers showed an increase of $6,494.72, or 26.21 per cent, and the number of such passengers, an increase of 884, or 14.43 per cent. Local passengers showed an increase of $63,329.32, or 9.82 per cent, in revenue, and 342,387, or 18.23 per cent, in the number carried.

The total earnings of the company's steamship line were $1,876,726.55 in 1910, an increase of $428,371.24, or 29.58 per cent, over 1909. The operating expenses increased from $1,335,848.13 in 1909, to $1,708,774.30 in 1910, or 27.92 per cent. Freight traffic increased 205,934 tons, or 93.77 per cent, and the revenue therefrom increased $410,296.45, or 48.36 per cent. The number of passengers carried increased 2,091, or 14.40 per cent, and there was an increase in earnings from this source of $5,270.49, or 1.45 per cent. The total increase from carrying the mails amounted to $7,400.70. Total mail revenue 1910—$218,098.04. Of the total tonnage transported, 96,279 tons were carried by the company's steamers, and 329,280 tons by chartered vessels.

Empire Athletic Meet.

An athletic meet was held at Empire on February 22, under the direction of the Y. M. C. A. in which 72 men and 21 boys were entered. The results in the sixteen events were, as follows:

100-yard dash—1st, W. J. Earle, Gorgona; 2d, J. K. Munroe, Ancon; 3d, G. B. Fitts, Gorgona. Time 11 2-5 seconds. In the second heat of this event, G. B. Fitts of Gorgona, made the dash in 10 2-5 seconds, lowering the Isthmian record 3-5 of a second.

Shot put—1st, C. O. Herring, Gorgona, distance 47 feet 3 inches; 2d, G. Shaffer, Empire, distance, 40 feet 3 inches; 3d, H. D. Myers, Gorgona, distance, 37 feet 11 inches. Herring established a new record for the Isthmus.

Running high jump—R. T. Clark, U. S. Marine Corps, and H. D. Myers, Gorgona, tied for first place at 5 feet 2 inches. On the jump-off R. T. Clark won first medal, and H. D. Meyers second; the points were divided equally between the two teams; 3rd, R. Koperski, Empire, distance 4 feet 10 inches.

220-yard dash—1st, G. B. Fitts, Gorgona; 2d, H. K. Allard, Ancon; 3d, W. L. Kenealy, Ancon. Time 26 2-5 seconds.

Hammer throw—1st, J. E. Carpenter, Porto Bello, distance 131 feet 1 inch; 2d, Geo. Shaffer, Empire, distance, 130 feet 1½ inches; 3d, C. O. Herring, Gorgona, distance, 95 feet 10 inches.

120-yard low hurdles—1st, H. G. Hallock, Gatun; 2d, H. D. Myers, Gorgona; 3d. W. J. Earle, Gorgona. Time, 16 2-5 seconds, lowering the previous Isthmian record 1 3-5 seconds.

Running broad jump—1st, C. O. Herring, Gorgona, distance 19 feet 7 inches; 2d, H. LaCroix, Cristobal, distance, 18 feet 3 inches; 3d, R. Koperski, Empire, distance, 17 feet 7½ inches.

100-yard dash (boys)—1st, H. Panai, Cristobal; 2d, Thomas Guderian, Cristobal; 3d, Guy Morrison, Cristobal. Time, 12 4-5 seconds.

440-yard dash—1st, H. K. Allard, Ancon; 2d, D. T. Ellsworth, Gorgona; 3d, H. W. Ottman, Gatun. Time, 1 minute 2 seconds.

Pole vault—1st, J. G. DeCora, Cristobal, distance, 9 feet 6 inches; 2d, J. T. Luttrell, Empire, distance, 9 feet 3 inches; 3d, H. D. Myers, Gorgona, distance, 9 feet. DeCora beat the Isthmian record by 2 inches.

Relay race (boys) ⅔ of a mile, 6-lap track—1st, Cristobal (Morrison, Gibson, Guderian, Panai); 2d, Gatun; 3d, Empire; 4th, Culebra. Time, 2 minutes 58 seconds.

One mile run—1st, Carl Sherberger, Ancon; 2d, A. A. Simka, Gorgona; 3d, C. J. Mengel. Time, 5 minutes 19 2-5 seconds.

Two mile walk—1st, R. K. Knox, Gorgona; 2d, G. K. Weston, Cristobal; 3d, I. N. DeLong, Cristobal. Time, 21 minutes 48 4-5 seconds.

Relay race (men) ⅔ of a mile, 6-lap track—1st, Cristobal (Starbuck, LaCroix, Koperski, DeCora); 2d, Ancon; 3d, Gorgona; 4th, Camp Elliott; 5th, Gatun. Time, 2 minutes 35 3-5 seconds.

The teams represented scored the following number of points: Gorgona Y. M. C. A., 43; Ancon Athletic Club, 17; Cristobal Y. M. C. A., 17; Empire Y. M. C. A., 11; Gatun Y. M. C. A., 6; Porto Bello Y. M. C. A., 5; U. S. Marines, Camp Elliott, 4; Culebra Y. M. C. A., 1.

Gatun Fire Department Tournament.

A fire department tournament was held by the three volunteer companies at Gatun on the morning of February 22. The results in the four events, which were fully described in THE CANAL RECORD of February 15, were, as follows:

1. One hundred and fifty-yard hose race—No. 3 company, Gatun spillway, first, time 43 seconds; No. 2 company, cement shed, second, time 53½ seconds; No. 1 company, Gatun, third, time 58 seconds.
2. Coupling contest, laying parallel four 50-foot lengths of hose—No. 1 company, first, time 22¼ seconds; No. 2 company, second, time 24½ seconds. No. 3 company, third, time 24½ seconds. The contest between the last two companies resulted in a tie for second place.
3. Removing section of hose from charged line—No. 1 company, first, time 20¼ seconds; No. 3 company, second, time 21¼ seconds; No. 2 company, third, time, 22½ seconds.
4. One man coupling contest—No. 3 company, first, time 9 seconds; No. 2 company, second, time 10¼ seconds; No. 1 company, third, time 10½ seconds.

No. 3 company won the series with 57 points. No. 1 company was second with 43 points. The winning company was awarded an American flag, 5 by 8 feet, as a prize, and will be entertained at a banquet by the other two companies at the Gatun hotel on Saturday night, March 4.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

The Caveny Company from the States will give an entertainment at the clubhouses during March, consisting of vocal and instrumental music, impersonations, and cartoon and clay modeling work. The dates are, as follows: Culebra, March 2; Gorgona, March 3; Gatun, March 6; Empire, March 7; Corozal, March 9.

COROZAL.

Gymnasium classes are meeting every Monday and Wednesday evenings. All men interested in work of this nature are invited to join the classes.

A Spanish class has been arranged for, and any one interested may hand his name to the secretary. A preliminary meeting for the arrangement of the class, and time of meeting, will be held during this week.

The Culebra Glee Club will give an entertainment on March 3; and the Gorgona Dramatic Club will present "Esmeralda" on the 14th.

All men who have ever sung in glee clubs or male quartets, or in choruses, are asked to leave their names with the secretary.

CULEBRA.

The 200 bowling scores for the week ending February 25, are, as follows: Fox, 236; Hall, 235; Cushing, 215; Conlon, 209; Mengel, 202.

The Topic Club will discuss "Problems of the family and the Church" on Monday evening, March 6, from 7.45 to 8.15. Rev. A. A. Nellis will direct the discussion.

The Gorgona Dramatic Club will present "Esmeralda" on Friday evening, March 10. Members, free; nonmembers, 50 cents; children, 25 cents.

The members of the boys' department took a trip to Old Panama beach on Saturday, February 25, preliminary to the organization of the Boy Scouts division in the evening, at which the following officers were chosen: Patrol leaders, Paul Warner, Frank Violett; Adjutant, Randolph Hepler.

The Culebra indoor baseball team will play the Corozal team on Saturday, March 4.

EMPIRE.

The February handicap pool tournament was won by H. M. Pearson.

The musical section of the Empire Y. M. C. A. Musical and Dramatic Society gave a performance of Gaul's "Holy City" on Sunday evening, February 26, before a large audience.

The standing of the local bowling league is as follows:

	Played.	*Won.*	*Lost.*	*P.C.*
Examiner of Accounts	6	6	0	1000
Machinists	6	3	3	500
Civil Administration	6	3	3	500
Central Division	9	3	6	333
Machine Shop	9	3	6	333

Moving pictures were shown on the 25th and will be exhibited again on March 1.

The literary society will hold a discussion on Friday evening, March 3.

Gymnasium classes continue to meet on Tuesdays and Thursdays. Considerable time is being spent by the members in preparing for the group games.

The new bowling alleys recently ordered from the States arrived on the *Advance*.

There will be a lecture on the "Florida Everglades" on Monday evening, March 6, illustrated by stereopticon views.

GATUN.

The "Life problem" club will discuss "Social amusements" next Sunday evening. A member may join this club on any Sunday evening.

A motion picture entertainment will be given on Saturday evening, March 4.

The carnival committee meets Thursday evening, February 23, to discuss plans for the Gatun carnival which will be held March 15, 16, and 17. A rehearsal of those who are to participate in the "College campus" will be held at the chapel on Thursday night.

The clubhouse has been made the recipient of a handsome album containing 75 excellent photographs of scenes on the Canal Zone. The book may be seen at the secretary's office.

CRISTOBAL.

Saturday, a twelve inning game of indoor baseball between the "Regulars" and "Picks" was won by the "Picks"; score, 14 to 12.

On Friday night, the Gorgona Dramatic Club will give "Esmeralda".

PORTO BELLO.

The pool tournament closed February 25. E. S. Wallen won eight out of eight games played and was awarded the prize of a bath robe. M. J. Tuttle secured second place, winning six out of seven games played.

The checker tournament resulted in a tie between Messrs. McIntosh and Arden for first place. Each man lost one game, so a series of five games will be arranged to decide the winner of the Y.M.C.A. pennant.

At the song service on February 19, there was an attendance of 45. Mrs. Chas. Harris played the piano. Mrs. Van Fleet, Miss Harris, Mr. Thomson, and Mr. Bucklin led the singing.

The "Life problem" class on Thursday night was led by Mr. Geer; subject, "Health."

There was a social assemblage at the Y.M. C. A. hall on the night of Washington's Birthday. A musical program was given by the Misses Harris and Day at the piano, and by Chas. Ray on the banjo. Mrs. Harris furnished home made cake.

BASEBALL.

The league season with six clubs closed on Wednesday, February 22, with the game between the Ancon and Commissary-Subsistence teams at the Colon park, in which the visitors were defeated. In winning this game, the Commissary-Subsistence team maintained an unbroken record of victories, and was awarded the pennant. The summary of the game played on February 22, follows:

C.-S.	AB.	H.	PO.	A.	E.
Buch'an,cf.	5	4	0	0	0

The Corozal baseball team defeated Balboa, by the score of 19 to 6, on February 19, at Corozal. At Colon, on February 22, Corozal defeated a picked team by a score of 12 to 3.

An exhibition game was played at the Empire park on Wednesday, February 22, between the Empire team, and the Atlantics, the former winning by a score of 6 to 4.

Commission Tug in Pursuit of Bank Robbers.

The Commission tug *La Boca* was placed at the service of the Panama police authorities on Monday, February 27, to pursue four burglars who, after robbing the safe of the Panama Banking Company in Panama, on the previous night, made their escape on a launch. The tug steamed as far as the Pearl Islands, but returned at nightfall after a vain search. On Tuesday morning, February 28, the tug was provisioned for a three days' trip and was again started out to hunt the robbers

The seagoing suction dredge *Caribbean* went into dry dock at Mount Hope on February 17 for extensive repairs, among which will be the placing of new doors and door frames of cast steel in the hoppers.

Missing Men.

Any one having information regarding the whereabouts of Thomas Murray McLaughlin, who left the service of the Commission on October 4, 1910, is requested to communicate with THE CANAL RECORD.

Any one having information regarding the whereabouts of R. M. Henry, who left the States on March 2, 1909, and is supposed to have come to the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding the present whereabouts of Staunton A. White, who resigned from the service of the Commission on December 20, 1909, is requested to communicate with THE CANAL RECORD.

OFFICIAL CIRCULARS.

Inspection of Floating Equipment.

CULEBRA, C. Z. January 28, 1911.

CIRCULAR NO. 371:

The duties of the Board of Local Inspectors are hereby extended to include an inspection of all floating plant belonging tò the Isthmian Canal Commision and the Panama Railroad Company, at least once every six months, except as to the steamships of the latter company, which are regularly inspected and licensed by the inspectors at the home port of the steamers in the United States.

1. The inspection shall cover the hulls and equipment of same, of any character or description, used in the work of the Isthmian Canal Commission or the Panama Railroad Company, except as noted in the preceding paragraph, with a special view to the preservation of life and property, under all conditions; and the Board shall make a report of its findings, as soon as possible after the inspection, to the Chairman and Chief Engineer, through the Head of Department of Civil Administration, and shall specifically recommend such changes in hull, equipment, etc., as in its opinion may be necessary for proper care of life and property.

2. Copies of reports shall be forwarded direct to the division heads in the case of Commission property, and to the General Superintendent of the Panama Railroad Company in the case of Panama Railroad property.

3. No general repairs shall be undertaken on any piece of marine plant of over fifteen (15) tons burden until same has been inspected and reported on by the Board of Local Inspectors, which report should be taken as a guide as to the work to be done; and to expedite this inspection, it is required that the Board shall receive notice of retirement from service of any piece of plant, as above stated, at least ten days before the time of undertaking the repairs; and at the time the Board receives notice of said retirement, a list of required repairs, prepared by the marine engineer, master, or supervisor, in immediate charge of the plant to be repaired, approved by the supervising engineer and officer in charge of the work, shall be filed in the office of the Board for their information and guidance in making the above inspection.

4. The term "general repairs" is intended to cover the periodic replacing of worn equipment, and such other repairs as may be authorized and made at such time, and do not cover the emergency repairs necessary at any time for the renewal of broken parts, or the running repairs made from day to day.

Compliance with recommendations of the Board is not obligatory on the part of the officials operating the floating equipment until approved by me. This is not intended, however, to prevent such action as may be considered necessary on the Board's recommendations without specific approval.

The Board of Local Inspectors, in addition to the report submitted immediately after inspection, shall prepare a monthly report of work done by them under the terms of this circular, which report shall be filed with the proper authorities by the tenth day of the month succeeding.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Approved:
J. M. DICKINSON, *Secretary of War.*

Baggage on Trip Passes.

CULEBRA, C. Z., February 25, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is reported that in several instances recently employes, to whom trip passes have been issued, have noted on the pass "With full baggage," without proper authority.

The baggage allowance on first-class I. C. C. transportation on the Panama railroad is 250 pounds, and, hereafter, ticket agents will not honor requests for excess baggage unless a notation to that effect appears on the pass over the signature of a Head of Department or Division.

H. F. HODGES,
Acting Chairman.

Injury Leave for Borrowed Mechanics.

CULEBRA, C. Z., February 24, 1911.

CIRCULAR NO. 357-A:

Whenever an employe temporarily obtained from the Mechanical Division under the provisions of Circular No. 357 is injured, the cost of all injury leave incident thereto will be borne by the division in which and for which he was working at the time the injury was sustained.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Transfer of Equipment.

CULEBRA, C. Z., February 24, 1911.

CIRCULAR NO. 370:

Whenever it is desired to transfer equipment from one division or department to any division or department of the Isthmian Canal Commission, or from the Isthmian Canal Commission to the Panama Railroad Company, or from the Panama Railroad Company to the Isthmian Canal Commission, request will be forwarded to the Surveying Officer, who will submit his recommendation to the Chairman and Chief Engineer, and if approved, the necessary instructions pertaining to the transfer will be issued, by direction of the Chairman, from the office of the Chief Quartermaster.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Reservations on Colon, March 19.

CULEBRA, C. Z., February 24, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

Practically the entire state room accommodations of the *Colon*, scheduled to sail from Cristobal on Sunday, March 19, 1911, having been reserved for members of the Congressional party on their return trip, no further requests will be issued for this sailing. Sufficient accommodations remain to provide for the limited number of requests already issued.

By direction of the Acting Chairman.

Respectfully,
C. A. MCILVAINE, *Chief Clerk.*

Stop-over Privileges on 24-Trip Tickets.

OFFICE OF THE MASTER OF TRANSPORTATION,
COLON, R. P., February 20, 1911.

Passenger Conductors and Collectors:

TRANSPORTATION BULLETIN NO 39.

On account of the evident abuse of the stop-over privilege on the 24-trip tickets, it is now ordered that those tickets must be made out in either indelible pencil, or ink, and clearly and distinctly dated. They will be honored for transportation on the date of issue only, and stop-overs, when allowed, will be noted on the back by conductors or collectors with indelible pencil, with the following notation:

"Off No......(at)........(date).........."
(Initials.)

The succeeding conductor or collector to whom this transportation is presented, will be careful to note that the date is for the day transportation is presented, otherwise it will not be honored.

Report of particulars in any violation of the above should be made in writing to this office.

A. K. STONE,
Master of Transportation.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending February 25, 1911:

Norman, February 21, from Brunswick, with 28,505 cypress ties for stock.

Ancon, February 22, from New York, with 23,540 barrels cement for Atlantic Division; 114 040 bags cement for Pacific Division.

Advance, February 23, from New York, with 14 automatic buckets, 25 pieces propeller blades, 1 crank shaft for Atlantic Division; 76 packages castings for Central Division; 11 packages iron covers, 2 barrels snatch blocks, 3 barrels sheaves for Mechanical Division; 17 cases drill parts, 10 cases varnish, 12 cases electrical goods, 12 cases seamless tubes, 6 coils rope for stock; and a miscellaneous cargo, the whole consisting of 262 packages, weighing 104 tons.

Atenas, February 23, from New Orleans, with 200 bundles rods and straps for Mechanical Division; 138 bales alfalfa hay, 46 rolls cotton duck for stock.

Santa Marta, February 23, from New York, with 25 bundles brooms, 230 crates wooden handles for stock.

Antillian, February 24, from Liverpool, with 15 dredge buckets for Pacific Division.

Rainfall from February 1 to 25, 1911, Inclusive.

†To 5 p. m., February 24.

**12th and 14th.

The following vessels arrived at and departed from the port of Balboa during the week ending February 25, 1911:

Arrivals—February 19, *Venetia*, from San Francisco; *Olson and Mahoney*, from San Francisco; February 20, *Vicksburg*, from Corinto; *Mexico*, from Callao; February 23, *Arica*, from Guayaquil; *Peru*, from San Francisco.

Departures—February 19, *Newport*, to San Francisco; February 20, *Ucayali*, to Callao; February 21, *Huasco*, to Valparaiso; February 22, *City of Para*, to San Francisco; *Quito*, to Buenaventura; *Venetia*, to San Francisco.

RAINFALL IN 1910.

There was less rainfall in the Canal Zone during the year 1910 than during the preceding year, but an excess, as compared with 1908. The rainiest month of 1910 at Cristobal was November; at Empire, July; and at Ancon, August. The month of least rain at Cristobal and Empire was January, and at Ancon, February. The rainfall at Porto Bello, situated on the Atlantic coast 16 miles from Colon, for 1910, was 67.16 inches less than during 1909, when the total for the year was 237.28 inches, 103.20 inches of which fell during the months of November and December. The rainiest month at Porto Bello in 1910 was November, with 23.08 inches, and the driest month, February, with 5.89 inches. The rainfall at that point was greater for each month in 1909 than for the corresponding month in 1910, with three exceptions, those of March, August and October. The following table shows the rainfall for the past three years at three principal points in the Canal Zone, and at Porto Bello for 1909, and 1910, by months:

MONTH.	Cristobal.			Empire.			Ancon.			Porto Bello.*	
	1908	*1909*	*1910*	*1908*	*1909*	*1910*	*1908*	*1909*	*1910*	*1909*	*1910*

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Excavation in Central Division During February.

The total excavation in the Central Division for the 23 working days during the month of February, 1911, was 1,630,758 cubic yards, of which 1,623,152 cubic yards were from the Canal prism, 5,736 cubic yards from the Obispo diversion, and 1,870 cubic yards were outside work. The amounts excavated, and remaining to be excavated, in the Central Division are, as follows:

	Excavated.	Remaining.
	Cu. Yds.	*Cu. Yds.*
Culebra Cut	59,671,665	24,515,059
Chagres Section	11,361,857	1,576,437
	71,033,522	26,091,496

The excavation in the prism for this month is the greatest February prism excavation of record within the limits of the Central Division, and exceeds the next highest record, made in February, 1909, by 77,144 cubic yards, and that of February, 1910, by 77,670 cubic yards. The total excavation from the Canal prism in the Culebra section of the Central Division, including the small amount of work done on the Obispo diversion, was 1,409,338 cubic yards in February, 1911, which is much the largest output in this section for the same month since operations were commenced by the United States, the greatest previous output having been 1,259,173 cubic yards in February, 1910.

Canal Work in February.

The grand total of Canal excavation to March 1 was 131,829,436 cubic yards, leaving to be excavated 50,708,330 cubic yards.

The total for February was 2,714,174 cubic yards, as compared with 2,602,995 cubic yards in February, 1910, and 3,148,879 cubic yards in February, 1909. Of the total, 2,691,036 cubic yards were "work excavation," and 23,138 cubic yards were "plant excavation."

The dry excavation amounted to 1,759,083 cubic yards and was principally by steam shovels. The dredges removed 950,787 cubic yards and 4,304 cubic yards were sluiced, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 574,199 cubic yards. Of this total, 97,613 cubic yards were dry excavation, and the remainder was removed by the dredges in the Atlantic entrance.

The total excavation in the Central Division was 1,630,758 cubic yards, and further reference to this work is published elsewhere in this issue.

In the Pacific Division, the total excavation was 509,217 cubic yards, 386,866 cubic yards of which were taken out by the dredges at the Pacific entrance.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work." Excavation.	"Plant." Excavation.	Total excavation

Mean rainfall along Canal (eleven stations) 1.46 inches.

By "Work" Excavation is meant excavation actually made for one of the constituent parts of the Canal, such as Prism, Diversions, or Locks etc.; that is, it represents material taken from the area to be occupied by the Canal, and constitutes excavation useful for the completed Canal.

By "Plant" Excavation is meant excavation outside of any of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc. It includes material necessary to be excavated for construction purposes only and is chargeable against the particular plant item for which it is performed, such as Prism, Diversions, Locks, etc.

Concrete Piles for Guide Wall Foundation.

The upper guide wall at Gatun locks will be a continuation of the center wall and will extend into Gatun Lake a distance of 1,500 feet from the upper guard gate. The foundation for 850 feet of it, in the bed of the lake, will be on piles, and the wall itself in this section will be of cellular, reinforced concrete construction. The reinforced concrete piles for this work are now being made at Gatun, where two casting platforms have been built on the east bank of the lower locks. The piles are rectangular in cross section, and are reinforced by four longitudinal angles near the four corners, connected at intervals of 18 inches by lateral straps. The reinforcement is in sections 12 feet long, so that piles of any length in multiples of 12, may be made. On the lower end of each pile is a cast iron shoe, and the upper end is heavily reinforced to give strength for the blow of the driver. In driving, a "driving head" is placed over the top of the pile. It consists of a piston which passes into a cylinder in which there is a cushion of sand, rope, and wood. The hammer strikes the piston and the blow is transmitted by it through the cushion to the pile. Six of these piles were driven last week, one to a depth of sixty feet, and the others to depths varying from 18 to 24 feet, and in every case the results were good. Two steam pile drivers will be used in this work, and each will drive 10 piles in eight hours. It is estimated that 3,500 piles will be required for the foundation.

At the Pacific Entrance.

The Canal at the Pacific entrance is completed from deep water to a point opposite the Panama railroad wharf at Balboa, a distance of about five miles, and apart from the removal by the suction dredge *Culebra* of a few loads of fill each month, there is no further dredging to be done in that section. The open water channel continues inland for a distance of about three miles from the Balboa wharf, and in this part of the Canal three of the dredges are now working. The depth of the channel varies from 30 to 45 feet at mean tide, and certain sections of it have been excavated to its final width of 500 feet. Considerable work, however, remains to be done on the west bank, where several rock patches project into the channel, and these are being drilled and mined preparatory to

NOTES OF PROGRESS.

(*Continued.*)

their removal by the dredges. Two of the Pacific Division dredges were recently set at work in the prism south of the dam at Miraflores, as their ladders are not long enough to permit them to continue the excavation in the open channel, except at mean tide, or below, and to keep them there would necessitate laying off one crew and working only a 12-hour day. The dredging fleet at the Pacific entrance consists of one seagoing suction dredge, four French ladder dredges, and one 5-yard dipper dredge. A new seagoing 2-yard ladder dredge for the Pacific end of the Canal is now under construction at Renfrew, Scotland, and is due for delivery at Balboa about September 1, 1911. The dredging work on the American Canal in the Pacific Division was begun in January, 1907, and up to March 1, 1911, a total of 26,581,119 cubic yards had been excavated.

The Atlantic Entrance.

In the Atlantic entrance to the Canal the channel is completed to its full width of 500 feet as far as the French canal, which is five miles and 2,438 feet inland from deep water in Limon Bay. The channel is 40 feet deep to a point 3,900 feet from deep water, 35 feet to a point three miles inland, 30 feet deep to a point 4 miles and 800 feet inland, and 20 feet deep as far as the French canal. The amount of material to be excavated in this section is 30,600,000 cubic yards of earth, including fill, and 3,800,000 cubic yards of rock. On March 1st, 20,175,000 cubic yards of earth had been taken out, and 2,250,000 cubic yards of rock, the earth excavation being 66 per cent, and the rock 59 per cent completed. The plant engaged in this work includes a seagoing suction dredge, three old French ladder dredges, and two modern dipper dredges, and auxiliary fleet. The excavation of rock under water is accomplished by drilling and blasting the rock prior to dredging. The drilling is done by eight common well drills, mounted on a barge served by one boiler and moved from place to place according as the work is completed. This excavation is being done at less cost than dry excavation, the greatest element of economy being the method of drilling, in which the whole battery of drills is moved at one time, and is served by a small force of men.

Naos Island Breakwater.

The breakwater between Balboa and Naos Island has been constructed for about 8,300 feet, leaving about 4,500 feet to be constructed before the island is reached.

Colon Breakwater.

The breakwater which extends from the west shore of Limon Bay, out toward the Canal entrance, had been extended 3,137 feet on March 4, and rock had been dumped to within 15 feet of the surface of the water for about 3,075 feet. A total of 202,659 cubic yards of rock, quarried on the main land near the breakwater, has been placed. The piles which are driven for the trestle encounter all sorts of material, from hard coral bottom, which must be blasted, to a mixture so soft that they penetrate to a depth of 40 feet. The breakwater will be armored with hard rock from Porto Bello, which will be placed by means of derricks operating on barges. Plans for the derrick barges have been completed. The driving of the trestle was begun in August, 1910, and the dumping of rock in September.

Notice to Free Masons.

The ground for the new Masonic temple to be erected on the corner of Eleventh and Bolivar streets, Cristobal, will be broken on Sunday morning, March 12, at 10 a. m. All Masons sojourning on the Isthmus are invited to be present and join with Sojourner's Lodge, No. 874, on this occasion. They will meet in the hall, corner of Fifth and Bolivar streets, Colon, on the arrival of the 9 a. m. train, proceeding from there to the lot.

C. G. Carty, R. W. M.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 56 per cent of the concrete for the system of three twin locks at Gatun has been laid, the exact amount in place at the close of work on March 4, being 1,160,752½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending March 4, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily. and the auxiliary plant 9 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
February 27	2,260	37:41	8	452	6:40	2	241¾	2,988¾

Grand total								1,160,752½

*The 229 yards shown for the portable mixers are reinforced concrete, and were placed on the following days: February 27th, 35 yards; February 28th, 25½ yards; March 1st, 26 yards; March 2d, 71½ yards; March 3d, 24 yards; March 4th, 47 yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 67 per cent completed, 565,547 cubic yards, out of a total of 837,400, having been placed at the close of work on March 4. The record for each of the six 8-hour working days of last week, follows:

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant.						Large stone.	Total.
				2-cubic yard mixers.			½-cubic yard mixer.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete Placed.	Hours worked.	No of mixers.

MIRAFLORES LOCKS.

About 11 per cent of the concrete for the system of locks at Miraflores was in place on March 4, the total amount on that date being 146,243 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

Date.	Auxiliary Plant.										Total.
	2-cubic yard mixers.			¾-cubic yard mixers.			½-cubic yard mixer.

*Includes 11 cubic yards laid by hand. †Includes 22 cubic yards laid by hand.

GATUN LOCKS

Excavation is About Completed and Nearly 56 Per Cent of Concrete is in Place.

Excavation in Gatun Locks is practically completed, all that remains being a small amount of material which has slid into the lower lock site from the east bank. In the north approach to the locks, however, excavation has only been begun by a 20-inch suction dredge, which will dig to a depth of 45 feet below sea level for the approach channel, and also dig the foundation for the center guide wall, and the north wing walls. This work will be carried on while concrete laying is in progress in the lower lock, the two pits being separated by a bulkhead. When the suction dredge has finished its work, it will be withdrawn and the pit will be unwatered so that concrete may be placed.

About 56 per cent of the concrete for the locks and approaches is in place. The record of this work by months since August, 1909, and the output of last week, are shown in tables published elsewhere in this issue. The estimated amount of concrete to be placed is 2,085,000, and there therefore remained to be laid on March 4th, 924,348 cubic yards. In the upper locks all concrete laying is finished, excepting that around the culvert valves and the reinforced concrete of the operating tunnel in the center wall. In the middle locks the side walls are completed, excepting the gate and valve monoliths, and the center wall is about half done. The lift wall between the middle and lower locks was completed on March 7. Concrete laying has but fairly begun in the lower locks, about 10 per cent of the floor being in place. Work is in progress on trestles on which the steel forms for the wall monoliths will be moved from the middle to the lower locks. Concrete laying will then be begun in the side walls, and they will be built to a height of 25 feet, in order that they may act as retaining walls for the banks, and it will then be safe to move the cableway towers to any portion of the lower locks. At present the banks in a number of places are not considered sufficiently stable to hold the towers.

The contractor who has in charge the manufacture and erection of the lock gates expects that the first shipment of material for the gates will arrive on the Isthmus about April 1. Meanwhile, he is constructing and erecting a bridge across the east lock of the upper flight, and is at work on a similar bridge across the west lock. Material for the gates will be lowered into place by locomotive crane operating from these bridges. The bridges themselves are movable and will be used for erecting all of the gates.

Gatun Dam and Spillway.

Gatun Dam is about 60 per cent completed. An analysis of the wet and dry fill will be found in "The Record of Canal Work" published elsewhere in this issue. The fill in place on March 1, was 13,848,000 cubic yards, about equally divided between the wet and dry, and almost two-thirds of this has been placed during the past 14 months. In the east half of the dam, the average height of the earth toes is 77 feet above sea level. The hydraulic fill is at plus 60 feet, and is being allowed to dry out during the present dry season. As the height of the dam increases the dry fill of the toes is allowed to encroach on the hydraulic fill, and, at present, the toes are within 40 feet of the limit prescribed for them. The dry and wet fills of the west half are being carried on. The dry fill of the toes has reached an average height of 52 feet above sea level, and the hydraulic fill is at 40 feet above.

In the spillway, work on the side of the concrete dam is being carried on behind coffer dams, and this part of the work will be finished during the present dry season. The eleven concrete piers, which have been built across the channel to a height of 45 feet above sea level, will be used in holding back the water from any section of the dam site in which it is desired to lay concrete. Grooves have been left in them to hold boards which will act as a dam. The piers are on the upper line of the spillway dam and will form a part of the completed dam after they have served their purpose in the construction work.

Concrete was placed in the spillway of Gatun Dam during the week ending March 4, as follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
February 27	264	6:00	2
February 28	340	17:00	2
March 1	352	17:00	2
March 2	350	17:00	2
March 3	370	17:00	2
March 4	232	15:00	2
Total	1,908	89:00	2
Previously reported	120,736		
Grand total	122,644		

Test of Gate Valves.

In the approach to the upper locks at Gatun, preparations are being made for the test of a Stoney gate valve under the full height of 85 feet of water, against which it will be obliged to operate when the Canal is completed. The test will be made by sealing up the culvert in which the gate is installed and filling the valve chamber. This will test the efficiency of the sealing devices and show the effect on the spring side seals when the gate is operated, and the initial force which will be required to break the water seal and open the valves about one foot. In the spillway at Gatun Dam, three of the piers which have been built for coffer dam purposes have been so constructed that the Stoney gate valves may be tested under working conditions.

Pedro Miguel Locks.

With the greater part of the walls in place, the work of laying concrete in the locks at Pedro Miguel is proceeding more slowly than formerly, although the amount placed in February shows an increase over the preceding month. The concrete work is now largely confined to the ends of the lock, where the extensions of the center and side walls are advancing toward completion. The construction of the outlet at the lower end of the center wall culvert is under way, and the work of building the overhead arches that form the extensions over the south end outlets of the side wall culverts is about to be begun. Three of the Stoney gate valves, and four of the guard gate valves, have been placed in position to date. The work of laying concrete in this lock was begun on September 1, 1909, and up to March 5th, 565,547 cubic yards, out of a total of 837,400, had been laid, indicating that over 67 per cent of the concrete necessary to complete the lock is in place. The earlier part of the concrete work, including all of the south guide wall as it now stands, was accomplished with stationary and portable mixing machinery. With the installation of the permanent handling and mixing plant, consisting of two berm cranes and four chamber cranes, an impetus was given the work, which, a few weeks ago, had advanced so far as to permit of the dismantling of one of the berm cranes for transfer to Miraflores Locks.

Miraflores Locks.

As at Pedro Miguel, the early concrete work in the upper of the two locks at Miraflores, which was begun in June, 1910, has proceeded with the use of auxiliary and portable mixers, and up to March 4, over 146,000 cubic yards had been laid by this method. The stationary mixing plant in this lock consists of two 2-cubic yard mixers, situated in the east storage trestle, and its output has been carried into the lock on cars. The plant will be abandoned, and the mixers transferred to the east berm crane, which, it is expected, will be ready for operation within the next ten days. The west berm crane is also practically completed. These cranes will deposit concrete directly into the walls. A considerable section of the east wall of the lock has been completed, and it is being extended into the forebay; the batter, or foundation section of the center wall is two-thirds finished, and work on the west side wall has been started. The floor and lateral culvert system is completed, with the exception of joining the culverts to the west wall tube. Several of the cylindrical valves have been erected, and the settling basin above the upper guard gate is nearly finished.

The preliminary work for excavating the material in the lower lock, not removed by the sluicing and pumping process, is well advanced. The incline construction track into the lock is completed, and a shovel cut has been made at the upper end for the purpose of beginning the excavation for the west wall.

Nombre de Dios Sand Output.

The projected loading bin at Nombre de Dios has not been constructed, but good results are now obtained from the 18-inch suction dredge pumping sand directly into the barges. The output of sand varies between 35,000 and 40,000 cubic yards a month, and the quantity that can be supplied is limited only by the barge capacity. The weekly consumption at Gatun varies in accordance with the amount of concrete placed, the amount of sand used being about two-fifths of a cubic yard for every yard of finished concrete.

Hydraulic Excavation in Pacific Division.

Part of the lower lock excavation at Miraflores was accomplished by the hydraulic process, and the work has now been extended to the section of the Canal prism lying between the lower lock and the dredged channel to Balboa. The process involves the disintegrating and sluicing of the original material by means of powerful pumps forcing the water at a high pressure through four monitors, or giants, and the lifting of the material thus disintegrated out of the pit by dredge pumps. Most of the material disposed of so far has been utilized in making the core fill of the west dam at Miraflores, but as this work draws to a conclusion, it will be used for reclaiming the tidal swamps between Corozal and the Canal.

THE EMERGENCY DAMS.

Contracts Soon to be Let for This Feature of the Locks.

Bids will be opened in the Washington office of the Isthmian Canal Commission on March 30 for six emergency dams, two each for the locks at Gatun, Pedro Miguel, and Miraflores, and for the machinery to operate them. The bids have been advertised for in the usual way, and, in addition, responsible European manufacturers have been invited to submit bids. The law governing the letting of contracts provides that materials for the Canal may be purchased from foreign manufacturers in case the President deems the bids of American manufacturers exorbitant.

The dams are to be completed and erected at Gatun and Pedro Miguel by January 1, 1913, and at Miraflores by September 1. 1913. The masonry at Gatun will be ready on June 1, 1911, at Pedro Miguel on September 1, 1911, and at Miraflores on January 1, 1912. Tests are provided for at the shops of the manufacturer and a final test when the dams are completed and erected, and twenty per cent of the total cost will be withheld until the final test has been met. The total amount of material for the six dams is 12,000 tons.

The purpose of these dams is to check the flow of water through the locks, in case of damage, or in case it should be necessary to make repairs, or to do any work in the locks, which would necessitate the shutting off of all water from the lake levels. The dams will be placed in pairs in the approaches to the upper locks about 200 feet above the upper guard gates, and each will close the approach to one of the twin locks.

Each dam is constructed on a steel truss bridge of the cantilever type, pivoted on the side wall of the approach to the locks, and when not in use, resting on the side wall parallel to the channel. When the dam is in use the bridge will be swung across the channel with the long arm resting on the center wall. A series of six girders, hinged to this bridge in such a way that they may be raised and lowered through an angle of 90 degrees, will be lowered into the approach channel, with their ends resting in iron pockets embedded in the masonry. After the girders are lowered in place, six panels, moving in them on roller bearings, will be allowed to roll down until they form a horizontal tier spanning the width of the Canal and damming the water to a height of ten feet. When this operation is completed, another series of six panels will be lowered, and the operation will be continued until a dam is constructed from the bottom upward, completely closing the channel. When this dam has checked the main flow of water, the remainder, which is due to the clearance between the vertical sides of the gates, may be checked by driving steel pipes between the sides of the adjacent panels.

The bridge which will hold the girders will be larger than any swing bridge yet constructed. Its total length will be 263 feet, the long arm which extends over the lock and holds the dam, approximately 163 feet, and the short arm about 98 feet. The extreme width will be 93 feet. At the end of the short arm will be built the operating house, in which machinery will be installed for turning and wedging the bridge. This bridge, when operated by electricity, must be safely and easily opened in two minutes, and when operated by hand, in 30 minutes. The dams for Pedro Miguel and Gatun will be five panels high and all of the same size, but those at Miraflores will be only four panels high due to the less depth of water at Miraflores Locks.

The wicket girders, on which the gate panels will operate, will be plate girders of the box type, braced by the top lateral system of sway frames. The material will be open hearth nickel steel, excepting the rods, which will be structural open hearth steel. The panels for the gates will consist of frames with buckle plates riveted to them, the material to be vanadium steel castings and structural open hearth rolled steel. On the down stream side of each frame, flange wheels, acting on roller bearings with ball bearing end thrust, will be fastened to the castings, and on these wheels, the plates will be lowered or lifted on the wicket girders.

Each dam will be operated in three movements, and the machinery for operating is, therefore, in three classes—(1) The gate moving machinery, (2) machines for raising and lowering the wicket girders, and (3) machines for hoisting the gates on the girders. It will be driven by electric motors, but hand capstans will be provided for use in emergency.

The bridge operating machinery will be erected in the operator's house, at the end of the short arm, and will consist of two motors for turning the bridge, a limit switch to prevent operation beyond an arc of 90 degrees, and a motor for driving the wedges which will hold the bridge firmly in place when it is at rest across the channel, or on the lock wall. The machine for raising and lowering each of the six wicket girders of each dam will consist of a hoisting drum driven by a motor, and equipped with a limit switch. The gates on the wicket girders will roll into place by gravity, and, when the dam is to be opened, they will be hoisted out of the water by a machine. There will, therefore, be six gate hoisting machines for each dam, and as many motors to drive them.

The chief items of materials for the six emergency dams are, as follows: Thirty-six wicket girder hoisting machines, with 36 motors and limit switches, thirty-six gate hoisting machines with 36 motors. Twelve motors to operate the bridge turning machinery, with six limit switches and six motors for driving the wedges. Nickel steel for vertical and horizontal trusses, and longitudinal and transverse girders, 9,290,000 pounds. Riveted structural steel for sway frames, portals, lateral systems, floor, machinery supports, and gates, 5,852,000 pounds. Carbon steel castings for center pivot, wedges and wedge seats, gear wheels, bearings, etc., 2,340,000 pounds. Carbon steel forgings, shafts and pins, 300,000 pounds. Cold rolled steel, 132,000 pounds. Turned bolts, 60,000 pounds. Checkered steel plates for floors, 180,000 pounds. Gas pipe for hand railing, 72,000 pounds. Brass pipe for hand railing in operators' houses, 46,000 pounds. Manganese bronze for worm wheels and center discs, 39,000 pounds. Chrome vanadium forging steel for upper and lower center discs, 24,000 pounds. Vanadium case hardening steel for flanged gate wheels, 290,000 pounds. Vanadium steel castings, wheel castings for gates, carriage yokes, main pinions, main pinion bearings, and rack segments, 1,022,000 pounds.

All persons on the Isthmus, who at any time have been students at the University of Virginia, and all employes of the Isthmian Canal Commission, who at any time have held positions on the faculty of an American college, are requested to send their names to W. M. James, Ancon.

Small Slide at Paraiso.

The digging necessary to maintain the track on the 95-foot level on the east bank of Culebra Cut at Paraiso has caused a small slide, which includes the site of the commissary building, and it is likely that this building will be moved.

PERSONAL.

Colonel H. F. Hardie, U. S. A., arrived on the Isthmus on the *Panama* on March 1.

Mr. Stanley W. Wood, for six years on the engineering forces of the Canal and Panama railroad recently passed the examination for a commission in the Army, standing second out of a class of 39, and he has been commissioned a second lieutenant in the infantry.

Action in the Case of M. H. Lough.

As a consequence of the affirmation of the Supreme Court of the Canal Zone of the verdict rendered by the Court of the Third Judicial Circuit, finding Mr. Matthew H. Lough guilty of criminal negligence in having caused the death of Conductor E. C. Tinsley in a railroad collision, at Bohio, on August 15, 1910, a mass meeting was held at Las Cascadas on Sunday, February 25, at which the following resolutions were adopted:

> We, the citizens of the United States of America and employes of the Isthmian Canal Commission on the Canal Zone in mass meeting assembled do on this 26th day of February, 1911, hereby severely protest against the persecution and unjust prosecution of one M. H. Lough, who is now unjustly confined in the Culebra penitentiary after nearly seven months of dilatory prosecution on the part of the civil authorities of the Canal Zone, which has left said M. H. Lough a wreck mentally and physically. And we believe the continuance of such persecution will be the death of M. H. Lough. Therefore, be it resolved,
>
> First. We demand the liberty of said M. H. Lough.
>
> Second. That the Chief Engineer of the Isthmian Canal Commission, or his representative, and the Governor of the Canal Zone use his or their prerogative and annul the proceedings and unjust decision in this case, as establishing a precedent unjust, unfair and a relic of barbarism, under which we do not care to remain as employes.
>
> Third. That unless said M. H. Lough is liberated as above requested and the iniquitous decision and unjust precedent annulled, you may consider our services with the Isthmian Canal Commission terminated at six o'clock, p. m., Monday, February 27, 1911 (changed to Friday, March 3, 1911, by a later resolution), and arrange to transport us to the United States where we can enjoy the protection of the Constitution, a jury trial, tranquillity, and the pursuit of happiness.

The resolutions were presented to the Acting Chairman by a number of the men the same afternoon, and he informed them that no action could be taken until the case had been carefully gone over, which he would have done, so that the matter could be laid before the Chairman, upon the latter's return from the States. The Chairman declined to take any action whatsoever in reference to these resolutions. A petition for Mr. Lough's pardon was subsequently circulated, which will be forwarded to the President, together with the records in the case for consideration and action. Mr. Lough's case was taken up with the President by a committee of the locomotive engineers during his visit to the Canal Zone, and he directed that this course be pursued in case the Supreme Court sustained the action of the lower court, and so advised the committee.

EMERGENCY DAM—MIRAFLORES LOCKS.

[DAMS AT GATUN AND PEDRO MIGUEL LOCKS ARE FIVE PANELS HIGH, INSTEAD OF FOUR, AS SHOWN HERE.]

Emergency Dam is shown closed with Wicket Girders and some Gates lowered in place.

Emergency Dam is shown open with Wicket Girders and Gates raised.

PANAMA WATER SUPPLY.

Salt Water Percolates into Cocoli Lake—New Source of Supply Established.

The water in Cocoli Lake reservoir, which, in conjunction with the Rio Grande reservoir, furnishes the water supply for Ancon and Panama, has been charged with salt since February 10 to such an extent as to make it unfit for domestic or mechanical purposes. The Cocoli reservoir was formed by the building of a dam west of the lock site at Miraflores, and, although salt water has been pumped into the hydraulic fill of this dam since September, 1910, there had been no indication of salt in the water prior to the above date. New material was added to the old fill on the west toe of the dam, and it is supposed that a leak developed at this point, as the hydraulic fill containing the salt water was raised above the old fill about the same time. The salt water pool has since been lowered, and a puddled connection is being made between the old and new parts of the fill for the purpose of preventing, if possible, further percolation. No leakage, however, was discovered in digging the trench for the puddle core.

A board was appointed to consider the best method of supplementing the Rio Grande supply, and after determining that it would be impossible to reduce the amount of chlorine in Cocoli Lake during the present dry season, it recommended that the Caimitillo River, which crosses the Panama railroad relocation just north of the Miraflores tunnel, be used for the purpose. This stream has a discharge at present of 3,000,000 gallons in 24 hours, and an analysis of the water made by the Commission's physiologist shows it to be potable, provided it is treated and filtered. There are comparatively few inhabitants on the watershed of the stream, and as it will be used chiefly in the dry season, the small amount of surface drainage will be of no consequence. To utilize this supply, the board recommended that a pump be installed on the river bank, near the railroad culvert, and a 10-inch pipe be laid to the settling tank of the Cocoli Lake pumping plant, about 4,000 feet distant. The pump, as well as the remainder of the material is now available on the Isthmus, and the work will probably be completed this week.

Rock Crushing at Porto Bello.

Improvements in the conveying apparatus, which carries rock from the crusher to the storage bins at Porto Bello, were largely responsible for the record of 84,072 cubic yards in January, as compared with 80,244 cubic yards in December. During December, the crushers worked 12 hours a day the first half of the month, and 10 hours the second half; while in January they worked 12 hours a day to the 15th, and 10 hours the balance of the month. In February, the daily record for an 8-hour day, and the best average hourly record, were broken on the 25th, when 3,389 cubic yards were crushed, an average of 423 cubic yards an hour. On February 14, the regular working day was reduced from 10 to eight hours. The average number of hours per day worked between February 1 and 14 was 7.68 out of 10 hours, and in the second half of the month, it was 6.48 out of eight hours. The average number of cubic yards crushed per hour of the working day in the first half of the month was 334.3, and during the second half of the month 365. The average number of cubic yards crushed per working hour during the first half of the month was 435.4, and during the second half of the month 450.8. The force at Porto Bello now consists of 540 men, 88 of whom are white "gold" employes.

A statement of the work done at the Porto Bello crusher, by days, for the week ending March 4, follows:

DATE.	Hours worked.	Cubic Yards.
February 27	7:31	3,399
February 28	5:23	2,607
March 1	6:54	3,19[illegible]
March 2	7:33	3,264
March 3	7:14	2,953
March 4	7:53	2,830
Total	42:28	18,251

Visit of the Civil Engineers.

Members of the American Society of Civil Engineers, and their friends, are due to arrive on the Isthmus on March 9 for a visit of one week. The *Zacapa* from New York is bringing 71 men and 22 women, and the *Abangarez* from New Orleans, 42 men, 12 women, and two children.

In the program for the entertainment of the party, the following changes have been made: Tuesday morning, March 10. After visiting Gorgona shops, the party will be taken to Culebra to view the relief map and the model of the locks and dams, and later to view Culebra Cut from the top of the hill; thence it will return by train to Empire, where lunch will be served at the Commission hotel. After lunch, the party will view the Cut from the Empire suspension bridge after which, it will return to Panama. The program for the afternoon remains unchanged

The program for Saturday morning will omit the visit to Culebra; otherwise the schedule will be unchanged.

Spanish War Veterans.

The following were installed as officers of Camp Col. Sibert, No. 1, United Spanish War Veterans, at Gatun on Sunday, March 5, by Commander Col. Gahon: Commander, C. T. Young; senior vice-commander, W. D. Rodgers; junior vice-commander, Evon Monchow; chaplain, the Rev. Mr. Purdy; surgeon, Dr. E. A. Vaughn; officer of the day, Geo. H. Hooker,; officer of the guard, L. Guarion; sergeant of the guard, N. E. Emmons: adjutant, A. O. Ludwig; quartermaster, N. Hearn; trustees, D. A. Garson, Col. Sibert, W. J. Dewey.

Chagres Camp, No. 2 of Culebra, was installed at the same time with the following officers: Commander, Charles C. Cameron; senior vice-commander, E. J. Hoffman; junior vice-commander, F. R. Bronson; adjutant, Don H. Beaman; quartermaster, Harry S. Farish; surgeon, Dr. C. J. McGillicuddy; officer of the day, Frank E. Frink; officer of the guard, E. H. Tracy; chaplain, S. J. Boyd.

BASEBALL.

RESULTS OF GAMES, MARCH 5.

At Ancon—Ancon, 6; Empire, 5.
At Colon—Commissary-Subsistence, 8; Atlantics, 6.

STANDING OF CLUBS.

	P.	W.	L.	P.C.		P.	W.	L.	P.C.

Empire ..	2	1	1	500	Atlantics.	2	0	2	.000

SCHEDULE OF GAMES, MARCH 12.

At Ancon—Ancon vs Atlantics.
At Empire—Empire vs. Commissary-Subsistence.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

The 200, or over, bowling scores for the week are, as follows: Huttlemeier, 210; Warner, 202; Herrington, 200. The 100, or over, duckpin scores are, as follows: Franks, 106; Hill, 102.

The third period in the "Topic" club will be conducted by H. N. Sollenberger on Monday evening, March, 13, at 7:45. Subject to be discussed, "Health, stimulants, and narcotics."

The billiard tournament will open on Monday, March 13. As this tournament is to be a handicap, all persons wishing to enter should hand in their names to Mr. DuBois not later than Saturday evening, March 11.

EMPIRE.

The following high scores were rolled from February 23, until March 4: Parkis, 201, 205; Giavelli, 224; Goolsby, 205; [illegible], 203; Bardelson, 213; Brown, 202; Edwards, [illegible]. Duckpins—Rodeghiero, 112, 110; Scull, 102, 101, 101; McLeod, 111.

All pool and billiard tables in the Empire clubhouse have been put in first-class condition for another year.

There are 15 entries for the March handicap pool tournament.

GATUN.

"Reciprocity with Canada" will be discussed by the literary and debating club on March 8. Three new members have been added to the club.

The "Life problem" club discussed "Social amusements" on Sunday evening, March 5. The discussion will be continued on March 12.

The clubhouse has added to its salable merchandise list large photographic views of Panama and the Canal Zone, and pennants of the various fraternal orders on the Zone.

Twenty-five men have enrolled in the health league. Apply to Mr. Ludwig for particulars.

CRISTOBAL.

In the bowling match with Culebra on Saturday night, Cristobal won two of the three games, with the following scores:

Culebra.				Cristobal.			
Carlson	85	83	89	Barnett	75	100	92
Baumer	85	83	90	Howard	96	82	85
Koperski	85	69	74	Adams, D	109	101	94
Kersey	92	76	95	Louch	91	95	79
Case	82	83	110	Herring	74	99	107
Total	429	394	458	Total	445	477	457

Work will be begun shortly on the two new bowling alleys, the material being assembled at the building.

The Cristobal vaudeville troupe will present their vaudeville show on Friday, March 10, and will appear at Gorgona on March 11, and at Empire on March 31, with possibly other dates later on.

The Cristobal chorus has been limited to 14 men, who will continue to practice with the vaudeville show.

PORTO BELLO.

Twenty members have joined the health league which at present is being organized in all parts of North America by Geo. J. Fisher, M. D. The chief value for Zone members will be in the health literature received from time to time.

The Caveny Entertainment Company from the States will be at Porto Bello on Friday evening, March 10.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending March 4, follows:

DATE.	Hours worked.	Cubic Yards.
February 27	9:50	2,674
February 28	9:55	2,847
March 1	9:10	3,201
March 2	10:05	2,977
March 3	8:30	2,595
March 4	9:40	3,357
Total	57:10	17,651

Pacific Division Sand Service for February.

DESTINATION.	Number of Cars.	Cubic Yards.
Pacific Division	2,366	35,490
Atlantic Division	9	205
Central Division	17	255
Quartermaster's Department	2	50

Miscellaneous	1	25
Total	2,396	36,050

OFFICIAL CIRCULARS.

Inspection and Adjustment of Scales.

CULEBRA, C. Z., March 4, 1911.

CIRCULAR No. 373:

The Mechanical Division is hereby charged with the inspection, adjustment, and repairing of all counter, platform, wagon, and railroad scales used by the different divisions and departments of the Isthmian Canal Commission and of the Panama Railroad Company.

Each scale will be inspected and adjusted once each quarter, and if repairs are found necessary, their character and extent will be reported by the Superintendent of the Mechanical Division to the head of the division or department concerned.

Division engineers, the General Superintendent of the Panama Railroad Company, and heads of departments, will furnish the Superintendent of the Mechanical Division with a list showing the kind and location of all scales under their jurisdiction.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Disposition of Surveyed Property.

CULEBRA, C. Z., February 24, 1911.

ALL ACCOUNTABLE OFFICERS:

Whenever it becomes necessary or advisable to change the approved disposition of equipment or property which has been surveyed, it is directed that request for such change be made direct to the Surveying Officer, who will submit his recommendation, and, if approved, such change will be directed.

H. F. HODGES,
Acting Chairman and Chief Engineer.

No Hunting on Watershed of Reservoir.

CULEBRA, C. Z., March 1, 1911.

CIRCULAR No. 372:

Employes hunting on the watershed of any reservoir in the Canal Zone will be punished by suspension or discharge.

H. F. HODGES, *Acting Chairman.*

Classified Expenditures.

EMPIRE, C. Z., February 21, 1911.

CIRCULAR No. 29:

The following changes in classified expenditure accounts are authorized, effective January, 1, 1911:

370. *Miscellaneous General Expenses.*

C. Y. M. C. A. Clubhouses.

1. Operation.

To this account will be charged the salaries and expenses of officers and employes connected with clubhouses, also the expenses of furniture, fixtures, and supplies; and all other expenses paid by the Commission, except the cost of constructing, repairing, and furnishing new buildings.

2. Furnishing New Buildings.

To this account will be charged the initial cost of all furniture and fixtures for new clubhouse buildings which are payable from I. C. C. funds.

W. W. WARWICK,
Examiner of Accounts.

Approved: H. F. HODGES,
Acting Chairman and Chief Engineer.

Certificates for Injury.

ANCON, C. Z., January 23, 1911.

TO ALL CONCERNED:

Hereafter, in issuing certificates for injury cases, the physicians will pay no attention to that part of the certificate referring to fault, or no fault, as this question will be determined from the report of accident made out by the foreman at the time the employe is injured.

Under the head of "Remarks" on the certificates, the physician is directed to state the exact nature and extent of the injury in each case.

Respectfully,
JOHN L. PHILLIPS,
Assistant Chief Sanitary Officer.

ANCON, C. Z., February 27, 1911.

TO ALL CONCERNED:

Referring to circular from this office under date of January 23, 1911, directing that physicians in making out sick certificates, where employes are injured on the work, pay no attention to that part of the certificate reading "Through Fault," or "Through No Fault," which was to be covered by foreman's certificate, it was not intended to cover sick certificates through injury not received on the work, and where the injury would be covered by sick certificate in distinction from injury pay.

Physicians making out sick certificates in case of injury not received on the work will, after ascertaining the facts in the case, state whether it was through fault, or no fault.

By order of the Chief Sanitary Officer.

JOHN L. PHILLIPS,
Assistant Chief Sanitary Officer.

Steamer Cristobal to Be Repaired.

CULEBRA, C. Z., March 4, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

The steamship *Cristobal* will be placed in drydock for repairs on arrival in New York after her next sailing from the Isthmus, about March 21, and no requests for reduced rate transportation for a later sailing will be issued until further notice.

By direction of the Chairman.

Respectfully,
C. A. MCILVAINE, *Chief Clerk.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa during the week ending March 4, 1911:

Clyde, February 26, from New York, with 9 reels wire cable for Pacific Division; 20 pieces steel channel, 200 cases washing powder.

Prinz Sigismund, February 27, from New York with 133 cases fuses for stock.

Pleiades, February 27, from San Francisco, with 29 packages fittings for Pacific Division.

Panama, March 1, from New York, with 8 cases tiles, 15 reels wire rope for Atlantic Division; 7 pieces castings, 4 cases castings, 72 packages concrete machinery for Central Division; 140 bundles brake shoes for Mechanical Division; 12 cases drugs and sundries for Sanitary Department; 38 crates iron valves, 200 cases toilet paper, 15 kegs wire nails, 11 cases hacksaw blades, 11 cases iron nuts, 65 bags Sucrene feed, 34 bundles handles, 100 kegs bolts for stock; and a miscellaneous cargo, the whole consisting of 809 packages, weighing 201 tons.

Turrialba, March 2, from New Orleans, with 63 bundles cypress shingles for Atlantic Division; 75 barrels sea coal facing for stock.

Metapan, March 2, from New York, with one 20-ton locomotive coaling crane for Pacific Division; 26 barrels drift bolts for stock.

Rainfall from February 1 to 28, 1911, Inclusive.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MARCH 15, 1911. No. 29.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Highest Daily Excavation.

All daily records for excavation in the Central Division were broken on Saturday, March 11, when the total amount of material excavated within the limits of the Central Division aggregated 80.341 cubic yards. Of this amount, 79.484 cubic yards were removed by 51 steam shovels and two orange peel cranes, the latter excavating 1,191 cubic yards of material from the Canal prism. The following amounts of material were removed from the different sections of the Central Division:

In the Chagres construction district, nine steam shovels of the 100-class and two orange peel cranes excavated 13,331 cubic yards of material.

In the Empire construction district, 20 shovels excavated 27,374 cubic yards of material, principally rock.

In the Culebra construction district, 21 shovels excavated 37,639 cubic yards of rock and earth.

In the Pedro Miguel construction district, one shovel excavated 1,140 cubic yards of rock.

In addition to the amounts already mentioned, there were excavated by hand work 482 cubic yards, and by scraper 375 cubic yards.

Of the total amount excavated on March 11th, 79,206 cubic yards were removed from the Canal prism, 1.105 cubic yards from the Obispo diversion, and 30 cubic yards from outside work.

Previous to the beginning of the present month, the highest daily record was made on April 8, 1909, on which date the total excavation within the limits of the Central Division aggregated 78,559 cubic yards. At this time, however, Lidgerwood flat cars were credited with a capacity of 20 cubic yards, place measurement, while at the present time they are counted as containing but 19 cubic yards, place measurement, although they are loaded as heavily as in 1909. Had figures now used for the contents of Lidgerwood cars been applied to the excavation of April 8, 1909, the output for the day would have aggregated 76,253 cubic yards, instead of 78,559 cubic yards, as was then reported, or about 4,000 cubic yards less than the total excavation of March 11, 1911.

Canal Fortifications.

An initial expenditure of $3,000,000 for the fortification of the Panama Canal is authorized in the Sundry Civil Act approved on March 4, 1911, in the following terms:

> "For construction of seacoast batteries on the Canal Zone, two million dollars.
>
> "For the purchase, manufacture and test of seacoast cannon for coast defense, including their carriages, sights, implements, equipments, and the machinery necessary for the manufacture at the arsenals, to cost ultimately not to exceed one million nine hundred and sixty thousand dollars, one million dollars, the same to be immediately available and to continue available until expended."

By recommendation of the Panama Fortification Board, the work on the Isthmus will be done under the direction of the Isthmian Canal Commission. The original estimate for this purpose was $14,104,203, and was published in THE CANAL RECORD of May 18, 1910. The estimate sent to Congress on November 1, 1910, provided for an appropriation of $19,546,843. A report of the fortification board of January 4, 1911, reduces the amount to be appropriated to $12,475,328.

The estimates on which the initial appropriation was made recommended seacoast armament for the defense of the Canal against naval attack by 14-inch rifles, 6-inch rifles, and 12-inch mortars.

Excavation Along Chagres River.

Excavation in the section of the Canal along the Chagres river between Gatun and Culebra Cut is within 600,000 cubic yards of completion, and, by the middle of next month all work that the Central Division forces can do during the present year will have been completed. There yet remain 178,000 cubic yards at Bohio, which is to be sluiced by a contractor, 6,000 cubic yards in the right-of-way of the Panama railroad at Bohio, 253,000 cubic yards at San Pablo, 20,000 at Tabernilla, 126,000 at Gorgona on which a contractor is now working, and the small quantity at Gorgona which the Central Division will finish by April 10.

The 6,000 yards at Bohio, and the 253,000 at San Pablo, will not be excavated until the present line of the Panama railroad is abandoned for the relocation, because the work would interfere with traffic. Sluicing at Bohio is about to begin; the steam shovel work at Tabernilla is almost finished, and the contract excavation at Gorgona is under way. The contractor on this piece of work has erected two steam-driven centrifugal pumps, which draw water from the river and force it through pipe to any part of the excavation desired. It is proposed to erect a movable sluice box into which the earth excavated will be dumped, to be carried by the water into the river.

The Central Division has an economical dump at Gorgona by means of which the Chagres is utilized. It is a trestle across the river upon which the spoil trains are run and dumped, the water carrying the material away. Five thousand cubic yards a day have been dumped over this trestle six days a week for the past six weeks, and the river has cleared it all away. The river bottom has been raised from 10 to 15 feet by this process, and, in consequence, a deep pond has been formed above the trestle. The water thus impounded escapes through a narrow channel under a head of five feet, or more, and sluices the dump as rapidly as the cars are unloaded.

The work at Mamei is finished, except for a small quantity of hand excavation and the removal of the old French dredge, both of which are in progress.

Empire-Chorrera Highway.

A survey, preliminary to the construction of a Zone highway from the village of Empire to the Canal Zone boundary three miles north of Arraijan, following for some distance the route of the present Empire-Chorrera trail, has been authorized. Trails from Miraflores, Pedro Miguel, Paraiso, Culebra, and Empire converge just inside the Zone line and enter Arraijan, a native town situated about one-eighth of a mile from the Panama side of the boundary. The trail from Pedro Miguel was considerably used at one time, and, in 1906, the Canal Zone Government had it widened and cleared. Lock construction at Pedro Miguel blocked the entrance to that village, and it is now much less used than formerly, and has again become choked with vegetation.

From Empire to Arraijan the trail traverses one of the best agricultural sections in the Canal Zone, and a large amount of fruit and produce is brought over it by pack horse and marketed in Empire. During the rainy season parts of this trail become almost impassable, due to the mud and the lack of bridges over the two or three streams that have to be crossed, thus interrupting traffic for days at a time. The proposed road will be about six and one-half miles in length, and while it will pass Arraijan considerably to the north, a fairly good trail will lead from it to the village. Prison labor will be utilized. There is a good wagon road extending west of Empire to the old rock quarry, a distance of about a mile from the railroad station. Near the quarry the Chorrera trail diverges and crosses the first range of hills through a steep and narrow pass, which, in wet weather, is muddy and badly washed out. The survey contemplates avoiding this pass altogether, and the ascent of the range where an easier grade can be established. The new road will probably be 16 feet in width, will conform closely to the

NOTES OF PROGRESS.

(*Continued.*)

recommendations of the committee on standard road construction in the Canal Zone, and will be built under the direction of the municipal engineer of the Central Division. Temporary improvements, consisting of fills in low places, and of creosoted plank bridges across ravines and gullies, have recently been made along the trail.

From the Zone line to Chorrera, a distance of eight or nine miles, the trail runs in a southwesterly direction. The Panama Government has given assurance that it will continue the highway built to the Zone line into Chorrera, thereby making this entire section of country accessible to Empire. Chorrera is a native village of about 3,500 inhabitants, situated near the Chorrera River, and about four miles from the falls, which are the largest in this part of the Isthmus. There are many farms of considerable extent in that section on which cattle are raised, and corn and other produce grown.

Gatun Spillway.

Concrete was placed in the spillway of Gatun Dam during the week ending March 11, as follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
March 6	154	13:00	2
March 7	294	15:00	2
March 8	330	17:00	2
March 9	286	15:00	2
March 10	318	17:00	2
March 11	360	17:00	2
Total	1,742	94:00	2
Previously reported	122,644		
Grand total	124,386		

Changes at East Balboa Electric Plant.

The installation of a 500-kilowatt, low pressure, turbo-generator, to displace all of the present electrical generating equipment at the power and air compressor plant, near East Balboa, has been authorized. The main engine shaft at the plant broke on January 1, placing the larger of the two alternating current generators out of commission, and curtailing the production of current for lighting purposes. Since then, the Pacific Division plant at Miraflores has been carrying part of the night load. The East Balboa plant has been supplying alternating current for day and night lighting in Ancon, Balboa, and East Balboa, and direct current for the operation of the cranes on the Panama railroad wharf and for the motors in the Pacific Division machine shop at Balboa. The new generator will be of the 2200-volt, 3-phase, 25-cycle type, and its installation will necessitate the substitution of the present direct current motors on the wharf, and in the machine shop, with 220-volt, 3-phase, 25-cycle motors.

The committee, who had the matter in charge, considered the feasibility of furnishing all current in the area between Balboa and Pedro Miguel from the Miraflores plant, but the determination was reached that the latter could not safely assume the extra day load without danger of interruption to the work in the Pacific Division. Under the new arrangement, the Balboa and Miraflores plants will be operated in parallel; the Balboa plant will carry its present day load, operating under power furnished by the exhaust steam of the air compressors, which will not only constitute a fuel economy, but will obviate any necessity for additional boiler capacity; while the Miraflores plant will assume the night load. In addition to the electric current required at Balboa during the day, there is sufficient energy in the exhaust steam to furnish from 100 to 200 kilowatts to the system now operated by the Miraflores plant.

It was also recommended that the present circulating water system for the condenser at the Balboa plant be retained, but that a motor-driven centrifugal pump, available on the Isthmus, be substituted for the nonexpansive circulating pump now in use. This arrangement contemplates the continuance of the pool and spray system for reducing the temperature of the circulating water in the condenser, now standing at about 83 degrees Fahrenheit.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 57 per cent of the concrete for the system of three twin locks at Gatun has been laid, the exact amount in place at the close of work on March 11, being 1,180,640¾ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending March 11, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily. and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 380 yards shown for the portable mixers were reinforced concrete, and were placed on the following days: March 6th, 77½ yards; March 7th, 68½ yards; March 8th, 51 yards; March 9th, 45½ yards; March 10th, 67½ yards; March 11th, 70 yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 68 per cent completed, 575,717 cubic yards, out of a total of 837,400, having been placed at the close of work on March 11. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixer.			Large stone.	Total.

Grand total										3,610	152.286

*At Miraflores, the amount of concrete laid by hand, which is included in the total for each day was, as follows; March 6th, 10 yards; March 7th, 14 yards; March 8th, 6 yards; March 9th, 15 yards; March 10th, 28 yards: March 11th, 10 yards; total, 83 yards.

STEAM SHOVEL RECORDS.

Central Division and Relocation Work.

During the month of February the total amount of material excavated in the Central Division was 1,630,758 cubic yards, of which 477,477 cubic yards were classified as earth, and 1,153,281 cubic yards as rock. Of this quantity, 1,600,597 cubic yards were removed by steam shovels, 5,096 cubic yards by scraper, 16,699 cubic yards by bucket cranes, and 870 cubic yards by hand. Contractors removed 4,304 cubic yards by sluicing, and 3,192 cubic yards by hand.

The high record for the month was made by shovel No. 256, working 23 days in the Culebra district, which excavated 57,754 cubic yards of rock. The second best record for the month was made by shovel No. 206, working 23 days in the Culebra district, which excavated 55,695 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 21 days in the Culebra district, which excavated 34,193 cubic yards of earth.

Shovel No. 201, working in the Empire district, made a high record for one day by excavating 3,249 cubic yards of rock on February 9. Shovel No. 126, working in the Chagres district, excavated 2,820 cubic yards of earth on February 21, and this is the high record for one day for a shovel of the 70-ton class, during the month.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown below:

*70-ton class.

Relocated Line, P. R. R.

The total excavation on the relocation of the Panama railroad for the month of February was 320,238 cubic yards, of which 129,428 cubic yards were earth, 3,020 cubic yards loose rock, and 186,790 cubic yards solid rock.

Six steam shovels on the Gatun-Monte Lirio section removed 252,815 cubic yards.

On the Gold Hill section, a total of 67,423 cubic yards were excavated, 40,648 cubic yards by pan car task work, 20,720 cubic yards by contract, also done by pan cars, and 3,800 cubic yards by steam shovel.

The best record was made by steam shovel No. 257, working south of Gatun, which excavated 1,345 cubic yards of earth and 57,550 cubic yards of rock, a total of 58,895 cubic yards in 23 working days.

The best record for a 70-ton shovel was made by steam shovel No. 117, also working on the Gatun section, which excavated 1,000 cubic yards of earth and 38,990 cubic yards of rock, a total of 39,990 cubic yards in 23 working days.

The best day's record for shovels with 5-yard dippers was made by steam shovel No. 257, which excavated 3,360 cubic yards of rock on February 18. This shovel excavated 3,350 cubic yards on February 17, which was the second best record. On February 2, steam shovel No. 262 excavated 3,260 cubic yards of rock.

In the 70-ton class, the best day's record was 2,190 cubic yards of earth and rock, excavated by steam shovel No. 121, on February 28.

BEST RECORDS FOR THE MONTH.

Shovel No.	Cubic Yards by Cross Section. Days worked.	Earth	Rock.	Total.
257	23	1,345	57,550	58,895
262	23	20,670	33,250	53,920
117	23	1,000	38,990	39,990

Total output during the month of February, 1911, 256,615 cubic yards.

Total number of steam shovel working days, 143.

Average output per working day, 1,795 cubic yards.

I. B. of S. S. and D. M.

Local No. 19 of the International Brotherhood of Steam Shovel and Dredge Men will hold its regular meeting on Sunday, March 19, at the I. C. C. lodge hall, Empire, at 12.15 p. m. All brotherhood men are requested to attend this meeting.

WALTER P. TUDOR, *Secretary and Treasurer.*

Empire,, C. Z., March 10, 1911.

PERFORMANCE OF TRACK SHIFTERS.

A statement of work performed by the nine track shifters in the Canal service during the months of October and November, 1910, has been prepared showing: (1) Time consumed. (2) Working efficiency of each machine based on an arbitrary amount of 10,000 feet of track shifted per day. (3) Per cent of time actually worked. A summary of performances for these two months shows that the five track shifters in the Central Division had an average efficiency of 63.5 per cent, and the per cent of time used 46.5. In the Atlantic Division, with two shifters, the average efficiency was 24.5 per cent, and the per cent of time used 62. In the Pacific Division, with two machines, the average efficiency was nine-tenths of one per cent, and the per cent of time used three and four-tenths. The low efficiency in the Pacific Division is due principally to the light demand on the services of the shifters, which, however, will be considerably augmented when the dry excavation work in the lower lock at Miraflores is fully under way. The statement, in detail, follows;

OCTOBER, 1910.

DIVISION.	Location.	Track shifted. (Feet.)	Time consumed. (Hours.)†	In shop. (Days)	Per cent of efficiency.*	Per cent time worked.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

At the meeting of the executive board of the Cristobal Woman's Club held on Wednesday morning, March 8, the resignation of Mrs. F. C. Crummett as treasurer was accepted, and Mrs. Fred Guderian was appointed in her place. The program at the meeting of the home department on Wednesday afternoon, March 8, consisted of papers on the business side of housekeeping. The home department will close the year's program, with papers on the poets, on April 12. The annual meeting and election of officers will be held on April 26.

The president of the Canal Zone Federation was the guest of the Paraiso Woman's Club on Wednesday, March 8, and spoke on "Child welfare."

The Gatun Woman's Club will hold its quarterly election of officers on March 31. At this meeting, papers on public health will be read, and the program will close with a drill in parliamentary law.

An exhibit of the federation pictures will be held by the Gorgona Woman's Club at the residence of Mrs. B. F. Henckle, house No. 83, beginning on Wednesday afternoon, March 16, and continuing until Friday evening, March 17. The exhibit will be open to all residents of Gorgona.

The next meeting of the Empire Woman's Club will be held at the home of Mrs. J. H. Westberg on Thursday, March 16. A number of women from Las Cascadas have joined the club. Mrs. C. R. Lingo has been appointed in charge of the current events program for each meeting.

Church Work.

A meeting of those interested in missionary work on the Isthmus will be held at the Gorgona chapel on Wednesday afternoon, March 22, under the direction of Mrs. J. Leon Webster, representative for the Canal Zone of the Woman's Foreign Missionary Society of the Methodist Episcopal Church. Mrs. W. W. Gray will deliver an address.

The Salvation Army has opened a barrack at Gatun, and has also extended its work along the coast, by establishing branches at Port Limon and Bocas del Toro. On Sunday, February 11, Colonel Maidment, commander for the West Indies, British Guiana, and Panama, paid a visit of inspection to the institute in Colon, when a conference of the heads of the divisions in the Canal Zone was held. Since the beginning of the year, Adjutant George Catlin, and Mrs. Catlin, of England, have been in charge of the social institute at Colon and the work on the Isthmus.

Secret Societies.

A meeting of those interested in the organization of a Canal Zone chapter of the Order of the Eastern Star will be held at the lodge hall in Gorgona on Sunday, March 19, at 2.30 p. m..

At the recent dance held by the Pythian Sisters in the lodge hall at Las Cascadas for the benefit of the Pythian sanitorium at Las Vegas, N. M., the receipts were $100.

Lawn Tennis.

At the tournament in singles held by the Isthmian Tennis Association at Empire on March 5, the following was the result: Preliminaries—Stokes, Empire, defeated Deane, Panama, 6–4, 6–3; Ross, Tivoli, defeated Rogers, Culebra, 6–1, 6–2; Dryden, Cristobal, defeated Wells, Gatun, 6–4, 6–4.

Semifinals—Stokes defeated Rogers, 4–6, 6–3, 6–4; Ross defeated Dryden, 6–3, 6–2.

Finals—Ross defeated Stokes, 8–6, 8–6.

The next tournament of the association will be held in doubles at Panama on April 2. The winning club of this tournament will become the custodian of the Maduro-Lupi cup for the season of 1911.

W. M. Wood of Empire, will be pleased to hear from members of tennis clubs on the Isthmus, who have passed their fortieth birthday, and are interested in a tournament, with suggestions as to time, date, place, rules, etc.

Colon Humane Society.

A meeting of the Colon Humane Society was held at the government palace on Tuesday evening, March 7, at which a committee was appointed to investigate the condition of the animals in the Panama railroad corral, and to decide upon the question of the appointment of a veterinary, who will look over and examine each animal once a month. A food inspector for Colon was appointed.

Public Schools.

The students and faculty of the Canal Zone High School entertained their friends and patrons at the school on Friday afternoon, March 10, when Col. W. C. Gorgas delivered an address on sanitation. A violin solo was played by Miss Maria Elise Johnson, and a piano solo by Arthur Vickery; and school songs were sung. At the close there was an informal reception at which refreshments were served by the school.

The second number of the Canal Zone High School periodical, *The Zonian*, has been issued. It is in magazine form, and contains stories, essays, and verses by the students. Class and athletic notes form special features, and a new department has been introduced containing letters from former students. The paper has been placed on sale throughout the Canal Zone, and the proceeds will be devoted to the piano fund. A "Commencement" issue of *The Zonian* will be brought out at the close of the school year.

Observance of St. Patrick's Day.

The Cristobal Catholic Club will hold a banquet at the Cristobal hotel on Saturday evening, March 18, in commemoration of St. Patrick, the patron saint of Ireland. The members of the Isthmian Canal Commission, and the officials of Panama, have been invited to attend. The Marine Band has been engaged to furnish music for the occasion. A special train will be run on that evening, leaving Panama at 5.45 o'clock and stopping at the various stations along the line, returning after the banquet.

Missing Men.

Any one having information regarding the present whereabouts of James Francis Quinn, who left the service of the Commission in June of last year, is requested to communicate with his brother, Joseph S. Quinn, 233 West 148th street, New York City.

Any one having information regarding the whereabouts of Harvey E. Diehl, who is supposed to be on the Isthmus, is requested to communicate with Mr. William N. Diehl, 408 Seaboard Bank Building, Norfolk, Va.

Any one having information regarding the following men, who are supposed to be on the Isthmus, are requested to communicate with The Canal Record: E. E. White, Patrick Carroll, J. L. Barnes, Patrick Kane, and Herbert Howe.

Any one having information regarding the whereabouts of Lester Tarplay, supposed to have come to the Isthmus from New Orleans during the latter part of 1910, is requested to communicate with W. S. Standifer, Bohio.

Any one having information regarding the whereabouts of H. Eugene Stribling, who is supposed to have come to the Isthmus, is requested to communicate with Geo. L. King, Porto Bello.

A Dime Savings Bank for West Indians.

A dime savings bank has recently been opened in connection with Christ Church, Colon, for the purpose of teaching and encouraging thrift among the West Indians of the parish. The business is operated by a manager, the rector of the church, a board of trustees, and a board of directors. Deposits are received once a week, and each person is allowed to deposit any sum between ten cents and one dollar. When a depositor has $25 in the bank, the amount will be transferred and placed at interest with one of the banking companies of the city of Colon. The number of depositors is already large.

Obituary.

Mrs. E. B. Clark, wife of E. B. Clark of Gatun, died at Ancon Hospital on March 5, after an illness covering three days. She was born in Mississippi twenty-two years ago, and had been on the Isthmus for several years.

Mrs. Lillie Gibson, wife of Capt. J. K. Gibson, living at Cristobal, died at Colon Hospital on March 13. She was 32 years of age, born in Belfast, Ireland, and had been on the Isthmus four years.

Mrs. Daniel J. McGraw, wife of Daniel J. McGraw, living at Pedro Miguel, died at Ancon Hospital on March 10. She was 27 years of age, born in Indiana, and had been on the Isthmus about three and a half years.

Mrs. Margaret Callahan, mother-in-law of H. Snyder, living at Empire, died at Ancon Hospital on March 12. She was 81 years of age, born in Cornwall, Ontario, Canada, and had been on the Isthmus nine months.

Spanish War Veterans.

Chagres Camp, No. 2, U. S. W. V., will hold its next meeting on Sunday, March 19, at 3 p. m., in Culebra lodge hall. All members of the order are invited to attend, and prospective members are also invited to be present at that time.

B. P. O. E.

Elks in good standing will meet at Hotel Imperial, Colon, on Sunday, March 19, at 10 a. m. All Elks are requested to attend.

Modern Woodmen.

All members of the Modern Woodmen of America who wish to form a Good Fellowship Camp on the Isthmus, are requested to communicate with W. W. Darling, Gorgona, C. Z.

At a meeting of Panama Council, No. 1371, Knights of Columbus, on March 12, resolutions of sympathy for D. J. McGraw were adopted on the death of his wife.

A special meeting of the Panama Canal Service Medal Association will be held at the Gatun lodge hall on Sunday, March 19, at 2 p. m.

FUNDS FOR CANAL WORK.

Appropriation for 1912, and Total of Appropriations for Past Years.

Provision for carrying on the Canal work during the fiscal year beginning July 1, 1912, was made by Congress in the Sundry Civil Act of March 4, 1911. The appropriation amounts to $45,560,000, divided into the following items:

Salaries of officers and employes in the United States	$130,000
Incidental expenses in the United States	50,000
Salaries of Commission, officers, employes on the Isthmus, other than skilled and unskilled labor, in the Departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts	3,900,000
Skilled and unskilled labor on the Isthmus in the Departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts	16,500,000
Materials, supplies, and equipment, and other expenses not in the United States for the Departments of Construction and Engineering, Quartermaster's, Subsistence, Dishursements, and Examination of Accounts	19,000,000
Miscellaneous expenditures, recruiting laborers, transporting lahorers and other employes, and expenses not otherwise provided for in the Departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts	950,000
Salaries of officers and employes, other than skilled and unskilled laborers, Department of Civil Administration	550,000
Skilled and unskilled labor, Department of Civil Administration	20,000
Materials, supplies, etc., and contingent expenses, Department of Civil Administration	110,000
Salaries of officers and employes, other than skilled and unskilled laborers, Department of Sanitation	600,000
Skilled and unskilled labor, Department of Sanitation	200,000
Materials, supplies, etc., and contingent expenses, Department of Sanitation	800,000
Relocation of Panama railroad	2,750,000
Total	$45,560,000

The entire appropriation is available until expended; ten per cent of each item may be used interchangeably, but not more than 10 per cent added to any one item.

The provisions of the appropriation act for the fiscal year 1911, directing that expenditures shall be paid from the proceeds of the sale of Canal bonds, and that no part of the appropriation shall be applied to the payment of allowances for longevity services or lay over days accruing after July 1, 1909, are retained. There are inserted the following new clauses:

"Except in cases of emergency, or conditions arising subsequent to and unforeseen at the time of the passage of this Act, there shall not be employed at any time during the fiscal year 1912, under any of the foregoing appropriations for the Isthmian Canal, any greater number of persons than are specified in the notes submitted respectively in connection with the estimates for each of said appropriations in the annual book of estimates for said year, nor shall there be paid to any of such persons during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on the first day of July, 1910, and all employments made or compensation increased because of emergencies or conditions so arising shall be specifically set forth, with the reasons therefor, by the Chairman of the Commission in his report for the fiscal year 1912.

"Hereafter, the Panama Railroad Company shall carry no insurance to cover marine or fire losses, nor make any further payment on the principal or interest on notes heretofore given by it to the United States for moneys appropriated for its use.

"That until the close of the fiscal year 1912, when any material, supplies, and equipment heretofore or hereafter purchased or acquired for the construction of the Isthmian Canal is no longer needed, or is no longer serviceable, it may be sold in such manner as the Secretary of War may direct, and without advertising in such classes of cases as may be authorized by him.

"That hereafter, the Act granting to certain employes of the United States the right to receive from it compensation for injuries sustained in the course of their employment shall apply to all employes under the Isthmian Canal Commission, when injured in the course of their employment; and claims for compensation on account of injury or death resulting from an accident occurring hereafter shall be settled by the Chairman of the Isthmian Canal Commission, who shall, as to such claims and under such regulations as he may prescribe, perform all the duties now devolving upon the Secretary of Commerce and Labor: *Provided*, That when an injury results in death, claim for compensation on account thereof shall be filed within one year after such death.

"Hereafter, the Panama Railroad Company shall not be required to give bond, either with or without surety, in contracts which it may make to furnish services, materials, or supplies to the Army, Navy, Marine Corps, or other departments of the Government, and such contracts may be made for periods less than one year, as may be agreed on, and formal contracts in writing shall not be required unless agreed on."

A statement follows showing the appropriations by Congress for the Isthmian Canal, separated by the different Acts, and showing the total amount appropriated:

ACT OF CONGRESS APPROVED.	Appropriation.	Deficiency.
June 28, 1902	*$40,000,000.00	
May 28, 1904	†10,000,000.00	
June 28, 1902	10,000,000.00	
December 21, 1905	11,000,000.00	
February 27, 1906		$5,990,786
June 30, 1906	25,456,415.08	
March 4, 1907	27,161,367.50	
February 15, 1908		12,178,900
May 27, 1908	29,187,000.00	
March 4, 1909		5,458,000
March 4, 1909	33,638,000.00	
February 25, 1910		76,000
June 25, 1910	37,855,000.00	
June 17, 1910	‡1,200.00	
January 13, 1911	‡1,500.00	
February 13, 1911	‡1,704.18	
March 4, 1911	45,560,000.00	
Total	$269,862,186.76	$23,703,686
Deficiency	23,703,686.00	
Grand total	$293,565,872.76	

*For purchase of Canal rights from the French.
†For purchase of Canal Zone rights.
‡Special acts, relief of private persons.

Work at Gorgona Shops.

A railroad inspection car driven by a gasoline engine and capable of accommodating five passengers, in addition to the operator and two other persons on the front seat, is nearing completion at the Gorgona shops. The underframe is of steel and the body is of steel plate welded by the oxy-acetylene process. The length over all is 15 feet, and the length of the body nine feet. The car is similar to the inspection cars purchased in the States, excepting that the power transmission is by means of friction discs.

A lifting magnet has been attached to a 25-ton locomotive traveling crane for the purpose of handling scrap at the shops more expeditiously, and with greater economy, than by the old process of loading it in dumping buckets. The motor generator set, with which the crane has been equipped, generates a current of 220 volts, eight kilowatts. The lifting magnet has a diameter of 52 inches, and is suitable for handling steel, angle iron, scrap, and pig iron. In a recent test the crane handled 30 tons of pig iron from piles to cars in 45 minutes, only one man being engaged in the operation. A similar amount of material, loaded by means of dumping buckets and a crane, formerly required half a day and 15 men.

Postal Business and Canal Zone Revenues.

The report of the Director of Posts for the month of February shows that 17,431 money orders were issued, amounting to $445,186.72. Of this amount, $340,013.03 was issued payable in the United States, $104,585.19 in orders payable in the Canal Zone, and $588.50 in orders payable in Martinique. The fees collected amounted to $1,946.26, and the amount paid and repaid during the month was $94,180.34.

Postal sales during the month amounted to $6,599.80, and newspaper postage amounted to $3.61.

The revenue collections for the month were, as follows:

Distillation licenses	$ 68.16
Insurance company fees	281.99
Motor vehicle licenses	111.00
Taxes, licenses, etc	7,490.55
Total	$7,951.70

Civil Service Examinations.

The following examinations are scheduled to be held in the near future. Request for blank application form should be made as early as possible, stating the position for which it is desired to apply.

Mechanical draftsman, topographic draftsman, physician, postal clerk, and trained nurse, in the Isthmian Canal Service; physician, and trained nurse, in the Indian and Philippine services. Women will be admitted to examination for trained nurse in all services.

It is to be noted that for examinations for appointment to the Isthmian Canal or Philippine services it is not required that the vouchers in an application be executed by persons who are residents, either *bona fide*, or bodily, of the State or Territory claimed by the applicant as *bona fide* residence.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
Culebra, C. Z., March 10, 1911.

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending March 11, follows:

DATE.	Hours worked.	Cubic Yards.
March 6	5:56	2,647
March 7	7:04	3,600
March 8	6:30	3,329
March 9	7:01	3,395
March 10	6:59	3,427
March 11	7:02	3,230
Total	40:32	19,628

Ancon Rock Crusher.

A statement of rock crushed at Ancon quarry during the week ending March 11, follows:

DATE.	Hours worked.	Cubic Yards.
March 6	9:50	3,175
March 7	7:50	3,074
March 8	10:35	3,034
March 9	8:25	2,583
March 10	9:50	2,737
March 11	10:30	2,761
Total	57.00	17,364

Fatal Accident at Toro Point.

John H. Hobrough, an American employed as a machinist by the Atlantic Division at Toro Point, was fatally injured by the explosion of a tire heater while engaged in making repairs to engine No. 105, about 10 p. m. on Monday, March 13. He was born in St. Paul, Minn., but had lived at Everett, Washington, prior to his appointment in the Isthmian service on November 16, 1910. He was 23 years of age, and unmarried.

The league baseball game between the Empire and Commissary-Subsistence teams, to be played at Empire park on Sunday, March 19, 1911, will be played for the benefit of Conductor C. C. Fitzpatrick. There will be music by the Marine Band.

The Atlantic second team defeated a team representing Gorgona shops by a score of 14 to 6 in a game played on the Lincoln House grounds in Colon on March 5.

The Corozal baseball team defeated the "Commissary Outlaws" at Colon on March 12, by a score of 7 to 0.

Married.

FLEISCHMAN-HENDERSON—At Cristobal, C. Z., on January 22, at 3. 30 p. m., Mabel C. Henderson of Pittsburg, Pa., to I. H. Fleischman of Atlanta, Ga., the Rev. H. A. Brown officiating. Canal Zone residence, Culebra.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending March 11, 1911:

Prinz Joachim, March 6, from New York, with five cases copper wire, 3 barrels valves for stock.

Allianca, March 7, from New York, with 28 crates wheels on axles for Atlantic Division; six pieces cable chain for Pacific Division; eight reels wire rope for Mechanical Division; 72 pieces drill bits, 52 cases machinery for Panama railroad; 10 bundles shovels, 24 cases incandescent lamps, 12 cases dish pans, 12 cases air brake material, 12 packages school desks, 11 cases steel bars, 18 pieces steel plate, 22 pieces railroad frogs, 150 cases common soap, 17 cases babbitt metal for stock; and a miscellaneous cargo, the whole consisting of 516 packages weigning 128 tons.

Barrister, March 7, from Liverpool, with 13 dredge buckets for Pacific Division.

Conway, March 7, from New York, with 12,360 barrels cement, 66,760 bags cement for Atlantic Division; 2,035 pieces steel rail for stock.

Border Knight, March 7, from Baltimore, with 993 tons structural material for Atlantic Division; 1,085 tons steel rods for Pacific Division; 1,500 car wheels for Mechanical Division; 4,934 pieces steel rail, 84 bags cork, 17,000 cases dynamite, 249 pieces galvanized pipe, 15 cases henzine for stock.

Abangarez, March 9, from New Orleans, with six cases castings for Atlantic Division; 24 pieces castings for Central Division; 15,451 feet B. M. yellow pine lumber for Mechanical Division; 200 pieces switch stands, 1,148 bales prairie hay for stock.

Zocopo, March 9, from New York, with 50 casks copper ingots for Mechanical Division; 875 bales prairie, 59 drums lubricating oil for stock.

Family Quarters.

Applications for married quarters were on file March 1, as follows:

The minimum charge shall be for one hour.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Designation of Employes.

CULEBRA, C. Z., March 13, 1911.

CIRCULAR No. 375:

As prescribed in circular letter from this office, dated November 22, 1907, each employe will be given in time books, on pay rolls, and in other official records, that designation adopted in Circulars Nos. 229 and 299 which correctly describes his trade or the class of work performed by him.

All employes incorrectly designated will be redesignated immediately, and should designations other than those prescribed in Circulars Nos. 229 and 299 be necessary, recommendation in regard thereto should be submitted to this office.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Transportation on Official Business.

CULEBRA, C. Z., March 10, 1911.

TO ALL CONCERNED:

The 120-trip tickets issued by the Isthmian Canal Commission will not in future be accepted for transportation on Sundays and holidays, except from members of the I. C. C. Band. Employes whose duties require them to travel on the Panama railroad on Sundays and holidays will obtain official business trip passes for the purpose.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Decauville Material as Scrap.

CULEBRA, C. Z., March 4, 1911.

ALL ACCOUNTABLE OFFICIALS:

No Decauville material of any class will be shipped as scrap until it has been surveyed.

By direction of the Chairman.

Respectfully,
C. A. DEVOL, *Chief Quartermaster.*

Stages of the Chagres.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

Men interested in indoor baseball should be present on Monday and Wednesdays to practice for the league.

CULEBRA.

The 200, or over, bowling scores for the week ending March 11 are, as follows: Duckpins—Hill, 103, 102, 101; bigpins—Huttlemeier, 220; Baumer, 206.

The duckpin bowling team from Cristobal played a match game with the local team on Saturday night, winning two games and losing one. Scores, as follows: Cristobal, 447, 475, 437; Culebra, 438, 449, 463.

The Empire indoor baseball team played the Culebra team on Saturday evening. Score: Culebra, 21; Empire, 14.

"Sex and life, manhood" will be discussed by the "Topic" club on Monday evening, March 20, under the leadership of H. N. Sollenberger.

EMPIRE.

The boy scouts will take an outing on Saturday, March 18.

Moving pictures will be exhibited on Saturday evening, March 18.

The following high scores were bowled during the past week: McLeod, 111; Scull, 125, 103; Danielson, 236; Goolsby, 222, 202; Pinney, 205.

The topic for the discussion club under the auspices of the literary society on March 17 will be "City and country life." The leader will be Mr. Christopherson.

There will be a free special train to the Gatun Carnival on Friday evening, March 17, leaving Empire about 7 o'clock. The glee club will attend in a body.

GORGONA.

The bowling alleys are being fully overhauled and planed, and will probably be open to the public on March 25. The February duckpin scores over 100 were, as follows: Otis, 114, 102, 106, 108; Montgomery, 107, 107, 101; Gailliott, 111; Davis, 102; Kaufman, 101, 104; Stoehr, 107; Edwall, 101; McWilliams, 104, 101, 101, 114; Wright, 106; Ellsworth, 115; Willison, 103; Dunlop, 102; Gaedke, 104.

The 200, or over, scores in bigpins were, as follows: Sammetinger, 205; McConaughey, 214, 221, 202, 206, 219; Bordt, 205, 214, 200; Varenkamp, 223, 214; Gaedke, 218, 202; Stoehr, 207, 204, 202, 207; Halderman, 202, 200, 202, 216; Gailliott, 207; Stewart, 200, 244, 212, 204, 206; Miller, 200; Canfield, 227; Tretter, 224; Haggerty, 205; Mrs. Cocoran, 235, 201.

The Caveny Company will give a return engagement on March 28.

The Cristobal vaudeville company will give an entertainment on March 21.

The Cristobal indoor baseball team was defeated by the local team on Saturday, March 11, by the score of 24 to 14. The Gorgona team will play at Empire on March 18.

The night men will hold a "St. Patrick's Day smoker" on Friday afternoon, March 17.

GATUN.

Motion pictures will be shown on March 18.

The glee club rehearsal will be omitted on March 16, and the physical culture class on March 17.

The Caveny entertainment wil return to Gatun on March 27.

On March 19, Mr. Barte will give a 10-minute talk on the "City," and Mr. Chenneville will lead the discussion on "Questionable amusements."

The literary and debating club will hold no meeting this week, but will meet on Wednesday night, March 22. Several musical numbers will be added to the program.

CRISTOBAL.

The duckpin match on Saturday night between Empire and Cristobal on the local alleys resulted, as follows:

Empire.				Cristobal.			
Gustavson	84	101	89	Barrett	88	83	84
Parkis	96	.	79	Claherty	109	98	95
Goolsby	....	80	90	Burns, T.	81	81	80
Lippert	85	108	99	Gibson	93	86	109
Gorham	80	91	110	Smith			78
Scull	86	85	....	Rosteck	90	75	....
Total	431	465	467	Total	461	423	446

The sale of tickets for the Caveny entertainment to be given on Friday night, March 17, will be, as follows: Members can secure tickets for themselves and friends up to Thursday, and on Thursday and Friday, tickets will be on sale to nonmembers.

LOST—On March 6, between Ancon Hospital and Paraiso, a gold hunting case watch, with the initials "G. L." engraved on the outside, and "Edward to Georgina" on the inside of the case. A suitable reward is offered for its return to Mrs. F. LaFountain, Paraiso, C. Z.

COMMISSARY DEPARTMENT.

The hours during which commissaries are open are as follows:

Cristobal and Culebra, 8 a. m. to 12.30 p. m. 2 p. m. to 7 p. m.

All other commissaries, 8 a. m. to 1 p. m.; 3 p. m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning March 11.

COLON TO BARBADOS, CALLING AT TRINIDAD.

Trent	R. M.	Tuesday	Mar. 28
Oruba	R. M.	Tuesday	April 11
Magdalena	R. M.	Tuesday	April 25

The next sailing of the Leyland Line will be as follows: *Colonian* on or about March 19, for New Orleans, via Kingston, Ja.

Hamburg-American steamers leave for New York every Tuesday at 10 a. m.; for Jamaica every fortnight, connecting there with steamers for all points in Cuba; for Port Limon every Tuesday, direct, or by way of Bocas del Toro.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursday at 3 p. m.; for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m., and for New York on Thursday at 11 a. m.

Sailings of the French line (Ciè Gènèrale Transatlantique) for Venezuelan ports, Martinique and Guadeloupe on the 3d and 20th of each month.

The following vessels arrived at, or departed from, Balboa during the week ending March 11:

Arrived—March 5, *San José*, from San Francisco; *Barracouta*, from Central America. March 6, *Fenwick*, from San Francisco; U S S *Princeton*, from Corinto; *Peru*, from Valparaiso. March 10, *Ecuador*, from Guayaquil.

Departed—March 6, *Rupanco*, to Buenaventura. March 7, *Manavi*, to immediate ports; *Palena*, to Valparaiso. March 10, *San José*, to San Francisco.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MARCH 22, 1911. No. 30.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of February is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of Canal work in all departments and divisions.

Effect of Blasting on Slides.

In the investigation which is being conducted by the Third Division of the Chief Engineer's office, to determine the effect of blasting on slides in Culebra Cut, the experiments indicate that the "dobeying" or surface blasting has little effect on the slides. The investigation is being continued to determine the effect which varying charges of dynamite at varying depths have on the banks of the Cut. The progress report says:

"The 'dobey' shots seem to produce much greater concussion of the air than the deep blasts. The deep blasts seem to produce earth vibrations that extend well back from the banks of the Canal, varying in intensity with the character of the material, amount of explosive used, etc.

"From the indications and observations made on the banks during the several kinds of blasting, it seems to be probable that the 'dobey' blasts have little effect on the banks, beyond the possibility of displacing small amounts of exposed material previously loosened. It is thought, however, that the concussion of the air produced by the 'dobey' blasting is mainly responsible for the shaking of houses and the damage resulting.

"The effect of this air concussion is plainly shown by placing two barographs side by side, one being fully exposed to the air and the the other carefully protected, both, however, being in similar positions regarding the ground. It has been found that the first instrument will show a distinct record, while a very slight record, if any, will be shown on the other, indicating that 'dobey' shooting does not appreciably affect firm banks, and is, therefore, not initially responsible for sliding of material.

"Particular attention is now being given to the blasting south of the Empire bridge and near the slide at old Culebra. Here it is expected to get information regarding the effect of blasting with different depths of holes and amounts of explosives."

Atlantic Entrance Dredges.

After an experiment which continued about a year it has been decided to equip all ladder dredges at work in the Atlantic entrance with five-sided top tumblers, to replace the four-sided tumblers with which the dredges have been equipped. It has been believed heretofore that a tumbler with more than four sides could not be used effectively, but experience with the five-sided tumblers in dredging done by the Japanese Government led to the adoption of the new style. A cast iron tumbler was made at Gorgona shops and it gave 160 days' service as compared with 70 days' service for the four sided tumblers. On the basis of this experience, three of the new style tumblers made of manganese steel were ordered, and one of them has been installed on dredge *No. 6*. The other dredges will be equipped with the new tumblers as soon as those now in service wear out.

The seagoing suction dredge *Caribbean* has returned to service maintaining the channel in the Atlantic entrance, after three weeks in dry dock during which it was given a general overhauling.

Work has been begun on a derrick barge which will be capable of handling 15-ton rock for the Colon breakwater. It will be used in placing the hard rock surface on the face of the breakwater. The barge will be 90 feet long and 42 feet wide, and will be constructed of creosoted wood.

Excavating and Dumping.

On Saturday, March 11th, 51 shovels working in the Central Division excavated 78,293 cubic yards of material, or an average of 1,535 cubic yards per shovel for the 8-hour working day. This is the highest average output per shovel ever made in the Central Division for one day. On the same day, 49 Lidgerwood trains and five small Western dump trains, or a total of 54 trains, were unloaded on the Balboa dumps, which is the greatest number of trains unloaded at this place since the commencement of work, the next highest record being on September 14, 1910, when 47 Lidgerwood trains and three Western dump trains were unloaded.

Gatun Locks.

False work for the erection of the lock gates is being placed, and the construction of the bridges over the locks for handling the gate material is completed. Advices from the States are to the effect that the first shipment of gate material will be made about the middle of April, and the construction plant at Gatun will be ready to begin the placing of it as soon as it arrives.

A slide of about 2,000 cubic yards of soft material from the east bank moved into the site of the lower locks last week. The movement was so rapid that the steam shovel working at the toe of the bank was caught and slightly damaged.

Repairs to Panama Railroad Ships.

The ships in the Panama railroad service between New York and Cristobal will go into dry dock for repairs, beginning March 31 and continuing until about May 23. In order that the repairs may be made without affecting the regularity of the service the cement carrying ships *Ancon* and *Cristobal* will be put in the regular service, and the cement service will be maintained by ships under the present charter agreement. The *Cristobal* will be in dry dock from March 31 to April 12, the *Allianca* from April 14 to April 26, the *Colon* from April 20 to May 2, the *Panama* from May 3 to May 15, the *Advance* from April 27 to May 5, the *Ancon* from May 18 to May 23. The published schedule of sailings will be changed from April 18 on ships leaving New York, and from May 2 on ships leaving Cristobal. The changes are noted in the regular list of sailings published elsewhere in this issue.

Panama Water Supply.

A 12-inch suction pump will be installed near the south end of the west toe of the dam at Miraflores, with its intake located in the old bed of the Cocoli River, for the purpose of ridding the reservoir of the greater part of its salt-impregnated contents. It has been found that the water covering the river bed, which constitutes the deepest part of the reservoir, was charged most heavily, and if the supply pumps had been situated near this spot, instead of at a considerable distance from it, the water could not have been used at all. Most of the leakage has been stopped by "shooting" the soft material in the core of the dam, thereby filling the crevices in the toe, as it fell back into place again. Only sufficient water to keep the pressure up is now pumped into the 16-inch Panama main.

The water level in the Rio Grande reservoir on March 15 was at about the same height as on the corresponding date a year ago. This is to a large extent due, however, to the auxiliary water supplies, viz., the Cocoli reservoir, the Pedro Miguel River, and more recently, since the use of the Cocoli Lake water has been curtailed, the Caimitillo River. On January 1, 1911, the water in the reservoir was at about 238 feet above sea level, while on March 15 it was at about 230, showing a fall of eight feet. The lowest stage recorded in the Rio Grande reservoir was during the dry season of

NOTES OF PROGRESS.

(Continued.)

1907-08, when it was 214, or 16 feet below the reading of March 15.

The 12-inch pump situated on the bank of the Pedro Miguel River is now supplying approximately 900,000 gallons of water each working day to the locomotive tank there, and many engines that formerly watered at Balboa take water at present at Pedro Miguel, thereby further conserving the Rio Grande storage. The Caimitillo River supply has diminished considerably since the installation of the pumping plant on its bank, at which time the estimated flow was 3,000,000 gallons in 24 hours. The absence of rainfall has dried up the parent stream, and the present supply, amounting to about 300,000 gallons a day, comes from its principal tributary, the Camaron River, and more particularly, from a branch emptying into it in which there is said to be a perennial flow.

Gatun Dam Spillway.

Two years ago, on March 17, the first concrete was laid in the spillway of Gatun Dam, and this was the first permanent concrete work to be done on the Canal. There have been placed to date 126,278 cubic yards out of a total of 250,000 cubic yards. Work is advancing behind the coffer dams on either side of the site of the spillway dam, and the concrete has reached a height which places this part of the work beyond danger from flood during the rainy season. A statement of the concrete work done during the week ending March 18, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
	Cu. Yds.		
March 13	284	17:00	2
March 14	326	16:00	2

March 18	6:34	3,288
Total	40:13	19,882

The record of March 15 is the highest made by this plant.

Visits of Congressmen.

The Congressional party which came to the Isthmus on March 13, returned to the States on March 19, after spending six days inspecting the work of the Canal. It was composed of the following members: W. P. Borland, W. O. Bradley, C. H. Burke, J. W. Gudger, Jr., Paul Howland, J. R. Knowland, J. W. Langley, E. W. Martin, J. A. Martin, Bird S. McGuire, M. A. Morrison, F. W. Mondell, J. C. Needham, A. B. Rouse, H. Steenerson, S. W. Smith, E. T. Taylor, R. Y. Thomas, F. E. Warren. A second party sailed on the *Panama* from New York and is due to arrive on the Isthmus on March 24. In this party are: Congressmen Young and wife, Alexander and wife, and Taylor and wife.

Special Trains on Saturday Night.

A Saturday night train service between Colon and Panama will go into effect on March 25. The schedule is published elsewhere in this issue.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 58 per cent of the concrete for the system of three twin locks at Gatun has been laid, the exact amount in place at the close of work on March 18, being 1,199,691 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending March 18, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily. and the auxiliary plant 9 hours.

*The 348 yards shown for the portable mixers are reinforced concrete, and were placed on the following days: March 13th, 48 yards; March 14th, 61 yards; March 15th, 59 yards; March 16th, 61 yards; March 17th, 76 yards; March 18th, 43 yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 69 per cent completed, 585,453 cubic yards, out of a total of 837,400, having been placed at the close of work on March 18. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ⅓-cubic yard mixer			Large stone.	Total.

RED CROSS ENDOWMENT.

Efforts to Raise Shapes Apportioned to Canal Zone.

President Taft, as president of the American National Red Cross, has undertaken to raise an endowment fund of $2,000,000 to be immediately available in cases of calamity. Five hundred thousand dollars have already been raised, and the State chapters are endeavoring to supply the balance. The Canal Zone Chapter has been called upon for $700, and a series of entertainments will be held by the various districts to raise that amount. The first of these will be a vaudeville entertainment at the National Theatre, Panama, on Friday evening, April 7, under the auspices of the Ancon, Pedro Miguel, Culebra, Empire, Las Cascadas and Bas Obispo districts. Tickets for this entertainment will be on sale at the offices of the district quartermasters, the Commission clubhouses, the Tiovli Hotel, and at Vibert & Dixon's store, Panama. Orders for boxes may be sent by mail to Dr. A. J. Orenstein, chairman, Ancon district, Ancon, and should be accompanied by check or post office money order for $10, United States currency.

The Pedro Miguel district recently gave a moving picture show in aid of the endowment which netted $20.40.

A statement of the financial condition of the Canal Zone Chapter, American National Red Cross, for the month of February, follows:

RECEIPTS.

February 1. Balance on hand....	$1,804.24	
February 2. Eighty-seven and one-half per cent of net proceeds of sale of Christmas seals........	53.92	
February 28. Membership dues received during month........	71.00	
February 28. Membership dues received in connection with Red Cross Ball, February 18.......	733.00	
February 28. Other receipts from Red Cross Ball..............	438.27	
		$3,100.43

DISBURSEMENTS.

February 4. Postage (Letter of W. N. Windes attached)..........	$0.41	
February 1. Relief of American in Colon Hospital..............	25.00	
February 1. Postage, receipt attached......................	1.00	
February 8. Remitted to treasurer, National Red Cross, Washington, D. C., one-half membership dues for quarter ending January 31.......................	79.00	
February 23. Relief of family of Spanish contract laborer at Chagres camp................	5.00	
February 23. Postage, receipt attached......................	2.00	
February 27. Relief of destitute American at Gatun...........	25.00	
February 28. Ribbon for badges, for Ball.....................	.23	
Total disbursements................		$137.64
February 28. Balance on hand............		$2,962.79

JOHN L. PHILLIPS, *Treasurer.*

Approved: C. A. DEVOL, *Chairman.*

Obituary.

John M. Hobrough died on March 13 as the result of injuries received at the explosion of a gasoline tank at Toro Point on the same day. He was 23 years of age, single, and had been on the Isthmus three and one-half months. His father, Robert H. Hobrough, lives at Everett, Wash.

Mrs. Wm. Shackleton, the wife of Wm. Shackleton living at Bas Obispo, died on March 13 at Ancon Hospital. She was 41 years of age and had been on the Isthmus six months.

Two Men Killed in Dynamite Explosion.

Two men were killed and seven injured in an explosion of dynamite at Gatun spillway on the morning of March 16. The dynamite gang had been loading a hole through a pipe in the borrow pit north of the spillway and were withdrawing the pipe when the explosion occurred. Clifford Boyce and James Dunkley, negro laborers, were killed. The injured men were also negro laborers, and four of them, Archie Wright, Andrew Maynard, Oliver Grace and Edrick Trotman, were so badly injured that they were removed to Colon Hospital. Joseph Rock and Berkley Williams were cared for in the sick camp at Gatun, and Sinclair Hunt was so slightly hurt that he returned to work.

PERSONAL.

Charles Francis Adams, wife and daughter of Boston, Francis D. Millet and wife of New York, Colonel R. H. I. Goddard and son of Providence, O. H. Tittman and wife of Washington, Lieut.-Gen. S. B. M. Young, and Major M. T. Davis, are in Panama inspecting the Canal work. Maj.-Gen. Alexander Mackenzie, Major W. V. Judson and wife, Major S. A. Cheney, and George R. Putnam are among the passengers on the *Panama*, due to arrive in Cristobal on March 24.

Dr. J. P. Perry has returned from his annual leave in the States.

Changes in Canal Zone Judiciary.

A cable message from Washington under date of March 18 announces the appointment of W. W. Warwick, formerly Examiner of Accounts in the Commission service, and Thomas E. Brown, Jr., formerly district judge at Cristobal, as associate justices of the Canal Zone Supreme Court. W. H. Jackson of New York, has been designated for the position of district judge to succeed Judge Brown.

K. of P.

Paradise Lodge No. 6, Knights of Pythias, of Paraiso, will hold a "Good of the Order" supper, for Knights only, in the Paraiso lodge hall on Saturday evening, April 8. A special train will leave Panama at 7.30, and from Gorgona at 7.15 p. m., returning after the supper.

Spanish War Veterans.

Colonel Sibert Camp, Spanish War Veterans, will hold a regular meeting in the Gatun clubhouse on Saturday, March 25. The charter will not be closed until after this meeting, and all Spanish War veterans desiring to become charter members should be present.

Women's Clubs.

The Pedro Miguel Woman's Club will hold a card party and reception on Saturday evening, March 25, in honor of Mrs. Walter H. Jennings, a charter member who is leaving the Isthmus. On March 15 the social meeting of the club was held at the home of Mrs. T. T. Curran, at Empire. The next business meeting will be held on March 22, after which there will be no business meetings for three months. The social sessions will be held as usual on the second and fourth Wednesdays in each month.

The home of the president of the Gorgona Woman's Club was thrown open for the exhibit of the federation pictures on Wednesday, Thursday, and Friday of last week. The large pictures were hung and the books and portfolios were placed on tables. On Wednesday evening, the president entertained the members of the Rebekah lodge. There was a large attendance at the meeting on Thursday afternoon. The program was informal and consisted of readings on the 12 greatest pictures in the world, and short sketches of painters. Refreshments were served on the veranda, which was decorated with palms and flags.

There will be an initiation of 16 candidates in the Rebekah lodge, Gorgona, on Friday evening, March 24.

Fireproof Construction in Colon.

The fill in the newly improved section of Colon is approaching completion, and, it is expected that the construction of new buildings will be started there within the next four months. The Health Officer of Colon has called attention to the desire of a number of the property owners to have a law enacted by the municipal authorities limiting buildings in this new district to those of fireproof construction. There is no field rock available at Colon, as at Panama, and in order to erect buildings of a permanent character, materials will have to be brought from a distance.

Coal Screen.

A large screen to help in sorting coal at the receiving pile at Mount Hope is being constructed at Gorgona shops. It will be erected at the hoist by which the coal is conveyed from the holds of ships to the storage piles. Up to the present time lump coal for domestic use has been sorted by hand. All the coal at present used is bituminous.

Missing Men.

Any one having information regarding the whereabouts of Nathan Gordon, who is supposed to be on the Isthmus, is requested to communicate with the General Superintendent, P. R. R., Colon, R. P.

At a recent meeting of Paraiso Court, No. 5, Independent Order of Panamanian Kangaroos, resolutions of sympathy were adopted on the death of R. C. Smith, a member of the court.

The Cristobal Marine Association and the Cristobal Catholic Club have passed resolutions of sympathy for J. K. Gibson, on the death of his wife.

Cold Storage Prices.

There are no changes in the prices of cold storage articles from those quoted in last week's issue of THE CANAL RECORD.

Misdirected Letters.

Ancon, C. Z., March 22, 1911.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of addressee:

CANAL WORK IN FEBRUARY.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

Culebra, C. Z., March 15, 1911.

The Honorable the Secretary of War,
Washington, D. C.

Sir: I have the honor to submit the following report of operations on the Isthmus for the month of February, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central and Pacific Divisions during the month:

Item.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	97,613	1,624,584	35,016	1,757,213
Work excavation, wet	Cubic yards	455,318	4,304	474,201	933,823
Total work excavation	Cubic yards	552,931	1,628,888	509,217	2,691,036
Plant excavation, dry	Cubic yards	....	1,870	....	1,870
Plant excavation, wet	Cubic yards	21,268	....	....	21,268
Total plant excavation	Cubic yards	21,268	1,870	....	23,138

Atlantic Division.

GATUN LOCKS.

Excavation—Shovel excavation during the month was continued in the lower lock, and outside the Canal prism, for the purpose of obtaining impervious material for back fill. A total of 68,023 cubic yards of material was removed. Of this quantity, 24,393 cubic yards were excavated for back fill. On February 28 the total material removed amounted to 5,728,864 cubic yards. The shovel excavation in the locks was 97.3 per cent completed, the channel excavation in the lower lock 85 per cent completed, and the excavation of culvert trenches by crane, 55 per cent completed.

Back Fill—Back filling behind the walls of the upper and middle locks was continued. The quantity placed during February aggregated 41,153 cubic yards, increasing the total to 301,870 cubic yards. On February 28 the back fill was 25.07 per cent completed.

Receiving and Issuing Material—The receipts of material during the month exceeded the consumption, with the exception of sand, the consumption of which exceeded the receipts by 1,025 cubic yards.

Mixing and Placing Plants—These plants were kept in satisfactory operation during the month. Three portable mixers were in use intermittently during the month, two being employed in placing concrete in operating tunnels, and one in building a molding platform for reinforced concrete piles.

Power Plant and Pumps—The operation of the power plant and pumps during the month was satisfactory.

Iron and Steel Work—During the month the setting of steel in Stoney gate valves was continued, and the setting of the sills of the lower gates of the middle lock was completed.

Concrete Work—There was a decrease of 815 cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 23 working days was 3,135 cubic yards, as compared with a daily average during January of 2,916 cubic yards. The total amount of concrete placed during the month was 72,103½ cubic yards, including 5,050¾ cubic yards of large stone. The bucket measurement exceeded the place measurement by 20¾ cubic yards. Of the total concrete, 13,524 cubic yards were placed in the upper lock, 47,119½ cubic yards in the middle lock, and 11,460 cubic yards in the lower lock. The concrete work for the entire lock system was 55 per cent completed at the end of February.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS, GATUN LOCKS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.22	8.50
Average number of hours per day worked per strand of cableway laying concrete and large stone (actual working time)	8.19	....
Average number of mixers per day	6.00	2.00
Average hourly output per mixer, (actual working time) cu. yds.	58.73	58.40
Average amount of concrete and large stone laid per hour, per strand of cableway, (actual working time) cu. yds.	35.01	....
Large rock laid, cu. yds.	4,385¾	665
Concrete laid, cableways, cu. yds.	49,213	....
Concrete laid, through chute into dump cars, cu. yds.	5,304	....
Concrete laid, derrick, crane and lift, cu. yds.	....	10,950
Concrete laid, portable mixers	....	1,606½
Total amount concrete and large rock laid, cu yds.	58,902¾	13,221½

Concrete from the auxiliary plant is placed by derricks, crane, and a lift. It is, therefore, impracticable to estimate the average amount placed per hour by each of these units.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 512,741 cubic yards, making the total amount in place 12,276,078 cubic yards.

Hydraulic Fill—The dredges increased the hydraulic fill by 301,733 cubic yards. The total hydraulic fill in place on Febraury 28 was 6,290,960 cubic yards.

Dry Fill—The material received from the Central Division, the locks, the spillway, and the plant excavation, amounting to 211,008 cubic yards, was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 5,985,118 cubic yards.

GATUN SPILLWAY.

Excavation—In preparing the foundation of the spillway dam, 6,881 cubic yards of rock were excavated by hand behind the east and west coffer dams, increasing the total spillway excavation to 1,578,006 cubic yards.

Concrete—The construction piers of the spillway dam were completed to elevation plus 45, and the building of the ogee monoliths and the heavy floor below was continued behind the east and west coffer dams. The amount of concrete placed during the month aggregated 6,609 cubic yards, which increased the total to 122,387 cubic yards.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea Level at Mindi—During the month 4,504 cubic yards of earth and 37,398 cubic yards of rock were removed from the prism by two 70-ton steam shovels working a total of 42 days. In addition, 5,200 cubic yards of mud were sluiced from the cut.

Dredging from the Ocean to Mindi—Five dredges removed 236,881 cubic yards of earth and 39,232 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 21,263 cubic yards of earth from the channel to, and in front of, Dock No. 14. On February 28th, 40 feet of water could be carried from zero to zero plus 3,900 feet; 30 feet to mile 4 plus 800 feet; 20 feet to mile 5 plus 2438.9 feet, at the junction with the French canal.

Dredging from Mindi to Gatun Locks—The dredge *Sandpiper* removed 179,205 cubic yards from the Canal prism at mile 6 plus 3,300 feet to mile 6 plus 400 feet.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Average day's output, (23 days) cu. yds.	3,141.0
Average hourly output, (193 hours 30 minutes) cu. ydss.	373.0

SAND, STONE AND CEMENT SERVICE.

In connection with this service plant steamed 11,578 miles, handled 842 barges, and carried 2,068 passengers.

TORO POINT.

Colon Breakwater—Forty thousand four hundred and sixty-six cubic yards of material were excavated, of which amount 1,635 cubic yards were placed in track fill, and 38,831 cubic yards in breakwater fill. The double track trestle was extended 370 linear feet. On March 1 the trestle extended 3,110 feet from shore. The total amount of rock dredged and dumped on the west breakwater to February 1, 1911, was 430,056 cubic yards. During the month 39,232 cubic yards of rock were dredged and dumped, increasing the total to 469,288 cubic yards. The amount of dry fill placed to March 1 was 188,510 cubic yards.

NOMBRE DE DIOS.

During the month 76 barges containing 33,513 cubic yards of sand were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of February the total amount of material excavated in the Central Division was 1,630,758 cubic yards, of which 477,477 cubic yards were classified as earth and 1,153,281 cubic yards as rock. Of this quantity 1,600,597 cubic yards were removed by steam shovels, 5,096 cubic yards by scraper, 16,699 cubic yards by bucket cranes, and 870 cubic yards by hand. Contractors removed 4,304 cubic yards by sluicing, and 3,192 cubic yards by hand. Of the total, 1,600,372 cubic yards consisted of primary excavation for the Canal prism, 5,736 cubic yards permanent diversion useful after the Canal is completed, and 22,780 cubic yards of silt deposited in completed sections of prism. The total work excavation amounted to 1,628,888 cubic yards. In addition, 1,870 cubic yards of gravel were excavated outside of the canal prism for ballast and concrete use.

The daily average number of steam shovels at work during the month was 48.41, and the total number of shovel days was 1,114, as compared with 47.68 shovels at work during the month of January, with 1,192 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No of shovels at work	Working days	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
Feb....	1,503,223	1,126,501	376,722	51.35	23	1,272 8
1911:						
Feb....	1,600,598	1,150,353	450,224	48.41	23	1,436 8

Rainfall at Empire: 1910, .76 ins.; 1911, .55 ins.

The above table shows the average output per shovel to be 12.88 per cent greater in February, 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in February, 1911, 1,403,602 cubic yards, was the highest record in that section for the month of February, the previous high record for the month having been in February, 1910, when 1,259,173 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division was 97,125,018 cubic yards, and up to March 1, 1911, 71,033,522 cubic yards had been removed, leaving 26,091,496 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures it will be seen that 73.14 per cent of all excavation in the Central Division had been completed up to the close of the month of February, and 26.86 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of February operations, were as follows:

CULEBRA SECTION.

	Cubic Yards.
Completed	59,671,665
To be completed	24,515,059

CHAGRES SECTION.

Completed	11,361,857
To be completed	1,576,437

From the above figures it will be seen that the Culebra section, locally known as Culebra Cut, was 70.88 per cent completed, with 29.12 per cent to be completed; the Chagres section was 87.82 per cent completed, with 12.18 per cent to be completed.

During the month 780 cubic yards of material were hauled from the Canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad in the vicinity of Pedro Miguel. The total amount of spoil from the Central Division used for this purpose at the close of the month was 3,743,354 cubic yards. The Central Division also delivered at Gatun 193,479 cubic yards of rock and earth for use in the construction of the dam, making the total for this purpose at the end of February 2,906,534 cubic yards.

The daily average number of laborers at work on the whole division during the month was 7,991, and the daily average number of gold employes 928.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 35,016 cubic yards.

Filling and Embankment—During February, no additional dry filling was added to the prism of the west dam at Pedro Miguel, the total amount of material in place at the close of the month remaining at 260,852 cubic yards, as previously reported. The back fill at Pedro Miguel was increased by 31,399 cubic yards, the total in place at the end of the month amounting to 92,558 cubic yards.

At Miraflores, 32,404 cubic yards were added to the dry fill in the toes, and 87,335 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month 666,952 cubic yards and 471,290 cubic yards respectively. The back fill was increased by 1,280 cubic yards, making the total amount in place at the end of the month 135,885 cubic yards.

PEDRO MIGUEL LOCKS.

The back filling of the west wall was continued, as was also the work of dismantling berm crane "G", the cantilevers being removed and taken to Miraflores where the erection of one of them was commenced on the west berm crane already partly installed. The placing of anchor bolts and castings for Stoney valves, and other iron, was continued, about 935,000 pounds of iron being placed during the month.

Concrete Work—The concrete work at Pedro Miguel for February showed a decrease of 1,502 cubic yards over the figures for January. The total amount placed was 37,011 cubic yards, including 26 cubic yards of large stone. The concrete was placed as follows: 10,647 cubic yards in the east wall; 500 cubic yards in the east head wall; 8,656 cubic yards in the west wall; 241 cubic yards in the west head wall; 16,340 cubic yards in the center wall; and 627 cubic yards in the floor.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)...	8.00	8.00
Average number of hours per day, per unit, worked laying concrete and large stone (actual working time)...............	5.23	3.70
Average number of mixers per day........................	2.00	3.36
	Cu. Yds.	*Cu. Yds.*
Average hourly output per mixer (actual working time)........	74.44	38.02
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)........................	59.00	....
Large rock laid................	8.00	18.00
Concrete laid..................	28,399.00	8,586.00
Total concrete laid..........	28,407.00	8,604.00

Auxiliary plant consists of three 2-cubic yard mixers, and one ⅓-cubic yard mixer, and locomotive cranes and derricks averaging 2.83 units per day for the month of February.

MIRAFLORES LOCKS.

Work on the west storage trestle at Miraflores, and the filling of the dike at the Agua Dulce pumping station were continued. The excavation of rock in the lower lock site was commenced.

Concrete Work—The total amount of concrete and large stone laid was 20,896 cubic yards, as compared with 24,018 cubic yards during January. The concrete was placed as follows: 12,623 cubic yards in the east wall; 7,406 cubic yards in the center wall; and 867 cubic yards in the floor.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)..	8.00	8.00
Average number of hours per day per unit, worked laying concrete and large stone (actual working time).............	7.55	6.25
Average number of mixers per day..........................	....	4.65

*Excavated from lower lock site at Miraflores.

CHAMÉ SAND EXCAVATION.

Approximately 39,300 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, watermains, sewers, roads, and oil pipe lines were maintained and extended as required, to facilitate construction work. Work was continued on the municipal improvements in the city of Panama.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day	12:00
Average number of hours per day (actual working time)	8:87
	Cu. Yds.
Average amount crushed per hour of working day	222.00
Average amount crushed per working hour	300 36
Total output for the month	61,274.00

Relocation of Panama Railroad.

During the month 252,815 cubic yards of material were excavated, making the total excavation at the close of the month 5,762,375 cubic yards, and 252,815 cubic yards of material were placed in embankment, making a total of 11,126,946 cubic yards used for this purpose.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'k'g days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu Yds.*	*Cu. Yds.*	*Cu. Yds.*			
Jan	214,411	71,075	143,336	7.91	23	1,179
1911:						
Jan	251.175	162,390	88,785	6 00	25	1,675
Feb	256,615	180,600	76,015	6.22	23	1,795

During the month 1,070 feet of temporary trestles were driven, and work on the bridges and culverts was continued. No permanent track was laid during the month, the total of 70-pound and 90-pound permanent track remaining at 157,744 linear feet and 18,997 linear feet respectively, as previously reported. The total force averaged 2,210 men.

Quartermaster's Department.

Labor—The supply of skilled and unskilled labor continued satisfactory during the month.

Materials and Supplies—The inventory of the Panama railroad storehouse was completed. The value of the material taken over by the Commission was $445,908.24 (P.R.R. value). The value of obsolete and unserviceable material amounted to $20,534.73; this material will be considered the property of the Panama railroad. The figures given are subject to correction after final check is made. The greater portion of the stock from the storehouse has been moved to the Mount Hope depot.

The total value of material received by the Commission during the month was $200,000 less than during the preceding month. The value of material received for stock and the value of material ordered from the United States was likewise less. The value of the material received was $583,849.95. Cargo was brought to the Isthmus in 28 vessels, and consisted of 460 separate shipments, approximately 60 per cent of which were handled direct from dock to destination on the Isthmus, other than Mount Hope depot. The total weight of cargo received, exclusive of lumber, cross ties, and piling, aggregated 33,381 tons. Lumber was delivered in the amount of 226,739 feet, board measure, and 28,505 cypress ties and 927 pieces of piling were received.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens and the line hotels showed a net profit of $2,063.94. The operation of the hotel Tivoli showed a net profit of $8,594.77, and there was a net profit on restaurants, penitentiary and dredges of $253.17. The net profit on subsistence operations was $10,911.88.

Department of Civil Administration.

COURTS.

One criminal case was disposed of in the Supreme Court of the Canal Zone; 22 civil and 18 criminal cases in the Circuit Courts, and 51 civil and 476 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS AND REVENUES.

Money order sales for February amounted to $445,086.97, and the fees to $1,945.99. Receipts from stamp and card sales, and newspaper postage aggregated $6,603.41. The total collection of revenues made by the division was $16,501.10, and the collection on account of court fines, costs and fees, $2,01929.

Twenty vessels entered at and 23 vessels cleared from the port of Ancon; and 20 vessels entered at and 22 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 486, of whom 444 were men and 42 women. Forty-five nationalities were represented. The total number of arrests for the month was an increase of 102, as compared with January. Five convicts were committed to the penitentiary, and 10 were discharged, leaving 139 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,373.55, and the value of their work on the Canal Zone roads $1,884.20.

DIVISION OF FIRE PROTECTION.

Twenty-seven fires were reported in the Canal Zone during the month, a decrease of 17, as compared with January. The damage to Commission property was $290, and to Panama railroad property $3,136.03.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,266,165 gallons, and in Colon 986,572 gallons.

The usual inpsection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The total enrolment in the white schools during the month was 1,087 and the average daily attendance 914.2, or 84 per cent of the enrolment; and in the colored schools the total enrolment was 1,293 and the average daily attendance 611.9, or 47 per cent. Forty two white and 24 colored teachers were employed in the division on February 28.

Department of Sanitation.

The total number of deaths from all causes among employes was 41. These were divided as follows: From disease, 26, and from violence, 15, giving the annual average per thousand of 6.27 and 3.61, respectively.

The annual average death rate per thousand among employes for the month of February in previous years since American occupation, was as follows:

1905	14.05
1906	29.09
1907	30.74
1908	12.80
1909	9.42
1910	8.75

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and nonemployes, was 18.60.

The annual average death rate per thousand for the month of February among the same class of population for previous years, was as follows:

1905	42.07
1906	43.96
1907	36.07
1908	21.40
1909	18.59
1910	17.50

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 5.67; blacks, 6.47; giving a general average of 6.27. For the same month during 1909, the annual death rate per thousand from disease was: Whites, 6.85; blacks, 6.97, giving a general average of 6.93; and for the same month during 1910, whites, 520; blacks, 4.59; giving a general average of 4.73.

Among employes during February, 1911, deaths from the principal diseases were as follows: Chronic nephritis, 4; hemoglobinuric fever, 1; organic disease of the heart, 3; lobar pneumonia, 3; tuberculosis, 3; dysentery, 2; leaving a balance of 10 deaths from all other diseases, and 15 deaths from external violence.

An epidemic of measles of a mild form has existed on the Isthmus for several weeks.

No cases of yellow fever, small pox, or plague were brought to or originated on the Isthmus during the month.

Respectfully,
Geo. W. Goethals, *Chairman.*

OFFICIAL CIRCULARS.

Children's Names on Applications for Transportation.

Culebra, C. Z., March 17, 1911.

Circular No. 175-E:

In the future, in order to comply with the requirements of the Bureau of Immigration and Naturalization in connection with outward bound passengers from the port of New York, it will be necessary to furnish this office the *names* of all children for whom transportation is desired, as well as their ages.

Geo. W. Goethals,
Chairman and Chief Engineer.

Interchange of "Extra" Men.

Culebra, C. Z., March 16, 1911.

Circular No. 376:

Whenever the list of "extra" employes of any division or department of the Isthmian Canal Commission, the Panama railroad and the relocation is exhausted, from any combination of circumstances, the necessities will be met by temporarily transferring men from other divisions which are able to spare same, in which case the expense of such borrowed men will be borne by the division or department obtaining their services. Care should be exercised to keep the number of "extra" men in each division down to a minimum.

Geo. W. Goethals,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Estate of Gregorio Perez.

Creditors of the above estate are hereby notified to file their claims with the Circuit Court Clerk, Ancon, or the same will be barred at the expiration of the minimum term fixed by the Code.

LOST—On Sunday, March 12, a No. 3-A kodak in black leather case well worn; carrying strap broken and khaki-colored string substitued. Finder please leave at Cristobal police station or district quartermater's office, Gatun, where a suitable reward will be paid.

SCHEDULE OF GAMES, MARCH 26,

At Ancon—Commissary-Subsistence vs. Ancon.
At Empire—Atlantics vs. Empire.

Supplies for Canal Work.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Cristobal and Colon during the week ending March 18, 1911:

San Mateo, March 12, from Philadelphia, with 1,000 drums gasoline for stock.

Prinz Eitel Friedrich, March 12, from New York, with 25 cases enamel paint for stock.

Consul Horn, March 12, from Gulfport, with 709 pieces piling, 744 pieces washers, 6 barrels washers for Atlantic Division; 11 barrels washers for stock.

Colon, March 13, from New York, with 13 cases rubber hose for Atlantic Division; 60 kegs potassium chlorate, 22 kegs manganese dioxid for Mechanical Division; 20 kegs shellac for Panama railroad; 54 cases drugs and sundries for Sanitary Department; 50 bundles steel rail, 88 cases caustic soda, 34 barrels resin, 11 barrels water bottles, 8 cases vermillion paint, 9 cases drill machinery for stock; and a miscellaneous cargo, the whole consisting of 532 packages, weighing 99 tons.

Cristobal, March 13, from New York, with 25,470 barrels cement, 40,000 bags cement for Atlantic Division; 59,040 bags cement for Pacific Division.

Atenas, March 16, from New Orleans, with 10 barrels journal bearings for Mechanical Division; 43,198 feet, B. M., yellow pine lumber for stock.

Almirante, March 17, from New York, with 3 cases machinery for Mechanical Division; 34 bundles brooms for stock.

The following vesels arrived at or departed from the port of Balboa during the week ending March 18, 1911:

Arrivals—March 12, *Vicksburg*, from Central American ports; March 13, *Ucayali*, from Callao; *Riverside* from San Francisco; March 14, *Aztec*, from San Francisco; *Sydney*, from San Francisco; March 16, *Quito*, from Buenaventura; *Aysen*, from Valparaiso; *Arica*, from Guayaquil.

Departures—March 11, *Pennsylvania*, to San Francisco; March 10, *San Jose*, to San Francisco; March 14, *Barracouta*, to Central American ports; March 17, *Pleiodes*, to San Francisco; *Ecuador*, to Guayaquil; March, 18, *Fenwick*, to San Francisco; March 13, *Peru* (P.S.N.), to Valparaiso.

A concrete sea wall is in progress of construction on Colon beach from 11th street to the wharves in front of the railroad station. It will protect the beach from wave action and also afford a landing place for boats in the coastwise trade.

Proposals for Charcoal.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, until 2 p. m., March 31, 1911, when they will be publicly opened, for 40,000 pounds of charcoal in hags. Delivery of 10,000 pounds to be made within 10 days after award, balance within 30 days thereafter. Charcoal will be accepted on board cars at any point on the Panama railroad and will be inspected and weighed on receipt at destination. Payment will be made on basis of net dry weight, according to specifications which will be furnished upon application. Tne right is reserved to reject any or all bids. Bids must be marked "Proposal for Charcoal" and addressed to the Depot Quartermaster, Mount Hope, C. Z.

C. NIXON,
Depot Quartermaster.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

The 200, or over, bigpin bowling scores for the week ending March 19 are as follows: Mengel, 220; Huttlemaier, 244, 211.

The 100, or over, duckpin scores for the week ending March 19 are as follows: Fredericks, 111; Huttlemaier, 106, 105; Hill, 103.

There will be an informal social on Friday evening, March 24. The program will be musical and literary in character.

On Sunday night, March 26, the Empire Musical Society will present "Gual's Holy City" under the direction of A. B. Dickson in the auditorium of the clubhouse. The Christian League of Culebra will unite with the association in this service. The sacred concert will begin at 8 o'clock and everyone in the community is invited to attend. Admission will be free and no collection will be taken.

The topic to be discussed at the session of the Discussion Club on Monday evening, March 27, will be "Sex and religion," the relation of the physical and spiritual natures; leader, H. N. Sollenberger.

EMPIRE.

There will be a billiard and pool tournament between Empire and Gatun on Saturday night, March 25.

The boy scouts will combine with the Gorgona boy scouts for an outing on Saturday afternoon, March 25.

The indoor baseball team will play the Gorgona team at Gorgona on Saturday night, March 25.

The Cristobal vaudeville company will give an entertainment in the clubhouse on Monday night, March 27.

GORGONA.

The Gorgona Dramatic Club, playing the comedy "Esmeralda" has just finished the last of eight engagements. It has appeared at all the clubhouses and at the National Theatre, Panama, entertaining about 2,500 people. C. W. Fahr is manager and E. L. Emery stage director. L. P. Robitoy, W. H. Robertson, and D. J. Kenny have assisted the management in handling the property. W. Humphrey is electrician. The club will present another play in the near future.

The Caveny entertainment company will give a return engagement on Tuesday evening, March 28, with a complete change of program.

GATUN.

The Gatun carnival was held at the clubhouse on Wednesday, Thursday and Friday of last week. Wednesday night was called "Gatun" night when 500 people from Gatun were present; Thursday night a special train brought 200 people from Cristobal, and another special train on Friday night brought 450 people from other towns on the Isthmus. There were illuminated street parades on all three nights. The entire second floor of the clubhouse was turned over for the use of the carnival. Among the attractions were the following: Punch and Judy show, nigger baby shooting gallery, infernal regions, trip around the world, menagerie of wonderful animals, milky way telescope, freak hall, moving pictures, wrestling match, fortune telling booth, country dance, candy booth, pennant and banner booth, vaudeville, fourth degree of Kangaroos, K. of P. picture gallery, ice cream, etc. Seven hundred and seventy-five dollars were taken in, about 50 per cent of which will be net proceeds.

On March 26, Mr. Chenneville will give a five-minute talk on the "Theatre," and Mr. Barte will speak on the "City."

The Caveny entertainment company will give a return engagement on Monday, March 27.

The Cristobal vaudeville company will appear at Gatun on April 3.

The Yost entertainment company will appear at the clubhouse on April 10 and 24.

CRISTOBAL.

Cristobal won two out of three bowling games from Gatun on Saturday night with the following scores:

Cristobal.				Gatun.

The Cristobal vaudeville company has elected the following officers: President, W. G. Manley; treasuer, Irvin Delong, and manager, F. G. Pack. The following engagements have been made for the company: Tuesday, March 21, Gorgona; Monday, March 27, Empire; Monday, April 3, Gatun; and Friday, April 7, National Theatre, Panama.

PORTO BELLO.

The chess club meets every Thursday evening. Several new members have been added.

The Gorgona Dramatic Club playted "Esmeralda" on Saturday night to a well-pleased audience.

A 20-foot diving tower has been erected near the spring board at the swimming hole.

Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Gatun Locks.

The construction of the operating tunnel in the center wall of the locks at Gatun has been begun in the upper locks.

The steamshovel working in the soft mud of the slide in the lower locks excavated 2,367 cubic yards on March 27.

Concrete Dock at Pacific Entrance.

Work has been begun on the reinforced concrete dock, which is to be the first constructed of the series of docks proposed for the anchorage basin at Balboa, near the Pacific entrance to the Canal. The dock will be based on 55 concrete piers nine feet in diameter which will rest on rock. Excavation for four of these piers has been begun, the lowest point reached so far being 25 feet below mean tide, while the average depth to rock is minus 65 feet. The excavation is in soft mud composed of decaying vegetable matter and fish of low order. Caissons of concrete formed around collapsible steel forms are used. A gas resulting from the decaying matter overcame one of the workmen in a caisson on March 25, and precautions are now being taken to supply fresh air to the men in the pits.

Borings are being made immediately north and east of the site of the new dock, to determine the character of foundation that will be met in the construction of another dock.

Sale and Delivery of Fuel Oil.

The agreement between the Isthmian Canal Commission and the Union Oil Company of California for the sale and delivery of fuel oil, made on April 1, 1909, has been amended as follows:

First. That the standard of quality of fuel oil to be furnished by the party of the second part shall not be heavier than 14 degrees nor lighter than 26 degrees Baumé at 60 degrees Fahrenheit, and shall be equal in efficiency, under the same conditions, to the oil furnished heretofore by the party of the second part to the party of the first part, for consumption on the Canal Zone.

Second. If said fuel oil shall contain water and sand in excess of two per cent then said party of the first part shall be entitled to a rebate on such excess at the agreed price of one dollar and ten cents per barrel, provided claim therefor is made within 15 days after delivery thereof, and provided further, that the final test of the water content of the oil shall be based upon distillation. The party of the second part further agrees to furnish not to exceed one hundred thousand barrels of fuel oil monthly, if required, at the agreed price of $1.10 per barrel; and it is mutually agreed that the basis of measurement for payment shall be a barrel of 42 gallons, U. S. standard, at 60 degrees Fahrenheit.

Third. The seventh paragraph of said agreement of April 1, 1909, shall not be construed to require the payment by the party of the second part during the existence of this contract of the monthly license fee of $500 therein referred to for the sale by the party of the second part to others than the Isthmian Canal Commission and the Panama Railroad Company of oil at the end of its pipe line at Balboa, C. Z., from its storage tanks, provided that sales to such others shall not at any time deprive the said Commission and railroad company of the amount needed to supply their requirements under this agreement.

Fourth. The supplementary agreement between the parties hereto made on April 1, 1909, is hereby cancelled and held to be of no further effect, and the provisions of the original agreement of April 1, 1909, between the parties hereto which are in conflict or inconsistent with the terms of this supplementary agreement are hereby substituted and superseded; otherwise this agreement shall be held to form a part of the said original agreement of April 1, 1909.

A revocable license was granted on January 10,1906, under which the Union Oil Company was to deliver oil at 90 cents a barrel at any point along the Canal, pay a fee of $500 a month to the Canal Zone treasury for the support of schools, and the regular taxes. Under this license an 8-inch pipe was laid across the Isthmus, a distance of 48 miles and oil was delivered in August, 1907, although delivery along the entire length of the line was not made until November 14, 1907.

The oil company found that it was actually costing $1.10 a barrel to deliver oil on the Isthmus, and after an effort had been made to procure oil at a less price, the Commission entered into a contract for one year, extendible for three years, on April 1, 1909, providing for the remission of the monthly payment of $500, so long as oil was sold only to the Commission or Panama Railroad Company, and for a price of $1.10 a barrel for not less than 30,000 nor more than 60,000 barrels of oil a month. This agreement was made because oil at $1.10 a barrel is more economical than coal, and because it was desired to make a thorough test of oil fuel as compared with coal. The contract provided a standard for the oil, for the operation of the pipe line in case the oil company should refuse to operate it, and secured the Commission against loss from failure of the company to carry out its contract. On October 11, 1910, permission was granted the company to sell oil at Balboa to others than the Commission and Panama Railroad Company. In July, 1910, the monthly consumption of oil was 56,149 barrels, and steps were at once taken to increase the maximum amount that could be used. The new contract increases the amount of oil that may be used monthly to 100,000, and provides the distillation test to determine the water content.

The annual consumption of oil and the monthly average, have been as follows:

	Annual barrels.	Monthly average, barrels.
1907*	6,919	1,384
1908	154,817	12,901
1909	534,958	44,580
1910	652,022	54,335
1911—		
January	....	62,637
February	....	72,939

*Five months.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 51 per cent completed, 128,314 cubic yards out of a total of 250,000 having been placed up to the close of work on March 25. A statement of the amount laid each day last week and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
	Cu. Yds.		
March 20	332	17:00	2
March 21	324	17:00	2
March 22	412	17:00	2
March 23	364	17:00	2
March 24	336	17:00	2
March 25	268	17:00	2
Total	2.036	102:00	2
Previously reported	126.278		
Grand total	128,314		

Meals for Negro Laborers.

Reductions in the prices of foodstuffs and economies in the methods of preparing and serving meals to negro laborers have made it possible to reduce the price per ration of three meals from 30 to 27 cents, until further notice, as indicated in an official circular published elsewhere in this issue. The number of rations served and the cost of food and service during the past four months, are as follows:

Month.	Number rations served.	Cost Cents.
November	39,071	26.55
December	38,201	27.03
January	37,010	26 04
February	31,260	25.64

Meals for negro and European laborers have been served in the past at separate places, necessitating separate kitchens for the cooking. Except at Gatun and Ancon the food is now prepared in one kitchen and served on opposite sides, so that, although one kitchen organization does the cooking, the food is still served separately to the two classes of laborers. Under this system the cost of service has been steadily reduced, although the average daily number of rations served to negro laborers decreased from 5,900 in July, 1908, to 1,116 in February, 1911. Of the negro laborers as viewed from the stand-

NOTES OF PROGRESS.

(*Continued.*)

point of subsistence, the Subsistence Officer says:

"The negro is gradually changing his status from that of a laborer to that of an inhabitant, and instead of getting his meals from the Subsistence Department he now buys food at the Commissary or from the local markets. Apparently a great deal of yams, yuccas, and sweet potatoes consumed by the negroes are actually grown on the Isthmus, as our importations of yams and sweet potatoes at the present time are very light, the yams not over one-fourth of the quantity imported two years ago. The present laborers in the common labor kitchens are not "floaters," or people who work irregularly, or new arrivals on the Isthmus, but they are in fact old employes and men generally who work every day; generally speaking the most reliable and most industrious of the negro workmen."

Each ration consists of three meals so that the price of a meal served to a negro laborer is nine cents.

Porto Bello Crusher.

A statement of the work done at Porto Bello crusher, by days, for the week ending March 25, follows:

DATE.	Hours worked.	Cubic Yards.
March 20	7:00	3,001
March 21	6:00	2,802
March 22	7:23	3,451
March 23	7:14	3,386
March 24	7:33	3,453
March 25	7:26	3,051
Total	42:36	19,144

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending March 25, follows:

DATE.	Hours worked.	Cubic Yards.
March 20	9:50	3,364
March 21	10:10	3,609
March 22	8:55	3,175
March 23	7:55	2,470
March 24	7:40	1,571
March 25		*276
Total	44:50	14,465

*Crusher shut down, putting shaft in No. 12 crusher.

Models of Locks and Dam.

A model of the locks is being constructed at Gorgona shops, and a model of Gatun Dam is being made in the States, both for exhibition at the International Exposition to be held at Turin, Italy, during the present year.

Losses Caused by the Sinking of the Finance.

A compromise agreement has been reached between the proctors for the various interests in the ligitation arising out of the collision between the steamship *Finance* of the Panama railroad line and the steamship *Georgic* of the White Star Line on November 26, 1908, which resulted in the sinking of the former vessel and a total loss of the effects of the passengers, as well as a total loss of the cargo. The agreement provides for the payment of eighty (80) per cent of the amount of the proved claims of the shippers of cargo and seventy (70) per cent of the passengers' claims as filed by them without further proof. The settlement is in process of adjustment and by the end of March the entire funds should be paid over to the proctors for the claimants. Mr. Evan Shelby, of No. 60 Wall street, New York, who represents nearly all the passengers, has requested that the passengers send him their present addresses, and advice as to whether he shall send them a New York check in settlement of their claims.

The cost of repairs to steam shovels in the Central Division during January and February averaged two cents per cubic yard of material excavated.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 58 per cent of the concrete for the system of three twin locks at Gatun has been laid, the exact amount in place at the close of work on March 25, being 1,219,573 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending March 25, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

THE COLON FIRE.

Extent of Loss, and Measures for Relief.

A fire, said to have originated in a frame building at the northwest corner of 13th and Cash streets in Colon shortly after 3 o clock on the afternoon of March 23, destroyed 10 city blocks and several buildings situated on the Mount Hope road. The remains of a child and a man have been recovered from the debris. No official estimate has yet been made of the loss in Colon.

Under the terms of an agreement with Panama, published elsewhere in this issue, the Cristobal fire department confined its work to the property of the Isthmian Canal Commission and the Panama railroad. Sailors from the U. S. S. *Paducah*, which was at anchor in the harbor, working under the direction of their officers, assisted the Colon firemen and volunteers in checking the fire by cutting down buildings in its path. The buildings in Colon are principally wooden frames and they burned very rapidly. The heat drove the firemen away from the nearest hydrants, and eight 2½ inch pipes were left open. Because of this the water pressure was low although 3,000 gallons a minute were being pumped into the 20 inch main from Mt. Hope to Colon all during the fire.

The following Isthmian Canal Commission buildings situated on the Mount Hope road were burned: Building No. 240, Salvation Army Headquarters; No. 217, school for colored children; Nos. 93, 94, 95, and 96, of Folks River labor camp; No. 118, public convenience house; No. 284, wash house. Houses No. 97 and 99 were pulled down in checking the fire. Houses in Cristobal, facing the boundary line, were blistered by the heat, but only slightly damaged. No insurance is carried on Commission property. The loss is estimated at $14,394.

Red Cross and Relief Work.

It is estimated that 2,000 people in Colon were without homes on the night of March 23. All who asked for food were given it at the Camp Bierd labor camp of the Commission at Cristobal. Beginning March 25, the subsistence was undertaken by the Canal Zone Branch of the American Red Cross, and this will be continued until the need has passed. A tent village was started by the Red Cross in an open field near the baseball park, where 35 tents were ready for use by the night of the 24th. Water mains were laid through the camp by noon of the 24th. There are now 66 tents in the village, capable of accomodating 800 people, and between 450 and 500 are being cared for. The Health Officer of Colon has charge of the sanitary arrangements, and a nurse from Colon Hospital cares for the sick.

The Cristobal Y. M. C. A. gave a benefit entertainment at the clubhouse on the night of March 24, in which the Caveney Company, the Cristobal Vaudeville Company, and others assisted. One hundred and seventy-five dollars was added to the relief fund. The Y. M. C. A. has also assisted by receiving and distributing clothing.

A baseball game between the second nine of the Commissary-Subsistence Department and Porto Bello was played at Colon on March 26 under the auspices of the Colon Humane Society, at which $167 was realized.

Benefit Baseball Game.

A baseball game for the benefit of the Colon fire sufferers between teams representing the Commissary-Subsistence Department and Empire will be played on the grounds of the Atlantic Athletic Association at Colon on Sunday, April 2, at 3 p. m. Both teams have volunteered their services and a close and exciting game is anticipated. Tickets at $1 each, including free transportation on special train leaving Panama at 12 o'clock and returning leaving Colon at 6.30 p. m., are on sale at the offices of the district quartermasters, at Y. M. C. A. clubhouses and at the offices of the Panama Banking Company, Panama and Colon. The receipts will be turned over to the Canal Zone Branch of the American National Red Cross Society, which is in charge of the relief work in Colon. Music will be furnished. Box seats, at $2 each are on sale at the office of the Subsistence Officer in Cristobal.

New Regulations for Canal Zone Fire Department

A new set of rules and regulations governing the Division of Fire Protection of the Canal Zone has been approved, and will become effective on April 1, 1911. The regulations regarding the use of apparatus in the cities of Panama and Colon are extensively defined in Articles 210 to 220, which read, as follows:

Article 210. In addition to property of any description whatsoever situated within the limits of the Canal Zone, all property of the Isthmian Canal Commission and Panama railroad, and other property owned or leased in the cities of Panama or Colon are included in the fire protection districts of the Ancon and Cristobal companies, respectively.

Article 211. The Ancon or Cristobal companies shall respond to all alarms received from alarm boxes of this division located in the cities of Panama or Colon, respectively.

Article 212. If the Ancon or Cristobal companies are definitely advised by telephone, or otherwise, of fire, or imminent danger of fire in property described in Article 210, they shall immediately proceed to the scene of the fire.

Article 213. The Ancon or Cristobal companies will not respond, except as provided in the two preceding paragraphs, unless requested to respond by the chief, or acting chief, of the Panama or Colon fire departments.

Article 214. Upon arrival at a fire, if it is found that the fire is in property described in Article 210, the Ancon or Cristobal companies will take charge of fighting the fire.

Article 215. If upon arrival, it is found that the property described in Article 210, might be endangered by fire in adjacent property, the Ancon or Cristobal companies shall remain at the fire and protect property described in said article, but shall not assist in fighting the fire if it does not endanger such property, unless requested to do so by the proper official.

Article 216. If the fire endangers property described in Article 210, the Ancon or Cristobal companies will protect such property, and take part in fighting the fire, if necessary.

Article 217. If upon arrival, it is found that property described in Article 210 is not in danger, the Ancon or Cristobal companies will immediately return to quarters, unless requested by the chief, or acting chief, of the Panama or Colon fire departments to remain and assist in fighting the fire.

Article 218. If the Ancon or Cristobal companies are requested by the chief of the Panama or Colon fire departments to assist in fighting fire in Panama or Colon, in property other than described in Article 210, these companies will go into these cities and assist under the direction of the chief of the Panama or Colon departments.

Article 219. If the Ancon or Cristobal companies arrive first at a fire described in Article 210, the Panama or Colon fire departments will not take part in fighting such fire, unless requested by the officer in charge of the Canal Zone companies.

Article 220. All three-way hydrants in the city of Colon installed by the Isthmian Canal Commission or the Panama railroad for the protection of property described in Article 210 shall be reserved for use of the fire engine of Cristobal company.

Organization for Advancement of Negroes.

The Intercolonial Club, an organization composed of American, West Indian, and African negro men, with headquarters in Colon, recently celebrated its first anniversary. The club was organized to meet the needs of the educated class of negroes on the Isthmus and in the Canal Zone. Its membership includes ministers, lawyers, doctors, dentists, merchants, and business men, residents of Panama, Culebra, Empire, Gorgona, Gatun, Colon, Bocas del Toro, and Kingston, Jamaica. The club rooms are situated on Bolivar street and consist of a library, billiard room, reception room, club bar, and a reading room, which is furnished with the leading newspapers of New York and London, the better class American and English magazines, and such publications as deal with the affairs of the negro race. The club interests itself in all matters pertaining to the welfare of the race. Another object of the organization is to bring about a better understanding between the American and British negroes, and the club works in cooperation with the Pan-African Club of London and the National Club of Kingston. There are two social functions in the year; a dance, which is held in May, and an annual reception in September. The management of the club is in the hands of the officers and an executive committee which meets twice a month. A general meeting is held once a week. A special feature is the literary evening once a month, when questions are brought before the club on all matters of interest.

President Declines Clemency.

A cable message from Washington under date of March 25, 1911, states: "President has declined application for clemency M. H. Lough."

Matthew H. Lough, locomotive engineer, was found guilty in the District Court at Cristobal of criminal negligence in having caused a wreck at Bohio on the night of August 15, 1910, in which Elias Tinsley, a conductor, was killed. On appeal, the Supreme Court confirmed the decision of the District Court on February 21. During the visit of President Taft to the Isthmus in November, 1910, fellow employes of Lough presented a petition asking him to grant a pardon. The President directed that the case be brought to his attention after the decision of the Supreme Court had been made, and this was done in a petition presented to the Chairman and forwarded by him to the President. Mr. Lough's sentence is for one year in Culebra penitentiary, where he is now confined.

The Elders' Tennis Tournament.

The tennis tournament for members of Zone tennis clubs who are over 40 years of age took place on the court of the Gatun Tennis Club on Sunday, March 26, with the following entries: Empire, Mr. E. J. Williams, Mr. W. W. Wood; Panama, Mr. Pezet, Mr. Fearon; Culebra, Dr. Crabtree; Colon, Mr. P. G. Hoyt; Gatun, Major Harding, Major Jervey, Mr. Ben Johnson. The scores were as follows:

Preliminaries—Wood defeated Johnson, 6-3, 6-3; Hoyt, defeated Fearon, by default; Pezet defeated Williams, 3-6, 6-3, 6-2; Harding defeated Crabtree, 8-10, 6-3, 6-2.

Second round—Hoyt defeated Wood, 6-3, 6-3; Jervey defeated Harding, 6-1, 6-3.

Semi-finals—Jervey defeated Pezet by default.

Finals—Jervey defeated Hoyt, 2-6, 6-3, 11-9.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

A meeting of the executive board and conference of presidents of the Canal Zone Federation of Women's Clubs will be held in the Commission clubhouse at Empire on Tuesday afternoon, April 4, at 3 o'clock. Mrs. R. W. Hart has been designated corresponding secretary of the Federation during the absence of Mrs. F. Mears, and all communications regarding the work of the organization should be addressed to her at Cristobal.

The Federation cook book has been placed on sale at the newstands in Colon and at the Hotel Tivoli in Ancon.

Church Notes.

A three weeks' mission is being held at St. Ferdinand's Church in Empire, by the Very Rev. Patrick MacHale, of Philadelphia, visitor of the Vincentian Fathers. The mission is divided into three classes: For West Indians, for French, and from March 29 to April 2, for white Americans, non-Roman Catholics being invited to attend. The meetings are held in the church every evening at 7.30 o'clock. St. Ferdinand's parish includes the village of Empire and the surrounding districts, with several bush settlements, in all about 2,000 members.

The Wesleyan Methodist Church on the Isthmus has been asked to take charge of the Methodist work at Bocas del Toro and the adjoining stations. The church building and other property at Bocas has been turned over to the representatives of the conference and as soon as the investigation of titles is completed the transfer will be effected. The Rev. M. B. King of Panama and The Rev. E. J. Cooke of Colon will take the duty at the new mission until a minister is appointed. The Wesleyan Methodist Church on the Isthmus is part of the West Indies branch, which is under the jurisdiction of the missionary committee of the English conference.

Mr. James Hayter, agent of the American Bible Society, with headquarters at Guatemala City, was a recent visitor to the Isthmus in the interests of the work of the society.

Tivoli Hotel and Tourist Trade.

Two buildings formerly used as servants' quarters and one family house situated in the rear of the Hotel Tivoli have been remodelled for the accommodation of guests. They are furnished and equipped uniformly with the rooms in the main building, and baths and toilets are provided. The annex gives additional accommodations for about 60 persons. The hotel servants will be quartered in two barracks which have been moved from the Spanish camp to a site back of and near the hotel.

Additional accommodations have been made necessary by the large increase in the number of visitors to the Isthmus during the dry season. Interest in Canal construction attracts tourists, and healthful conditions having been established on the Isthmus, a considerable number of persons come here to escape the rigors of the winter months. The Tivoli was completed in 1907 and accommodated about 115 guests. Since that time the interior of the building has been remodelled, so that 150 persons may be accommodated without inconvenience. The trade during the dry season runs from 120 to 170 guests, in the wet season the average falls below 100. In addition to this transient trade, the hotel provides for large tourist parties from the States which visit the Isthmus on an average of once in three weeks from December to April. These excursions carry from 250 to 450 passengers. The tourists usually cross the Isthmus in special trains, arriving in time for lunch at the hotel, and returning to Colon in time to sail on the evening of the same day. For tourist lunches, tables are set in the ball room, the tea room, on the south veranda and the billiard room. The regular staff of waiters is supplemented on these occasions by ships' stewards, one steward to eight persons being sent over to assist. The hotel kitchen has been recently improved and enlarged and there is dining room equipment sufficient to provide for 600 persons at a sitting.

PERSONAL.

Major-General George W. Davis, U. S. A., retired, who was a member of the first Isthmian Canal Commission, and first Governor of the Canal Zone, arrived on the Isthmus on the *Panama* on March 24 for a brief visit.

Funds for Gatun Playground.

As a result of the three nights' carnival held in Gatun on March 15, 16 and 17, $360.15 has been turned over to the finance committee of the Gatun playground association for the establishing of a public playground in the village.

Culebra Gun Club.

The Culebra Gun Club will hold a clay pigeon shoot at its clubhouse on Sunday morning, April 2. All employes of the Commission and Panama railroad on the gold roll are eligible and those who are desirous of becoming members should communicate with—

WM. E. TRAGSDORF,
Secretary and Treasurer.

CULEBRA, March 25, 1911.

Changes in Organization.

Mr. George H. Ruggles has been assigned to take charge of the construction of the new concrete docks at Cristobal. The position of Superintendent of Public Works, formerly occupied by Mr. Ruggles, has been filled by the appointment of Mr. Maurice E. Gilmore, formerly of the Panama railroad engineering corps.

Obituary.

J. R. Cleary, an employe of the Mechanical Division, residing at Tabernilla, was killed at the Gorgona shops on March 18 by a railroad train. He was born in Baltimore, Md., was 24 years of age, married, and had been on the Isthmus since October, 1910.

Charles Matthew Cuvillier, who was employed in the Pacific Division as a foreman and who had been on the Isthmus from October, 1904, to December, 1910, died at his home in Alexandria, Va., on March 16. He was 40 years of age and is survived by a widow.

The statement in last week's issue of THE CANAL RECORD that Paraiso Court No. 5, I. O. P. K., had passed resolutions of sympathy on the death of R. C. Smith was in error. The resolutions of sympathy were adopted for Mr. R. C. Smith on account of the death of his wife.

Spanish War Veterans.

Chagres Camp, No. 2, Spanish War Veterans, will meet in the lodge hall at Gorgona on Sunday, April 2, at 2.30 p. m. A full attendance is desired.

B. P. O. E.

There will be a meeting of Elks at the Imperial Hotel, Colon, on Sunday, April 2, at 10 a. m. All Elks in good standing are requested to attend.

School Holidays.

The public schools will be closed for the Easter holidays from April 8 to 17.

LOST—A bunch of keys. Finder please notify Col. C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Proposals for Charcoal.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, until 2 p. m., March 31, 1911, when they will be publicly opened, for 40,000 pounds of charcoal in bags. Delivery of 10,000 pounds to be made within 10 days after award, balance within 30 days thereafter. Charcoal will be accepted on board cars at any point on the Panama railroad and will be inspected and weighed on receipt at destination. Payment will be made on basis of net dry weight, according to specifications which will be furnished upon application. The right is reserved to reject any or all bids. Bids must be marked "Proposal for Charcoal" and addressed to the Depot Quartermaster, Mount Hope, C. Z.

C. NIXON,
Depot Quartermaster.

LABOR FORCE AND QUARTERS IN FEBRUARY.

The total of the Canal and Panama railroad force at work on February 28 was 35,955, as compared with 37,271 in January, and 37,458 in February, 1910. Of the total for February, 1911, Canal employes numbered 28,755, and Panama railroad, 7,200. The force report for February, follows:

DEPARTMENT.	SILVER EMPLOYES.*														Total Gold.	Grand Total.
	Artisans.						European Laborers.		West Indian Laborers.							
	Monthly	44 cents.	32 cents.	25 cents.	20 cents.	16 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.	10 cents.	7 cents.	Total Silver.

Panama railroad force, 3,832; Panama railroad relocation force, 2,408; Panama railroad commissary force, 960. Total, 7,200. I. C. C. force, 28,755. Grand total, 35,955.

*All wages specified are in gold.

On February 28 there were 9,688 occupants of quarters for "gold" employes, of whom 2,133 were women and 1,895 were children. The occupants of quarters for European laborers numbered 5,690, of whom 272 were women and 377 were children. The occupants of quarters for negro laborers numbered 8,886, of whom 1,160 were women, and 1,368 were children. The total number of occupants of Commission quarters was 24,264.

HEALTH OF COLON.

Systematic Education of People in the Crowded Sections.

A campaign against disease has been begun in Colon by various organizations in cooperation with the public health authorities. The work is among the people in the crowded section of the city, and is along the lines of education. Colon has a population estimated variously at from 10,000 to 15,000 and the health authorities estimate that about 90 per cent of this population is floating, and that more than one-half of the unstable portion is composed of West Indian negroes who come to the Isthmus in search of work on the Canal.

Most of the dwelling houses in the crowded section are large frame structures two or three stories high (a sanitary decree issued on April 23, 1907, prohibits the construction of "new frame buildings or the remodeling of old ones, which provide for more than two stories.") The smaller type of houses has an average of 38 rooms, the larger, 75 rooms. Each house has central fire-proof kitchens, the number being regulated by the sanitary decree which orders that "kitchen space shall be provided for in buildings at the rate of not less than sixteen (16) square feet of space for each living room contained in each story." Running water is installed, and there are sanitary toilets with open plumbing.

In regard to the living rooms, the law provides that "no building or buildings to be used as a dwelling shall have a living or bedroom smaller than 10 by 10 feet and each room shall have not less than one window three by five feet and one door two feet six inches by seven feet opening upon a street, yard, alley, or patio. The distance between the floor and ceiling shall not be less than 10 feet."

Owing to the limited number of these houses in proportion to the population, and the high rent charged, each room is usually occupied by a family consisting of two or three adults and several children, or by three, or more, adult persons. It has been demonstrated, however, that should the authorities insist upon limiting the number of persons occupying a room, many people would be turned into the streets.

The room occupied by a family is usually divided into sleeping and living portions by a curtain, and is overcrowded with furniture. Although the West Indian negoes are accustomed to living out of doors during the day, they adhere to the old superstition that sleeping in the night air produces fever. They close the solid wooden doors at night and exclude all the air they can by means of curtains. On the ground floor the condition is more favorable to this exclusion of air than on the upper stories which get a sea breeze constantly.

The initial step in the campaign against disease was taken by the institution of district nursing, as outlined in THE CANAL RECORD of February 8. The object was to discover the reasons for the high rate of infant mortality in the city and to begin an educational campaign. The work is experimental, and, as far as it concerns Colon Hospital, temporary, as nurses of the regular staff can be spared for outside duty only during the dry season when the wards are not full. Two nurses began the work on January 16, and in the three weeks that followed, 409 visits were made, and nine babies were sent to Colon Hospital. In all other cases, the mothers of new born infants were taught the simple principles of infant hygiene, and the daily visit of the nurse was sufficient. Except in emergency cases, the nurses give no medicine or other supplies.

Tuberculosis work has been begun at the initiation of the Cristobal Woman's Club, acting under the advice of the health authorities, and with the cooperation of the churches, church societies, and other organizations in Cristobal and Colon. The district nurses assist by paying special attention to the children in the families they visit, with a view to the discovery of cases in their incipiency. When such are found, the mothers are given careful instructions regarding care and treatment. As a measure preliminary to the general work, placards in Spanish and English, giving rules for the prevention of the spread of the disease and for self-treatment for those already affected, have been posted in the halls of every tenement house in the city.

A large number of lantern slides have been received, and will be used to illustrate lectures to be delivered in the public buildings in different parts of the city, and in Cristobal. Besides the pictures showing the nature and development of tuberculosis, there are 20 slides showing sanitary and insanitary house conditions, flies and fly breeding. The exhibit will be accompanied with lectures.

Hamburg-American Steamship Service.

The Hamburg-American line has instituted a first and second class weekly service between Colon and New York, by the steamers *Prinz August Wilhelm, Prinz Joachim, Prinz Eitel Friedrich,* and *Prinz Sigismund,* one leaving Colon at 10 o'clock each Tuesday morning. All of these ships call at Kingston on both north and southbound voyages, and the *Prinz Joachim* and *Prinz August Wilhelm* call also at Santiago, Cuba. The weekly sailings to Port Limon, Costa Rica, have been discontinued and fortnightly calls have been substituted, the steamers leaving Colon on alternate Wednesdays. These ships call also at Bocas del Toro.

Quarantine Regulations Modified.

On account of the recent removal of quarantine restrictions against passengers, who spend five days in San José, Costa Rica and embark immediately upon arrival at Port Limon, and, in order to minimize as much as possible the restrictions against tourist traffic, the following regulations have been made effective, as of January 24, 1911:

Passengers from noninfected ports for Colon, via Port Limon will be allowed to avail themselves of the privilege of going to San José under the following conditions:

1. The captain of the vessel will prepare a list of all such passengers disembarking at Port Limon for the purpose of proceeding to San José. The captain, or other officer of the ship, will furthermore be required to accompany such passengers to the train and see that they go aboard directly for San José, without spending two or three hours walking about the city of Port Limon.

2. Such passengers must procure from the American Consul in San José a certificate stating that they reported at his office on that date. This is required as evidence that they went to San José, and did not spend the time in the coast country.

3. Upon return from San José, passengers must proceed directly from the train to the steamer, and the captain of the vessel will be required to certify that this provision of the regulation, as well as that mentioned in section 1, has been complied with.

Upon arrival at Colon, the captain of the vessel will present to the quarantine officer a list showing the names of the passengers, who went to San José, as provided for by the regulation, and he will be required to certify on honor that the provisions mentioned herein have been fully observed.

New regulations were placed in effect on the same date, governing passengers from Puerto Barrios, Guatemala. These are, as follows:

1. For the present, passengers, who have completed five days from date of departure from Puerto Barrios, will be received at Colon without quarantine detention, except in cases of sickness, provided, however, that such passengers come from Guatemala City to Puerto Barrios by rail the same day of sailing, without stopping at points along the line. Such passengers must bring a certificate from the officer of the Public Health and Marine Hospital Service, detailed in Guatemala City, to the effect that they are from that city, and, during the close season of quarantine, when an officer of that Service is on duty at Puerto Barrios, these certificates must be viséd by him.

2. Passengers without such certification, and, who have not completed five days on the trip from Puerto Barrios to Colon, will be subject to quarantine detention.

Money Orders for Costa Rica.

A money order convention between the Canal Zone and Costa Rica was signed at Washington on March 2. Regulations for the issue of these orders are published, as an official circular, on another page of this issue.

Panama-Gorgona Highway Nearing Completion.

Grading on the section of the Canal Zone highway between Pedro Miguel and Corozal has been practically completed; most of it has been macadamized, and rolling is now well under way. The trestle fill, made by the Panama railroad over the valleys of the Camaron and Caimitillo Rivers, and the construction of the concrete bridge over the Cardenas River, near Corozal, were finished a few weeks ago, thereby furnishing a continuous roadway from Panama to Gorgona, with the exception of the concrete bridge, now building, which is to span the Mandingo River, near Bas Obispo. It is probable that wheeled vehicles will be able to make the trip from Panama to Gorgona by July 1.

The highway out of Panama branches off the Caledonia road about one-half mile from the railroad station, and continues east of the railway, in some places one-half mile or more, and in others approaching close to, or crossing, the railroad right of way. From Panama to Corozal the road is rather tortuous, but from Corozal to Pedro Miguel there are very few sharp curves, although it takes several wide swings. At Pedro Miguel the highway crosses to the west of the relocated line, which it parallels until near Paraiso Junction, where the railroad is recrossed. From this point it follows the east bank of the Canal to the Empire suspension bridge, which takes it to the west side of the Cut. Passing through the east part of Empire it crosses the railroad and goes through the old town toward Las Cascadas. From Empire to Gorgona the road remains on the west side of both the Panama railroad and the Canal. The total length of the highway is about 20 miles, or about one mile longer than the rail distance between Panama and Gorgona.

A committee to determine the method of handling and disposing of scrap material has been appointed, consisting of Lieut.-Cols. D. D. Gaillard and C. A. Devol, Mr. J. A. Smith, Major T. C. Dickson, and Mr. A. L. Robinson.

Missing Man.

Any one having information regarding the whereabouts of Frank Braun of Newark, N. J., who is supposed to have come to the Isthmus, is requested to communicate with the American Legation, Panama.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

The 200, or over, bigpin bowling scores for the week ending March 25, are as follows: Cushing, 235, 223; Case, 227; Mengel, 226; Conlon, 218, 204; Huttlemaier, 216.

The 100, or over, duckpin scores for the week ending March 25, are as follows: Hill, 116; Huttlemaier, 111; Cornthwaite, 104; Case, 101; Fox, 100.

The standing of the players in the handicap chess turnament for the week ending March 25, is as follows:

Name.	Won.	Lost.	Name.	Won.	Lost.
Bartlett.....	7	1	Stearns.....	3	4
Dubois.....	4	6	Warner....	4	5
Goodenow...	5½	7½	Wilson.....	5	1
Putnam.....	6	8	Strong.....	2½	4½

There will be a return engagement of the Caveny Entertainment Company on Thursday evening, March 30, beginning at 8.15 o'clock with an entire change of program. Members, free; nonmembers, 50 cents; children, 25 cents.

The last period of the topic club on Monday evening April 3, between 7.45 and 8.15 o'clock, will be under the, direction of Mr. J. F. Warner; topic, "The law of service, in relation to growth and happiness."

Selected films will be presented at the motion picture entertainment to be held on Thursday evening, April 6.

EMPIRE.

Gorgona defeated Empire in an indoor baseball game on Saturday evening, March 25, by a score of 15 to 12.

Empire won two out of three events in the pool and billiard tournament with Gatun on March 25. Hersh beat DePoorter, 125 to 92; Pearson beat Wilson, 125 to 109; and Smith lost to Townsley, 80 to 100. A return match will be played at Gatun on Saturday, April 1.

The Cristobal Vaudeville Company will combine with the Empire Musical and Dramatic Society in a joint performance at the National Theatre, Panama, for the benefit of the Red Cross on Friday evening, April 7.

Moving pictures will be exhibited on March 29 and April 5.

There are three events still to be run off in the group contests in the gymnasium: Horizontal bar, three standing broad jump, and seventeen potato race. These events will be run off on March 30, April 6 and 13.

GORGONA.

On Sunday, April 2, A. A. Simka will deliver an illustrated lecture on "Jerusalem." Mr. Simka was born and raised in Jerusalem. The meeting opens at 7 o'clock.

The bowling alleys are again open. They have been thoroughly planed and are in excellent condition.

The weekly moving picture show is scheduled for Friday, March 31, instead of the regular Tuesday night exhibition.

GATUN.

The Cristobal Vaudeville Company will play at Gatun on April 3.

The meeting of the "Life problem's club" on Sunday, March 26, was well attenced. The subject for discussion was the "Theatre."

A debate on the subject "Resolved that it is more beneficial to live in the city than in the country" was participated in by Messrs. Dougherty, Fox, Colton, and Gilkie on Wednesday night, March 22.

CRISTOBAL.

In the bowling match between Gorgona and Cristobal duckpin teams on Saturday night, the following scores were made:

Gorgona.				Cristobal.			
Seebt.......	80	77	82	Barrett.....	90	90	81
Madler.....	68	81	81	Furlong...	91	79	102
Otis........	96	92	87	Jacques...	82	92	80
Haggerty...	64	78	89	Louch.....	92	85	100
Orr.........	85	81	80	Herring...	79	94	100
Total.....	393	409	419	Total...	434	440	463

Dr. Lloyd Noland of Colon Hospital will conduct the "Life problem club" meeting on Wednesday night, using as his subject "Health and stimulants." The last meeting under the leadership of Judge Brown discussed "The family and the church."

The basketball trophy won by the Cristobal basketball team has arrived and is hung on one of the walls of the building.

Twenty-five new books have been added to the library.

The following vessels arrived at or departed from the port of Balboa during the week ending March 25, 1911:

Arrivals—March 19, *Rupanco*, from Guayaquil; March 20, *Chile*, from Valparaiso; March 22, *Leelanaw*, from San Francisco; March 23, *Acapulco*, from San Francisco.

Departures—March 20, *Ucayali*, to Callao; March 22, *Riverside*, and *Sydney*, to San Francisco; *Quito*, to Buenaventura; *Aysen*, to Valparaiso; March 24; *Aztec*, to San Francisco.

PANAMA CANAL BASEBALL LEAGUE.

Panama Canal Baseball League Batting Averages.

OFFICIAL CIRCULARS.

Spare Parts and Materials to be Turned into Store.

CULEBRA, C. Z., March 20, 1911.

CIRCULAR No. 377:

The drawing by construction divisions from storehouses of spare parts and material for anticipated future needs, and the retention thereof either on the work or in storehouses not under the Chief Quartermaster, has resulted in the acccumulation of a larger stock of some articles than is necessary, and in the making of articles of which an adequate supply was on hand, but the existence of which was not known to the proper officials.

It is therefore directed that officials of the construction divisions turn over to the nearest quartermaster's storehouse all spare parts and material that are not required for immediate use, and that in future no spare part or material shall be drawn from the Quartermaster's Department until actually required.

The keeping of limited quantities of spare parts in places not accesible to quartermaster's storehouses by the Mechanical Division and other shops charged with the making of repairs to rolling equipment, steam shovels, etc., is authorized, but a correct list of such parts and the number thereof at each place will be kept, and copies thereof furnished semi-annually to the Chief Quartermaster.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Rate for Head Waiter.

CULEBRA, C. Z., March 20, 1911.

CIRCULAR No. 299-K (Corrected):

The maximum rate of $75 a month is authorized for the position of Head Waiter, Subsistence Department.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Meteorologists and Tool Dresser.

CULEBRA, C. Z., March 21, 1911.

CIRCULAR No. 299-L:

The following designations and rates of pay are authorized in addition to those published in Circular No. 299:

Designation.	Unit.	Rate of pay.
Principal Meteorologist	Mo.	$175.00
Meteorologist	Mo.	162.50
Tool dresser	Hr.	.75

(Is applicable only to Mechanical Division.)

The rating of Principal Observer at $175 a month is hereby abolished.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Survey Laborers and Observers.

CULEBRA, C. Z., March 21, 1911.

CIRCULAR No. 229-O:

The special rates of $1.30 a day for Survey Laborers and $5 a month for Observers at Chepo and Chorrera are hereby authorized.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Photographs and Blue Prints.

CULEBRA, C. Z., March 21, 1911.

CIRCULAR No. 156-A:

That part of Circular No. 156, issued by the Acting Chairman and Chief Engineer, February 8, 1908, relating to the sale of photographs and blue prints, is hereby revoked.

In future, photographs and blue prints will be issued only for official use.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Planing Mill Work at Gorgona Shops.

CULEBRA, C. Z., March 21, 1911.

CIRCULAR No. 343-B:

Paragraphs 13 and 14 of Circular No. 343, dated August 25, 1910, are hereby revoked.

Effective April 1, 1911, all doors, wood sash, panel work, furniture of any kind not purchased under contract, all light wood work required to be mortised and tenoned, coffins; jack, mud and center blocks for steam shovels; tamping sticks, and other wood work carried in stock for issue, will be made by the Mechanical Division at Gorgona shops.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Reduction of Force in Shops.

CULEBRA, C. Z., March 23, 1911.

CIRCULAR No. 262-E:

Circular No. 262-D is hereby amended by the addition of the following paragraph:

12. *Reduction of Force*—Whenever a reduction in the force of artisans employed in any shop can be made, a list of the employes whose services can be dispensed with will be forwarded to the Inspector of Shops, and the latter will indicate the place and position to which they will be transferred, or recommend any other action to be taken in their cases. No artisans will hereafter be given five days' notice, or discharged on account of reduction of force, until after the recommendation of the Inspector of Shops has been received.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

In Charge of Relocation, P. R. R.

CULEBRA, C. Z., March 22, 1911.

CIRCULAR No. 378:

Effective March 23, 1911, Mr. H. P. Warren, Engineer of Construction, will be in charge of the relocation of the Panama railroad during the absence on leave of Lieutenant Frederick Mears.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Price of Rations at Colored Laborers' Kitchens.

CULEBRA, C. Z., March 23, 1911.

CIRCULAR No. 173-A:

Effective April 1, 1911, the price per ration in the Colored Laborers' Kitchens will be reduced, until further notice, from 30 cents per day, to 27 cents per day.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Employes on Labor and Other Trains.

CULEBRA, C. Z., March 25, 1911.

CIRCULAR No. 379:

All employes of the Isthmian Canal Commission and Panama Railroad Company, except members of train crews, are prohibited from jumping on and off moving locomotives, cars, or trains, and from riding on the roofs and platforms of cars of labor trains. Any employes violating this order render themselves liable to discharge.

Labor trains will come to a full stop at the regular places where passengers are either taken on or discharged in order that this order may be fully complied with.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Copies of Work Requests.

CULEBRA, C. Z., March 23, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

As this office is not at all times furnished the proper number of copies of work requests (Form 159 C. E.-Revised) required by Circular 197-C and instructions subsequent thereto, the following is repeated for your guidance:

When the work to be performed exceeds an estimated cost of $50 and requires the approval of this office;

The orignal and nine copies should be forwarded for work to be done by the Panama Railroad Company;

The original and six copies should be forwarded for work to be done by the Central Division; and

The original and four copies should be forwarded for work to be done by any of the other departments or divisions. (Except as provided in Paragraph 3 of Circular 197-C.)

When the estimated cost of work does not exceed $50, it is necessary that this office be furnished two carbon copies of the request.

By direction of the Chairman.

C. A. MCILVAINE, *Chief Clerk.*

Money Orders for Costa Rica.

DEPARTMENT OF CIVIL ADMINISTRATION.
DIVISION OF POSTS, CUSTOMS, AND REVENUES.

ANCON, C. Z., March 23, 1911.

CIRCULAR No. 82:

To All Postmasters: A convention for the exchange of money orders between the Canal Zone and the Republic of Costa Rica has been entered into, effective April 1, and on and after that date you will issue money orders for payment at any post-offices in Costa Rica, and effect payment at your office upon money orders issued in Costa Rica for payment in the Canal Zone. The exchange of money orders with Costa Rica will be carried on practically along the same lines as our present domestic money order system. You will, however, note particularly the following:

Writing may be either in the English or Spanish language, but must be in Roman letters and Arabic numerals, without erasure, alteration or obliteration, and no money order shall contain a fraction of a cent, or of a centime. The maximum amount for which a single money order may be drawn is fixed at $100 U. S. currency. The amount of money orders in both directions shall be expressed in the money of the country of origin, and, because of the difference in value between the dollar of the United States and the colon of Costa Rica, and on account of the fluctuation in value of the currency of Costa Rica, it has been agreed that the amounts of all money orders shall be converted into their proper equivalents by the Postal Administration of Costa Rica, and that for this purpose that country shall make use of the money order exchange office at San Jose, to which all advices of money orders, issued in either country upon the other, shall be sent; and where the sum thus advised by the Postal Department of Costa Rica, for money orders drawn on the Canal Zone, shall be converted into U. S. money, at the current rate of exchange at the time of receipt of such advices by the exchange office. In like manner, the amounts named in advices of orders issued in the Canal Zone on Costa Rica shall, upon their arrival at the exchange office at San Jose, be converted into the currency of Costa Rica at the current rate of exchange on the day of the arrival of the advices.

The exchange office will write on each advice, in red ink, the amount to be paid in the currency of the country of destination, and dispatch the advices to the respective offices of payments, where the amount on the advice (in red ink) is to be paid on the corresponding order, and at the same time entered on the face of the order (at the time of payment) in red ink.

Advices shall be dispatched by the first mail after issue of the order to the exchange office at San Jose.

Application for second advices shall be complied with, and shall be sent to the exchange office at San Jose for certification and transmission to the office of payment.

Postmasters in Costa Rica and the Canal Zone may correspond with each other:

1. In making requests for second advices and complying with the same.
2. In making inquiries regarding the payment or repayment of orders.
3. In recalling advices of repaid orders.

Domestic money order fees will be collected on orders issued for payment in Costa Rica.

Costa Rica orders will be reported to this office and to the Auditor in the same manner as are all other orders. In the weekly reports the words "Costa Rica" should be stamped after each order drawn on that country. Rubber stamps for that purpose will be furnished you.

TOM M. COOKE, *Director of Posts.*

Supplies for Canal Work.

The following steamers with supplies for the Isthmian Canal Commission arrived at the ports of Cristobal and Colon during the week ending March 25:

Advance, March 20, from New York, with 10 crates car wheels, 8 cases copper ladder rungs for Atlantic Division; 18 cases copper rungs, 293 tons structural material for Pacific Division; 80 pigs tin, 618 pieces castings for Mechanical Division; 2 barrels knuckles, 3 barrels twine, 7 casks crockery, 20 kegs rivets for stock; and a miscellaneous cargo, the whole consisting of 847 packages, weighing 79 tons.

Turrialba, March 23, from New Orleans, with 6 crates cement screens for Atlantic Division; 6 pieces castings for Mechanical Division; 32,175 feet, B. M., yellow pine lumber for stock.

Santa Marta, March 24, from New York, with 4 cases electrical material for Mechanical Division; 9 cases insulated wire, 114 barrels drift bolts for stock.

Panama, March 24, from New York, with 24 pieces castings, 36 pieces crusher machinery, 26 pieces steel castings for Atlantic Division; 24 pieces castings for Central Division; 260 bundles brake shoes, 7 packages electrical crane, 12 oxygen cylinders, empty, 6 acetylene cylinders, filled, 140 drums calcium carbide for Mechanical Division; 50 cases alcohol, 300 pieces steel plate, 65 bags feed, 6 cases range parts for stock; and a miscellaneous cargo, the whole consisting of 1,101 packages, weighing 162 tons.

COLON TO BARBADOS, CALLING AT TRINIDAD.

Oruba	R. M.	Tuesday	April 11
Magdalena	R. M.	Tuesday	April 25

Hamburg-American steamers leave Colon for New York via Kingston every Tuesday at 10 a. m., and those designated (*) call at Santiago, Cuba; for Bocas del Toro and Port Limon on alternate Wednesdays, by ships designated (*).

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on Alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m., and for New York on Thursday at 11 a. m.

The *Miltonian* of the Leyland line will sail for Tampa via Kingston on April 1.

Sailings of the French line (Ciè Gènèrale Transatlantique) for Venezuelan ports, Martinique and Guadeloupe on the 3d and 20th of each month.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, APRIL 5, 1911. No. 32.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Panama Railroad Hotel in Colon.

In accordance with a plan agreed upon by the President on his visit to the Isthmus in November, 1910, the Panama Railroad Company will construct a new hotel in Colon, on the site occupied by the present Washington House and adjacent buildings. It is probable that the material will be reinforced concrete. B. G. Goodhue of the firm of Cram, Goodhue & Ferguson, which has charge of the additions to the Military Academy at West Point, has been requested to confer with the President of the railroad company with regard to plans. Mr. Goodhue has made a study of Spanish architecture and it is probable that the new hotel will be of that class.

Highest Excavation Record in Central Division.

The total excavation in the Central Division for the month of March, 1911, amounted to 2,032,523 cubic yards, of which 2,012,469 cubic yards were excavated from the Canal prism, 13,618 from the Obispo diversion and 6,436 from other outside work.

From the Culebra section of the Central Division (Culebra Cut,) 1,729,588 cubic yards were excavated and from the Chagres section, 302,935 cubic yards.

The total excavation from the Canal prism (2,012,469) is the largest ever made in any one month in the Central Division since the commencement of work by the United States, the largest previous records having been 1,966,294 in March, 1909, and 1,987.714 in March, 1910. The total excavation in the Culebra section (1,729,588 cubic yards) was also the largest ever made in a single month, the highest previous records having been 1,434,597 in March, 1909, and 1,509,728 cubic yards in March, 1910.

The excavation of March, 1911, is undoubtedly the highest excavation in the prism that will ever be made within the limits of the Central Division for the reason that, owing to the completion of steam shovel work in the Chagres section within the next two or three weeks, except for two small remaining pieces which will be taken out in the next dry season, 10 shovels which worked in the month just passed, will be out of commission so far as future work in the Central Division is concerned.

Unloading Record in Pedro Miguel District.

On March 28, six unloaders working in the Pedro Miguel district of the Central Division, unloaded 82 Lidgerwood trains; and in addition there were handled seven 10-yard dump trains containing a total of 33,610 cubic yards of rock and earth. The Lidgerwood trains were composed of 20 cars, each car containing 19 cubic yards of material, the 10-yard dump trains being composed of 35 cars, each car containing 10 cubic yards. The material contained in these cars was wasted on the Miraflores and Balboa dumps, except seven Lidgerwood trains, or 2,660 cubic yards, which were dumped on the Panama railroad relocation.

The highest previous record was on January 7, when 80 Lidgerwood trains and seven 10-yard dump trains, containing a total of 32,850 cubic yards of rock and earth were unloaded.

New Fire Station at Cristobal.

The railway tracks to the proposed concrete docks at Cristobal will leave the main line of the Panama railroad at the entrance to the village, and run to the waterfront through the street on which the present fire station is situated. This will make it difficult for the apparatus to leave the house quickly and, in case a train happened to be running by when an alarm came in, there would be both delay and danger, at a time when a few minutes might make the difference between a small and a large fire. The station will be abandoned as a fire house, therefore, and a new station will be erected on the water front, at the corner of Roosevelt avenue and 11th street, oposite the Cristobal commissary, where the old rest house now stands. The new building will be 75 by 56 feet in dimensions, and two stories high. On the ground floor will be space for the fire apparatus, with four doors opening upon Roosevelt avenue, stalls for eight horses, and a storeroom, and a blacksmith shop. On the second floor there will be offices, a reading room, a room for the men to sleep in, and a hay storage room.

Sidewalks in Canal Zone Villages.

Sidewalks to be constructed in Cristobal, Gatun, and Ancon from this time forth will be made of concrete, and sidewalks in other Canal Zone villages will be built of the best material available at the time and place. The construction of board walks will not be continued, because they rot out quickly and the cost of maintaining them is therefore heavy. In Culebra, walks have been built recently of rock screenings from Ancon quarry, at an average cost of 40 cents per square yard for 1,107 feet of walk four feet wide. This class of walk is adapted only for the villages that will not be permanently occupied by Government forces after the completion of the Canal. In the permanent stations concrete walks costing one dollar or less a square yard will be constructed, because the low cost of upkeep over a term of years will make them the most economical kind of walk.

Fireproof Construction in Colon.

The Panama railroad has been directed to establish a storage pile for gravel in or near Colon from which people who wish to erect concrete buildings in that city may draw supplies of gravel. The price will be as low as possible, because it is desired to encourage fireproof construction. This movement was begun some weeks ago, and the municipal authorities now have under advisement a regulation forbidding any but fireproof construction in certain areas, especially those made available for buildings by the filling of the lowlands back of the present inhabited section. The gravel will be taken from the Chagres River above Gamboa Bridge and hauled to Colon, and enough will be stored to supply the demand. Concrete made from this gravel has been used with good results by the railroad in culverts and other permanent structures.

It is proposed also to make concrete blocks for sale at the lowest practicable price. This matter is under advisement by the General Superintendent of the railroad and the Chief Quartermaster of the Commission for the purpose of determining how the blocks may be manufactured most economically.

Explosives for 1912.

It is estimated that ten million pounds of dynamite will be required to carry on the Canal and Panama railroad work in the fiscal year ending June 30, 1912, and bids for that amount will be opened at the Washington office on April 14. The amount may be reduced or increased by 20 per cent at the option of the Commission. Saltpeter dynamite is specified, and the materials will be examined at the manufacturing plant, and analyses will be made to determine the variation in percentage of nitroglycerine. If there is a variation of three per cent or more from the contract strength, the dynamite will be rejected, and for a variation of more than one per cent and less than three, the dynamite will be accepted at a reduction of 15 cents per hundred pounds for each reduction of one per cent below the full contract percentage. Three classes are specified—45 per cent nitroglycerine in 8 by $1\frac{1}{4}$ inch cartridges, 6,500,000 pounds; 60 per cent, 3,300,000 pounds in 8 by $1\frac{1}{4}$ inch cartridges, and 200,000 pounds in cartidges 8 by 2 inches.

The quantity estimated for the present fiscal year was 13,727,000 pounds, with the

NOTES OF PROGRESS.

(Continued.)

option of increasing or decreasing it 50 per cent, but it is not probable that more than ten million pounds will be used. The orders under the contract are placed from month to month, the amount being determined by the consumption during the previous month and the probable needs of the coming month. The quantities used each year, compared with those specified for 1911 and 1912, are as follows:

Year.	*Pounds.*	*Year.*	*Pounds.*
1904*	500,000	1909	8,270,000
1906	1,400,000	1910	10,403,800
1907	5,087,000	1911†	13,727,000
1908	6,822,000	1912†	10,000,000

*Amount purchased for 1904 lasted during 1905.
†Estimate.

Of the total estimated for 1912, about 63 per cent is for the Central Division for use in Culebra Cut, 20 per cent for the Atlantic Division, 11 per cent for the Pacific Division, and 8 per cent for the Panama railroad relocation.

The estimate for blasting supplies to be used with the dynamite, provides for:

Blasting caps		580,000
Electric detonators—		
10 feet long	28,000	
16 feet long	49,000	
20 feet long	155,000	
24 feet long	262,000	
25 feet long	16,000	
30 feet long	225,000	
35 feet long	170,000	
40 feet long	76,500	
50 feet long	46,500	
60 feet long	25,000	
80 feet long	3,000	1,056,000
Safety fuse, feet		1,480,000
Tape, insulating, pounds		4,350
Wire, connecting, feet		636,000
Wire, lead, feet		496,500

The amount of blasting supplies specified may be reduced or increased by 50 per cent or less at the option of the Commission.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 52 per cent completed, 130,184 cubic yards out of a total of 250,000 having been placed up to the close of work on April 1. A statement of the amount laid each day last week and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
	Cu. Yds.		
March 27	364	17:00	2
March 28	368	17:00	2
March 29	284	16:00	2
March 30	328	17:00	2
March 31	298	15:00	2
April 1	228	14:00	2
Total	1,870	96:00	2
Previously reported	128,314		
Grand total	130,184		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending April 1, follows:

DATE.	Hours worked.	Cubic Yards.
March 27	6:05	2,930
March 28	7:49	3,453
March 29	7:23	3,378
March 30	6:49	3,022
March 31	7:25	3,427
April 1	6:50	3,244
Total	42:21	19,454

Sub-Aqueous Bones.

Two vertebrae 30 inches in diameter were dug up from beneath 20 feet of sand in Chamé bay on March 20 by the dredge *Gopher*, which is working in the Pacific Division sand service. The bones were sent to the office of the Chief Engineer in Culebra and will be made the subject of expert investigation.

New Railroad Time Table.

A complete time table of Panama railroad trains, effective on April 1, is published elsewhere in this issue. There is a change in the time of departure of train No. 8 from Miraflores, Pedro Miguel, Culebra and Empire, and the time of departure of train No. 5 from Gatun and Las Cascadas and intermediate stations is also changed. The schedule of trains run on Saturday and Sunday is changed a few minutes.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 59 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 1, being 1,238,751 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending April 1, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers.		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*	*Cu. Yds.*
March 27	2,228	43:32	6	474	7:40	2	235½	2,937½
March 28	1,980	32:01	6	574	8:40	2	194¼	2,748¼
March 29	2,238	37:43	6	764	8:40	2	187	3,189

Total	13,772	232:18	6	4,066½	51:00	2	1,339¼	19,177¾
Previously reported								1,219,573½
Grand total								1,238,751¼

*The 426½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: March 27th, 54 yards; March 28th, 73 yards; March 29th, 75 yards; March 30th, 110½ yards; March 31st, 81 yards; April 1st, 33 yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Migue' is over 72 per cent completed, 606,512 cubic yards, out of a total of 837,400, having been placed at the close of work on April 1. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-Cubic yard mixers			AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixer.			Large stone.	Total.

MIRAFLORES LOCKS.

About 13 per cent of the concrete for the system of two twin locks at Miraflores was in place on April 1, the total amount on that date being 174,166 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixer.				Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Large stone.

*This 449 yards was mixed by a ½-yard mixer, the amounts for each day being: March 27th, 102 yards; March 28th, 68 yards; March 29th, 77 yards; March 30th, 62 yards; March 31st, 19 yards; April 1st, 121 yards.

SOCIAL LIFE OF THE ZONE.

Women's Organizations.

At the meeting of the Gatun Woman's Club on Friday, March 31, the quarterly election of officers was held, the following being chosen: President, Mrs. V. V. Sessions; vice-president, Mrs. James Allen; secretary, Mrs. Wilbur H. Lawrence; treasurer, Mrs. J. H. Hanna. Hereafter the meetings will be held on Thursday afternoon of each week instead of on Friday.

The next meeting of the Paraiso Woman's Club will be on Wednesday afternoon, April 12.

The Gatun Sunshine Society will hold a tea at the lodge hall on Thursday, April 13.

Church Notes.

The concrete Baptist church building was entirely gutted by the recent fire in Colon, and only a portion of the walls remain standing. Nothing was saved of the church furniture nor of the apartment in the second story, which was the pastor's residence. In connection with the church there was a school attended by about 300 Spanish, West Indian, and Chinese pupils. The church was erected in 1909 at a cost of $7,500, U. S. currency; $3,700 of this money being raised by local subscription, and the remainder being a grant of the Southern Baptist Mission Board. The pastor in charge is residing at the Baptist parsonage in Empire. Funds will be collected for the purpose of rebuilding the church at once.

During holy week, April 10 to 15, there will be services at St. Luke's Church, Ancon, as follows: On Monday, Tuesday, Wednesday, and Thursday at 7 and 9 a. m., and at 8 p. m.; on Friday at 7 and 9 a. m., and at 3 and 8 p. m.; on Saturday at 7 a. m. The services on Easter Sunday will be at 7 and 10 a. m. Sunday school at 9 a. m.

Masonic.

The first assembly of Isthmian Council No. 1, R. and S. M., was held at the lodge hall, Las Cascadas, on Saturday evening, April 1. The council degrees were conferred on a large class of Royal Arch Masons, after which a light lunch was served. The stated assemblies of the council will be held at Las Cascadas on the first Saturday night of each month at 8.15 o'clock. The recorder of the new body is J. B. Fields of Las Cascadas.

B. P. O. E.

At a meeting held in Colon on Sunday, April 2, the "Eleven O'Clock" club of Elks was organized and officers were elected. There will be a meeting at the Commission clubhouse, Cristobal, on Sunday, April 9, at 9 a. m., for the adoption of a constitution and by-laws. All Elks in good standing are requested to be present, and Elks on the Isthmus, whether wishing to join the club or not, are requested to send their names, present address, and lodge address to D. B. Walcutt, secretary, Cristobal.

Lawn Tennis.

The tournament in doubles for the Maduro-Lupi cup held in Panama on April 2, resulted:

Preliminary—Corozal failed to report and Panama won by default.

First round—Herrick-Runyon, Ancon, defeated Rogers-Tupper, Culebra, 6–0, 6–4; Deane-Fearon, Panama, defeated Smith-Wells, Gatun, 8–6, 2–6, 7–5; Farquharson-Hart, Colon, defeated Fechtig-Poole, Tivoli, 3–6, 6–3, 9–7; Bartholomew-Smith, Empire, defeated Dryden-Seville, Cristobal, 6–0, 6–3.

Semifinals—Herrick-Runyon, Ancon, defeated Deane-Fearon, Panama, 6–1, 6–4; Farquharson-Hart, Colon, defeated Bartholomew-Smith, Empire, 6–4, 8–6.

Finals—Herrick-Runyon, Ancon, defeated Farquharson-Hart, Colon, 6–4, 8–6, thus winning the cup for the season of 1911.

It was voted that the rule barring the winners of previous tournaments in doubles should not apply to this tournament, and that there should be no medals awarded; also that there be added to the schedule a tournament in doubles to be held May 30, 1911, on the Tivoli courts, to be goverened by the rules as reported by the secretary on January 1, and January 8. The next association tournament will be held in singles at Colon-Cristobal on May 7. Players will report at the Cristobal courts near the Y. M. C. A. ready for play at 9 a. m.

Personal.

Mr. T. B. Monniche returned to the Isthmus on the *Allianca*, arriving at Cristobal on March 30.

Obituary.

Mildred Hartson, the daughter of Frank J. Hartson of Culebra, died at Culebra on March 27, 1911. She was born in Danville, Ill., May 26, 1908, and had been on the Isthmus seven months.

Fatal Accident at Gatun.

Henry Joseph Marcotte, engineer of a locomotive crane was killed while at his work at Gatun on the afternoon of March 31. His crane was at work lifting concrete from the cars, on which it is carried from the auxillary mixing plant into the locks, when it overbalanced and fell, killing him instantly, and injuring the fireman. He was born in Detroit, Mich., 45 years ago, and from 1882 to 1893 was employed by the French canal company on the Isthmus, in administrative positions and as a dredgeman. From 1893 to 1909 he worked in the States, and in June, 1909, he returned to the Isthmus and entered the Canal service.

Missing Man.

Any one having information regarding the whereabouts of John Francis Sheridan, who left the service of the Commission in January, 1908, and of Devany J. Greelish, who is supposed to have been employed by the Commission in 1908,is requested to communicate with Charles W. Sass, 465 East 140th street, New York City.

Gorgona Lodge, International Association of Machinists, has adopted resolutions of sympathy on the death of John H. Hobrough who was killed in an accident at Toro Point on March 13, 1911.

In response to a petition signed by 96 persons a charter has been granted for the organization of a Canal Zone Chapter of the Order of the Eastern Star. An organizer will arrive on the Isthmus from New Orleans about May 4. There will be a meeting of those who wish to become charter members at Gorgona lodge hall on Sunday afternoon, April 23.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., on Sunday, April 9, 1911, at 7.30 p. m.

EXECUTIVE ORDERS.

Justices of the Supreme Court.

Under authority vested in me by law, and until otherwise provided by law or ordered, Walter W. Warwick is appointed an Associate Justice of the Supreme Court of the Canal Zone, at a salary of six thousand dollars per annum, effective the day he enters on the duties of the office.

WM. H. TAFT,

THE WHITE HOUSE,
March 16, 1911.

Under authority vested in me by law, and until otherwise provided by law or ordered, Thomas E. Brown, Jr., is appointed an Associate Justice of the Supreme Court of the Canal Zone, at a salary of six thousand dollars ($6,000,) per annum, effective the day he enters on the duties of the office.

WM. H. TAFT,

THE WHITE HOUSE,
March 16, 1911.

Loss by Colon Fire.

It is estimated by the Superintendent of the Panama railroad that the value of buildings burned in the Colon fire of March 23, was $352,079. This does not include the value of stock in stores or of personal effects in houses. The values were obtained as far as possible from the tax lists in Colon, and, where this was not possible, from the owners of buildings. In all, 118 buildings were destroyed. The chief of the Colon fire department places the total loss at $400,000.

Ancon Quarry.

A statement of the rock crushed at Ancon quarry during the week ending April 1, 1911, follows:

DATE.	Hours worked.	Cubic Yards.
March 27	8:00	2,528
March 28	8:35	2,174
March 29	9:55	2,560
March 30	7:00	2,502
March 31	8:50	2,746
April 1	7:50	2,193
Total	50:00	14,703

Pacific Division Sand Service for March.

Sand was supplied in March by the Pacific Division service as follows:

DESTINATION.	Number of Cars.	Cubic Yards.
Pacific Division	2,676	40,140
Atlantic Division	30	698
Central Division	30	450
Quartermaster's Department	12	300
Panama railroad	8	200
Miscellaneous	10	240
Total	2,766	42,028

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, April 1, 1911. All heights are in feet above mean sea level.

TRIANGULATION SURVEY.

Panama-Colon Datum Adopted March 23.

The primary triangulation of the Canal Zone has been completed by the Third Division of the Chief Engineer's office, and the Coast and Geodetic Survey has made its report on the final adjustment of the field data, which were sent to Washington for computation because the instruments and mechanical aids used in the special computations are not available on the Isthmus. The various stations in the network of triangles are shown in the drawing on this page.

The base line was laid off from a station on a small hill near the entrance to Tabernilla dumps to a hill back of Frijoles, a distance of 3,785.45 meters or about 2⅓ miles, and this was measured with Invar tapes in accordance with the methods of the Coast and Geodetic Survey, which were used throughout the survey. The primary net includes 19 stations stretching from Colon lighthouse on Manzanilla Point to Ancon Hill. Determinations for azimuth were based on the astronomical work done at Colon and Panama in previous years. The work done by the Commission was classed as secondary triangulation by the Coast and Geodetic Survey, the average closing error of a triangle being less than two seconds, and the length of the sides being from 10 to 13 miles. The triangulation work previously done by the Coast and Geodetic Survey in the vicinity of Colon was readjusted to bring it into accord with the Canal Zone triangulation system.

After the computations had been made to satisfy the condition and side equations, additional computations were made to carry the latitude and longitude from the Colon lighthouse through the triangulation system to the spire on the cathedral at Panama, these points having previously been used in the astronomical work noted above. Following the methods described in "The Figure of the Earth and Isostasy," by John F. Hayford, computations were made to adjust the previously determined astronomical stations to the distances as determined by the triangulation survey, and new values were given to the Colon lighthouse and cathedral spire stations.

In making the adjustments between the predetermined astronomical positions and the Canal Zone triangulation system, one of four positions had to be adopted as the standard datum: (1) The position carried forward from the observed latitude and longitude of Colon astronomical station; (2). the position carried forward from the observed latitude and longitude of Panama astronomical station; (3) the straight mean position as carried forward from the observed latitudes and longitudes of Colon and Panama astronomical stations; (4) the mean position as carried from the astronomical stations at Colon and Panama, using the observed latitude and longitude corrected for the computed effect of topography and compensation.

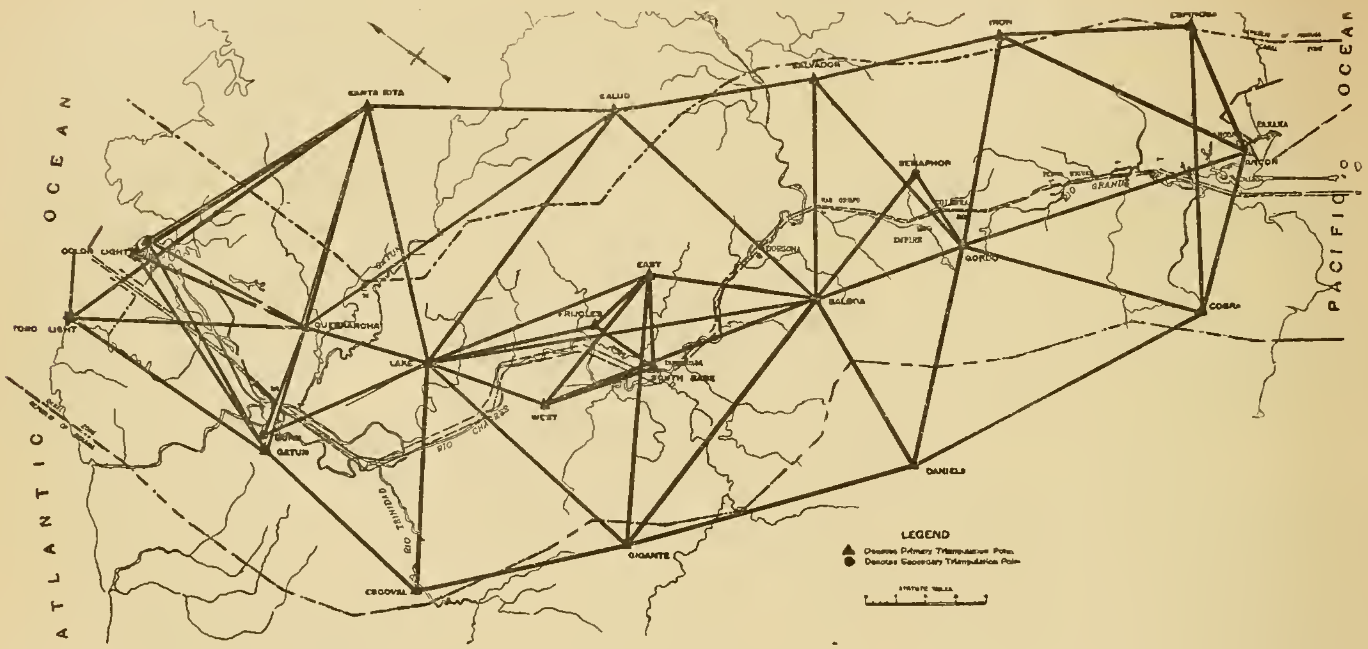
The advantage of adopting the first or second methods would be that the existing maps and charts, and the geographical positions at one end of the Zone, would remain undisturbed. The advantage of the fourth is that it gives geographical positions on the Zone which on an average would agree most closely with latitudes and longitudes observed in the future, and which also would agree most closely with data used in adjacent territory. The fourth plan was adopted by the Coast and Geodetic Survey with the positions as follows:

Colon lighthouse, latitude north, 9 degrees, 21 minutes, 55.314 seconds; longitude west from Greenwich, 79 degrees, 54 minutes, 38.811 seconds.

Balboa Hill, (Gorgona) latitude north, 9 degrees, 4 minutes, 57.637 seconds; longitude west, 79 degrees, 43 minutes, 50.313 seconds. This is the origin of the coordinates for the Zone land surveys which are based on the triangulation system.

Panama Cathedral spire, (east tower) latitude north, 8 degrees, 57 minutes, 13.676 seconds; longitude west, 79 degrees, 32 minutes, 16.516 seconds.

The new triangulation system has been made the standard for all survey and location work on the Canal Zone, and has been designated the "Panama-Colon Datum." Secondary triangulation stations, which will be convenient for local work, are being established on the Canal axis at Gatun, Tabernilla, Bas Obispo, and Pedro Miguel. By this system, and the line of precise levels previously run across the Isthmus, the surveys on all work of the Isthmian Canal Commission and Panama railroad are now referred to the same data, both for distances and for elevation.



CANAL ZONE TRIANGULATION SYSTEM.

CANAL MEDAL LIST.

The following is a list of American employes of the Isthmian Canal Commission, who completed two years' service on the Isthmus during the twelve months ending December 31, 1910, and for that reason are entitled to receive the Canal Medal. The date shown opposite each name is that from which medal service is reckoned.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in the spelling of names or in the dates from which medal service is reckoned, should be reported to the Office of the Chairman, at Culebra, for correction.

In numbering the medals the relative standing of employes, whose medal service is reckoned from the same date, will be determined by lot. The list will be continued in THE CANAL RECORD of April 12, 1911.

OFFICIAL CIRCULARS.

Changes in Organization and Increases in Pay.

CULEBRA, C. Z., March 28, 1911.

CIRCULAR No. 380:

The following excerpt from an act of Congress approved March 4, 1911, is quoted for your information and guidance:

"Except in cases of emergency, or conditions arising subsequent to and unforseen at the time of the passage of this Act, there shall not be employed at any time during the fiscal year nineteen hundred and twelve, under any of the foregoing appropriations for the Isthmian Canal, any greater number of persons than are specified in the notes submitted respectively in connection with the estimates for each of said appropriations in the annual book of estimates for said year, nor shall there be paid to any of such persons during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on the first day of July, nineteen hundred and ten, and all employments made or compensation increased because of emergencies so arising shall be specifically set forth, with the reasons therefor, by the Chairman of the Commission in his report for the fiscal year nineteen hundred and twelve."

While this limitation on expenditures applies only to the fiscal year 1912, any application for increase in force or increase in pay received during the balance of the present fiscal year will have to be passed upon just as though the above quoted Act of Congress applied to the present fiscal year.

Hereafter, therefore, every application for increase in force or increase in pay, as compared with the approved organization as of July 1, 1910, as printed in the book of estimates for 1912, must be accompanied by a detailed statement of the emergency or conditions which have arisen to render same necessary, which can be submitted to Congress in accordance with the foregoing Act, if the application is approved by me.

In order that a complete record can be obtained and prepared in shape for submission to Congress as required, it is directed that all changes in the approved organization of July 1, 1910, which have been approved to date, be tabulated, and the specific reasons therefor stated, which statements should be forwarded to me not later than April 15, 1911. It will be noted that silver employes as well as gold employes are included in the provisions of this Act.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Curtailment of Special Trains.

CULEBRA, C. Z., March 29, 1911.

CIRCULAR No. 286-A:

The Panama Railroad Company now operates regular trains on Saturday nights for the convenience especially of employes who wish to attend entertainments of various kinds along the line, as it is desired to curtail the operation of Commission equipment specials over the Panama railroad tracks, this practice having grown to such proportions that it is deemed unsafe.

Hereafter, no permission will be granted to operate Commission equipment specials on Saturday nights, and will not be granted for other nights unless convincing reasons are given showing why the entertainment or function which they are to serve cannot be given on a Saturday night.

GEO. W. GOETHALS, *Chairman.*

Special Designations, Central Division.

CULEBRA, C. Z., March 29, 1911.

CIRCULAR, No. 229-P:

The following additional designations and rates of pay are hereby authorized for night repair gangs Central Division only:

Designation.	Unit.	Rate of Pay.
Boilermaker	Mo.	$30.00
Boilermaker	Mo.	40.00
Boilermaker	Mo.	50.00

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Issue of Commissary and Hotel Books.

CULEBRA, C. Z., March 31, 1911.

CIRCULAR No. 256C-:

The following amendments to Circular No. 256, dated May 28, 1909, are hereby made:

Paragraph 4 is changed to read as follows:

Employes are *required* to obtain, as far as practicable, all hotel and commissary books required by them for the month at one time.

Paragraph 8 is cancelled and in lieu thereof the following is substituted:

The issue of commissary books to gold employes will be limited to three-fourths of the amount of their monthly pay. Silver employes may draw commissary books up to the full amount of their pay, with the understanding that silver employes whose pay is over $50 U. S. currency per month will not be permitted to draw commissary books in an amount exceeding $50 in any one month.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

CULEBRA, C. Z., March 29, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is invited to the fact that it is the intention of Paragraph 3 of Circular No. 256, dated May 28, 1909, that coupon books can be obtained at any time during a month except on the last two and the first four days of each month by both gold and silver employes. I have been informed that this intention is not being carried out and that at the present time gold employes are in general not able to obtain coupon books during more than 70 per cent of the time—instead of the 80 per cent allowed by Circular No. 256—and silver employes during not more than 50 per cent of the time.

It is directed that you make such changes in the present methods in your respective departments and divisions as are practicable and necessary to secure compliance with the intention of this Circular without increase in force.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Good Friday, a Holiday.

CULEBRA, C. Z., March 30, 1911.

CIRCULAR No. 381:

So far as consistent with the transaction of public business, Friday, April 14 (Good Friday), will be observed as a holiday in the Canal Zone.

Good Friday is not included in the list of holidays for which gratuity pay is allowed, and pay for services performed on that day will be calculated the same as for Sundays.

Holy Thursday will be considered an ordinary working day and payment made accordingly.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Designation Engineer (Crane).

CULEBRA, C. Z., April 3, 1911.

CIRCULAR No. 229-Q:

The designation Engineer (Crane) at the rates of $50 and $60 a month is hereby authorized.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Leasing of a Building at Empire.

ANCON, C. Z., March 29, 1911.

Bids will be received by the Collector of Revenues, up to and including April 20, 1911, for the leasing to the highest bidder, from May 1, 1911, for a period of not more than three years, of building No. 16 at Empire owned by the Canal Zone Government The building is of French construction, two stories, and contains, in all, 12 rooms. Bids should be in envelopes marked, "Bids for a lease to Building No. 16 at Empire."

TOM M. COOKE, *Collector of Revenues.*

LOST—Watch fob with a Masonic and Kangaroo pin attached, between the Cristobal commissary and P. R. R. station, Colon, on Saturday, April 1, between 5.45 and 6 p. m. Finder kindly return to L. E. Burdge, care Depot Quartermaster, Mount Hope.

Rainfall from March 1 to 31, Inclusive.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

An entertainment company from the States known as the Yost Concert Party will give entertainments at the clubhouses during the present month. The company consists of Gaylord Yost, violinist; Ella Schroeder-Yost, violinist and pianist; Harietta Purcell Rowlen, soprano; Charles D. Rowlen, baritone, and Molly Jane Reed, reader. The dates so far arranged are as follows: Empire, April 8; Gatun, April 10; Corozal, April 11, Culebra, April 12; Cristobal, April 13; Gorgona, April 14; Porto Bello, April 21.

CULEBRA.

A chess match by wireless telegraph and telephone is in progress between the Culebra and Porto Bello chess clubs. The first move was made by Porto Bello on Saturday night and was the pawn to the king's fourth. Culebra answered with the black's pawn to the king's fourth. The plan of play is for each member of the club to study out what he thinks would be the best move, and that suggested by the majority is adopted. In this way the match is made a test of club strength rather than of the ability of individuals. The moves are transmitted from Porto Bello to Colon by aerogram, and from Colon to Culebra by telephone, and the replies of Culebra are sent back by reversing this process.

During the week ending April 1, Fox made a bigpin score of 205, the only one over 200. The 100, or over, scores for duckpins were made by the following: Case, 103, 101, 101; Fox, 103; Huttlemaier, 101; Kersey, 100, Hurst, 100.

The opening game of the Y. M. C. A. indoor baseball league will be played between Culebra and Gatun at Culebra on April 8, at 8.15 p. m.

The topic for discussion at the session of the topic club to be held on Monday evening, April 10, at 7.45, will be "Social and political service."

EMPIRE.

The following high scores were bowled on the alleys this week in duckpins: Henry, 101, 104, 102; Parkis, 111, 108, 112; McLeod, 107; Scull, 100, 104, 105; Goolsby, 101; Koperski, 106.

In the opening game of the indoor baseball league, Empire will play Gorgona at Gorgona on Saturday, April 8.

Baseball from all angles was dicussed under the direction of Umpire Irwin last Friday evening, March 31. There was a good attendance.

Sixty new books for the library have been received and fifty more are being ordered for delivery about May 1.

GORGONA.

The discussion club on Wednesday night, March 29, was led by S. J. Boyd; the topic was, "Who should own the land, the individual or the nation?" C. M. Benson will lead the discussion on Wednesday, April 5; the topic will be "Should immigration be restricted?"

GATUN.

At the moving picture entertainment on Thursday, March 30, Fred W. Clause of Cristobal assisted at the piano and G. Karl Weston sang several popular songs and recited an original poem. The next moving picture show will be given on Saturday, April 8.

The vaudeville show by the Cristobal Y. M. C. A. troupe at the Gatun clubhouse on Monday, April 3, was enjoyed by a large audience.

Mr. Ludwig announces that the physical classes will continue to be held on Tuesday and Friday nights, and that at 9 o'clock practice for indoor baseball will be held.

"Gambling" was the subject for discussion by the "Life problem's club" on Sunday night, April 2. The attendance of the club is increasing.

The literary club held a successful meeting on Wednesday night, March 28. The musical numbers were: Soprano solo, Mrs. A. O. Ludwig; bass solo, Mr. Hull; piano solo, Mrs, Johnson; baritone solo, Mr. Ourand; Mr. Young, the president, presided. The subject for discussion and debate was "Should foreign immigration be restricted," in which the following participated: Messrs. Whiting, Gilkie, Ludwig, Guarine and Jones. Mr. Young gave a recitation.

The results of the pool and billiard match held at Gatun on Saturday, April 1, are as follows: Pool—DePoorter (Gatun), 125; Hirsh (Empire), 80. Wilson (Gatun), 74; Pierson (Empire) 185. Billiards—Tounsley (Gatun), 100; Smith (Empire), 83. Mr. Hirsh and Mr. DePoorter will play a match game of 300 balls for the championship and gold medal; the first half to be played at Empire on Saturday, April 8, the second at Gatun on April 15.

Capt. Hodges' team defeated Capt. Duran's team in a match game of duckpins held on the night of March 28. Cristobal took all three games of duckpins at Gatun on April 1.

BASEBALL.

League Games Discontinued.

The free transportation granted to the Panama Canal Baseball League teams at the beginning of the season was withdrawn on April 1. The league finds it impossible to pay expenses under these conditions and the games scheduled for dates following April 1 have been cancelled. The schedule provided for games on April 2, 9, 14, 16, 23, 30, and May 7.

The team representing the Commissary and Subsistence Departments was in the lead at the close of the season, and the standing was as follows:

	P.	W.	L.	P.C.		P.	W.	L.	P.C.
Com-Sub.	5	5	0	1.000	Empire ..	5	2	3	.400

Misdirected Letters.

Ancon, C. Z., April 5, 1911.

The following insufficiently addressed letters originating in the United States and its possesions have been received in the office of the Director of Posts and may be secured upon request of the addressee:

Coley, John
Cross, William P.
Errington, Mrs. A. C.
Ferdinand, Miss Marie (3rd class)
Higley, Charles
Holder, Norel Hoda
Hurt, W. F.
James, Mrs. Clara (pkg.)
Jenkins, J. B.
John, Florence (3d class)
Kellner, Miss C.
Maloy, Dr. E. S.
Milford, J. D.
O'Berle, Mrs. R. B.
Pettys, Mrs. William N.
Russell, Wm. G. (3d class).
Scholder, Mrs. H.
Solomon, S.
Templeton, H. L.

Supplies for Canal Work.

The following steamers with supplies for the Isthmian Canal Commission arrived at the ports of Cristobal, Colon and Balboa, during the week ending April 1, 1911:

Stanley Dollar, March 27, St. Helens, Ore.; with 462,570 feet, B. M., Douglas fir lumber for stock.

Prinz Sigismund, March 27, from New York, with 133 cases electric fuzes for stock.

Mathilda, March 28, from Tacoma, with 493,771 feet, B. M., Oregon pine lumber for stock.

City of Para, March 28, from San Francisco, with 10,002 feet, B. M., sugar pine lumber for stock.

Allianca, March 30, from New York, with 20 cases drugs and sundries for Sanitary Department; 12 cases tubing for Mechanical Division; 2 cases ball joints for Pacific Division; 25 cargo trucks, 25 bundles cork life preservers, 13 cases printing paper, 50 cases water coolers, 50 pieces switches for stock; and a miscellaneous cargo, the whole consisting of 185 packages, weighing 53 tons.

Abangare , March 30, from New Orleans, with 13,854 feet, B. M., creosoted lumber for Atlantic Division, 13,860 feet, B. M., yellow pine lumber, 390 bales alfalfa hay, 249 sacks cotton seed meal for stock.

Metapan, March 31, from New York, with 50 coils manila rope, 25 bundles brooms, for stock.

Ancon, March 31, from New York, with 22,595 barrels cement for Atlantic Division; 94,160 bags cement for Pacific Division.

Banes, March 31, from Bridgeton, N. J.; with 18,000 cases dynamite for stock.

The following vessels arrived at or departed from the port of Balboa during the week ending April 1, 1911:

Arrivals—March 26, *Yorktown*, from Central American ports; *Stanley Dollar*, from San Francisco; March 27, *Mantoro*, from Callao; March 28, *City of Para*, from San Francisco; *Mathilda*, from San Francisco; *Pectan*, from San Francisco; March 29, *Loa*, from Valparaiso; March 30, *Manavi*, from Guayaquil; March 31, *San Juan*, from San Francisco; April 1, *Santa Maria*, from San Francisco.

Departures—March 25, *Vicksburg*, to Central American ports; March 27, *Chile*, to Valparaiso; *Arica*, to Guayaquil; March 28, *Rupanco*, to Guayaquil; March 29, *Acapulco*, to San Francisco.

MOVEMENT OF OCEAN VESSELS.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Colon Breakwater.

The high tides in Limon Bay during the dry season have interfered somewhat with the construction of the Colon breakwater, although it has not been necessary to suspend operations at any time. Piles for the trestles from which rock is dumped are towed out to the end of the trestle and there lifted from the water to the pile driver, and this part of the work has been rendered difficult by the heavy seas. At times men working on the outer end of the trestle have been forced to suspend operations entirely, and on one day recently six men were washed off by heavy waves. This emergency had been anticipated, however, and the men were immediately rescued. From this time on the bay will be more calm, and this part of the work will advance with less difficulty. The end of the trestle on March 1 was 3,598 feet from the shore line.

The 20-yard steel dump cars assigned to the breakwater work have not stood up well under the dumping of heavy rock required for the jetty, and on this account some of them have been transferred to the Central Division in exchange for 20 wooden flat cars to be used with a Lidgerwood unloader. One unloading machine and two plows accompany these cars, and the equipment in service will consist of 20 flats and 23 steel dump cars serving two steamshovels. In March 42,192 cubic yards of rock were quarried and dumped, and 50,105 cubic yards of rock dredged from the Canal prism were also dumped on the breakwater. With the heavier equipment it is believed that better results will be obtained each month.

Canal Work in March.

The grand total of Canal excavation to April 1 was 135,089,432 cubic yards, leaving to be excavated 47,448,334 cubic yards.

The total for March was 3,327,443 cubic yards, as compared with 3,067,479 cubic yards in March, 1910, and 3,880,337 cubic yards in March, 1909. Of the total, 3,259,996 cubic yards were "work excavation," and 67,447 cubic yards were "plant excavation." The dry excavation amounted to 2,210,788 cubic yards and was principally by steam shovels. The dredges removed 996,838 cubic yards and 109,668 cubic yards were sluiced, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 543,938 cubic yards. Of this total, 104,878 cubic yards were dry excavation, and the remainder was removed by the dredges in the Atlantic entrance.

The total excavation in the Central Division was 2,032,523 cubic yards, of which 2,012,469 yards were from the prism, the best record for any month in the Canal history.

In the Pacific Division, the total excavation was 750,982 cubic yards, 557,778 cubic yards of which were taken out by the dredges at the Pacific entrance.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work." Excavation.	"Plant." Excavation.	Total excavation
Dry excavation—	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*
Locks, Dam and Spillway	51,431	....	51,431
Mindi	49,734	3,713	53,447

TOTAL CANAL EXCAVATION.

Dry excavation	2,210,788	10,149	2,220,937
Wet excavation	1,049,208	57,298	1,106,506
Total	3,259,996	67,447	3,327,443

Mean rainfall along Canal (twelve stations) 0.54 inches.

By "Work" Excavation is meant excavation actually made for one of the constituent parts of the Canal, such as Prism, Diversions, or Locks etc.; that is, it represents material taken from the area to be occupied by the Canal, and constitutes excavation useful for the completed Canal.

By "Plant" Excavation is meant excavation outside of any of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc. It includes material necessary to be excavated for construction purposes only and is chargeable against the particular plant item for which it is performed, such as Prism, Diversions, Locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
Concrete laid in locks.	86,884	75,889	162,773
Concrete laid in dams and spillways	8,704	....	8,704
Fill placed in dams	597,847	49,071	646,918

High Tide at Pacific Entrance.

High tide in the Pacific entrance to the Canal on April 1, broke through the dam across the Rio Grande at Corozal, and since then the hydraulic excavating plant at Miraflores locks has not been able to run during extreme low water. The dam was thrown across the river to impound water at high tide so that the hydraulic excavating plant could continue work at all stages of the tide. The high water of April 1 made a gap about 100 feet wide, and a trestle is now being driven in order that a rock fill may be made and the dam may thus be restored. The same high water in the Pacific threatened to wash out the dam across the mouth of the Corundu River at Balboa, behind which caissons for the cement dock are being sunk. By prompt measures taken to strengthen this dyke a washout was averted.

Machinery for Operating Gate Valves.

Awards have been authorized for sample machines to be used in operating the Stoney gate valves, which will control the water in the main culverts of the locks, and to operate the cylindrical valves, which will control the water in the lateral culverts. These machines will be tested on the Isthmus under conditions approximating those of actual use, and upon the results of the tests the contracts for the whole quantity, costing about $905,000 will be made.

Tenders for this machinery under a previous advertisement were opened on September 16, 1910, but the bids for the principal items were so high that no award was made. At the price then offered, the material now to be furnished would cost more than $1,400-000. New bids were requested to be opened on February 25, and the attention of foreign manufacturers was invited to the advertisement. Twenty-two bids were received on the second advertisement as compared with seven on the first, and the difference in the prices offered represents a saving of about $500,000. The lowest bid received for one item was from a European manufacturer, and an order may be placed with him. One of

NOTES OF PROGRESS.

(Continued.)

the awards provides for the use of foreign made tubes for the valve stems, the price asked for domestic material being deemed exorbitant.

The awards authorized, are as follows:

Two Stoney gate valve machines and two cylindrical valve machines complete, except motor and limit switch, with hot rolled thrust screws and Mannesmann (foreign) screws for valve stems, to Wheeling Mold and Foundry Company. The total number of machines to be purchased under this contract is 114 Stoney gate machines and 118 cylindrical valve machines, provided the test machines prove satisfactory.

Two motors for Stoney gate valve machines; two sample motors to be purchased from each of the following bidders: Allis-Chalmers Company, Westinghouse Electrical and Manufacturing Company, General Electric Company, two from the General Electric Company on an alternative bid, and two from the Allmanna Svenska Elektriska Aktiebolaget, the last award being conditional. Total number of motors to be purchased after test, 114.

Two motors for cylindrical valve machines; two sample motors to be purchased as in preceding paragraph. Total number of motors to be purchased under this contract after test, 118.

Two limit switches for Stoney gate valve machines and two for cylindrical valve machines to be purchased from each of the following bidders: Cutler Hammer Manufacturing Company, Westinghouse Electrical and Manufacturing Company, General Electric Company, and two from the Allmanna Svenska Elektriska Aktiebolaget, the last award being conditional. The total number of limit switches to be purchased under this contract is 114 for Stoney gate valve machines, and 118 for cylindrical valve machines, the award of the contract to be let after the machines have been tested.

Unloading in Central Division.

A statement of Lidgerwood cars unloaded in the Central Division during the month of March, follows:

Location.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	3	1,148	22,960
Miraflores	3	796	15,920
Gamboa	4	1,292	27,147
Total	10	3,236	66,027

Dredging at Atlantic Entrance.

In the dredging at the Atlantic entrance the rock excavation in the eastern half of the ledge farthest from the shore line has been completed. This contained 312,856 cubic yards, and the dredges have been working on it since July 1908. This amount has been handled by the following dredges:

	Cu. Yds.
Ladder dredge *No. 1*	16,366
Ladder dredge *No. 5*	73,830
Ladder dredge *No. 6*	137,890
Dipper derdge *Chagres*	18,038
Dipper dredge *Mindi*	66,732
Total	312,856

The rock excavation from this time forward in the eastern half of the canal will be from a point three and one-half miles inland from deep water. The seagoing suction dredge *Caribbean* is now attacking the earth in the channel adjacent to that part of the rock excavation just completed, as well as the reach from this rock shoal to next shoal landward to which the ladder dredge has been moved.

A small office building has been authorized at the Panama railroad terminal in Balboa for the use of the California-Atlantic Steamship Company.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 60 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 8, being 1,254,159 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending April 8, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

*This 404 yards was mixed by a ½-yard mixer, the amounts for each day being: April 3d, 116 yards; April 4th 110 yards; April 5th, 111 yards; April 6th, 67 yards.

STEAM SHOVEL RECORDS.

Central Division Work in March.

During the month of March the total amount of material excavated in the Central Division was 2,032,523 cubic yards, of which 542,991 cubic yards were classified as earth, and 1,489,532 cubic yards as rock.

Of this quantity, 1,961,204 cubic yards were removed by steamshovels, 8,508 cubic yards by scraper, 28,185 cubic yards by bucket cranes, and 9,170 cubic yards by hand. Contractors removed 17,711 cubic yards by sluicing and 7,745 cubic yards by hand.

The high record for the month was made by shovel No. 223, working 27 days in the Culebra district, which excavated 65,559 cubic yards of rock. The second best record for the month was made by shovel No. 208, working 27 days in the Culebra district, which excavated 62,003 cubic yards of rock and earth.

The best record for a shovel of the 70-ton class was made by shovel No. 124, working 27 days in the Culebra district, which excavated 37,420 cubic yards of rock and earth.

Shovel No. 253, working in the Empire district, made a high record for one day by excavating 3,116 cubic yards of rock on March 28. Shovel No. 128, working in the Chagres district, excavated 2,130 cubic yards of earth on March 24, the high record for one day for a shovel of the 70-ton class, during the month.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown below:

Steamshovels on P. R. R. Relocation.

For the month of March, the total excavation on the relocation of the Panama railroad was 408,180 cubic yards, of which 134,429 were earth and 273,751 cubic yards were rock. On the Gatun-Monte Lirio section 273,475 cubic yards were taken out by steamshovels and 400 cubic yards by hand. On the Gold Hill section, 51,820 cubic yards were removed by steamshovels, 61,688 cubic yards by pan car task work, 4,667 cubic yards by hand for culverts, and 16,130 cubic yards by contract, a total of 134,305 cubic yards.

The best steamshovel record was made by steamshovel No. 257, on the Gatun section, which removed 5,400 cubic yards of earth and 64,200 cubic yards of rock, a total of 69,600 cubic yards from main line cuts in 27 working days.

The best 70-ton record was made by steamshovel No. 117, working near Camp Totten, which excavated 48,160 cubic yards of rock in 27 working days.

The high record for one day for 5-yard shovels was made by steamshovel No. 257 which excavated 3,240 cubic yards of rock on March 24.

The high record for a shovel with 3-yard dipper was made by steamshovel No. 105, which excavated 2,300 cubic yards of earth and rock on March 27.

'BEST RECORDS FOR THE MONTH.

Total	41:58	19,997

Atlantic Division Sand and Rock Service.

The sand dredged from the beds at Nombre de Dios and shipped to Gatun for use in the locks and spillway concrete, amounted to 48,292 cubic yards in March. This is the greatest output for one month from the Nombre de Dios pits. The amount of rock quarried and crushed at Porto Bello in March was also the greatest monthly output, 87,109 cubic yards. The plant worked eight hours a day throughout the month, and the greatest daily output was that of March 15 when 3,737 cubic yards were sent to Gatun.

Ancon Quarry.

A statement of the rock crushed at Ancon quarry during the week ended April 8, 1911, follows:

Date.	Hours worked.	Cubic Yards.
April 3	4:25	1,824
April 4	1:40	979
April 5	6:15	1,609
April 6	8:20	2,588
April 7	8:45	2,778
April 8	7:25	2,560
Total	36:50	12,356

Obituary.

A cable message from the States under date of April 8, announces the death of William B. Corse, resident engineer at Corozal in the Pacific Division. He was granted leave of absence on account of illness on March 23. He was born in Alexandria, Va., 43 years ago, and came to the Isthmus on January 4, 1910. He is survived by his wife, a daughter, and a brother whose home is in Lexington, Va.

I. B. of S. S. and D. M.

The International Brotherhood of Steam Shovel and Dredge Men will hold its regular meeting on Sunday, April 16, at the I. C. C. lodge hall, Empire, at 12.15 p. m. It is very important that all brotherhood men attend this meeting.

WALTER P. TUDOR, *Secretary and Treasurer*
Empire, April 7, 1911.

Work of the Chinese Red Cross.

Improvements to the Chinese section in Mount Hope cemetery are being made by the Chinese chapter of the Red Cross. The section is situated directly east of the main entrance adjoining the Jewish section, and covers about one acre of ground. The lot is being enclosed by a concrete wall three feet high and about eight inches thick. The back of this wall will be decorated with symbolic designs and memorial inscriptions, and the space along the top will be reserved for flowers, urns, and other memorials. The entrance will be an arched gateway nine feet six inches high and six feet wide. The representatives of the Red Cross have located the bodies of several of their countrymen who were buried in the old cemetery prior to American occupation, and have removed them to the new section. Under this society it has been the custom of the Chinese to exhume the bones of their dead who have families in China and ship them home for reinterment. This was done in 1908 and 1910, fifty bodies having thus been shipped. About 80 will remain in the cemetery. The improvements will cost $2,500.

Among the 2,000 Chinese in the Republic and in the Canal Zone, 150 are active members of the Red Cross, and several hundred are associate members, paying a subscription every three years. The chapter recently forwarded $800 to the headquarters in Shanghai for the famine sufferers.

Murder at Bohio.

At a dance near Bohio on the night of April 10, Andres Oraso stabbed and killed Doceibe Rodriguez. Oraso is in jail.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

CANAL MEDAL LIST.

The following is a list of American employes of the Isthmian Canal Commission, who completed two years' service on the Isthmus during the twelve months ending December 31, 1910, and for that reason are entitled to receive the Canal Medal. The date shown opposite each name is that from which medal service is reckoned. The list is continued from the issue of April 5, 1911.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in the spelling of names or in the dates from which medal service is reckoned, should be reported to the Office of the Chairman at Culebra, for correction.

In numbering the medals the relative standing of employes, whose medal service is reckoned from the same date, will be determined by lot. The list will be continued in the issue of April 26, 1911.

RED CROSS AND COLON FIRE.

Restriction of Relief Work—Action of Colon Residents.

The work of relieving the sufferers by the fire in Colon on March 23 has been continued by the Red Cross, at the tent village started in Colon on March 24. Many of those who at first were destitute have ceased to depend on the relief camp, either wholly or in part, and the work of reducing the relief granted has been begun. Accurate records have been kept of 350 families whose need has been determined beyond question, and these represent about 1,200 people. Rations averaged 582 a day up to April 9, each ration representing enough food for one day's subsistence, and in addition a large quantity of condensed milk has been issued for infants. There has been less illness among infants in the camp than among those living in houses, according to the observation of the district nurse, who visits both classes of habitation. In dispensing with the relief work three options are given to the families whose need has been established: Rations for the balance of the month; house rent for a month; or an order for five dollars worth of clothing on the commissary, which has reduced prices on this clothing to the least point. New frame buildings are being constructed on the area burned over.

The following letter and resolutions have been made of record:

PROCEEDINGS OF THE SESSIONS OF APRIL 1, 1911.

The committee for the distribution of the funds assigned for the aid of the victims of the fire of March 23 last, met in the office of the Governor of the Province in the city of Colon on the first day of April, 1911, at 9 a. m., the following members being present: Rafael Neira A., Governor; Gerardo Abrahams C., Administrator of Provincial Funds; Juna Angel Gomez, Prosecuting Attorney; Hilary B. Parker, and Benigno Andrion, secretary.

In accordance with the resolution of the previous session, Mr. Neira made the following resolution, and the same was unamimously approved:

"The distributing committee of the funds which the Government of the Republic may contribute for the relief of the victims of the recent fire in this city, Considering:

"That the Government of the Republic has voted the sum of $5,000 gold for the aid of the most needy victims of the fire which took place on the 23d of March, and has appointed a committee to distribute these funds in the manner deemed most advisable; Considering:

"That the American Red Cross Society, voluntarily and with the greatest interest has taken charge of the providing of food and lodging for the most destitute among the unfortunates of the above mentioned catastrophe and has actually provided a camp where food and shelter are provided for the needy; Considering:

"That the Red Cross Society is better able to distribute with fairness and prudence among the destitute victims the funds appropriated by the Government of the Republic, providing food and clothing to the most needy: Considering:

"Lieut.-Col. C. A. Devol, President of the Red Cross Society, has signified that said society will accept the said sum of five thousand Balboas which the Government of the Republic wishes to distribute among the poor who suffer from the fire of March 23, and that the Red Cross will appropriate said sum in conformity with the wishes of the Government donating it; Resolved:

"The distributing committee created by the Government of the Republic to exercise the function of administering and distributing the said sum of five thousand Balboas appropriated by the National Treasury for the relief of the most poverty-stricken and needy of the victims of the fire of March 23, shall deliver in the name of the Government of the Republic of Panama, by authority vested in said distributing committee of said five thousand Balboas to be received from the National Treasury, said sum to the Red Cross Society of the Canal Zone, in order that this society may administer and dispense same in the relief and aid of the victims in accord with the intentions of the Government.

"The delivery of this sum will be made by the treasurer of the committee, Mr. J. H. Stillson, to the treasurer of the Red Cross Society, Lieut.-Col. John L. Phillips.

The Governor of the Province is commissioned to manage the delivery of the relief fund to the treasuer of the committee.

This is to be communicated to all interested."

There being no further business, the session was adjourned, and this action is endorsed by the signature of the Governor-President. Rafael Neira A.; the Administrator of Provincial Funds, Gerrarado Abrahams C.; District Attorney, J. Angel Gomez; Treasuer of Committee, J. H. Stilson; the Secretary, Benigno Andrion; Member, Hilary B. Parker.

OFFICE OF THE GOVERNOR OF THE PROVINCE,
COLON, R. P. April 8, 1911.

SIR:

Please find enclosed a true copy of the resolution unamimously adopted by the committee charged with the distribution of the funds voted by the Government of Panama for the relief of the victims of the recent fire in the city of Colon, which fire occurred on the 23d of March, 1911. The sum voted amounts to $5,000 gold, or $10,000 Panamanian silver, and same has been delivered by the treasurer of our committee to Lieut.-Col. John L. Phillips, treasurer of the Canal Zone Chapter, American National Red Cross, by sight draft duly endorsed.

I reiterate, my dear Colonel, the expressions of gratitude on behalf of my Government, and on behalf of myself personally, toward the Red Cross, over which you so worthily preside, for its benevolent and incessant labor so successfully carried on today in this city for the relief and aid of the victims of the deplorable fire.

I improve this opportunity to express to you my feelings of profound respect and thanks.

RAFAEL NEIRA A.,
Governor of the Province.

LIEUT.-COL. C. A. DEVOL,
Chairman, Canal Zone Chapter,
American National Red Cross,
Culebra, C. Z.

Women's Clubs.

At the meeting of the executive board of the Canal Zone Federation of Women's Clubs and conference of presidents held at Empire on Tuesday, April 4, a proposed plan of slight changes in the character and meetings of the organization was discussed and a committee was appointed to make such revisions in the by-laws as will coincide with these plans. At the close of the meeting tea was served by the Empire Woman's Club. The annual meeting of the federation will be held at Gatun on April 21. Transportation will be furnished the delegates, alternates, and federation officers, as usual. The meeting will convene at the Commission clubhouse at 1.15 a. m. A meeting of the executive board will be held at 1 o'clock. Committee chairmen should call their meetings as soon as possible after the arrival of the trains from either end of the line.

At the meeting of the educational department of the Cristobal Woman's Club on Wednesday, April 5, a paper on the Canal fortifications was read by Mrs. Tracy Robinson.

A tea was held by the Gatun Sunshine Society at the Commission chapel on Thursday afternoon, April 6, for the benefit of the organization. Tea, sandwiches, and cakes of various kinds were served at a nominal sum. The tables were decorated with cut flowers and the members of the society served. During the afternoon there was music by Mrs. Matt Johnson, Miss Neville, and Mrs. Reginald Hughes.

Church Notes.

On April 23, the corner stone of a new church building will be laid by the negro Baptist congregation in Empire. The building is a barrack, which has been purchased from the Commission, and is to be remodelled at a cost of $500.

The last Lenten meeting of the Woman's Altar Guild of St. Luke's Church, Ancon, was held in the church on Tuesday morning, April 11, at 9 o'clock. Following the services the chaplain gave a discourse on the tenets of the Episcopal church. The Easter offering of the congregation will be for the Aged and Infirm Clergy Fund.

At a missionary meeting held by the Rev. W. W. Gray at Gorgona the last week in March, it was decided by the women of the Methodist church in that village to support a scholarship in the Panama College in Panama. Mrs. W. W. Gray was one of the speakers of the afternoon.

Twelve members of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, from Ancon, Balboa, and Panama, went to Culebra on Wednesday afternoon, April 5, and held a missionary meeting in the Commission clubhouse with 35 Culebra women. There was a program consisting of papers by the members, musical numbers, an address by the president of the society, Mrs. W. W. Gray, on "Women of Eastern Lands in Comparison with Women of Western Lands," and an informal address by Mrs. James Stokoe. At the close of the meeting the Culebra women presented a sum of money to be used in its work here.

A meeting of the Ladies' Auxiliary to the Empire Christian League was held in the chapel on Friday afternoon, April 7, when the speaker and guest of honor was Miss Helen Brown, who for 30 years has been a city missionary and Sunday school visitor in Buffalo, N. Y. A paper on general missionary work was read by the president of the auxiliary, Mrs. Philip Kelly. A committee was appointed to decide upon the decoration for the interior of the chapel, with the vice-president, Mrs. Gaw, as chairman. The auxiliary has accepted an invitation to meet with the missionary society of Panama and Ancon at the home of Mrs. E. W. Keyser in Ancon on May 4.

The Woman's Altar Guild of Christ Church, Colon, will hold a meeting at the residence of Mrs. P. T. Murphy, Colon Beach, on Thursday, April 20, at 3.30 o'clock. The Rev. Edward J. Cooper, rector of Christ Church, will make an address on "Guatemala." A contribution for the guild treasury will be asked.

St. Andrews Episcopal Church, Empire, has received as an Easter memorial gift a solid silver communion service with two cut glass cruets, from Miss Mary Wier of Philadelphia. The interior of the church has been painted, and the building is now complete and free from debt. The work was commenced in 1909, under the Rev. W. H. Decker, who is still in charge.

Missing Men.

Any one having information regarding the whereabouts of Harold A. Shafer, who left the service of the Commission in January, 1911, is requested to communicate with THE CANAL RECORD.

Any one having information regarding the whereabouts of J. M. Fowler, who is supposed to be on the Isthmus, is requested to communicate with the American Consul General, Panama.

Any one having information regarding the whereabouts of C. M. Russell, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

OFFICIAL CIRCULARS.

Transfer of Gatun Mechanical Shops.

CULEBRA, C. Z., April 4, 1911.

CIRCULAR No. 183-Q:

1. Effective April 5. 1911, the Gatun machine shop of the Atlantic Division will be transferred to the Mechanical Division.

2. On and after April 5, 1911, the Mechanical Division will hostle all locomotives, inspect and repair all cars, and will perform all mechanical work, both day and night, resulting from this transfer, as may be required by the Division Engineer of the Atlantic Division or such representatives as he may authorize to direct the performance of such work.

3. The Division Engineer of the Atlantic Division and his authorized representatives may call direct upon the foreman of the Gatun shop for mechanical work, provided that the manufacture of new material and the making of alterations will he done as provided in Circulars Nos. 343, 343-A, and 343-B.

4. The Division Engineer of the Atlantic Division will notify the Superintendent of the Mechanical Division and the foreman of the Gatun shop direct what representatives of the Atlantic Division are authorized to call upon the Gatun shop for mechanical work, and will also advise as to the classes of work the cost of which he desires should be kept separately.

5. All machines, tools and other equipment in the Gatun shop will be inventoried and receipted for by the Superintendent of the Mechanical Division, but no credit for their value shall be given until it shall have been demonstrated by a four months' trial whether the transfer has resulted in economy and increased efficiency to the construction work of the Atlantic Division.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Transfer of Equipment.

CULEBRA, C.Z., April 7, 1911.

CIRCULAR No. 370-A:

In carrying out the procedure laid down by Circular No. 370 regarding transfer of equipment, so far as this circular refers to locomotives, cars and other rolling stock, it is desired, in order to save time, that before forwarding requests for such transfers to the Surveying Officer the department or division head shall, through his representative on the transportation committee, obtain information that will enable him to indicate on the request the division or department from which the transfer shall be made. If, after following this procedure, the division or department head is unable to indicate where the rolling stock desired can be obtained, a statement to that effect should be made on the request forwarded.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Leasing of a Building at Empire.

ANCON, C. Z., March 29, 1911.

Bids will be received by the Collector of Revenues, up to and including April 20, 1911, for the leasing to the highest bidder, from May 1, 1911, for a period of not more than three years, of building No. 16 at Empire owned by the Canal Zone Government The building is of French construction, two stories, and contains, in all, 12 rooms. Bids should be in envelopes marked, "Bids for a lease to Building No. 16 at Empire."

TOM M. COOKE, *Collector of Revenues.*

Cold Storage Price List.

The price list of cold storage articles as published in THE CANAL RECORD of April 5, remains unchanged.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL NOTES.

The first series of entertainments given by the Yost Concert Company proved so pleasing that a series of return engagements has been arranged as follows: Empire, April 16; Corozal, April 18; Cristobal, April 20; Gorgona, April 23, and Gatun, April 24.

COROZAL.

The first league indoor baseball game between Corozal and Cristobal was played at Corozal on Saturday night, April 8. The following is the lineup of the teams: Cristobal—Russell, McSparren, R. Russell, Semons, Simms, Curtis, Wehmeier. Corozal—Bath, Lorah, Cuff, Schlager, Lofgren, Taylor, Rawley. The score was 10 to 4 in favor of Corozal.

All men interested in indoor baseball, games, and gymnastic work are welcome to the classes. Monday and Wednesday of each week has been set aside for work of this nature.

A discussion club on "Life probems" will hold its first meeting on April 13. Such topics as "The value of work," and "The choice of a life work," will be discussed.

CULEBRA.

The 200, or over, scores in bowling for the week ending April 8 are as follws: Warner, 211; Leylander, 208; Baumer, 207. The 100, or over, scores in duckpins for the same week are as follows: Kersey, 108, 102; Fox, 107; Hill, 106; Huttlemeier, 104, 101; McIlvaine, 100.

The following are the moves up to and including April 8 in the game of chess being played by wireless between the Porto Bello and Culebra chess teams, one move a day:

	Porto Bello.		Culebra.
1.	P —K4	1.	P —K4

3.	B —B4	3.	B —B4
4.	P —QB3	4.	Kt—KB3
5.	P —Q4	5.	P × P

This opening is called the Giuoco Piano or Italian game.

EMPIRE.

The following high scores were rolled in duckpins during the week ending April 8: W. G. Brown, 103; H. Rodeghiere, 103, 107, 102, 105, 102, 106, 104, 103, 101; S. Parkis, 104, 131; Pinney, 100; Gustavson, 102, 100, 102, 102, 110; Giavelli, 105, 105; Koperski, 100; Danielson, 101; Pearson, 103, 107; Witmer, 102 J. Parkis, 101; Huson, 106.

The meeting of the literary society was postponed from Friday April 7, to Monday, April 10. The program was: Reading, Owen King, "A Costa Rican Vacation," Edward Thompson; "The Mexican Situation," E. L. Zacharias.

Moving pictures will be exhibited on April 12 and 19. There will be soloists on both of these occasions.

The score of the first half of the Isthmian pool tournament between DePoorter and Hersh was decided in favor of DePoorter by a score of 156 to 121. The other half will be played at Gatun on Saturday evening, April 15.

A preliminary duckpin tournament is in progress and the 12 high men will represent Empire in the inter-association contests.

The March handicap pool tournament was won by H. F. Edwards.

The winning team in the gymnasium group contest was composed of Messrs. Feurtardo, Adams, Jones, Lang and Koperski. The total number of points made by this team was 2,785. M. A. Hall had the highest individual total with 636 points.

GORGONA.

The indoor baseball league opened in Gorgona on Saturday evening, April 8, when Gorgona won from Empire by the score of 11 to 8.

A local duckpin tournament started on April 3, with seven three-men teams entered.

A. A. Simka and W. I. Hodeson challenge anyone on the Isthmus to a match game of shuffleboard, either singles or doubles.

GATUN.

"The City" from the social and political standpoint, was discussed by the "Life problems club" on Sunday evening, April 9.

The program for the literary club on Wednesday night, April 5, included a piano selection by Miss Neville, baritone solo by Mr. Shailer, tenor solo by Mr. Perkins, and a violin solo by Mr. Smith. Mr. Ludwig read a paper on "History of Fencing." In the debate on "Natural Wonders of the New and Old World," the following men participated: Messrs. Chatfield, Whiting, Smith and Wond. Mr. Smith gave a reading on "William Jennings Bryan, the Orator." Ladies are now allowed to join the club.

A duckpin bowling team called the "Five D's" challenges any other team on the Isthmus whose last names begin with a common letter. The Gatun D's are as follows: Durand, DeMoll, DePoorter, Dalton, and Dickson.

A handicap pool tournament will be started on April 17. The prizes are a gold medal, first; cuff links, second; ivory jointed cue, third.

PORTO BELLO.

On April 7, the people of Porto Bello gathered at the clubhouse in the evening to celebrate the first anniversary of the opening of the clubhouse. Miss Harris and Melville Booz gave several selections on the piano. Mr. Ray played the banjo. Capt. H. W. Stickle reviewed some of the work of the Y. M. C. A. and E. D. Butler gave a reading.

Married.

HOSTETTER-SCOFIELD—At St. Luke's Church, Ancon, on Wednesday, April 5, Florence Alma, daughter of Mr. and Mrs. A. B. Schofield of Winona, Minn., to Herbert Peart Hostetter of Chicago, Ill., Chaplain Henry A. Brown officiating. Residence, Chicago.

Misdirected Letters.

The following insufficiently addressed letters originating in the United States and its possessions have been received in the office of the Director of Posts and may be secured upon request of the addressee:

Supplies for Canal Work.

The following steamers with supplies for the Isthmian Canal Commission arrived at the ports of Cristobal and Colon during the week ending April 8, 1911:

Alcana, April 3, from New York, with 13,550 barrels cement for Atlantic Division; 63,160 bags cement for Pacific Division.

Haakon VII, April 5, from Baltimore, with 6 pieces mushroom anchors, 29 bundles castings, 6 pieces castings, 60 pieces pipe, 12 cases valve material, 31 crates valve material, 30 pieces valve material for Pacific Division; 60 pieces pipe, 35 crates valve material, 35 pieces valve material, 14 cases valve material, 3 pieces boiler and stack, 35 bundles steel castings, 6 cases steel castings, 69 pieces steel castings, 42 crates steel castings for Atlantic Division; 14 pieces steel castings, 6 bundles steel castings, 2 cases steel castings for Mechanical Division; 105 pieces frogs, 15,000 bundles tie plates, 98 tons coke, 10 cases paint, 500 cases dynamite for stock.

Atenas, April 6, from New Orleans, with 7 pieces castings for Central Division; 112 tons pig iron for Mechanical Division; 29,000 feet yellow pine lumber for stock.

Zacapa, April 6, from New York, with 385 coils rope; 300 cases linseed oil for stock.

Colon, April 6, from New York, with 6 cases rubber sleeves, 942 bundles steel bars, 1,500 pieces steel bars 8 cases filing cabinets for Atlantic Division; 10 cases missing links for Central Division; 8 cases tape, 50 pieces couplers, 252 pieces knuckles, 6 barrels locks for Mechanical Division; 44 barrels alcohol, 32 packages drugs and sundries for Sanitary Department; 50 cases alcohol, 10 cases rubber hose, 88 cases caustic soda, 18 cases enamel ware, 50 cases sapolio 8 crates mop handles, 104 barrels sulphate of aluminum, 5 cases trays, 6 cases glassware, 8 barrels compound, 10 bags oats, 50 pieces car wheels for stock; and a miscellaneous cargo, the whole consisting of 3,313 packages, weighing 202 tons.

Linda Fell, April 7, from New York, with 10,555 barrels cement for Atlantic Division; 59,200 bags cement for Pacific Division.

The following vessels arrived at or departed from the port of Balboa during the week ending April 8, 1911:

Arrivals—April 2, *Ecuador*, from Guayaquil; April 3, *Guatemala*, from Callao; *Peru*, from Guayaquil; April 4, *Manga Reve* and tug *Hercules*, from San Francisco.

Departures—April 2, *Leelanaw*, to San Francisco; April 3, *Mantaro*, to Callao; April 4, *Mathilda*, to south ports; *Santa Maria*, to Port Harford; April 5, *Loa*, to Valparaiso; *Manavi*, to Guayaquil; April 7, *City of Para*, to San Francisco; April 8, *Stanley Dollar*, to San Francisco.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line; the Panama Railroad Company's dates being subject to change:

COLON TO BARBADOS, CALLING AT TRINIDAD.

Magdalena	R. M.	Tuesday	April 25

Hamburg-American steamers leave Colon for New York via Kingston every Tuesday at 10 a. m., and those designated (*) call at Santiago, Cuba; for Bocas del Toro and Port Limon on alternate Wednesdays, by ships designated (*).

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (†) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

The Leyland Line ship *Californian* will sail from Colon for New Orleans via Port Limon on April 21.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, APRIL 19, 1911. No. 34.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of March is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of Canal work in all departments and divisions.

Lighting the Canal.

A general project for lighting and buoying the Panama Canal has been submitted by Lieut.-Col. Hodges, Assistant Chief Engineer, and has been approved. It is based on a study made by Walter F. Beyer, an assistant engineer, who has been detailed by the Lighthouse Board in Washington for this purpose. The report follows:

> The scheme of illumination contemplates the use of range lights to establish direction on the longer tangents, and of side lights spaced about one mile apart to mark each side of the channel. The range lights are omitted in the Cut, where the use is hardly practicable, and on four of the shorter tangents on the remainder of the Canal. The project includes a light and fog signal on the west breakwater in Limon Bay, a light on the east breakwater, should it be built, and gas and nun buoys lighting and marking the channel to the Mount Hope dry dock. Mr. Beyer has also made a separate estimate, not included in the general lighting project, for light and fog signals at the Pacific entrance to the Canal and shore lights in its neighborhood.
>
> The estimate for all the structures needed for the Canal proper, exclusive of the coast lights on the Pacific side, is, say, $658,000. This includes light-keepers' dwellings, buoy depots, and a boat landing, as well as the purchase and establishment of all the aids to navigation. It also includes a gas-charging plant, and certain expenditures in converting a tug into a lighthouse tender, and repairing launches for maintenance. It does not, however, include the original purchase price of any floating plant, it having been assumed that this can be provided at the close of construction from present construction plant, the price having then been written off in the plant arbitraries. The annual maintenance charge of the system, when in full operation, is estimated at about $60,500.
>
> The additional cost of the coast aids to navigation exterior to the Canal on the Pacific side, is estimated at $97,000.
>
> It is proposed to use gas for the lighted buoys in all the sections of the Canal, and for the beacons in the Gatun Lake section. For the beacons in the Atlantic, Pacific, Miraflores and Culebra Cut sections, electricity is to be used as the illuminant. The cost of the original installation for electricity is slightly greater than for gas, but the maintenance is very much less. The original tentative estimate for lighting the Canal, included in the estimate for 1908, was $500,000.
>
> Should it be decided to install now only the necessary permanent features without lighting apparatus, except for the harbor lights at the entrance to the Canal, the cost would be about $433,000. This is equivalent to assuming that no night traffic on the Canal will be permitted for some time, and that the illuminating apparatus will not be installed until the need for it shall arise.
>
> In any event, certain parts of the work should be taken in hand immediately. The most pressing part is the clearing, which will have to be done for the establishment of the beacons and range lights and for the lines of sight for referencing the important buoys and beacons. This work must be accomplished in Gatun Lake before the water is allowed to rise next year. It would be well to undertake, as time serves, the casting of the reinforced concrete structures for beacons and towers, which casting can conveniently be done at some single place, the finished structures to be transported and placed when completed.
>
> No specific appropriation has been made for this work, but it evidently should be begun at once, proper accounts being opened for the purpose, and the amounts needed being supplied from time to time. It is probable that about $100,000 will be needed between now and June 30, 1912. The large expenditures, namely, for purchase of buoys, light-keepers' dwellings, etc., will be estimated for the fiscal year 1913.

The complete plan is to be executed, namely, the plan involving the installation of the lights when the Canal is opened.

Record Work on P. R. R. Relocation.

Six 70-ton and three 105-ton steamshovels working on the relocated line of the Panama railroad, on April 15, excavated 18,210 cubic yards, an average of 2,023 yards a shovel. Six of these shovels were digging in the borrow pits at Monte Lirio and the spoil was hauled in 10-yard steel dump cars to the fill across the Gatun valley. Three of the shovels were working on the Culebra Cut section and the spoil was disposed of in nearby fills.

Steel Casting Plant.

A steel casting plant will be part of the equipment in the permanent shops to be established near the Pacific entrance to the Canal, and it has been decided to purchase the plant now in order that it may be utilized on the Canal work during the coming two years. To this end, bids will be asked for a complete plant, the principal items of which will be as follows:

One Tropenas steel converter, two tons capacity, of a type and design of one in use in an arsenal or navy yard in the United States, provided with a 7½-horsepower motor for tilting. One high pressure blower, with a 75-horsepower motor, single geared to the blower. One double roller sand crusher and mixer, provided with a 10-horsepower motor, direct geared, and a pan of not less than five feet in diameter, weight of rolls to be not less than 2,000 pounds each. One 4-ton, and two 2-ton crane ladles, and eight 150 pound bull ladles. One fuel oil ladle heater for crane ladles and one for bull ladles.

The bids for the plant must provide also for the services of a metallurgical engineer for three months who is competent to instruct in the making of patterns and moulds, melting and mixing of metal for the production of different grades of steel castings, proper operation of the plant, and the making of chemical analyses.

About one million pounds of steel castings were purchased for the Canal during the fiscal year 1910, and the average price per pound was about 15 cents. It is estimated that these castings can be made on the Isthmus at 12 cents per pound. The plant will make it possible to supply parts immediately, instead of waiting from four to nine months for their shipment from the States, and to reduce the stock of spare parts and material kept on hand on the Isthmus and, ultimately, to do away entirely with cast steel spare parts. It is not proposed to install an annealing furnace, as the small amount of this work to be done can be accomplished by fires made from scrap lumber. Sinkheads and risers will be cut off with the saws already installed or by use of an oxy-acetylene plant. Castings will be cleaned by chipping hammers now in use, and the sand blast machine which is being installed for cleaning steel cars. The plant will be installed upon its receipt in the extension recently made to the foundry in the Gorgona shops.

Work in the Pacific Entrance.

It is now possible for ships drawing 18 feet of water to use the Canal at the Pacific entrance from the beginning of the channel in Panama bay to a point eight miles inland, at the lower end of Miraflores Locks, but the Canal is only partially completed to that point, because the channel is not its full width of 500 feet in some parts, and in the last three miles is not at its final depth. Only the first five miles are open to navigation.

The seagoing suction dredge *Culebra* and the ladder dredges *Badger* and *Marmot*, are working in the channel immediately below the lock site, opposite Corozal. These dredges are digging out clay and small rock down to the surface of solid rock that overlies the bottom. After the mud is scraped off the rock, a dam will be thrown across the channel and the water will be pumped out of the basin thus formed, and the rock will then be blasted in the dry. After it is broken up it can be taken out by steamshovel or by the deep digging ladder dredge now building in Scotland.

The suction dredge *Culebra* which was placed on the gridiron at Balboa machine shops on March 28, was returned to service on April 8, after having its bottom scraped and painted and general repairs made. The sand excluding device on the tail end shaft was removed and the shaft and bushings were found in good condition after 14 months of service. The maximum time for bushings to wear prior to the fitting of the sand excluding device was six weeks. The hatches of the coal bunkers were increased in size to facilitate the coaling

NOTES OF PROGRESS.

(*Continued*)

of the ship. It is now possible to place 225 tons of coal in the *Culebra's* bunkers in five hours, only four men being employed. The coal is lifted from a lighter to the hatches of the ship by a clamshell hoist.

The ladder dredge *Marmot*, which was put into commission on May 10, 1909, has been in service almost continuously since that time, and up to March had dredged 2,610,832 cubic yards, an average of 125,537 cubic yards per month for a period of 21 months.

The ladder dredge *Badger* was brought to the marine shops on April 11 for running repairs, and returned to work in the channel near Miraflores Locks on April 17. It had been in continuous service since February 18, 1910. The new bearings, top gears, and manganese tumblers that were installed at that time were found in excellent condition. Last week the lower fenders were removed, the hull scraped and painted, and minor repairs made to condensing and circulating pumps.

The ledges of rock that form part of the bottom at a point about six miles inland are being blasted under water and then taken out by ladder and dipper dredges. The drilling is done by the drill barge *Teredo*, and the blasting also is under the direction of the master of the barge. Holes are sunk to a depth of 55 feet below mean tide and are then loaded with dynamite, an average charge being about 5 tons of explosive to 20 holes. When the blast is set off a sheet of water is thrown 50 feet or more into the air. First there arises a mass of white foam, then a cloud of muddy water as broad but not so high as the white, and finally the gas from the dynamite, a slowly dissipating amber cloud which hangs in the air for quite a minute. When blasting is begun on a ledge large quantities of fish are killed, but almost immediately after the first charges the fish seem to desert the vicinity and only a few are killed by subsequent blasts.

Part of the rock is prepared for the dredges by the sub-aqueous rock breaker *Vulcan* which is now operating in soft material at a point about five miles inland. The amount of work accomplished by this method is not large, but the cost is low.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 53 per cent completed, 132,598 cubic yards out of a total of 250,000 having been placed up to the close of work on April 15. A statement of the amount laid each day last week and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
	Cu. Yds.		
April 10	216	15:00	2
April 11	200	17:00	2

Pilots, Masters, Mates, and Engineers.

A meeting of the Board of Local Inspectors will be held on Wednesday, April 26, at 8 a. m., at the Administration building, Ancon, at which time applicants for licenses as Pilots, Masters, Mates, or Engineers, who have submitted applications on the prescribed form, may appear for examination.

Changes in Organization.

On account of the death of W. B. Corse, Resident Engineer of the first district, Pacific Division, the following changes in the organization of that division have been made: H. O. Cole from assistant engineer in charge of municipal work to resident engineer; Frank Cotton from assistant engineer to assistant engineer in charge of municipal work; H. D. Hinman from junior engineer to assistant engineer; W. Rowland from draftsman to junior engineer.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 60 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 15, being 1,268,702½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending April 15, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Grand total	....	....	......	....	....	......	....	1,268,702½

The 288 yards shown for the portable mixers are reinforced concrete, and were placed on the following days: April 10, 69 yards; April 11, 36 yards; April 12, 59 yards; April 13th, 45½ yards; April 15th, 78½ yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 74 per cent completed, 621,926 cubic yards, out of a total of 837,400, having been placed at the close of work on April 15. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-Cubic yard mixers			AUXILIARY PLANT.						Large stone.	Total.
				2-cubic yard mixers.			½-cubic yard mixer.

MIRAFLORES LOCKS.

Over 14 per cent of the concrete for the system of two twin locks at Miraflores was in place on April 15, the total amount on that date being 191,302 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixer.

*This 256 yards was mixed by a ½-yard mixer, the amounts for each day being: April 10th, 85 yards; April 11th, 103 yards; April 12th, 68 yards.

COUPON BOOKS FOR CASH.

Three Months Trial to be Made at Gorgona Shops.

It has been decided to make a three months' trial of the cash method of selling commissary and hotel coupon books to employes of the Gorgona shops, beginning May 1. The method now in general use is to issue the books to employes and deduct the value of them from their pay, and a circular published in the April 5 issue of THE CANAL RECORD gives the restrictions on the value of books that may be drawn in any month. The present method has the effect of limiting the number of days on which the books may be drawn, and involves a greater amount of clerical work than will be necessary under a proper cash system. Economy and the convenience of the employes prompt the trial of the new method, and if it is found satisfactory it will be extended to all the force. The details so far agreed upon are given as follows in the report of the committee appointed to arrange the trial:

"That the trial be made beginning May 1, and be limited to employes of the Mechanical Division who are located at Gorgona.

"That the issuing, handling, accounting, etc., of both books and cash be under the control of the Panama Railroad Company (commissaries) and under existing rules and regulations of the Commission, so far as same are not inapplicable to the change in method.

"That the Superintendent of the Mechanical Division have printed such notices as may be necessary and in such different languages as may be required, posting them in conspicuous places in order that all employes may have notice of the change, and be prepared to purchase their coupon books for cash beginning May 1.

"That the books may be placed on sale during each working day of the month, between the hours of 8 a. m. and 1 p. m., and 3 to 7 p. m., and that such employes of the Mechanical Division as may be necessary be detailed for this purpose.

"That the books be issued on the basis of salaries and wages, and without regard to actual earnings and to the amount fixed by existing regulations. That a card of identification be issued to each employe at the time of delivering his pay receipt, or at such other time as may be more convenient to the Mechanical Division, this card to be good for one calendar month, a form to be printed on the back of the identification card authorizing a member of the employe's family to purchase books upon presenting the card to the issuing clerk. This plan includes the issuance of a card of identification, good during one month, for the purchase at any time during the month of all or any part of the maximum amount of books allowed. * * * * *

"Books to be sold only upon presentation of card by the employe or such member of his family as may be authorized by him, and are to be paid for in cash at the time of application and issue.

"That the issuing clerk be responsible to the Panama Railroad Company for coupon books and cash, and render reports and remit cash under such regulations as may be prescribed by the local Auditor.

"The issuing clerk shall keep a record of all books issued, separated between gold and silver employes and by denominations, showing the sales for each day separately, and maintaining memoranda of the issues by hours, and such other data as may be required from time to time by this committee. The Panama Railroad Company will furnish any information required by the committee, which is authorized to make such changes as may be found necessary during the three months' trial."

It is the opinion of this committee that it should be maintained throughout the three months to observe from time to time the operations, so that such difficulties as may develop or changes as may be found necessary can be given attention before any attempt is made to extend the "sales for cash" method throughout the work; and that it make further recommendation by July 1, 1911, as to the extension of the system.

Information in Regard to Arrival of Ships.

On days when Panama railroad ships are due to arrive at Cristobal, anyone who wishes information with regard to the hour of docking may procure it from any of the telephone exchanges. This arrangement has been made in order to relieve the wires from the extra work entailed by handling a large number of requests for information. The wireless station at Colon will furnish the various exchanges with the information as soon as it is received.

Civil Service Examinations.

Examination will be held, probably on April 30, for typewriter and stenographer, and typewriter in the Isthmian Canal service. Men only will be admitted, who are citizens of the United States and between the ages of 20 and 45 years.

Requests should be made at once for forms 304 and 1424, stating the name of the examination desired.

Care should be exercised in executing applications and they should be reviewed before filing. It is to be noted that *bona fide* residence must be shown to the date of application, and that such residence does not require continuous bodily presence, but refers to the place at which the applicant, if a voter, is legally entitled to exercise the right of suffrage.

Attention is directed to the fact that cards of admission are sent to all applicants for civil service examinations, if found eligible. No one should report at Culebra without such a card of admission, or at least before having ascertained the date on which an examination is scheduled to be held if no card has been received.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.

Culebra, April 14, 1911.

Odd Fellows.

In accordance with the proclamation of the Sovereign Grand Sire, the Odd Fellows have arranged for a meeting in commemoration of the ninety-second anniversary of the foundation of Odd Fellowship to be held at Cristobal Y. M. C. A. on Sunday, April 23, at 2.30 p. m.

All members of the order now in the Canal Zone are requested to be present, that we may in a fitting manner return thanks for the privileges we have enjoyed and the success and prosperity which have attended the acts of our beloved order during the past year.

This meeting will be open to the public and a cordial invitation is extended to all who are interested in the objects and work of the order to attend.

By order of the Sovereign Grand Sire.

J. P. MEADE,
Secretary, Cristobal Lodge No. 2.

Women's Clubs.

The last meeting for the year of the home department of the Cristobal Woman's Club was held in the clubhouse on Wednesday, April 12. The program consisted of selections by the Cecelian chorus, a vocal duet by Mrs. Frank Ullrich and Mrs. J. Diers, a piano solo by Mrs. Ullrich, and a lecture on Guatemala by the Rev. Edward J. Cooper, rector of Christ Church, Colon. Since the beginning of the club year in October, the home department has held a meeting on the fourth Wednesday in each month. Programs have been given at each meeting, among the topics being: "Vacation notes," "The duties of a hostess and the duties of the guest," "Tropical fruits and vegetables," "Cooking and housekeeping," and one afternoon was devoted to a discussion of the duties and amusement of young daughters in the family. Mrs. Charles B. Butters is the chairman and the department has 20 members.

At an election of officers held in the Pedro Miguel Woman's Club the following were chosen: President, Mrs. George Brown; vice-president, Mrs. Harry Girdner; secretary, Mrs. E. J. Brown; treasuer, Mrs. Williams. The fortnightly business meetings will be held as usual for the present. The next social meeting will be at the home of Mrs. W. H. Doyle on Wednesday, April 23.

The meeting of the Paraiso Woman's Club was held in the lodge hall on Wednesday, April 12. The current events program consisted of papers on the Mexican trouble, the famine in China, and the fortifications of Cape Henry. Members are assigned special topics at each meeting for the current events, and discussion follows the reading of each paper.

Obituary.

John S. Notte, employed by the Panama Railroad Company and living in Ancon, died at Ancon Hospital on April 13. He was 42 years of age, single, and had been on the Isthmus six years. His home was at West New Brighton, N. Y., where his mother is living.

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending April 15, follows:

DATE.	Hours worked.	Cubic Yards.
April 10	6:43	2,302
April 11	7:29	2,367
April 12	7:20	3,307
April 13	7:00	3,154
April 14—Holiday.		
April 15	4:00	1,919
Total	32:32	13,049

Ancon Crusher.

A statement of the rock crushrd at Ancon quarry during the week ending April 15, follows:

DATE.	Hours worked.	Cubic Yards.
April 10	....	253
April 11	....	197
April 12	5:50	1,298
April 13	7:35	2,828
April 14—Holiday.		
April 15	8:20	2,375
Total	21:45	6,951

Crusher shut down, putting new eccentric into large crusher.

The next big shoot of the Culebra Gun Club will take place on Sunday morning, April 23. All members are requested to come early in order that shooting may begin at 9 o'clock.

WM. E. TRAGSDORF.

Married.

LOWE–HEGENER—At Cristobal, C. Z., on April 7, Estelle Sylvia Hegener of Cleveland, Ohio., to Grover Cleveland Lowe of Birmingham, Ala., the Rev. C. O. Purdy, officiating. Canal Zone residence, Las Cascadas.

A baseball game was played at Colon Park on April 14 between teams called the Commissary-Subsistence Regulars and the Commissary-Subsistence Outlaws, the Outlaws winning 10 to 9 in 11 innings.

The Corozal baseball team defeated the Commissary Outlaws at Ancon on Sunday, April 9, by a score of 5 to 4.

A concert will be given by the Isthmian Canal Commission Band at Culebra, C. Z., on Sunday, April 23, 1911, at 5.45 p. m.

A concert will be given at Cristobal on Sunday, April 30, 1911, at 4.30 p. m.

CANAL WORK IN MARCH.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., April 14, 1911.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of March, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	101,165	2,006,376	101,247	2,210,788
Work excavation, wet	Cubic yards	391,736	17,711	639,761	1,049,208
Total work excavation	Cubic yards	492,901	2,026,087	741,008	3,259,996
Plant excavation, dry	Cubic yards	3,713	6,436	....	10,149
Plant excavation, wet	Cubic yards	47,324	....	9,974	57,298
Total plant excavation	Cubic yards	51,037	6,436	9,974	67,447
Total Canal excavation	Cubic yards	543,938	2,032,523	750,782	3,327,443
Material placed in dams	Cubic yards	597,847	....	49,071	646,918
Concrete placed in locks and dams	Cubic yards	95,588	....	75,889	171,477
Explosives used	Tons (Gross)	93.23	272.95	38.69	404.87
Rock drilled	Feet	72,815	454,363	77,055	604,233
Tracks removed	Miles	....	21.89	....	21.89
New tracks laid	Miles	2.54	26.17	3.45	32.16
Rock crushed	Cubic yards	87,109	376	68,361	155,846
Cement used	Barrels	96,079	878	77,621	174,578
New roads built	Miles	.04	....	.66	.70
Water mains laid	Feet	4,478	965	4,737	10,180
Sewers laid	Feet	1,740	111	145	1,996
Open drains and ditches dug	Feet	28,102	150	818	29,070
Average daily force	....	6,967	8,645	4,349	19,961
Average rainfall	Inches	1.60	.41	.02	.54

Atlantic Division.

GATUN LOCKS.

Shovel excavation during the month was continued in the lower lock, and outside the Canal prism for the purpose of obtaining impervious material for back fill. A total of 62,211 cubic yards of material was removed. Of this amount 23,265 cubic yards were excavated for back fill. On March 31 the total material removed amounted to 5,791,075 cubic yards. The shovel excavation in the locks was 98.8 per cent completed, the channel excavation 90 per cent completed, and the excavation of the culvert trenches by crane, 65 per cent completed.

Back Fill—Back filling behind the walls of the upper locks was continued. The quantity placed during March aggregated 40,515 cubic yards, increasing the total to 346,575 cubic yards. On March 31 the back fill was 28.45 per cent completed.

Receiving and Issuing Material—The receipts of rock and sand during the month were satisfactory and exceeded the consumption. The amount of cement consumed exceeded the receipts by 34,265½ barrels.

Mixing and Placing Plants—Both plants and all portable mixers were kept in satisfactory operation during the month.

Power Plants and Pumps—The operation of the power plant and pumps was satisfactory and economical.

Iron and Steel Work—During the month the setting of steel for Stoney gate valves and hollow quoins was continued. A total of 447.4 tons of fixed steel was placed, exclusive of reinforcement.

Concrete Work—There was an increase of 14,780½ cubic yards in the amount of concrete laid as compared with the figures for the preceding month. The daily average for the 27 working days was 3,218 cubic yards, as compared with a daily average during February of 3,135 cubic yards. The total amount of concrete placed during the month was 86,884 cubic yards, including 5,697¾ cubic yards of large stone. The bucket measurement exceeded the place measurement by 572¼ cubic yards. Of the total concrete, 11,635 cubic yards were placed in the upper lock, 44,351 cubic yards in the middle lock, and 30,898 cubic yards in the lower lock. The concrete work for the entire lock system was 59.1 per cent completed at the end of March.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS, GATUN LOCKS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.06	8.50
Average number of hours per day worked per strand of cableway laying concrete and large stone (actual working time)	8.03	....
Average number of mixers per day	6.00	2.00
Average hourly output per mixer, (actual working time) cu. yds.	58.59	73.21
Average amount of concrete and large stone laid per hour, per strand of cableway, (actual working time) cu. yds.	34.61	....
Large stone laid, cu. yds	5,073½	624½
Concrete laid, cableways, cu. yds.	55,066	....
Concrete laid, through chute into dump cars, cu. yds	8,206	8,516
Concrete laid, crane and derrick, cu. yds.	....	8,104
Concrete laid, portable mixers	....	1,866½
Total amount concrete and large stone laid, cu yds.	68,345¼	19,111

Concrete from the auxiliary plant was placed by a crane, five derricks, and through a chute on the east bank of the lower lock into dump cars below and there distributed. This chute was put into operation the morning of March 6th.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 597,847 cubic yards, making the total amount in place 12,873,925 cubic yards.

Hydraulic Fill—The dredges increased the hydraulic fill by 342,800 cubic yards. The total hydraulic fill in place on March 31 was 6,633,760 cubic yards.

Dry Fill—The material received from the Central Division and steam shovel No. 51, amounting to 255,047 cubic yards, was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 6,240,165 cubic yards.

GATUN SPILLWAY.

Excavation—In preparing foundation of the spillway dam 1,010 cubic yards of rock were excavated by hand, increasing the total spillway excavation to 1,579,016 cubic yards.

Concrete—Construction work on the spillway dam was continued, and the concrete behind the east and west coffer-dams was practically completed to an elevation above ordinary floods. The amount of concrete placed during the month aggregated 8,704 cubic yards, which increased the total to 131,091 cubic yards.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea-Level at Mindi—During the month three steam shovels removed 2,270 cubic yards of earth and 47,464 cubic yards of rock from the Canal prism. In addition, 9,055 cubic yards of earth were sluiced by pumping plant.

Dredging from the Ocean to Mindi—Five dredges removed 227,292 cubic yards of earth and 50,105 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 30,889 cubic yards of earth from the channel between Dock 11 and Dock 14, and 17,435 cubic yards of earth in front of Dock 14. On March 31st, 40 feet of water could be carried from zero to zero plus 1,900 feet; 35 feet to mile 3 plus 200 feet; 30 feet to mile 3 plus 3,100 feet; 27 feet to mile 5 plus 2,438 feet, at the junction with the French canal.

Dredging from Mindi to Gatun Locks—The dredge *Sandpiper* removed 114,339 cubic yards of earth from the Canal prism betweeen mile 6 plus 3,130 feet and mile 6 plus 3,700 feet.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working days—hours From 1st to 31st, inclusive	8.00
Average number of hours worked per day	6.98
Average number of cubic yards per hour of working day	403.30
Average number of cubic yards per working hour	462.30
Maximum day's output, (7 hours 16 minutes) cu. yds	3,737.00
Average day's output (27 days) cu. yds.	3,226.00
Average hourly output, (212 hours 34 minutes) cu. yds.	410.00
Total output for the month, cu. yds.	87,109.00

SAND, STONE, AND CEMENT SERVICE.

In connection with this service plant steamed 12,340 miles, handled 974 barges, and carried 2,560 passengers.

TORO POINT.

Colon Breakwater—45,483 cubic yards of material were excavated, of which amount 3,291 cubic yards were placed in track fill, and 42,192 cubic yards in breakwater fill. The double track trestle was extended 488 linear feet. On March 31 the trestle extended 3,598 feet from shore. The total amount of rock dredged and dumped on the west breakwater to March 1, 1911, was 469,288 cubic yards. During the month 50,105 cubic yards of rock were dredged and dumped, increasing the total to 519,393 cubic yards. The amount of dry fill placed to April 1 was 230,702 cubic yards.

NOMBRE DE DIOS.

During the month 109 barges containing 48,292 cubic yards of sand were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required, to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of March the total amount of material excavated in the Central Division was 2,032,523 cubic yards, of which 542,991 cubic yards were classified as earth and 1,489,532 cubic yards as rock. Of this quantity 1,961,204 cubic yards were removed by steam shovels, 8,508 cubic yards by scraper, 28,185 cubic yards by bucket cranes, and 9,170 cubic yards by hand. Contractors removed 17,711 cubic yards by sluicing, and 7,745 cubic yards by hand. Of the total, 1,990,650 cubic yards consisted of primary excavation for the Canal prism, 13,618 cubic yards permanent diversion, useful after the Canal is completed, and 21,819 cubic yards of silt deposited in completed sections of prism. The total work excavation amounted to 2,026,087 cubic yards. In addition, 5,596 cubic yards of gravel were excavated outside of the Canal prism for ballast and concrete use.

The daily average number of steam shovels at work during the month was 50.63, and the total number of shovel days was 1,367, as compared with 48.41 shovels at work during the month of February, with 1,114 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
March	1,945,976	1,274,706	671,270	53.92	26	1,388.0
1911:						
March	1,961,204	1,478,558	482,546	50.63	27	1,434.7

Rainfall at Empire: 1910, 1.60 ins.; 1911, .20 ins.

The above table shows the average output per shovel to be 3.36 per cent greater in March, 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in March, 1911, 1,715,130 cubic yards, was the highest record in that section for the month of March, the previous high record for the month having been March, 1910, when 1 502,868 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division was 97,125,018 cubic yards, and up to April 1, 1911, 73,059 609 cubic yards had been removed leaving 24,065 409 cubic yards to be removed, in order to complete all excavation in the Central Division. From these figures it will be seen that 75.22 per cent of all excavation in the Central Division had been completed up to the close of the month of March, and 24.73 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of March operations was as follows:

CULEBRA SECTION.

	Cubic Yards.
Completed	61,400,413
To be completed	22,786,311

CHAGRES SECTION.

Completed	11,659,196
To be completed	1,279,098

From the above figures it will be seen that the Culebra section, locally known as Culebra Cut, was 72.93 per cent completed, with 27.07 per cent to be completed; the Chagres section was 90.11 per cent completed, with 9.89 per cent to be completed.

During the month 20,140 cubic yards of material were hauled from the Canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad in the vicinity of Pedro Miguel. The total amount of spoil from the Central Division used for this purpose at the close of the month was 3,763,494 cubic yards. The Central Division also delivered at Gatun 241,266 cubic yards of rock and earth for use in the construction of the dam, making the total for this purpose at the end of March 3,147,800 cubic yards. In addition, the Central Division delivered 27,740 cubic yards of rock and earth to the Pacific Division to be used as back fill for the lock at Pedro Miguel.

The daily average number of laborers at work on the whole division during the month was 7,738, and the daily average number of gold employes 907.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 101,247 cubic yards.

Filling and Embankment—During March no additional dry filling was added to the prism of the west dam at Pedro Miguel, the total amount of material in place remaining at 260,852 cubic yards, as previously reported. The back fill at Pedro Miguel was increased by 90,097 cubic yards, the total in place at the end of the month amounting to 188,655 cubic yards.

At Miraflores, 23,940 cubic yards were added to the dry fill in the toes, and 25,131 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month 690,892 cubic yards and 496,421 cubic yards, respectively. No material was added to the back fill during the month, leaving the amount in place as previously reported, 135,885 cubic yards.

PEDRO MIGUEL LOCKS.

The back filling of the west wall was continued, and filling behind the east wall was commenced. The dismantling of berm crane "G" was continued. During the month the amount of iron placed aggregated 761,746 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 44,716 cubic yards, as compared with 37,011 cubic yards during February. The concrete was placed as follows: 14,680 cubic yards in the west wall; 20,429 cubic yards in the center wall; and 9,607 cubic yards in the east wall.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	*8.00	8.00
Average number of hours per day, per unit, worked laying concrete and large stone (actual working time)	5.44	6.06
Average number of mixers per day	2.00	3.89
Average hourly output per mixer (actual working time)	*Cu. Yds.* 63.38	*Cu. Yds.* 37.03
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)	58.30	....
Large rock laid	....	1.00
Concrete laid	34,338.00	10,377 00
Total concrete laid	34,338.00	10,378.00

*12 hours per day for 9 days.

Auxiliary plant consists of three 2-cubic yard mixers and one ½-yard mixer, averaging 3.81 mixers per day. Placing plant consists of locomotive cranes and derricks, averaging 1.81 units per day and ½-cubic yard mixer dumping directly into forms.

MIRAFLORES LOCKS.

The erection of berm crane "H" at Miraflores was completed, and berm crane "F" was completed with the exception of adjusting the machinery. During the month the amount of iron placed aggregated 38,550 pounds. The excavation of rock in the lower lock site was continued, and the filling of the dike at the Agua Dulce pumping station completed.

Concrete Work—The total amount of concrete and large stone laid was 31,173, as compared with 20,896 cubic yards during February. The concrete was placed as follows: 4,182 cubic yards in the west wall; 6,913 cubic yards in the center wall; 19,264 cubic yards in the east wall; and 814 cubic yards in the floors.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.*	Auxiliary Plant †
Length of working day (hours)	8.00	8.00
Average number of hours per day per unit, worked laying concrete and large stone (actual working time)	2.84	6.16

*Excavated from canal prism south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 45,100 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required, to facilitate construction work. Work was continued on the municipal improvements in the city of Panama.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day	12:00
Average number of hours per day (actual working time)	8:89
	Cu. Yds.
Average amount crushed per hour of working day	210.99
Average amount crushed per working hour	284.79
Total output for the month	68,361.00

Relocation of Panama Railroad.

During the month 403,543 cubic yards of material were excavated, increasing the total excavation at the close of the month to 6,271,494 cubic yards, and 448,434 cubic yards of material were placed in embankment, increasing the total for this purpose to 11,698,838 cubic yards.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Relocation of Panama Railroad.

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			
March.	236,531	85,761	150,770	7.31	26	1,245
1911:						
Feb.	256 615	180,600	76,015	6.22	23	1,795
March.	325,295	250,505	74,790	7.04	27	1,712

During the month 2,320 feet of temporary trestle were driven, and work on bridges and culverts was continued. No permanent track was laid during the month, the total of 70-pound and 90-pound permanent track remaining at 157,744 linear feet and 18,997 linear feet, respectively, as previously reported. During the month the track connecting the Gold Hill line with the Obispo diversion track south of Empire bridge was completed, and track laid southward on the former line over the Continental divide into the head of the Pedro Miguel valley. All culvert work north of the Rio Sardinilla was completed, and construction commenced on the culvert at the Rio Obispo. The force averaged 2,372 men, in addition to those employed by the contractors.

Quartermaster's Department.

Labor—The laborers whose services were no longer required by the Central Division in the Chagres district, by reason of the completion of certain portions of the work in that district, were given employment on the relocation of the Panama railroad.

Building—The work of moving six cottages at Culebra was completed during the month. A considerable amount of work was performed in connection with the alterations necessary to create additional accomodations at the Hotel Tivoli.

Materials and Supplies—The work of turning in surplus supplies and concentrating stock was continued. During the first three months of the year approximately $300,000 worth of material was turned in from the line storehouses to the Mount Hope depot. The stocks in the line storehouses are being materially reduced.

The amount of material ordered last month was in excess of that for the previous month, the increase being due to the large orders placed for lock material, aggregating nearly $1,000,000 for the Atlantic and Pacific Divisions.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens and the line hotels showed a net profit of $94,148.55. The operation of the Hotel Tivoli showed a net profit of $8,193.02, and there was a net profit on restuarants, penitentiary and dredges of $202.33. The net profit on subsistence operations was $12,543.90.

Department of Civil Administration.

COURTS.

During the month four civil and 25 criminal cases were disposed of in the Circuit Courts, and 75 civil and 441 criminal cases in the the District Courts.

DIVISION OF POSTS, CUSTOMS AND REVENUES.

Money order sales for the month of March amounted to $494,136.65, and the fees to $2,183.63. Receipts from stamp and card sales and newspaper postage aggregated $8,339.03. The total collection of revenues made by the division was $23,750.27, and the collections on account of court fines, costs and fees, $2,330.82.

Twenty-six vessels entered at and 25 vessels cleared from the port of Ancon, and 23 vessels entered at and 22 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 442, of whom 389 were men and 53 women. Forty-six nationalities were represented. The total number of arrests for the month was a decrease of 44, as compared with February. Ten convicts were committed to the penitentiary, and 12 were discharged, leaving 137 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,544.90, and the value of their work on the Canal Zone roads $2,364.80.

DIVISION OF FIRE PROTECTION.

Eighty-four fires were reported in the Canal Zone during the month, an increase of 57, as compared with February. The large number of fires was due to the excessively dry weather conditions prevailing at this time of the year, and is accounted for in particular by the numerous small grass fires along the line of the railroad caused by sparks from locomotives, there being 50 during the month attributable to this cause. On March 23, one of the most disastrous fires since American occupation swept Colon. Nine Commission buildings were consumed, the Chief Quartermaster's estimate placing the loss at $14,394.93.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,370,771 gallons, and in Colon 914,982 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The total enrolment in the white schools during the month was 1,089 and the average daily attendance 864.6, or 79 per cent of the enrolment; and in the colored schools the total enrolment was 1,418 and the average daily attendance 658.2, or 46 per cent. Forty-two white and 25 colored teachers were employed in the division on March 31.

Department of Sanitation

The total number of deaths from all causes among employes was 43. These were divided as follows: From disease 27, and from violence, 16, giving the annual average per thousand of 6.76 and 4.00, respectively.

The annual average death rate per thousand among employes for the month of March in previous years since American occupation, was as follows:

1905	12.27
1906	37.44
1907	40.23
1908	12.47
1909	8.76
1910	8.91

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and non-employes, was 22.22.

The annual average death rate per thousand for the month of March among the same class of population for previous years, was as follows:

1905	36.51
1906	46.72
1907	32.32
1908	20.67
1909	17.07
1910	18.33

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was, for whites, 3.38; blacks, 7.76, giving a general average of 6.76. For the same month during 1909, the annual average death rate per thousand from disease was, whites, 3.90; blacks, 7.99, giving a general average of 6.84, and for the same month during 1910, whites, 3.89; blacks, 5.87, giving a general average of 5.39.

Among employes during March, 1911, deaths from the principal diseases were as follows: Chronic nephritis, 1; dysentery, 2; malaria, 2; lobar pneumonia, 7; and tuberculosis, 7, leaving a balance of 8 deaths from all other diseases, and 16 deaths from external violence.

No cases of yellow fever, small-pox, or plague were brought to or originated on the Isthmus during the month.

Respectfully,
Geo. W. Goethals, *Chairman.*

Half a Million in Money Orders—Internal Revenues.

The report of the Director of Posts for the month of March shows that 20,095 money orders were issued, amounting to $495,991.18. This was the record month in amount issued, the previous high record was that of March, 1910, when orders to the value of $481,515.67 were issued. Of the $495,991.18 issued last month, $369,546.23 was payable in the United States, $125,491.45 in the Canal Zone, $943.50 in Martinique, and $10 in Costa Rica. The fees collected amounted to $2,188.93, and the amount paid and repaid during the month was $128,436.77.

Postal sales during the month amounted to $8,335.88, and newspaper postage amounted to $3.15.

The revenue collections for the month were as follows:

Distillation licenses	$246.61
Insurance company's fees	129.89
Motor vehicle licenses	37.00
Taxes, license, etc	13,060.72
Total	$13,474.22

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

A lecture on the cruise of the Atlantic battleship fleet around the world will be delivered at the various clubhouses by Franklin Matthews, a newswriter for 18 years on the staff of the New York Sun. He was one of the two civilians allowed to make the cruise with the fleet, and his lecture is an account of the life of the fleet as well as of the countries visited. The schedule of lectures follows: Gatun, April 20; Culebra, April 21; Pedro Miguel, April 22; Porto Bello, April 24; Corozal, April 26; Empire, April 27; Cristobal, April 28; Gorgona, April 29.

COROZAL.

A men's smoker will be held on Thursday evening, April 20. Both members and non-members are invited.

The Corozal indoor baseball team will play at Empire on Saturday evening, April 22.

CULEBRA.

The duckpin bowling league games opened on Saturday night, April 15, with Culebra teams rolling at Empire and Culebra. The results of the match on the Culebra alleys are as follows:

Culebra.				Empire.			
Kersey.....	97	90	85	Davis.....	87	87	84
Conlan.....	82	76	88	Pinney....	88	78	80
Fox........	88	78	78	Witmer...	81	86	85
Mengel.....	89	86	84	Leon......	93	95	84
Hurst......	92	77	84	Henry....	84	98	106
Total.....	448	407	419	Total...	433	444	439

The following are the latest moves in the chess game "by wireless" between Culebra and Porto Bello:

Porto Bello.	Culebra.
6. P X P	6. B—Kt5 ch.
7. B—Q2	7. B takes B, ch.
8. QKt takes B	8. P—Q4
9. P takes P	9. K Kt takes P

The Culebra Boy Scouts took a Sunday afternoon "hike" to Las Cascadas plantation directed by W. R. McCann.

EMPIRE.

A farewell smoker was held on Saturday, April 15, in honor of W. W. Warwick and F. W. Miracle, who have been members of the Empire council for several years past. After an hour's entertainment of magic by Prof. Kellermann, there were speeches by Messrs. Warwick and Miracle, an address by Judge Brown of Cristobal, and remarks by Messrs. Freeman and Dickson. There was music by an orchestra.

The Hon. Maurice H. Thatcher delivered an address under the auspices of the Canal Zone Sunday School Association at the clubhouse on Friday evening, April 14.

The following high scores were bowled during the past week: Parkis, 102, 101; Mason, 105; Gustavson, 100, 101; Giavelli 101, 104; Gorham, 108; Witmer, 106, 102; Pearsou, 100; Reed, 104.

Culebra defeated Empire at Empire in the first series of duckpin league games on Saturday evening, April 15, by the following scores:

Empire				Culebra.			
Gustavson...	88	95	92	Frederick..	88	95	92
Gorham....	86	76	81	Huttle....	94	92	96
Potter......	88	82	75	Judge.....	77	82	78
Pearson.....	91	81	91	Hill.......	82	95	86
Huson......	72	86	97	Case......	105	102	85
	425	420	436		446	465	428

GORGONA.

A. A. Simka will deliver an illustrated lecture on "The Holy Land" on Sunday night, April 23. Mr. Simka made an extended tour of the Holy Land and will talk on his experiences while there.

C. M. Benson led the discussion club on Wednesday night, April 13. His topic was "Should immigration to the United States be restricted."

All mechanics wishing to become acquainted with the Westinghouse air brake E. T. equipment should communicate with the secretary of the Y. M. C. A., Gorgona. Classes for the study of air brake practice will be started in Las Cascadas and Pedro Miguel if there are enough applicants.

Gatun and Gorgona will play indoor baseball at Gorgona on Saturday night, April 22.

GATUN.

The pool match between DePoorter of Gatun and Hirsh of Empire resulted in favor of DePoorter, the final score being DePoorter 300; Hirsh, 276. In the early part of the game Hirsh was 72 balls in the lead. DePoorter by winning this match retains the championship of the Isthmus and will receive a specially designed medal. Hirsh made five 15-ball runs during the last half of the match at Gatun.

The "Life problems club" discussed "The family and the home" at its meeting on Sunday evening, April 16. Those participating were Messrs. Purdy, Smith, Wood, Hughson and Wilson. The subject for April 23 will be "Marriage and divorce."

A special committee representing the Red Cross Society met at the clubhouse on Saturday evening and planned an entertainment, the funds of which will go toward the two million dollar endowment.

The game of indoor baseball at Gatun on April 15 resulted in the score: Empire, 46; Gatun, 19.

Henry Hughson gave a talk on the "History of Money" in the game room on Friday evening, April 14.

Mr. Fox presided at the meeting of the literary club, in the absence of President Young, on Wednesday evening, April 12. Mr. Young of Empire sang two baritone solos and Mr. McAnelly played several piano selections. In the debate on "Election of United States Senators", Mr. Shafer upheld the affirmative, and Mr. Philips the negative. Messrs. Gilkie, Young, Carr, Smith and Hughson also took part. Mr. Critchlow read a paper on "The cause and recording of earthquakes." The election of officers resulted as follows: President, Mr. Wantland; vice-president, Mr. Chatfield; secretary, Mr. Cotton; program committee, Messrs. Smith, Critchlow, and Shafer.

CRISTOBAL.

In the opening of the Isthmian Duckpin League with Gatun on Saturday night, April 15, Cristobal won two out of three games.

In the local duckpin league the 100, or over, scores were made during the week ending April 15, by Harrington, 102; DeCora, 110, 107; Sullivan, 104.

At a meeting of the bowlers eligible for the Isthmian Duckpin League, Adams and Rosteck were elected captains of the two teams, composed of the following men: Adams' team—DeCora, Sullivan, Herring, Jacques, Smith, Thompson, Rabbitt, French, Bullard. Rosteck's team—Louch, Howard, Barrett, Claherty, Harrington, Beck, Furlong, Blackburn, Gibson.

In the duckpin tournament the games won are as follows: Commissary-Subsistence, 28; Quartermasters, 23; Miscellaneous, 23; Dry Dock, 10.

A handicap pool tournament will be started on April 24 with the following men entered: Thomas, Chambers, Wempe, Glick, Jamieson, Benson, Cleall, Schlager, DeCora, Prados, Ford, Jarboe.

At a special Good Friday service the Rev. Carl H. Elliott spoke on "The badge of royalty," and special music was furnished by the Panama railroad orchestra.

The moving pictures which were to have been here on Monday, April 10, did not arrive. In the near future an evening of moving pictures will be given, showing scenes from life on the Isthmus, interspersed with comic scenes.

Preliminary steps were taken at a meeting on Wednesday night, April 12, to organize a debating club which will take up at its meetings topics under discussion at the present time.

Gorgona won the indoor baseball game in the league series on Saturday night by the score of 23 to 9. The batteries were: Gorgona—Weiser and Ridge; Cristobal—Russell and MacSparren.

The Easter cantata "Easter Angels" as sung by the Union Church choir on Easter Sunday will be repeated at a morning service at the clubhouse on April 23. There will also be a short talk and general singing.

Rainfall from April 1 to 15, Inclusive.

OFFICIAL CIRCULARS.

Seeing the Canal.

CULEBRA, C. Z., April 12, 1911.

CIRCULAR No. 382:

If visitors to the Isthmus who wish to inspect the Canal will communicate in advance with the Secretary to the Chairman, Culebra, C. Z., a representative will be detailed to conduct them to the points of greatest interest and explain the most prominent features of the work, according to the following schedule:

Monday, a. m.—The locks at Pedro Miguel.

Wednesday, a. m.—The models and relief maps in the office of the Chairman and Chief Engineer at Culebra, and the Culebra Cut.

Friday, a. m.—The locks and dam at Gatun.

Saturday, a.m.—The models and relief maps in the office of the Chairman and Chief Engineer at Culebra, and the Culebra Cut.

Saturday, p. m.—The locks and dam at Gatun.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Report of Unsatisfactory Work.

CULEBRA, C. Z., April 17, 1911.

CIRCULAR No. 384:

All work of an unsatisfactory character peformed for one department or division (including the Panama Railroad Company) by another shall hereafter be reported to this office on Form C. E. 298, which has been provided for this purpose, in duplicate.

Stock of Form C. E. 298 has been ordered printed, and necessary supply may be obtained from the Depot Quartermaster on requisition in the usual manner.

It is expected that before forwarding the report the head of the department or division will make such examination as will assure him of the correctness thereof.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Slaughter of Animals for Food.

ANCON, C. Z., April 6, 1911.

Until further orders, all individuals, firms, or companies, slaughtering beeves, sheep, hogs, or goats within the limits of the Canal Zone, will be required to secure a permit for each animal slaughtered from the district physician of the station where the killing is to be done. The application for the permit must specify the time and place, when and where the animal is to be slaughtered.

The district physician will be present when the carcasses are opened and satisfy himself that the animals did not have anthrax or any other infectious disease. Should the characteristic lesions of an infectious disease be found in any animal, the district physician is instructed to thoroughly disinfect the floor of the slaughter house and see that the sanitary inspector of the district at once thoroughly burns up the entire carcass together with the hide and offal of any animal so infected.

Persons slaughtering any of the above-mentioned animals within the Canal Zone, without complying with the provisions of this circular, shall be subject to criminal prosecution as provided for by law.

Adopted by the Board of Health, the 6th day of April, 1911.

W. C. GORGAS,
Chief Sanitary Officer and Chairman Board of Health.

Approved: GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Chief Clerk, Mechanical Division.

GORGONA, C. Z., April 11, 1911.

ALL CONCERNED:

During the absence of Mr. William Taylor on leave, Mr. H. C. Dew will, in addition to his regular duties, act as Chief Clerk of the Mechanical Division.

A. L. ROBINSON,
Superintendent, Mechanical Division.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending April 26, 1911 (75th meridian time):

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending April 15, 1911:

Moldegaard, April 8, from Brunswick, with 41,800 pieces cross ties for stock

Prinz Eitel Friederich, April 9, from New York, with 200 barrels crude carbolic acid for stock.

Oruba, April 9, from New York, with 59 cases paper for stock.

Wanderer, April 11, from Liverpool, with 12 pieces dredge buckets for Pacific Division.

Turrialba, April 13, from New Orleans, with 34 crates library paste, 706 pieces lumber, 400 sacks bran for stock; 395 pieces creosoted lumber for Atlantic Division; 8 pieces dipper lips for Central Division.

Advance, April 13, from New York, with 100 cases soap, 5 cases pitchers, 117 barrels fire brick, 34 barrels rosin; 8 casks china, 5 cases paints for stock; 8 cases coupon books for Examiner of Accounts; 13 barrels tower locks for Mechanical Division; 9 cases rubber sleeves for Atlantic Division; 6 pieces castings, 20 pieces cable chains for Central Division; and a miscellaneous cargo, the whole consisting of 363 packages, weighing 134 tons.

Almirante, April 14, from New York, with 13 cases brooms, 185 coils rope for stock; 5 cases electrical material for Atlantic Division.

The following vessels arrived at and departed from the port of Balboa during the week ending April 15:

Arrivals—April 8, *Barracouta*, from Central American ports; April 10, *Mackinaw*, from San Francisco; *Ucayali*, from Callao; April 11, *City of Panama*, from San Francisco; April 12, *Huasco*, from Valparaiso; April 13, *Pennsylvania*, from San Francisco; April 14, *Chile*, from *Guayaquil*; April 15, *Rupanco*, from Columbian ports; *Quito*, from Buenaventura.

Departures—April 9, *San Juan* to San Francisco; April 10, *Guatemala*, to Callao; April 11, *Peru*, to Guayaquil; April 13, *Barracouta*, to Central American ports.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, April. 15, 1911. All heights are in feet above mean sea level.

COLON TO BARBADOS, CALLING AT TRINIDAD.

Magdalena	R. M.	Tuesday	April 25

Hamburg-American steamers leave Colon for New York via Kingston every Tuesday at 10 a. m., and those designated (*) call at Santiago, Cuba; for Bocas del Toro and Port Limon on alternate Wednesdays, by ships designated (*†).

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (†) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

The Leyland Line ship *Californian* will sail from Colon for New Orleans via Port Limon on April 21.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, APRIL 26, 1911. No. 35.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chagres Section Work Suspended.

The Central Division has finished all the excavation that it can do at present in the section of the Canal between Gatun Lake and Culebra Cut, known as the Chagres section because the line follows in general that of the Chagres River. There remains to be taken out a portion of a hill at Bohio, on which a contractor is sluicing, a small hill at San Pablo, and a part of the east bank of the river at Gorgona, where another contractor is at work. The hill at San Pablo will be taken out during the dry season of 1912, after the present line of the Panama railroad has been abandoned. There remain about 679,000 cubic yards to be excavated. In the official estimate an additional allowance of 600,000 cubic yards is made for silt, which will be deposited by the river and which will be removed after the Canal is in operation by dredges.

The completion of work in this section had little effect on the common labor force, because most of the men released were absorbed on the relocation of the Panama railroad, and at Gatun and Miraflores. The white Americans were utilized elsewhere, as far as possible.

Miraflores Locks.

In the upper locks at Miraflores, awaiting its turn for further service, lies a wooden form that has been used 20 times in making a joint between the main culverts in the side walls and the lateral culverts at Pedro Miguel Locks. It is one of the "lily forms," so called because of their resemblance to a lily, due to the fact that they represent the joint between a circular culvert and an elliptical one. It is rather a complicated pattern in appearance, and is put together in sections, so that when concrete has set around it, the form may be removed and then assembled again for further use. It cost $250, so that the cost of forming each joint so far made over it is about $12.50. This is typical of the repeated use to which the forms are put in concrete work, both in the Pacific locks and at Gatun, and typical also of the general methods that have resulted in a steady lowering of the price of concrete construction.

The progress of concrete work at Miraflores is indicated on page 2 of this issue. Two of the cantilever cranes are completed, and are performing the entire operation of taking materials from the storage piles, mixing them into concrete, and delivering the concrete into the forms; one to the east side wall and the other to the west wall. There will be four of these cranes in the completed plant; the third is now in process of erection, and work on the fourth will soon be begun.

Concrete laying is in progress only in the upper locks and the north forebay, the work in the lower locks and the south forebay being entirely excavation. Seven steamshovels are digging here, and streams of water from four monitors are performing hydraulic excavation, the material from which is pumped into the dam across the Cocoli River. In anticipation of the rainy season, a sump is being dug into which water from the steamshovel section of the excavation will be drained, to be lifted thence out of the lock site by two 12-inch pumps.

Gatun Locks and Dam.

The steel forms for side wall monoliths in Gatun Locks were moved into the lower locks on April 23 and the placing of concrete in those locks is now in full swing. Most of the floor has been laid with concrete from the auxiliary plants, but two of the construction cableways are now at work on the side walls, four monoliths of which are completed. The floor is 60 per cent completed and over 15 per cent of all the concrete for the lower locks is in place. Concrete work in the middle locks is about 80 per cent completed and in the upper locks it is practically all done. A statement of the concrete work in the series of three twin locks is published on page 2 of this issue, and it shows that over 61 per cent of all the concrete for Gatun Locks is in place.

The hydraulic filling of the east section of the dam was resumed on April 15. This half of the fill had been allowed to settle and dry out during the dry season. Two suction dredges are working on each section. At one point the dry fill has reached an elevation of 90 feet above sea level. A statement of the progress of work on the spillway is published elsewhere in this issue.

Drainage of Culebra Cut.

Preparations for the drainage of Culebra Cut north of the summit at Empire have been completed, and but little trouble is anticipated from water on that slope during the present rainy season. The drainage system north of the summit consists of two diversion ditches or canals running parallel with the Cut on either side, to keep water from draining into the excavation, and a ditch running through the center of the excavation to a sump at the north end, whence the water is pumped over the dike into the Chagres River.

The west diversion, known as Camacho, has given no trouble since its completion in 1908; but the east diversion ditch, the Obispo diversion, broke in one place and was endangered by a slide in another, during the last wet season. The first break was at a point opposite Empire, known as La Pita, and occurred on May 7, 1910. It was due to seamed rock sliding on rock, a movement that was well developed before the rainy season began. A wooden flume was constructed to take the drainage during the rainy season, and this has been replaced by a reinforced concrete flume, completed on April 21. This flume is 370 feet long, with a wing wall 30 feet long on the upstream end, and is 22 feet wide. It will carry 3,040 cubic feet of water per second. The largest quantity ever passing through the diversion is recorded as 2,650 cubic feet per second.

The slide on the east bank opposite Las Cascadas, which had been in motion since April, 1908, broke so far back during December, 1910, that it was deemed advisable to locate a diversion ditch farther back from the Canal, and this relocation work has been completed. It involved the excavation of about 22,000 cubic yards of material, most of which was taken out by scrapers. Two plows and 18 scrapers were employed.

On the south end, the plan for drainage through the center culvert of Pedro Miguel Locks, has not been carried out, because this would interfere with the lock work still in progress at the north end of the locks. The water will be drained through the old Panama railroad culvert and the location of Pedro Miguel dam, as heretofore, until the drainage through the locks can be effected.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 54 per cent completed, 133,466 cubic yards out of a total of 225,000 having been placed up to the close of work on April 22. A statement of the amount laid each day last week and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
	Cu. Yds.		
April 17	156	14:00	2
April 18	144	14:00	2
April 19	220	14:00	2
April 20	136	10:00	2
April 21	163	12:00	2
April 22	49	4:15	2
Total	868	68:15	2
Previously reported	132,598		
Grand total	133,466		

Record Excavation in Culebra Section.

On April 20th, 45 steamshovels, working in the Culebra section of the Central Division, excavated 67,749 cubic yards of rock and earth

NOTES OF PROGRESS.

(Continued.)

during the working day of eight hours, an average per shovel of 1,505 cubic yards for the day. The next highest record for the Culebra section was made on March 31, 1911, when 66,660 cubic yards of rock and earth were excavated.

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending April 22, follows:

DATE.	Hours worked.	Cubic Yards.
April 17	6:58	2,624
April 18	6:42	2,567
April 19	7:30	1,935
April 20	7:09	2,686
April 21	7:11	3,060
April 22	6:50	3,370
Total	42:20	16,242

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending April 22, follows:

DATE.	Hours worked.	Cubic Yards.
April 17	7:35	2,555
April 18	6:40	2,059
April 19	6:15	2,429
April 20	7:15	2,949
April 21	7:10	2,656
April 22	7:15	2,554
Total	42:10	15,202

Family Quarters.

The Canal work at Tabernilla is completed and that at San Pablo is as nearly so as it can be until the relocation of the Panama railroad is in regular use. Employes will be transferred to other points convenient to their work, but all houses suitable as family quarters will be reserved for that purpose and assigned to married employes who are unable to secure family quarters near their work. A statement of the applications for family quarters on file on April 1, follows:

PLACE.	No. 1 List.*	No. 2 List.
Ancon	....	50
Ancon Hospital	2	5
Balboa	3	37 (8)
Corozal	....	34 (3)
Cristobal	....	126 (3)
Culebra	4 (2)	33
Empire	3	59 (21)
Gatun	6	157 (60)
Gorgona	16 (2)	133 (31)
Las Cascadas-Bas Obispo	2	27 (5)
Miraflores	....	1
Pedro Miguel-Paraiso	3	51 (19)
Porto Bello	....	14 (2)
Tabernilla	3	59 (2)
Toro Point	1	9
Total	43 (4)	775 (152)

NOTE.—Figures in parentheses represent occupants of non-housekeeping quarters.

*Employed prior to January 1, 1908.

College Entrance Examinations.

The College Entrance Examining Board has included Ancon among the places at which examinations for entrance to American colleges and universities will be held on June 19 to 24. The certificates of this board admit the holder to any college or university in the United States without further examination. Any person may take the examination, and applications for information should be addressed to F. A. Gause, Superintendent of Schools, Ancon.

Canal Medals.

Canal medals earned during the years 1908–10 will be distributed about September of this year, and those earned during the years 1909–11 will not be ready for distribution until approximately a year later. The list of persons who have earned the medal service bar will be published in the issue of May 3.

Sailing of Cristobal.

The sailing date of the *Cristobal* from Pier No. 11, Cristobal, has been changed to Wednesday, May 3, at 3 p. m., instead of Tuesday, May 2, as shown heretofore on the schedule.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 61 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 22, being 1,286,032 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending April 22, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 455½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: April 17, 73 yards; April 18th, 65½ yards; April 19th, 95 yards; April 20th, 97 yards; April 21st, 74 yards; April 22d, 51 yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is about 75 per cent completed, 627,909 cubic yards, out of a total of 837,400, having been placed at the close of work on April 22. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-Cubic yard mixers			AUXILIARY PLANT.						Large stone.	Total.
				2-cubic yard mixers.			½-cubic yard mixer.

MIRAFLORES LOCKS.

About 15 per cent of the concrete for the system of two twin locks at Miraflores was in place on April 22, the total amount on that date being 202,943 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixer.

*This 135 yards was mixed by a ½-yard mixer, the amounts for each day being: April 18, 44 yards; April 19, 42 yards; April 20, 42 yards; April 21 7 yards.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The annual meeting of the Canal Zone Federation of Women's Clubs was held at the Gatun clubhouse on Friday afternoon, April 21, when there was a full attendance of delegates and club members. The visitors were welcomed by the president of the entertaining club, Mrs. V. V. Sessions. In her annual report, Mrs. Thomes E. Brown, Jr., the president of the Federation, reviewed briefly the work of the organization for the past two years during which time she has been its chief officer, and in closing, she urged women to work in the home and in the care of children.

From the reports of the club presidents it was seen that the differences in the efforts of the several organizations are marked; Cristobal, with its 60 odd members, is the only club doing department work; Gatun is interested in civic work and is preparing to take up a study course; Gorgona continues its social meetings and the art embroidery class is one of its features; Paraiso has varied interests and is developing club programs; Pedro Miguel holds business and social meetings alternately. The most notable efforts for the year have been the initiative steps taken by the Cristobal club in the establishing of a systematic campaign against disease in the city of Colon, and by the Gatun club in placing a playground equipment in the village.

The education committee recommended the establishment of self supporting vacation schools. The library extension committee reported the addition of 50 new books to the library in Cristobal, and the exchange of books with the Gatun library. These two juvenile libraries are the property of the Federation, having been presented to the organization in 1909. These libraries will be lent to the public schools which have no libraries for certain portions of the school year.

The following changes in the organization of the Federation were adopted: In place of three meetings a year, there will be one general meeting of the Federation in January, to be held either in Colon or Ancon and the expenses to be met by the federated clubs. The meeting will be divided into two sessions: The business meeting in the morning, and a formal program, followed by a reception in the afternoon. At this time the officers for the year will be elected. The standing committees are abolished; such committees as are necessary for carrying on the work of the organization being appointed. There will be a reciprocity committee, the chairman of which will keep in touch with the clubs and have filed a list of names of speakers and papers that shall be available for the clubs upon application. A custodian will be appointed to take charge of the Federation property. The officers of the Federation, with the presidents of the several clubs, will constitute the executive board, and meetings of this board will be held in October and April, and at such other times as is considered needful.

At the close of the meeting the Federation cook book was placed on sale at auction and more than 50 copies were sold at popular prices. The remainder of the books are still in the hands of the chairman of the committee, Mrs. E. H. Colip, Cristobal, and may be obtained from her, at a price greatly reduced from the original.

Tea was served by the Gatun club, during which time Miss Neville played several selections on the piano.

The following officers were elected to serve until the next annual meeting which will take place in January, 1912: President, Miss J. Macklin Beattie; first vice-president, Mrs. Frederick Mears; second vice-president, Mrs. E. M. Colip; third vice-president, Mrs. V. V. Sessions; recording secretary, Mrs. Carl H. Elliott; corresponding and general federation secretary, Mrs. Thomas E. Brown, Jr.; treasurer, Mrs. M. E. Smith; auditor, Mrs. S. E. Calvit.

Church.

The meetings of St. Luke's Altar Guild will be held at the Hotel Tivoli on the first and third Tuesdays in each month at 9.30 a. m. On May 2, the Rev. E. J. Cooper will speak on his recent visit to Guatemala. The meeting will be informal and the members are privileged to invite their friends. The rector's course of lectures on church history and doctrine that was begun at the Lenten meetings of the guild will be continued in St. Luke's church on Wednesday evenings at 8 o'clock.

Tabernilla Dramatic Club.

The Tabernilla Dramatic Club has elected the following officers: President, Miss Elida Williams; vice president, Mrs. Ray E. Courter; secretary, Mrs. Nolan; treasurer, Mrs. Carl Twitchell, and stage manager, O. S. Farrar. The club will give its first play on Saturday evening, May 6, at the I. C. C. hall, Tabernilla, and the proceeds will be donated towards the American Red Cross endowment fund.

No Staterooms on Ancon and Cristobal.

All available accomodations on the steamships *Cristobal* and *Ancon*, scheduled to sail on May 3 and 8, respectively, having been reserved no further requests for cabin passage will be issued. Requests for steerage passage will be issued until further notice.

Civil Service Examination.

Attention is directed to the fact that cards of admission are sent to all applicants for civil service examinations, if found eligible. No one should report at Culebra without such a card of admission, or at least before having ascertained the date on which an examination is scheduled to be held if no card has been received.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
Culebra, April 14, 1911,

PERSONAL.

Mr. M. H. Thatcher, accompanied by Mrs. Thatcher and Miss Chinn, left for the States via Cuba on his annual leave of absence on the *Prinz August Wilhelm* on April 25.

Mr. W. W. Warwick, Examiner of Accounts, who was appointed a Justice of the Canal Zone Supreme Court under date of March 16, 1911, did not qualify for that position because before he could do so the President decided that he preferred to have him become a member of the Economy and Efficiency Commission, which is charged with the work of coordinating the duties of the Government departments in Washington. He has accepted the latter position, and sailed for the States on April 25, accompanied by Mrs. Warwick.

I. O. O. F.

The election of officers for Canal Zone Lodge No. 3 of Culebra, held on Monday night, April 17, to fill vacancies caused by resignations resulted as follows: Noble grand, Claud Peters; vice grand, Eugene W. Palmer; secretary, Albert F. Sickler; treasurer, Arthur E. Erickson.

Spanish War Veterans.

There will be a meeting of Lieut.-Col. William L. Sibert Camp No. 1, U. S. W. V., in the lodge hall at Gatun on May 10. Prior to this meeting, at 7.30 p. m., there will be a short meeting for all persons eligible for membership, when the object of the organization will be explained by Commander Young, and those who desire to do so can fill out an application for membership. The initiation fee is $2, and dues are 25 cents a month.

Members of Chagres Camp No. 2, United Spanish War Veterans, are requested to attend a meeting to be held in Kangaroo Hall, Empire, on May 6, at 2.45 p. m.

LABOR FORCE AND QUARTERS IN MARCH.

The total of the Canal and Panama railroad force at work on March 29 was 35,806, as compared with 35,955 in February, and with 38,676 in March, 1910. Of the total in March, 1911, Canal employes numbered 28,850, and Panama railroad, 6,956. The force report for March, follows:

DEPARTMENT.	SILVER EMPLOYES.*														Total Gold.	Grand Total.

LOCK GATE OPERATING MACHINES.

Gates Will Be Opened or Closed in Two Minutes.

Bids have been requested in the United States for the machinery to operate the lock gates. It consists of three distinct parts—the machinery for opening and closing the gates, the machines for locking the gates when they are closed, and the motors to operate these machines.

The machinery for opening and closing the gates was invented in the office of the Assistant Chief Engineer by Edward Schildhauer, electrical and mechanical engineer, and a patent has been issued on it. It is the subject of the illustration herewith. It consists essentially of a crank or "bull wheel" to which is fastened one end of a strut or connecting rod, the other end of which is fastened to a lock gate. The wheel, moved through an arc of 197 degrees, closes or opens the gate leaf, according to the direction in which it is turned. One operation takes 2 minutes. It is a combination gear and crank, is constructed of cast steel, is 19 feet 2 inches in diameter, and weighs approximately 35,000 pounds. It is mounted in a horizontal position on the lock wall; turns on a large center pin, and is supported at the rim in four places by rollers. The center pin is keyed into a heavy casting anchored securely to the concrete. The crank gear or "bull wheel" has gear teeth on its rim and is driven by a single pinion on a vertical shaft. The vertical shaft is driven by a bevel gear and pinion, the pinion being fast on a horizontal shaft passing through the bullkhead, which separates the motor chamber from the bull wheel chamber. This shaft carries a gear with spring center which is driven by a pinion on the back shaft of the motor.

The strut pin is fastened on the wheel in a boss near the rim of the crank gear. The opposite end of the strut or connecting rod is fastened to the gate at a distance of 17 feet from the pintle by means of the strut anchor. The connecting rod consists of a built-up structural member with flexible connection at either end, and a spring shock absorber at the gate end. The purpose of the shock absorber is to prevent undue strain on the crank gear from wave action on the gate, or other causes. It consists of six nests of two springs each, capable of exerting, when solid, a force of about 184,000 pounds and assembled with an initial compression of about 50,000 pounds. The springs are in compression for a force acting in either direction on the strut. A slip joint allows for lengthening or shortening the strut within fixed limits.

The strut is supported at the slip joint by a pair of rollers, which are intended to relieve the joint of undue bending strains. These rollers are supported in spring bearings, which allow for variation in the distance from the center line of the strut to the roller track. The roller track is riveted to the top girder of the miter gate.

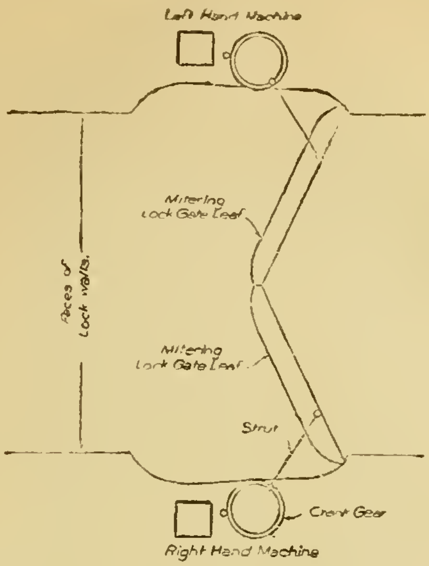
The crank gear end of the strut turns through an angle of about 197 degrees on the pin circle and back again over the same path. At the extreme position the strut is on a dead center with respect to the crank gear and can exert a force on the miter gate depending only on the strength of the strut, crank gear, or gate.

The miter forcing machine is designed to force the gate leaves to perfect miter and lock them in mitered position. It consists essentially of two box shaped castings, one bolted to the outer end of the top girder of each gate leaf, one casting carrying a pair of moveable jaws and their operating mechanism and the other carrying a large pin, which is enclosed by the jaws when they are in the closed position.

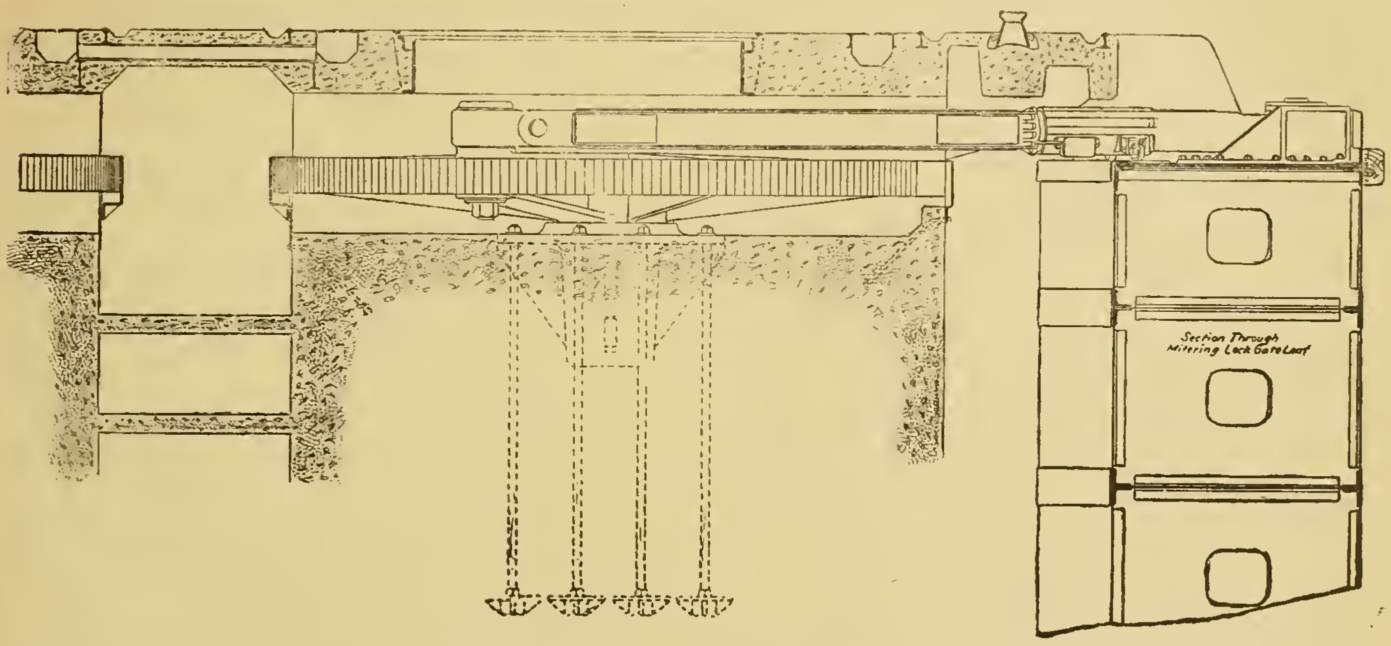
The jaws are connected by a series of toggle links to a crosshead nut which is moved by means of a revolving screw. The end thrust of the screw is taken up by two thrust bearings which transmit thrust in either direction to the main frame casting. The screw is turned by a bevel gear in mesh with a bevel pinion on the motor driving shaft. This driving shaft passes through a plug bearing and is connected to the motor shaft by means of a friction cutoff coupling. The forces acting on the jaws are transmitted directly to the frame through pins when the jaws are in the locking position, and there is no strain on the screw due to forces acting on the jaws. When in open position the jaws allow either gate leaf to reach the mitering position without interference from the other.

The motor is provided with a solenoid brake for bringing the machine quickly to rest when the current is shut off by the limit switch. The estimated time of a single operation for this machine in one direction is 15 seconds.

One gate moving machine will be required for each gate leaf, 92 in all; one miter forcing machine for each gate or pair of leaves, 46 in all; one motor for each gate moving machine and one for each miter forcing machine, 138 in all. Two gate moving machines, one miter forcing machine, and three motors will be purchased first and given a thorough test before the contract for the whole quantity is let.



Mitering Lock Gates Closed Showing Relative Position of Gate Moving Machines.



CROSS SECTION THROUGH CENTER WALL OF LOCK SHOWING POSITION OF APPARATUS WITH RESPECT TO LOCK WALL COPING AND OPERATING TUNNEL.

Cruces Anchors to be Moved to West Point.

Two large wrought iron anchors at Cruces have been taken from the place where they have rested for two centuries or more and sent to West Point, where it is probable they will be mounted above the entrance to the library.

Various people on the Canal Zone and elsewhere have sought in the literature of the Isthmus for some reference to the time and the circumstances under which these anchors were brought to Cruces. If any such reference is extant, it is not a matter of common knowledge. Cruces, or as it was originally called, Venta Cruz, is on the Chagres River, a distance of 36 miles by the waterway from the Caribbean Sea, and a distance overland from the Pacific by the main trail of 15 miles. It is known that Nombre de Dios was founded in 1519 and that a line of posts was run across the Isthmus from that port to old Panama. Soon afterwards a road was constructed between the two settlements along the line of posts. In 1534, or soon after that date, a route by water for boats and light draft vessels was established from Nombre de Dios along the coast and up the Chagres to Cruces. This was accomplished by removing obstructions which had interfered with the navigation of the river, but the use of the paved way was not discontinued. It is known, also, that early in the 16th century, ships were taken apart on the Atlantic side, and the parts were transported across the Isthmus and assembled again on the Pacific side; and that other heavy freight was taken over the trails.

There is a legend which says that the anchors were brought up the Chagres in boats and unloaded at Cruces for transport overland to Panama. Forty men were carrying an anchor when one of them stumbled and fell. The others were unable to stand the weight and the anchor fell, crushing seven of them. The point at which the anchor now rests is called Matasiete, which is Spanish for "kill seven."

The idea of removing the anchors to West Point originated with Lieut. Walter D. Smith, class of 1901 at the Military Academy, and the work of taking them to the railroad was assigned to him. One of them stood in the village about 300 yards from the river and the other alongside the trail in the jungle about 400 yards from the river. Each anchor has a 14-foot shank and is made of wrought iron. A raft was constructed on the river at Cruces and the anchors were hauled on sledges by block and tackle to the bank, where they were loaded upon the rafts and floated to Gamboa. There a crane lifted them to a flat car and they were taken to the ship.

Cold Storage Price List.

The prices of cold storage articles as published last week remain unchanged.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

The indoor baseball team will play the Gorgona team at Corozal on Saturday night, April 29.

The Corozal pennants have arrived and may be purchased at the office.

An informal social will be held on Thursday evening, May 4.

CULEBRA.

In the bowling match on Saturday, April 22, the Culebra team was defeated by the Gatun team by a score of 2 to 1.

Following are the latest moves of the wireless chess game between Porto Bello and Culebra:

Porto Bello.	Culebra.
10. Q—Kt 3	10. Q Kt—Q 2
11. Castles (K R)	11. Castles.

On Tuesday evening, April 24, W. A. Reece gave an illustrated lecture to Culebra men on "Things Electrical."

On Friday evening, April 28, there will be held a smoker. Special talent has been secured and a good program is expected.

EMPIRE.

Empire's new bowling alleys were opened on Saturday evening, April 22. A large crowd was present to see Mr. Warwick throw the first ball. A local orchestra of mandolins and banjos provided music for the occasion. The first strike was made by T. L. Clear, and high score of 208 by J. A. Parkis.

Empire defeated Corozal at indoor baseball on April 22, by a score of 20 to 14. The batteries for Empire were Young and Mullane, and for Corozal, Ritter and Cunningham.

The following high scores in duckpins were made during the week ending April 22: W. G. Brown, 104; Giavelli, 104; Lippert, 103; Parkis, 113; Huson, 109, 101; Potter, 109, 100; P. F. Brown, 101; Pinney, 117 102; Rodeghiere, 100. High scores in tenpins were as follows: Peterson, 213, 209; Danielson, 202, 200; Parkis, 205, 208; P. F. Brown, 211, 202.

The March statistical report shows that Empire clubhouse had 400 members, a percentage according to population of 70, that over 2,000 games were bowled, and that over 6,000 games of pool were played.

The literary society on Monday evening, April 24, discussed the problem of "Handling men."

The Gatun duckpin team will play at Empire on Saturday evening April 29. This will be the first tournament game on the new alleys.

GORGONA.

Gatun lost to Gorgona at indoor basball, by a score of 18 to 6, on Saturday night, April 23. This is the third straight victory for Gorgona since the opening of the league.

"Should prohibition be universal in the United States" was the topic for discussion last Wednesaday S. C. Murray led the discussion.

Ten boys have passed their tests for second class scout badges, and are now preparing themselves for the first class test.

GATUN.

On April 17, the orchestra from the Hamburg-American liner *Prinz August Wilhelm* gave a recital. The orchestra will be engaged for another concert in the near future.

Gatun lost three games of duckpins to Culebra on the local alleys on Saturday evening, April 22.

Instead of the debate scheduled for the literary club on Wednesday evening, April 19, Franklin Matthews gave a talk on "Incidents in the life of a correspondent." Mr. Ross of Empire and Mrs. Ludwig of Gatun sang several solos during the evening.

The 100, or over, duckpin scores for the week ending April 22 are as follows: DePoorter, 122, 101, 105; H. S. Adams, 100; Wells, 106, 101; Green, 100, 105, 101; Barte, 100, 104, 102, 103, 112, 110, 105.

CRISTOBAL.

In the Isthmian Duckpin League the following scores were made on Saturday night, April 22:

Gorgona.				Cristobal.			
Otis........	83	97	76	Adams....	79	87	89
Misel.......	86	79	89	Jacques...	86	91	81
Dunlap.....	91	96	115	DeCora...	80	92	127
Davis......	86	78	87	Sullivan...	81	108	84
Varenkamp..	93	92	91	Herring...	93	90	90
Total.....	439	442	458	Total...	419	473	471

The following 100, or over, scores were made during the week in duckpins: Rosteck, 111; Claherty, 101, 110; Furlong, 103, 121, 102, 103; Wheeler, 100; Hess, 109; Weston, 107; DeCora, 110, 111, 101, 127· Sullivan, 101, 106, 108; Beck, 104; Bullard, 123; Gibson, 104; Adams, 106; Smith, 107; Howard, 104; Louch, 136; Herring, 104, 101; Dunlop (Gorgona), 115.

Culebra defeated Cristobal in indoor baseball on Saturday night by the score of 12 to 10. The batteries were: Culebra—Tupper and Cushing; Cristobal—Russell and McSparren.

A debating and discussion club was organized on Wednesday night and the following committee was appointed to draw up a constitution: Messrs. Ware, Yeiser, and Richards. Messrs. Weaver, Moyer, Ware and Yeiser were appointed to conduct the first debate on the following subject "Resolved that the resignation of President Diaz of Mexico would be for the betterment of that country." Debates will be held every Wednesday night.

COACH TARIFF

Rates Established in The Canal Zone and Panama

ANCON, C. Z., April 20, 1911.

By virtue of the authority conferred on me by an ordinance enacted by the Isthmian Canal Commission on August 25, 1910 and approved by the Secretary of War on December 3, 1910, I hereby establish and promulgate, to be effective on and after May 4, 1911, the rates and charges hereinafter set forth which may be made and collected by persons engaged in the transportation of passengers for hire over the streets and roads of the Canal Zone by means of carriages, surreys, wagons, carts, coaches, cabs, or other conveyances drawn by horses or mules.

Any person who shall charge and receive for the transportation of any person over the streets or roads of the Canal Zone in any of the aforesaid conveyances, any sum in excess of any rate herein prescribed, or any person who shall receive for himself or others such transportation in the Canal Zone, and who fails or refuses to pay therefor the rate or rates herein prescribed, shall be held to be guilty of a misdemeanor, and upon conviction, shall be fined for each offense a sum not exceeding Twenty-five Dollars (Sections 4 and 5 of Ordinances.) A rate different from that herein prescribed may, however, be charged and paid if the parties to the transaction agree thereon; but if there be any dispute as to such agreement the duly prescribed rate shall prevail (Section 4). Where the rates are indicated to cover transportation of persons betweeen Zone points and points in Panamanian territory, they are the same that have been duly established and promulgated by Panamanian authority for the like service; the rates to cover such transportation having been agreed on by such Panamaian authority and myself, thus providing harmony of coach tariffs; and, except under agreement otherwise, it shall be unlawful to charge and receive any rate not so prescribed, or to refuse to pay any rate so prescribed.

The failure of any coachman to keep a copy of this tariff displayed in his coach constitutes a violation of the aforesaid ordinance.

Except when duly licensed in the Republic of Panama, on each conveyance aforesaid employed in the transportation of passengers for hire, there shall be paid to the Canal Zone Government a license tax of $1.25 (United States Currency) a month (Par. "A," Section 7, of the "Regulations Providing for Certain Taxes and licenses in the Canal Zone other than for the Sale of Intoxicating Liquors," effective July 1, 1908, as amended by ordinance enacted August 25, 1910, and approved by the Acting Secretary of War, October 31, 1910.)

All coaches and like conveyances on Zone streets and roads should carry lights between the hours of 6 p. m. and 5 a . m., and should also be provided with bells or horns.

Coachmen should secure copies of this tariff from the Head of the Department of Civil Administration, Ancon, Canal Zone.

(Note A.) The rates herein indicated are in Panamanian (silver) money. The rates in United States currency are one-half of those shown in this tariff.

(Note B.) The term "east of Episcopal chapel" means east of a north and south line drawn through the entrance to the chapel.

(Note C.) One stop, not exceeding five (5) minutes, in transit between two points will be allowed without the payment of extra fare.

(Note D.) Between 11 p. m. and 6 a. m. the rates are increased fifty (50) per cent.

(Note E.) In lieu of the rates herein named, special agreements as to rates may be made between passengers and coachmen.

One coach, per hour		1.50	2.00	2.50	3.00

M. H. THATCHER
Head of Department of Civil Administration.

Lease of Lots in Colon.

Sealed bids will be received up to 5.30 p. m., Wednesday, May 31, 1911 for lease to the highest bidder of lots in the newly filled section of Colon as shown on plans which may be seen at the Land Office in Colon and at the Land Office in Panama.

These sealed bids must be addressed to the General Superintendent of the Panama Railroad Company, Colon, and must be plainly marked on the outside of the envelope "Proposal for lot No. ——, block No. ——, Colon." Bids not marked in this manner will not be considered.

The minimum rental to be accepted for these lots may be ascertained by applying to either one of the above mentioned Land Offices.

Persons holding options on any lots in this district and having paid rental up to June 30, 1910, will have the privilege of taking the lot at the highest rate offered.

The lots to be leased are those on the west side of E street between 2d street and 14th street, and that district on the east side of E street bounded by 2d street on the north, 9th street on the south, E street on the west and G street on the east.

Those lots on the west side of E street will be available for building on or about June 1, 1911; the balance of the lots will not be available for building before October 1, 1911.

Parties submitting bids must state character and purpose of building they intend to erect, and must indicate period of time in which they expect to commence construction after assignment.

Application blanks may be obtained at the Land Office in Colon and Panama.

All rental is to be paid quarterly in advance.

The Panama Railroad Company reserves the right to reject any or all bids.

J. A. SMITH,
General Superintendent.

Colon, R. P., April 22, 1911.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Cristobal, C. Z., on Sunday, April 30, 1911, at 4.30 p. m.

The next concert will be given at Gatun, on Sunday, May 7, at 5 p. m.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending May 3, 1911: (75th meridian time):

OFFICIAL CIRCULARS.

Mechanical Committee.

CULEBRA, C. Z., April 18, 1911.

CIRCULAR No. 383:

1. For the purpose of standardizing shop practices and methods, securing uniformity in the performance of work, disseminating useful information, and discussing shop methods and mechanical work, a Mechanical Committee is appointed, with the following membership:

The Inspector of Shops.
The Superintendent of the Mechanical Division.
The Superintendent of steamshovel repairs.
The Superintendent of dredging, Balboa shops.
The Master Mechanic, Cristobal Dry Dock shops.
The Master Mechanic, Porto Bello shop.
The General Foreman, car department, Panama railroad.
The General Foreman, locomotive department, Gorgona shops.
The General Foreman, car and foundry department, Gorgona shops.
The General Foreman, Las Cascadas engine house.
The General Foreman, Pedro Miguel engine house.
The General Foreman, Gatun shops.
The Foreman, Toro Point shop.
The Day Foreman, Cristobal roundhouse, Panama railroad.

2. Regular meetings will be held on the last Monday in each month (or the following day if Monday is a holiday) at 7.45 a. m. Meetings will be held usually, and in the absence of notice to the contrary, at the Gorgona shops. They may be held at other shops whenever so desired by the committee. Other persons may attend meetings on invitation, and the attendance of any foremen and other employes may be requested whenever desired by the committee. A permanent record shall be kept of the proceedings of the committee, so far as is considered necessary, and duplicate copies of the record of each meeting will be forwarded to this office. The Inspector of Shops will preside at meetings, and he may call special meetings whenever necessary. The first meeting of this committee will be held on Monday, April 30, at Gorgona shops.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Repairs to Locomotive Flues.

CULEBRA, C. Z., April 19, 1911.

CIRCULAR No. 385:

The following rules will be strictly adhered to in the maintenance of repairs of flues of all American locomotive boilers and of all locomotive type boilers on steamshovels and in stationary plants of both the Isthmian Canal Commission and the Panama Railroad Company:

1. The use of plugs in flues of locomotive type boilers should be avoided whenever practicable. In any case, not more than two plugs will be allowed in any one sheet for more than 12 hours. If the requirements of the service and the condition of the boiler require the use of more than two plugs for more than 12 consecutive hours, a report on the condition of the boiler and the necessity for continuing it in service should be made promptly to the head of the division or department having jurisdiction over it. One copy of each report on the boiler of a locomotive will be sent to the traveling engineer, one copy of each report on the boiler of a steamshovel will be sent to the superintendent of steamshovel repairs, and one copy of each report on a locomotive type boiler in a stationary plant will be sent to the boiler inspector.

2. The use of rolls in fire boxes of boilers on American locomotives, steamshovels and of locomotive type boilers in stationary plants is prohibited, except in case of emergency, which will be reported promptly to the head of division or department.

3. All beading tools will be made in accordance with standard gauge; and no tools will be permitted to be used after thay are worn out of gauge. All standard gauges will be made and furnished by Gorgona shops. The foreman in charge of the working of flues of locomotive type boilers shall obtain standard gauges and see that no beading tools are used which do not conform to the standard gauge. Standard beading tools will be obtained from Gorgona shops. Old beading tools should be returned to Gorgona shops for repair.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Acting Subsistence Officer.

CULEBRA, C. Z., April 20, 1911.

CIRCULAR No. 386:

During the absence from the Isthmus of Major E. T. Wilson, Subsistence Officer, Isthmian Canal Commission, all his duties in connection with the Subsistence Department, Isthmian Canal Commission, and the Commissary Department, Panama Railroad Company, will be performed by Lieutenant F. O. Whitlock, Assistant Subsistence Officer, Isthmian Canal Commission.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Classified Expenditure Accounts.

EMPIRE, C. Z., April 15, 1911.

CIRCULAR No. 30:

The following classified expenditure accounts are authorized:

DEPARTMENT OF CONSTRUCTION AND ENGINEERING
CENTRAL DIVISION.

328. *Masonry.*

A. Construction Work.

To this account will be charged a proper proportion of the salaries and expense of the supervising force of the division, and the salaries and expenses of all officers and employes while engaged directly in the construction of masonry work within the prism of the Canal for reinforcing the sides, or of auxiliary masonry work outside the prism of the Canal such as diversion flumes; also all material and supplies used and expenses incurred and the repair of equipment used in the work.

B. Plant.

This account will be opened with a charge of the value of plant heretofore purchased for, or used by this division in the work of masonry construction and of plant hereafter purchased or used therein; also to be charged with plant transferred from other divisions and credited with plant transferred from this division.

General Items.

424. *Lighting and Buoying the Canal.*

To this account will be charged all labor, material and other expenses incidental to the lighting and buoying of the Canal including the construction of buoys, beacons and lighthouses.

W. W. WARWICK,
Examiner of Accounts.

Approved: GEO. W. GOETHALS,
Chairman and Chief Engineer.

New Schedule for Pay Car.

The monthly schedule of the I. C. C. pay car effective May, 1911, follows:

SCHEDULE FOR THE 12TH OF THE MONTH.

Leave Empire at 7 a. m.
Balboa dumps, 8 to 8 30 a. m.
Ancon crusher, 8.45 to 9 a. m.
Corozal, 9.15 to 9.30 a. m.
Miraflores dump, 9.45 to 10.15 a. m.
Miraflores power house, 10.20 to 10.30 a. m.
Pedro Miguel, 10.45 a. m. to 12 noon.
Miraflores Locks, 12.15 to 2.30 p. m.
Mt. Zion pump station, 3 to 3.05 p. m.
Culebra station, 3.15 to 3.45 p. m.
Lirio, 3.50 to 4 p. m.
Empire, 4.05 p. m.

SCHEDULE FOR THE 13TH OF THE MONTH.

Leave Empire at 7 a. m.
Through Canal, Bridge 57½ to Las Cascadas, 7.45 to 10.45 a. m.
Las Cascadas, 11 a. m. to 12.15 p. m.
Bas Obispo, 12.20 to 12.30 p. m.
Gorgona and Gorgona shops, 12.45 to 2 p. m.
Matachin, 2.15 to 2.30 p. m.
Through Cut, Matachin to Las Cascadas, 2.30 to 3.30 p. m.

SCHEDULE FOR THE 14TH OF THE MONTH.

Leave Empire at 5.30 a. m.
Gatun, 6.45 a. m. to 1.30 p. m.
Bohio, 2 to 2.15 p. m.
Frijoles, 2.25 to 2.30 p. m.
Tabernilla, 2.40 to 3 p. m.
Over relocation, Barbacoas to Gamboa, 3 to 4.30 p. m.
Gamboa yard, 4.30 to 4.40 p. m.

When one of the above days falls on Sunday or holiday, payments will be made the same as for a week day; but stops made only at points along the main line of the P. R. R. except on notice from divisions to go to certain points where they may have men at work.

EDWARD J. WILLIAMS,
Disbursing Officer.

Approved: GEO. W. GOETHALS,
Chairman and Chief Engineer.

Local Auditor, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., April 20, 1911.

CIRCULAR No. 135:

Effective at once, Mr. R. W. Hart is appointed Local Auditor of the Panama Railroad Company, with headquarters at Colon, R. P., vice Mr. H. L. Stuntz, resigned.

J. A. SMITH, *General Superintendent.*

Approved: GEO. W. GOETHALS,
President.

MOVEMENT OF OCEAN VESSELS.

Hamburg-American steamers leave Colon for New York via Kingston every Tuesday at 10 a. m., and those designated (*) call at Santiago, Cuba.

Steamers designated (*) make a local run from Colon to Bocas del Toro and Port Limon on alternate Wednesdays.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (†) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

The Leyland line steamer *Asian* sails for Tampa on May 1.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MAY 3, 1911. No. 36.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Cost of Construction Work.

A statement of construction expenditures up to March 31, 1911, inclusive, and a detailed statement of the cost of construction during the quarter ending March 31, is published in Part 2 of this issue of The Canal Record. It shows that the cost of excavation in the Central Division, and of concrete laying in both the Atlantic and Pacific Divisions reached its lowest point during the last quarter.

The cost of excavation in the Central Division was 56.92 cents a cubic yard for the quarter, and this includes a charge for plant and general expenses. During the month of March, when the excavation was the largest of record—2,026,087 cubic yards—the division cost was 37.61 cents, and the total cost, including plant arbitrary and general expenses, was 51.01 cents. Table No. 1 of the statement shows that the average cost of excavation in the Central Division up to March 31, was 88.01 cents a cubic yard, which is six cents below the cost per yard in the estimate submitted to Congress in October, 1908.

The cost of concrete placed in Gatun Locks during the quarter—231,907 cubic yards—was $6.6972 per cubic yard. This price included all expenditures and included likewise 3,314 yards of reinforced concrete, used in the construction of operating tunnels, at a cost of $14.276 per cubic yard. In March, 86,884 cubic yards of concrete were placed in the locks, and of this amount 1,585 cubic yards were reinforced concrete. Reinforced concrete cost $13.9034 a cubic yard, and the mass concrete $6.315 a yard; these costs are the lowest for concrete at Gatun Locks. The estimate made in October, 1908, placed the cost at $7.75 per cubic yard. The cost of crushed stone from Porto Bello, which forms part of the concrete at Gatun, shows a reduction of 23.11 cents a yard from the last quarter, the average cost being $2.1787, as against $2.4098 in the previous quarter. The cost of sand in the Atlantic Division during the quarter is slightly in excess of that for the previous quarter, but in March this sand was delivered at a cost of $1.5827 a cubic yard, which is a substantial decrease, as compared to the cost in previous months.

There is a slight increase in the cost of concrete at the Pedro Miguel Locks due to a smaller yardage, consequent upon a portion of the construction plant having been moved to the locks at Miraflores. The cost of $5.2131 per cubic yard for the quarter is, however, below the estimate of $8.25 a cubic yard made in October, 1908. At Miraflores, although only a part of the construction plant was in operation, 76,087 cubic yards of concrete were produced during the quarter at an average cost of $4.8434 a yard, as compared with $8.22 a yard, the estimate of October, 1908.

Chilibre River Caverns.

Extensive caverns have been found by hydrographers while gaging on the Chilibre River, and a thorough exploration of the underground passages will be made. The caverns are situated at the junction of the Chilibre and Cabulla rivers, just outside the Canal Zone, and about two miles directly east of Juan Mina village on the Chagres River. The elevation appears to be about 100 feet above sea level, 15 feet above the normal level of Gatun Lake.

The Slides in Culebra Cut.

The beginning of the rainy season finds the work in Culebra Cut better prepared than ever before to cope with the slides that may be accelerated by the wetting of the ground. The slides at Culebra have been moving during the dry season, and the break across the hill on which the house of the Chief Quartermaster was formerly situated has actually widened. It is believed that as soon as the mass of earth becomes water soaked it will begin to move on its rock bed into the Canal.

This is a part of the great slide on the west bank of the Cut, from which over 2,000,000 cubic yards were taken the past year, and which is estimated to contain two million cubic yards more; and has already included within its area several of the buildings in the village of Culebra. Three steam shovels are now taking material from the top of this slide, and four are excavating from the bottom. The shovels at work on the bottom of the slope are 10 to 110 feet outside the Canal prism. The third of the shovels on the top of the slide was set at work on May 1, and it will excavate a terrace or bench one step farther up the hill than the two that have been digging for some time past. This bench will extend along the edge of the slide from Rio Grande to near Culebra wye. A track will be laid along this bench and the spoil trains can be handled on a run-around, instead of being forced to back up to the shovels as at present. Seven buildings used as employes' quarters will be moved to make room for the new bench.

Work on the east bank opposite the village of Culebra is also in satisfactory condition. The shovels excavating at the toe of the slope are 80 to 130 feet outside the prism. A shovel will be set at work presently, making a cut from the slope along the edge of the old French dump, casting over into the Canal, thus lessening the weight of the slide.

At Cucaracha, the shovels digging at the toe of the big slide are 100 feet outside the Canal prism, and the material is moving slowly, but will probably move more rapidly during the rainy season.

Adjustment of Claim for Coconut Grove.

The claim of the Caribbean Coconut Company for damages to its coconut grove at Toro Point, incident to the construction of the Colon breakwater, has been adjusted for $33,964.85, and the lease of land from the Panama Railroad Company has been cancelled. This adjustment was made in accordance with the recommendation of a board of arbitration appointed for the purpose of determining the value of the coconut grove, under the following provision of the contract entered into with the company by the Panama railroad on August 26, 1893, and renewed on December 29, 1900:

> Article 6. If, during the time of this contract, the Lessor Company should require the land for its own use, this contract will thereupon be cancelled and the Lessor Company shall pay to the Lessees the value of the plants which are found thereon—this value being fixed by appraisers—but the buildings thereon shall be removed by the Lessees and without indemnity on the part of the Lessor Company.

The land leased under this contract was approximately 457 acres. The report of the appraisers states that there were found on the land 6,249 bearing coconut trees and 5,850 trees not bearing. In arriving at the value the appraisers determined a reasonable average number of coconuts that the grove would yield during each of the seven and two-thirds years remaining under the lease, a reasonable price per coconut obtainable in the Colon market, and the annual expense of maintenance, harvesting and bringing the nuts to the Colon market. From this data the net annual income from the grove was derived, and the cash value of the annuity was considered the measure of damages which should be paid to the coconut company by reason of the cancellation of the lease.

It was assumed that of the 5,850 nonbearing trees, 2,000 would have come into bearing during the remaining period of the lease, this assumption implying that 1,350 of the trees would never bear, and that 2,500 of the remainder would take the place of the trees now bearing, which, on account of age, accident, or disease would cease to bear. Data collected from various sources show that some trees bear as many as 200 coconuts a year,

NOTES OF PROGRESS.

(Continued.)

and that on the Isthmus some yield as many as 180 per year. The yield per tree on several small plantations along the Caribbean coast runs from 12 to 180, and the trees on Cristobal beach have given an annual yield for the past four years of from 45 to 75 nuts per tree. On data thus collected, it was decided that the annual gross crop from the grove would be 40 nuts per tree for 8,249 trees. The average price of coconuts on the Colon market for the 24 months of 1909 and 1910 was $24.04 per thousand, and on this basis, after making deductions for maintenance, rents, taxes, harvesting, hulling the crop, and delivery at Colon, the net annual income of the grove was determined as $6,092.35. After making a deduction of 8 per cent for interest, the total amount of the claim was agreed upon as $33,964.85, and this payment has been made by the Panama Railroad Company. The railroad will be reimbursed from Canal funds, because the damage is caused in the construction of the Canal. The appraisers were Major Chester Harding for the United States, and Robert Wilcox for the Caribbean Coconut Company.

Changes in Concrete Handling in Pacific Division.

It has been found advisable to change the method of the delivery of concrete in the center wall at the Miraflores Locks from that contemplated in the original plan. In the description of the concrete handling plants at Pedro Miguel and Miraflores Locks, published in THE CANAL RECORD of January 4, 1911, it was explained that the berm cranes on the sides of the Miraflores Locks would supply the concrete for the center, as well as the side walls, and that it was designed to send the material for the center wall down a transfer chute into the chamber crane buckets. Under the revised plan, the transfer chute will be dispensed with, and the berm cranes will provide concrete for the side walls only. Concrete for the center wall will be furnished by auxiliary mixers situated in an opening left for the purpose in the east side wall, and will be carried by narrow gage equipment to within reach of the chamber cranes, thence hoisted and carried into place by the longer arms of the cranes, working in a reverse position to that at Pedro Miguel. By this method, the berm cranes will be relieved of the burden of supplying concrete for both center and side walls, and the work, in consequence, will proceed with added rapidity.

The removal of the cranes from the Pedro Miguel Locks will also involve some changes in concrete handling there. The contractors are at present engaged in dismantling chamber crane No. 2 in the west chamber, and the plan is to remove two of the chamber cranes, then the remaining berm crane, and afterwards the other two chamber cranes. With the removal of all of the berm crane mixing machinery, it is proposed to utilize the auxiliary mixers in the west storage trestle to continue the concrete work remaining at that time, which will be principally wing wall construction. The material will be hauled to the place desired by the narrow gage equipment, elevated by derrick and automatically dumped. The east storage trestle at these locks has been abandoned, and is being taken down. The auxiliary mixer, formerly situated at the south end of the trestle, is to be set up on the west trestle.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 62 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 29, being 1,303,783½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending April 29, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is about 76 per cent completed, 635,875 cubic yards, out of a total of 837,400, having been placed at the close of work on April 29. The record for each of the six 8-hour working days of last week, follows:

MIRAFLORES LOCKS.

Over 15 per cent of the concrete for the system of two twin locks at Miraflores was in place on April 29, the total amount on that date being 213,949 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixer.				Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Large stone.

*This 205 yards was mixed by a ½-yard mixer, the amounts for each day being: April 24th, 61 yards; April 25th, 47 yards; April 26th, 42 yards; April 27th, 55 yards.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

There will be a meeting of the executive board of the Canal Zone Federation of Women's Clubs in Cristobal on Monday afternoon, May 8. The executive board is composed of the eight officers of the Federation and the presidents of the several clubs.

The annual meeting of the Cristobal Woman's Club was held at the Commission clubhouse on Wednesday, April 26. The season opened on September 28 with a reception, and there have been 20 general meetings with programs, seven meetings of the executive board, and seven business meetings. The four departments have been active; the educational, philanthropy, and home departments each has provided two programs for the general meetings, and the meetings of the art and literature department, with programs following out a study of French art and history, have been open to the club members and well attended. The membership of 60 with which the year began, has been maintained. The Cecelian chorus organized in 1908, continues one of the features of the club. The officers elected for the coming year are, as follows: President, Mrs. Carl H. Elliott; first vice-president, Mrs. Thomas E. Brown, Jr.; second vice–president, Mrs. E. H. Colip; recording secretary, Mrs. R. W. Culbertson; corresponding secretary, Mrs. Charles M. Butters; treasurer, Mrs. Fred Guderian. A meeting of the executive board will be held on Wednesday, May 3, at which time the newly elected president will appoint the chairmen of the house and social committees, and the work for the coming year will be outlined. The club will resume meetings in September.

On Thursday, April 20, the Gatun Woman's Club held a farewell reception in honor of Mrs. A. P. McCulloch, who has been an active member of the club since its organization. Mrs. McCulloch has left for her home in the States.

The Paraiso Woman's Club will hold two meetings in May, after which the meetings will be discontinued until September. On May 24, the club will entertain the members of the Empire Woman's Club. There will be an exhibition of the Federation pictures and a program consisting of a paper on art, and musical numbers. Each member of the club is entitled to invite one guest.

A dance will be held by the Knights of Pythias in the Culebra clubhouse on Saturday evening, May 13, when the members of the Odd Fellows lodge, the Red Men, and their auxiliary order, the Daughters of Pocahontas, will be the guests.

The Mechanics Club of Empire will hold a banquet and dance at the Kangaroo hall on Saturday evening, May 6.

On Sunday, April 22, a meeting in honor of the ninety-second anniversary of the founding of the Independent Order of Odd Fellows was held at the Cristobal clubhouse. The program consisted of songs and speeches. There are five lodges in the Canal Zone, and one of the auxiliary order, the Daughters of Rebekah.

New Clubhouse for University Club.

The University Club of Panama, a majority of whose members are Canal or railroad employes, has purchased a lot about 60 by 100 feet, near the old fort on the sea wall in Panama, and will erect thereon a three-story, masonry clubhouse. Tentative plans provide for a building with an open third story or roof garden, rooms on the second floor, which can be made into one large room for dancing; and for kitchen and bowling alley on the ground floor.

Observance of Memorial Day.

EMPIRE, C. Z., April 22, 1911.

To all ex-service men of the Army, Navy, Marine Corps, or Revenue Cutter Service of the United States, now on the Canal Zone.

DEAR COMRADES: As has been our custom since 1908, orders have been issued from these headquarters, to observe with fitting ceremony, the day set aside for the purpose of paying tribute to our soldier dead, viz., Decoration Day, May 30.

In this we ask the cooperation of all ex-soldier organizations upon the Canal Zone, and especially do we invite all ex-service men who are not already connected with any organization of the kind.

We also invite any and all civic organizations to participate with us in this, what we hold to be a sacred duty, incumbent upon us.

It is therefore hereby earnestly requested that each organization designate at least one representative to confer with the undersigned, either by letter or 'phone, in order that the special details be arranged with satisfaction to all.

To observe this day with fitting service is not only our duty, but it will be an object lesson for good results among our associates of other nations, owing to the peculiar circumstances surrounding us.

It is hoped that the public schools of the Zone may join us in whatever manner is consistent with the management and surroundings.

Sincerely and fraternally yours,
E. W. BUCKLIN.
Department Commander Canal Zone, Army and Navy Union of the United States of America.

George Washington Memorial Association.

The George Washington Memorial Association has been organized for the purpose of erecting in Washington a building suitable for holding conventions, and with institutional features such as will promote the study of science and the arts. This building will cost about two million dollars, and it is proposed to raise this amount, and an endowment fund of five hundred thousand dollars, by public subscription. Literature on the subject, and pins, may be obtained at the Commission clubhouses.

Baseball Premiums.

The pennant for the club winning the greatest number of games in the Panama Canal Baseball League series, which came to an end with the benefit game played at Cristobal on April 2, will be awarded to the Commissary-Subsistence team. In addition, a prize in the form of a gold watch fob, presented by a firm of undergarment manufacturers in the United States, will be given to each member of the winning team. The Atlantic club has been awarded second place, and each member of that team will receive a bronze watch chain fob from the same firm.

Fancy Dress Ball.

The Catholic Club, in connection with St. Ferdinand's Church, Empire, held a fancy dress ball at Kangaroo hall on Saturday evening, April 29.

NEW STEAM SHOVEL TRIP.

Invention of Steam Shovel Engineer Stands Practical Test.

A steam shovel dipper trip devised by steam shovel engineer A. H. Geddes of the Central Division has been recommended for use on 40 dippers of the 95-ton steam shovels.

The present trip, or latch, by which the bottom of a steam shovel dipper is opened, to permit material to fall through, is operated by a rope in the hand of the steam shovel craneman, and under conditions frequently met, the force required is extreme. The device invented by Mr. Geddes consists of a steam cylinder the piston of which opens the latch on the door of the dipper through levers. Steam is admitted and exhausted from the cylinder through a three-way valve located on the boom beside the craneman's seat. A steam pipe extends from the valve along the boom opposite the dipper stick slot, and at the end of the pipe and on the cylinder are universal joints connected with a flexible hose.

At the request of the inventor, his device was given a trial on steam shovel No. 216 at work in Culebra Cut. The test was begun on January 18 and ended on March 31, and in this period the shovel excavated an average of 1,418 cubic yards a day. In the 60 working days from October 30, 1910, to January 12, 1911, this same steam shovel, working under practically the same conditions, using the old style trip, excavated an average of 939 cubic yards a day. Six other shovels, working under practically the same conditions, using the old style trip, during the period of the test excavated an average of 1,222 cubic yards a day.

The committee which considered the merits of the device consisted of Major T. C. Dickson, Inspector of Shops; W. H. Bates, Superintendent of Steam Shovel Repairs, and Lewis Webster, steam shovel engineer. In its report this committee says:

> While the effect of the device upon the amount excavated is based upon the operation of a single shovel, the above data indicate in the opinion of the committee, that the device increases the output by at least 100 cubic yards per working day. Taking the cost of the excavation at 67 cents a cubic yard, the value of the device would be $67 per day.
>
> It is estimated that the device can be made and applied in quantity for about $125 per shovel.
>
> Although the night repair crew made minor repairs on the device on 10 different occasions, it was not injured by dobeying. The engineer and craneman claim that repairs required by the device have caused no greater delays during working hours than the rope trip. Account was not kept of the actual cost of repairs made to the device, and the committee is of the opinion that the cost of repairs and maintenance of the device will appreciably exceed the corresponding costs with the rope trip, but that the cost of original installation and the cost of running repairs will be small in comparison with the value of the increased output, as estimated above.

The committee is of the opinion that the general principles and features of the device will result in an increase in output and will prove economical, and recommends its adoption and installation on all dipper sticks of 95-ton shovels on which four and five-yard dippers are used. It recommends also that the cylinder and piston which were used in the experimental device, and were taken from available material, be redesigned. Meanwhile, a thrust cylinder, now in stock, will be tested, and, if it proves satisfactory, will probably be used. If it does not prove satisfactory a cylinder and piston will be designed especially for the purpose.

CANAL MEDAL SERVICE BARS.

The following list contains the names of employes of the Isthmian Canal Commission, who completed six or four years' continuous service on the Isthmus, between January 1 and December 31, 1910, and for that reason are entitled to receive a medal bar. The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in the spelling of names or in the dates from which bars become due, should be reported to the Office of the Chairman at Culebra, for correction. The list will be continued in the issue of May 10, 1911.

PANAMA RAILROAD TRAFFIC.

Conditions of New Agreement With Pacific Carriers.

The agreement between the Panama Railroad Company and the Pacific Mail and the California-Atlantic steamship companies, allowing the Pacific carriers 70 per cent of the total freight charge for carriage between New York and San Francisco, expired by notice on April 24. The officers of the Panama Railroad Company were authorized at a meeting on March 14 to effect a new agreement under the following conditions, and negotiations are in progress:

1. On all business moving between Pacific coast points and Atlantic ports, where the water transportation upon the Atlantic side is performed by the Panama Railroad Steamship Line, the division of rates shall be 40 per cent to the Panama Railroad Company and 60 per cent to the Pacific carrier.

2. On business where no part of the water haul is performed by the ships of the Panama Railroad Company the rate for rail transportation across the Isthmus will be, as follows:

On business proceeding to and from the ports of New York and Philadelphia 30 per cent of the through rate; on business proceeding to and from other Atlantic ports 25 per cent of the through rate.

3. The foregoing divisions are predicated upon classified tariffs to be agreed upon between officials of the Panama Railroad Company and of its cocarriers, and to be incorporated as a schedule hereto; and shall not be changed or reduced by any cocarrier, except upon the consent of the Panama Railroad Company.

4. No charge will be made at Balboa by the Panama Railroad Company for wharfage or craneage on traffic covered by this agreement.

5. The Panama Railroad Company will furnish to cocarriers under this agreement on the Pacific side coal at the same rate as is furnished at Balboa to the Isthmian Canal Commission.

6. In case that any cocarrier violates this agreement, the Panama Railroad Company shall have the privilege of withdrawing through billing privileges with respect to such cocarrier.

7. This agreement shall be effective for two years from April 24, 1911.

At a meeting of the board of directors held in New York on January 27, the officers of the company were directed "to reestablish a classified commodity tariff on eastbound coastwise business from Pacific coast ports to Atlantic coast ports of the United States to become effective as early as practicable after the expiration of the 90 days' notices of discontinuance of through billing relations with the present cocarriers on this traffic."

The officers were also authorized to enter into a contract for the stevedoring of cement for the *Ancon* and *Cristobal* at New York at the rate of 23 cents per ton on barrels and 26 cents per ton on bags, for a period of one year, the rate on barrels being a reduction of three cents per ton.

Claims for Sinking of Finance.

The proctors for the steamship *Georgic*, who have settled the claim against that ship growing out of the sinking of the "*Finance*" on November 26, 1908, have agreed to pay any of the crew who will apply for payment at the office of Messrs. Burlingham, Montgomery and Beecher, 27 William Street, New York, 65 per cent of the face of their claims as sworn to and on file in the court proceedings. The first offer of the owners of the *Georgic* was very much less than this, and the offer has been increased to the amount stated only as the result of much solicitation. This amount has been accepted by Capt. Mowbray, Officer Munroe, and others.

Sale of Useless Materials.

Authority has been granted the Chairman and Chief Engineer to sell materials no longer needed in the construction of the Canal, in the following letter from the Secretary of War under date of April 17:

> Referring to your letter of April 4, and to that part of Section 4 of the Act of Congress approved March 4, 1911, as follows:
>
> > That until the close of the fiscal year 1912, when any material, supplies and equipment heretofore or hereafter purchased or acquired for the construction of the Isthmian Canal is no longer needed, or is no longer serviceable, it may be sold in such manner as the Secretary of War may direct, and without advertising in such classes of cases as may be authorized by him.
>
> You are hereby authorized to sell, upon such terms as you may approve and without advertising, any material, supplies and equipment heretofore or hereafter purchased or acquired for the construction of the Isthmian Canal, which in your judgment is no longer needed or no longer serviceable, provided that when time permits, each transaction shall, before consummation, be submitted to the Secretary of War for approval, but that where time does not permit, such sales shall be made effective by you without such approval, the transactions to be subsequently reported to the Secretary of War.

PERSONAL.

Mr. William H. Jackson, with Mrs. Jackson, arrived on the Isthmus on April 25, to take up his duties as judge of the district court at Cristobal.

Mr. W. Whiting Andrews arrived in Panama on April 27 to assume his duties as secretary of the American Legation and charge d'affaires, *ad interim*, succeeding Mr. Charles Campbell, Jr., who has been transferred to Guatemala.

Missing Men.

Any one having information regarding the present whereabouts of Dennis Nugent, who at one time worked on the relocation of the Panama railroad, is requested to communicate with the postmaster at Ancon.

Any one having information regarding the whereabouts of Earle Jordan of Steubenville, Ohio, who may be on the Isthmus, will please communicate with the American Legation, Panama.

Information is desired regarding the whereabouts of Joseph W. Maguire who is supposed to be on the Isthmus of Panama. Address The Canal Record.

Health of School Children.

The medical inspection of the Canal Zone schools for white children, by a physician detailed especially for that purpose, was begun on February 1, under the conditions indicated in The Canal Record of March 1. It was directed, first, to an examination of the surroundings of the children in school, the light, ventilation, use of drinking cups, and instruction of teachers in means of detecting diseases in children, and the prevention of the spread of disease in the schools; second, the detection and prevention of contagious diseases, and a general physical examination of each child.

The recommendations in regard to the schoolbuildings are in general that better light be procured in the schoolrooms by removing the outer walls to within five feet of the floor and doing away with the screening of verandas; that greater care be taken in the keeping of the individual water cups now required in the schools for white children; that all schools be provided with playgrounds for the use of both boys and girls; that the question of instruction in sex hygiene be determined by the proper authorities before the opening of the next school year; that greater care be taken to prevent contagion in diphtheria; that the public drinking glass in the railroad trains be abolished, and that *follicular conjunctivitis* be considered a contagious disease and all pupils affected with it be excluded from school until they have received proper treatment.

The physical examination comprised tests of hearing, color perception, vision, examination of the nose, throat, and conjunctival, and of the head, face and other exposed surfaces for parasites and skin diseases. A record was also made of each child's robustness, complexion and physiognomy. In cases where children's parents especially requested it the examination was more thorough. Of the 887 children examined 409 or 46 per cent showed some defect. Of the 409, there are 213 or 24 per cent, who have decayed teeth; 124 or 14 per cent, defective vision; 25 or 2.8 per cent, defective hearing; 74 or 8.3 per cent, some disease of the nose and throat; 32 or 3.6 per cent, other defect or disease. There were 33 cases of *follicular conjunctivitis* (an inflammation of the outer membrane of the eye), 2 at Gorgona, 24 at Empire, 2 at Culebra, 3 at Paraiso, and 2 at Pedro Miguel. The children in need of treatment were directed to consult the proper physician, and they are complying with this advice.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 59 per cent completed, 134,139 cubic yards, out of a total of 225,000, having been placed at the close of work on April 29. A statement of the amount laid each day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	Cubic Mixers. No.
	Cu. Yds.		
April 24	124	10:30	2
April 25	92	8:00	2
April 26	128	11:00	2
April 27	61	6:00	2
April 28	112	11:00	2
April 29	156	16:00	2
Total	673	62:30	2
Previously reported	133,466		
Grand total	134,139		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending April 29, follows:

Date.	Hours. worked.	Cubic Yards.
April 24	7:13	3,338
April 25	6:49	3,169
April 26	6:35	2,622
April 27	6:12	2,264
April 28	6:16	2,301
April 29	6:05	2,560
Total	39:10	16,254

Don José Buigas deDalmar has been appointed charge d'affaires and consul of the first-class for Spain in Panama, and has assumed the duties of that position.

On account of the stable labor conditions on the Isthmus and the fact that the force must be reduced as the work nears completion, it has been decided to discontinue the employment agency in New York.

Married.

MOORE-GAGE—At Matachin on April 29, Miss May Amanda Gage of New Haven, Conn., to Frank F. Moore of Pittsburg, Pa., the Rev. C. O. Purdy officiating.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

The Corozal indoor baseball team was defeated by the Gorgona team on Saturday night, April 29. The following was the lineup: Gorgona—Ridge, Donahue, Hennon, Christianson, Kuentz, Wright, Sims, Hall. Corozal—Cuff, Lorah, Lofgren, Taylor, Cunningham, Ritter, Schlager. The score was 15 to 3.

A sacred concert will be given in the clubhouse on Sunday night, May 14.

CULEBRA.

A "smoker" was held at the Culebra clubhouse on Friday night at which there were singing, Indian club swinging, wrestling, and other entertainment features. A light lunch was served. About 120 men attended.

In the duckpin bowling match on Saturday night, April 29, the Gorgona team defeated the Culebra home team, the scores being as follows:

Gorgona.				Culebra.			
Seebt	86	85	85	Fredericks	83	113	94
Simka	82	96	110	Huttlem'r	90	95	80
Atkins	83	98	86	Kersey	87	84	89
Haggerty	98	87	89	Hill	78	92	83
Varenkamp	97	72	89	Case	100	95	91
Total	446	438	459	Total	438	479	437

Following are the duckpin high scores for the week ending April 29: Fredericks, 113; Baumer, 109; Cornthwaite, 100; Hill, 102; Brown, 113, 108, 106, 104; Case, 108, 107, 103, 102, 100.

The monthly prize for the high score in bigpins was won by Mr. Warner, score 224. Mr. Hill secured the prize for the high score in duckpins, score 119.

The Culebra indoor baseball team defeated the Empire team on Saturday evening, April 29, by a score of 22 to 15. Batteries: Empire—Young and Mullane; Culebra—Tupper and Cushing.

The results of the handicap chess tournament, which was finished last week, are as follows:

Name.	Won.	Lost.	Name.	Won.	Lost.
Bartlett	11½	2½	Putnam	6	8
Wilson	9½	4½	Goodenow	6	8½
Stearns	8	6	Strong	5	9
Warner	6½	7½	Dubois	4	10

EMPIRE.

Empire took three straight games of duckpins from Gatun on Saturday evening, April 29. The following was the score:

Empire.				Gatun.			
Davis	81	90	92	Bull	82	81	80
Pinney	89	89	83	Wells	84	86	80
Sawtelle	79	90	93	Wolf	84	90	70
Giavelli	92	73	97	Adams	79	78	73
Rodeghiero	93	82	84	Barte	105	87	87
Total	*434	424	449	Total	*434	422	390

*Empire won play-off of tie.

The following high scores were bowled during the week ending April 29: Duckpins—Potter, 133; Koperski, 100, 103; Goolsby, 117; Dakin, 108; Rodeghiero, 101, 111, 105, 103, 102, 102, 115, 104, 107, 108, 104; Rennan, 101, 102, 102; Pearson, 100; Parkis, 101, Gorham, 102, 113, 104; Witmer, 114; Furlong, 105; 105, 102; Gustavson, 105; Huson, 113;. Big pins—Parkis, 206.

The monthly handicap pool tournament was won by E. E. Barnes. There were 22 entries. Members are invited to register their names at once for the May tournament.

The literary society will hold a public meeting in the hall on Friday evening, May 12. There will be music by an orchestra, a debate on the subject of fortifying the Canal, and refreshments will be served following the program. Both men and women are invited to attend.

GORGONA.

George Arebart will lead the discussion club on Wednesday night, May 3, at 7.30; topic "Is it right to draw interest on money or effort?" All men and women invited. Admission free.

A. A. Simka gave an illustrated lecture on Sunday evening on the Holy Land. Mr. Simka lived there for 12 years.

The following 200, or over, scores were bowled during the month of April: M. Varenkamp, 220, 202, 211; Gaul, 215, 219; Bordt, 210; Roper, 207; Halderman, 201. Duckpin scores—Watkins, 117, 109; Schofield, 101; Sims, 101; Wheat, 105; Dunlop, 119, 100, 105; Kauffman, 100, 101, 103, 101; McWilliams, 103; Seebt, 104; Misal, 104; Simka, 101, 102; Atkins, 100; R. Varenkamp, 100; Ellsworth, 101, 109; Davis, 102.

GATUN.

At the meeting of the literary club on April 26, Henry Hughson gave a talk on "Poetry and music." Politics were discussed. Paul Case of Culebra sang bass solos, accompanied by Mrs. Hohnson.

A "smoker" will be held on Wednesday night, May 3. Franklin Matthews of the *New York Sun* will speak on "Incidents in the life of a newspaper correspondent."

Gatun defeated Cristobal in a game of indoor baseball on Saturday night, April 29, by the score of 25 to 11.

Gatun will play the Corozal team in the Gatun gymnasium next Saturday night.

The Gatun "Ds" took two out of three games from Empire on Saturday night, April 29, at duckpins. The scores were: Gatun—440, 410, 427; Empire—422, 446, 420.

The Boy Scouts spent a day with the Cristobal boys at Toro Point last Saturday.

On account of the interest displayed at a previous meeting, the "Life problem" club discussed for a second time the subject of "Divorce and marriage" on Sunday night, April 30.

CRISTOBAL.

Moving pictures will be shown on Friday night, May 5, for the first time since April 3.

The Cristobal and Gatun boys took an all-day outing at Toro Point on Saturday, April 29. Each boy had to cook his own meat and potatoes. A tramp, games, and a long swim were among the day's events.

The Cristobal literary club met on Wednesday night, adopted a constitution, and elected the following officers: President, C. H. Elliott; vice-president, A. R. Richards; secretary-treasurer, W. H. Wempe.

Basketball will be resumed this week after a rest of three months.

The Cristobal duckpin league series closed on April 27, with the following scores:

	Played.	Won.	Lost.	Per cent.
Com.-Subsistence	54	35	19	.648
Quartermaster	54	31	23	.574
Miscellaneous	54	27	27	.500
Dry Dock	54	15	39	.277

Highest average, T. A. Sullivan, 92.15; highest score, L. A. Louch, 136.

Scores of 100 and over in duckpins were made last week, as follows: Furlong, 102, 110, 105, 108, 110; DeCora, 123, 101, 105; T. Burns, 111; Sullivan, 109; Bullard, 110; Smith, 109, 103, 102; Herring, 100, 103, 108, 106; Barrett, 102, 121, 105; Jacques, 101, 102; Wheeler, 103; Hess, 102; Louch, 104.

The standing of the Isthmian Duckpin League on April 30, 1911 was, as follows:

	Played.	Won.	Lost.	Per cent.
Cristobal	12	9	3	.750
Empire	12	7	5	.583
Gorgona	12	6	6	.500
Culebra	18	9	9	.500
Gatun	18	5	13	.277

Zone Liquor Licenses.

ISTHMIAN CANAL COMMISSION.
DIVISIONS OF POSTS, CUSTOMS AND REVENUES.
ANCON, C. Z., April 26, 1911.

The Isthmian Canal Commission, at its meeting at Culebra on April 15, authorized the issuance of liquor licenses in the Canal Zone for the year commencing July 1, 1911, at Rio Grande, Culebra, Empire, Las Cascadas, Bas Obispo, Matachin, Gorgona and Gatun.

The areas within which saloons may be located are, as follows:

Rio Grande: On the west side of the old line of the Panama railroad, facing the railroad, in line with the saloons at present licensed there.

Culebra: Lots 11 to 19, inclusive, block 1; lots 12 to 20, inclusive, block 2; lots 1 to 9, inclusive, block 4; lots 2 to 10, inclusive, block 5, West Culebra.

Empire: The area bounded by Second avenue, Main street, Seventh avenue and Front street.

Las Cascadas: The section known as the new town, where private houses are now located, on the west side of the Panama railroad.

Bas Obispo: On the west side of the Panama railroad, in line with the buildings in which saloons are now located.

Matachin: On the main street of the town, on the north side of the Panama railroad, in line with the buildings in which saloons are now located.

Gorgona: Area bounded by Second street, avenue "E", Fifth street and Central avenue (or avenue "A"); but no saloons will be permitted to face on Central avenue.

Gatun: All of blocks 7 and 8; lots 1 to 5, inclusive, block 2; lots 1 to 5, inclusive, block 4; and lots 1 to 4, inclusive, block 6, of the new town laid out by the Panama Railroad Company.

All of the areas described are more particularly indicated on maps which may be seen in the office of the Collector of Revenues, Ancon, or in the offices of the Deputy Collectors of Revenues at Empire, Gorgona and Cristobal.

The designation of the areas hereinbefore made, however, shall not be construed as prohibiting the renewal of the licenses of dealers now engaged in the retail sale of liquor, under proper license, in any of the towns mentioned, outside of the areas designated—the places of business of all such dealers outside of the areas described being shown on the maps hereinbefore referred to.

The number of saloons to be located in each town within the area designated shall not be restricted, but each reliable and responsible applicant shall be granted a license for the sale of liquor within any such described area, in conformity with the regulations, upon the payment of the necessary fee.

Applicants for licenses are invited to submit their applications prior to June 1, 1911, in conformity with the regulations adopted by the Isthmian Canal Commission, April 27, 1907, and amendments.

TOM M. COOKE, *Collector of Revenues.*

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gatun, C. Z., on Sunday, May 7, at 5 p. m. The program follows:

1	March—*Imperial*	Bagley
2	Selection—*Woodland*	Luders
3	Valse Tres Lente—*Amoureuse*	Berger
4	Overture—*Zampa*	Herold
5	Idyl—*Love's Message*	Brooks
6	Popular Medley—*Amina*	La Farge
7	Serenade—*Andalusian*	Bonnet
8	Descriptive—*A Hunting Scene*	Bucalossi
9	March—*Independentia*	Hall

CHAS. E. JENNINGS, *Musical Director.*

The next concert will be given at the Hotel Tivoli, Ancon, on Sunday, May 15, at 7.30 p. m.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending May 10, 1911 (75th meridian time):

OFFICIAL CIRCULARS.

Acting Examiner of Accounts.

CULEBRA, C. Z., April 25, 1911.

CIRCULAR No. 388:

Effective this date, Mr. T. L. Clear is appointed Acting Examiner of Accounts.

GEO. W. GOETHALS, *Chairman.*

Cumulative Leave.

CULEBRA, C. Z., April 26, 1911.

CIRCULAR No. 132-J:

The following extract from the minutes of the one hundred and sixtieth meeting of the Commission, held April 15, 1911, amending the resolution adopted at the one hundred and fifty-eighth meeting of the Commission respecting cumulative leave for monthly employes, is published for the information of all concerned:

Resolved, That a monthly employe who has earned forty-two days' leave of absence with pay may accumulate additional leave at the rate of three and one-half days for each month's actual service in excess of the twelve months, not to exceed eighty-four days in the aggregate; *Provided*, That not more than forty-two days' leave with pay will be granted at one time, unless prior notice shall be given that the employe's service is to terminate at the expiration of such leave, either by acceptance of resignation or by discharge on account of reduction of force; and, *Provided further*, That, except upon such termination of service, leave of absence with pay must be entered upon during the period extending from two months before to two months after the beginning of each service year.

Resolved Further, That hereafter a monthly employee who has rendered satisfactory service for six months or more for which he has received no leave of absence, and whose service is terminated by acceptance of resignation or by discharge on account of reduction of force, may be granted leave with pay at the rate of three and one-half days for each full month's such service.

Resolved Further, That hereafter an employe whose service terminates while on leave of absence, either by acceptance of resignation or by discharge on account of reduction of force, may be paid for the full period of his leave without returning to the Isthmus.

GEO. W. GOETHALS.
Chairman and Chief Engineer.

Leave for Employes Unaccustomed to Tropics.

CULEBRA, C. Z., April 26, 1911.

CIRCULAR No. 132-K:

The following extract from the minutes of the one hundred and sixtieth meeting of the Commission, held April 15, 1911, is published for the information of all concerned:

Resolved, That employes born in the tropics, who are otherwise entitled to the privilege of leave and who have spent the greater part of their lives in the temperate zones, are to be regarded as unaccustomed to a tropical climate within the meaning of those paragraphs of the general conditions of employment adopted at the one hundred and twenty-ninth meeting of the Commission which bear on leave of absence and sick leave.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Disposition of Buildings.

CULEBRA, C. Z., April 27, 1911.

CIRCULAR No. 293-A:

The board appointed in Circular No. 293 to recommend the disposition of buildings to be destroyed or removed is hereby abolished. The Chief Quartermaster will in future report on the disposition to be made of buildings, subject to approval by the Chairman. If any material or buildings are to be sold, appraisal will be made by the Surveying Officer.

GEO. W. GOETHALS, *Chairman.*

Promotions for Steam Shovel Craneman to Engineer.

CULEBRA, C. Z., May 1, 1911.

CIRCULAR No. 387:

The following rules shall hereafter govern promotions from the grade of steam shovel craneman to the grade of steam shovel engineer:

1. Except as herein provided, cranemen will be promoted in the order of seniority.

2. To qualify for promotion a craneman must demonstrate his ability to run a shovel in a six day tryout.

3. During this tryout the candidate for promotion shall have no special guidance or instruction, but an experienced craneman shall be assigned to his shovel for at least the first three days.

4. The candidate for promotion will be started on earth or other easy digging, if practicable, but before the six days have expired he may be transferred to rock work, which he must be competent to handle.

5. When the candidate for promotion has worked six days as an engineer, the superintendent of steam shovel repairs shall examine and report on the condition of his shovel, and the superintendent of construction shall report on his efficiency. From these reports, considered in connection with the daily shovel reports, the division engineer will determine whether the candidate is qualified for promotion.

6. A craneman will not be given an opportunity to break in as an engineer unless he will sign a written agreement to accept promotion to any vacancy which may occur in the grade of engineer, and to go to any station on the Isthmus where his services may be required.

7. In order that there may be always a man available to fill immediately any vacancy which may occur in the grade of engineer, the three senior cranemen shall be allowed to qualify for promotion. If one of these is found ineligible or refuses to sign the agreement referred to in paragraph No. 6, the man standing fourth on the seniority list will be permitted to qualify, and so forth, in order that there may be always three men available for promotion.

8. When a vacancy occurs in the grade of engineer, promotion shall be tendered to the senior qualified craneman unless he is absent from the Isthmus, sick, or otherwise incapacitated for immediate service, in which case promotion shall be tendered the second man in order of seniority, and so forth.

9. A craneman will not be allowed engineer's pay during his six day tryout, nor during any temporary assignment to perform the duties of an engineer, except that a substitute may be allowed engineer's pay when his temporary assignment lasts for 30 days or more.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Charges for Electric Current.

CULEBRA, C. Z., April 28, 1911.

CIRCULAR No. 336-B:

Effective May 1, and until further notice, the charges for electric light and current furnished by the Mechanical Division to all departments and divisions, including the Panama Railroad Company, will be as follows:

40 cents per month for each 16 c. p. lamp.

2½ cents per kilowatt hour for power and lights on motor basis, where the Mechanical Division does not furnish lamp renewals.

Other rates fixed by Circular No. 336-A of December 30, 1910, or as specially authorized as an exception thereto since that date, will remain in effect.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Assignment to Duty.

ISTHMIAN CANAL COMMISSION.
DEPARTMENT OF CIVIL ADMINISTRATION.
EXECUTIVE OFFICE.
ANCON, C. Z., April 29, 1911.

CIRCULAR No. 103:

Judge William H. Jackson, having arrived on the Isthmus pursuant to appointment issued to him in Washington, is hereby assigned to the Cristobal District Court for one month from May 5, 1911, after which he is assigned to the duties of Senior District Judge, vice M. C. Rerdell assigned to the Cristobal District Court.

GEO. W. GOETHALS,
Chairman of the Commission.

Injury in Course of Employment.

CULEBRA, C. Z., April 29, 1911.

CIRCULAR No. 235-E:

The Act of Congress approved May 30, 1908, as amended by Section 5 of the Act of March 4, 1911, granting to certain employes of the United States the right to receive from it compensation for injuries sustained in the course of their employment, applies to all employes under the Isthmian Canal Commission when injured in the course of their employment, and provides that claims for compensation on account of injury or death resulting from accident occurring on or after March 4, 1911, shall be settled by the Chairman of the Isthmian Canal Commission, who shall, as to such claims and under such regulations as he may prescribe, perform all the duties devolving upon the Secretary of Commerce and Labor under the Act of May 30, 1908. In all cases where an injury results in death, claim for compensation on account thereof must be filed within one year after such death.

In accordance with the authority conferred upon me by said Act of March 4, 1911, the following regulations are prescribed for the purpose of making effective the provisions of law referred to:

1. An employe injured in the course of his employment must at once report the injury to his foreman, or other immediate superior, if he is able to do so, giving a statement of the facts and the names of witnesses, if any. In case disability does not result until some time after the injury is received, the injured employe shall notify his foreman, or other immediate superior, promptly upon the beginning of such disability.

2. The foreman, or other immediate superior, of an employe injured in the course of his employment shall at once forward the preliminary report of injury (Form 177 C. E.) to the head of his department or division. The report shall be held by the head of the department or division until the employe returns to duty, if within 15 days, or until 15 days have elapsed from the date of the injury.

3. If the time lost does not exceed 15 calendar days, Form 206 C. E. shall be prepared by the head of the department or division and forwarded in triplicate to the Chairman for his action, accompanied by the certificate of the attending physician. Upon the return of this form approved, payment will be made on the regular pay roll as "Meritorious sick leave" in accordance with the regulations now in force, made under authority of the Act of February 24, 1909.

4. If the employe is still incapacitated for duty on the sixteenth day after the injury is received, or disability commenced, "Immediate report of injury" (Form X 155) shall be prepared by the head of the department or division and forwarded not later than the seventeenth day after such injury is received, or such disability commenced, to the Claim Officer, Empire, C. Z. In the event that the head of department or division reports that the employe was injured out of the course of employment or through negligence or misconduct, such reporting officer shall make an additional statement, giving the reasons for his conclusion, and forward same with this form.

5. Whenever an employe, concerning whom an "Immediate report of injury" (Form X 155) has been forwarded to the Claim Officer, returns to duty, a "Report of termination of disability" (Form X 156) shall be immediately sent to the Claim Officer, accompanied by a certificate of the attending physician.

6. The claim for compensation of an injured employe will be made on Form X 158, which will be furnished to the claimant by the Claim Officer, who will advise as to the preparation thereof.

7. The Chairman's approval and certification of all claims for compensation on account of injuries which are clearly within the terms of the Act, and concerning which no question as to their validity has been raised, will be made upon a pay roll prepared by the Claim Officer, under the direction of, and be recommended for approval by, the Examiner of Accounts, immediately after the close of the calendar month in which the completed claim was filed.

8. All claims for compensation on account of injuries about which any question as to their validity has been raised shall be submitted to the Chairman by the Examiner of Accounts with a brief of the facts in the case and a recommendation as to the action to be taken. If such claims are approved, the names of the claimants shall be added to the next pay roll covering injured employes.

9. In all cases where an employe is accidentally killed the head of his department or division shall make prompt report thereof direct to the Claim Officer on Form X 157.

10. When an employe entitled to compensation under the Act of March 4, 1911, dies as a result of an injury received in the course of his employment, and his widow, child or children under 16 years of age, and dependent parents, or any of them, desire to claim payment under the Act, they shall be furnished with blank form for compensation, Form X 159. This form must be properly completed. All persons who might be beneficiaries under the Act must sign, or reason be given for not signing, and the claim duly executed, returned to the Claim Officer within one year after the date of death. All claims for compensation on account of death shall be submitted by the Examiner of Accounts to the Chairman with a brief of the facts and a recommendation as to the action to be taken. If the Chairman approves payment of compensation to more than one person, he will designate the portion to be paid to each claimant. Payments of compensation on account of death shall be made on rolls separate from the regular injury pay roll, to be prepared by the Claim Officer.

11. The report of injury cases (on Form X 99) as at present being made to the Claim Officer by Ancon and Colon Hospitals and all line dispensaries, shall be continued, and all such reports shall be mailed not later than noon on Monday of each week.

12. The employe who at present is designated as Claim Officer for the Isthmian Canal Commission, under the supervision of the Examiner of Accounts, is charged with jurisdiction over all matters of detail arising in connection with claims under the Act of May 30, 1908, as amended by the Act of March 4, 1911; with the making of all necessary investigations in connection therewith; with the preparation of pay rolls for the payment of compensation under the Act; with the keeping of records pertaining to claims for compensation; and with such other duties as are at present performed by him in connection with claims arising under the Act of May 30, 1908, or as may be hereafter assigned to him.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

COMMISSARY DEPARTMENT.

The hours during which commissaries are open are as follows:

Cristobal and Culebra, 8 a. m. to 12.30 p. m.; 2 p. m. to 7 p. m.

54 Naos Island breakwater		$11,223.80			$40,232.85			$51,456.65	
Total construction cost, Pacific Division		$2,083,266.10			$14,955,402.51			$17,038,668.61	
55 Plant and equipment to be absorbed in construction costs after March 31								2,901,166.92	
Total expenditures, Pacific Division								$19,939,835.53	
Total expenditures, constr. and engr'n'g.								$117,423,175.29	

Item 8—*Gatun Spillway Back filling.* Material obtained mainly from excavation in preparing foundations, expenses in connection therewith being charged to Item No. .5
Item 26—*Dredging excavation, prism.* Preliminary surveys.

Item 40—*Miraflores Dams and Spillway.* Hydraulic filling. Expenditures represent cost of pipe lines, flumes, etc., 496,421 cubic yards have been deposited in Dam from dredging excavation in lock chamber, total expenditures therefor being charged to excavation.

Items 51, 52, 53—*La Boca Locks and Dams.* These expenditures were incurred prior to adoption of Miraflores as site for the lower locks and dams at the Pacific entrance to the Canal.

Item 54—*Naos Island Breakwater.* Expenditures represent cost of trestling only. Filling is done by Central Division and the cost thereof charged to Item No. 24—Central Division dry excavation, prism.

Items 23, 28, and 55—*Plant.* The expenditures for plant and equipment are absorbed into construction costs on the basis of estimated total cost of plant, and the estimated quantities of work to be done. The amounts shown under these items represent the balances which are to be absorbed into construction costs after March 31.

General—When excavated material is used in filling, such as dams, back filling, etc., the cost of dumping only is charged to the items benefited.

*Dry excavation in January February and March is charged with $182.11, $1,643.68, and $754.25, respectively, under maintenance, but no yardage was accomplished. The total cost of production includes this amount and for this reason the cost of dredging plus plant charge does not equal total cost of production.

LEASE OF LOTS IN COLON.

Sealed bids will be received up to 5.30 p. m., Wednesday, May 31, 1911 for lease to the highest bidder of lots in the newly filled section of Colon as shown on plans which may be seen at the Land Office in Colon and at the Land Office in Panama.

These sealed bids must be addressed to the General Superintendent of the Panama Railroad Company, Colon, and must be plainly marked on the outside of the envelope "Proposal for lot No. ——, block No. ——, Colon." Bids not marked in this manner will not be considered.

The minimum rental to be accepted for these lots may be ascertained by applying to either one of the above mentioned Land Offices.

Persons holding options on any lots in this district and having paid rental up to June 30, 1910, will have the privilege of taking the lot at the highest rate offered.

The lots to be leased are those on the west side of E street between 2d street and 14th street, and that district on the east side of E street bounded by 2d street on the north, 9th street on the south, E street on the west and G street on the east.

Those lots on the west side of E street will be available for building on or about June 1, 1911; the balance of the lots will not be available for building before October 1, 1911.

Parties submitting bids must state character and purpose of building they intend to erect, and must indicate period of time in which they expect to commence construction after assignment.

Application blanks may be obtained at the Land Office in Colon and Panama.

All rental is to be paid quarterly in advance.

The Panama Railroad Company reserves the right to reject any or all bids.

J. A. SMITH,
General Superintendent.

Colon, R. P., April 22, 1911.

COACH TARIFF.

Rates Established in the Canal Zone and Panama.

ANCON, C. Z., April 20, 1911.

By virtue of the authority conferred on me by an ordinance enacted by the Isthmian Canal Commission on August 25, 1910 and approved by the Secretary of War on December 3, 1910, I hereby establish and promulgate, to be effective on and after May 4, 1911, the rates and charges hereinafter set forth which may be made and collected by persons engaged in the transportation of passengers for hire over the streets and roads of the Canal Zone by means of carriages, surreys, wagons, carts, coaches, cabs, or other conveyances drawn by horses or mules.

Any person who shall charge and receive for the transportation of any person over the streets or roads of the Canal Zone in any of the aforesaid conveyances, any sum in excess of any rate herein prescribed, or any person who shall receive for himself or others such transportation in the Canal Zone, and who fails or refuses to pay therefor the rate or rates herein prescribed, shall be held to be guilty of a misdemeanor, and upon conviction, shall be fined for each offense a sum not exceeding Twenty-five Dollars (Sections 4 and 5 of Ordinances.) A rate different from that herein prescribed may, however, be charged and paid if the parties to the transaction agree thereon; but if there be any dispute as to such agreement the duly prescribed rate shall prevail (Section 4). Where the rates are indicated to cover transportation of persons betweeen Zone points and points in Panamanian territory, they are the same that have been duly established and promulgated by Panamanian authority for the like service; the rates to cover such transportation having been agreed on by such Panamaian authority and myself, thus providing harmony of coach tariffs: and, except under agreement otherwise, it shall be unlawful to charge and receive any rate not so prescribed, or to refuse to pay any rate so prescribed.

The failure of any coachman to keep a copy of this tariff displayed in his coach constitutes a violation of the aforesaid ordinance.

Except when duly licensed in the Republic of Panama, on each conveyance aforesaid employed in the transportation of passengers for hire, there shall be paid to the Canal Zone Government a license tax of $1.25 (United States Currency) a month (Par. "A," Section 7, of the "Regulations Providing for Certain Taxes and licenses in the Canal Zone other than for the Sale of Intoxicating Liquors," effective July 1, 1908, as amended by ordinance enacted August 25, 1910, and approved by the Acting Secretary of War, October 31, 1910.)

All coaches and like conveyances on Zone streets and roads should carry lights between the hours of 6 p. m and 5 a. m., and should also be provided with bells or horns.

Coachmen should secure copies of this tariff from the Head of the Department of Civil Administration, Ancon, Canal Zone.

(Note A.) The rates herein indicated are in Panamanian (silver) money. The rates in United States currency are one-half of those shown in this tariff.

(Note B.) The term "east of Episcopal chapel" means east of a north and south line drawn through the entrance to the chapel.

(Note C.) One stop, not exceeding five (5) minutes, in transit between two points will be allowed without the payment of extra fare.

(Note D.) Between 11 p. m. and 6 a. m. the rates are increased fifty (50) per cent.

(Note E.) In lieu of the rates herein named, special agreements as to rates may be made between passengers and coachmen.

M. H. THATCHER
Head of Department of Civil Administration.

SUPPLIES FOR CANAL WORK.

The following steamers with supplies for the Isthmian Canal Commission arrived at the ports of Cristobal, Colon and Balboa during the two weeks ending April 29, 1911:

Pennsylvania, April 18, from San Francisco, with 5 packages hydraulic machinery for Pacific Division.

Panama, April 18, from New York, with 1 drum on skids, 5 cases shafting, 3 crates pipe couplings, 10,090 pieces conduit pipe for Atlantic Division; 5 bundles castings, 3 crates pipe couplings, 10,090 pieces conduit pipe 8 cases pump material for Pacific Division; 16 pieces boom feet and sheaves for Central Division; 5 cases gear cutters, 64 casks copper ingots, 26 bundles insulated copper wire, 86 cases incandescent lamps for Mechanical Division; 53 cases machinery, 72 pieces machinery, 10 cases plates and lamps for Panama railroad; 50 packages drugs and sundries for Sanitary Department; 16 cases agate ware, 394 pieces garbage cans; 15 cases insulated tape, 32 pieces maple lumber, 15 cases rubber hose, 20 packages life preservers, 667 bundles shovels, 11 cases babbitt metal, 17 cases ink, 8 packages fittings for stock; and a miscellaneous cargo, the whole consisting of 21,867 packages, weighing 630 tons.

Waconsta, April 19, from New York, with 12,281 barrels cement for Atlantic Division; 60,560 bags cement for Pacific Division.

Abangarez, April 20, 1911, from New Orleans, with 21 packages earth spreader, 250 tons pig iron, 200 pieces castings for Mechanical Division; 630 bales straw, 120 sacks bran, 314 pieces lumber for stock.

Lyra, April 20, from Philadelphia, with 380 pieces angle reinforcements for Atlantic Division.

Santa Marta, April 20, from New York, with 8 bundles brooms for stock.

Axminster, April 23, from Philadelphia, with 19,500 cases dynamite.

Prinz Sigismund, April 23, from New York, with 23 cases paper, 282 barrels sulphate aluminum, 69 barrels lump alum.

Nordpol, April 24, from New York, with 20,004 barrels cement for Atlantic Division; 47,640 bags cement for Pacific Division.

Cristobal, April 26, from New York, with 16,935 barrels cement, 4 cases electric machinery, 21 cases lubricating oil for Atlantic Division; 28 cases castings for Central Division; 72,260 bags cement, 29 cases fire brick for Pacific Division; 5 cases leather for Mechanical Division; 22 bales hose, 21 barrels glassware, 9 cases Babbitt metal, 9 cases wire, 10 cases belt dressing, 126 bundles wheelbarrows, 15 bundles lumber, 8 kegs steel washers, 20 cases motor oil, 349 bales hay for stock; and a miscellaneous cargo, the whole consisting of 90,016 packages, weighing 7,905 tons.

Atenas, April 27, from New Orleans, with 66 cases for Atlantic Division; 1,562 bales hay, 1,606 bags oats, 275 pieces yellow pine lumber for stock; 2,176 bundles lumber for Panama Railroad Company.

Metapan, April 27, from New York, with 3 life boats and 6 life rafts for Pacific Division.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MAY 10, 1911. No. 37.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Medals and Bars.

At the close of the last year over four thousand Canal medals had been earned by employes of the Canal and Panama railroad. The medal is awarded to American citizens who complete two years of service on the Canal or Panama railroad, and a bar is awarded for each two years' service additional.

On January 1, there were 93 employes in the Canal and railroad service who were employed in 1904, and were therefore entitled to the second two-year service bar; 707 who were entitled to the first two-year bar, and 860 to the medal. The following statement shows the total number of medals and service bars earned up to January 1:

YEARS.	Medals earned.	Bars earned.
1904-08	2,264	146
1907-09	1,363	....
1905-09	....	535
1908-10	860	....
1906-10	....	707
Total	4,487	1,388

Canal Work in April.

The grand total of Canal excavation to May 1 was 137,750,520 cubic yards, leaving to be excavated 44,787,246 cubic yards, or less than one-fourth of the entire amount for the completed Canal.

The total for April was 2,691,753 cubic yards, as compared with 2,632,468 cubic yards in April, 1910, and 3,454,649 cubic yards in April, 1909. Of the total, 2,661,088 cubic yards were "work excavation," and 30,665 cubic yards were "plant excavation."

The dry excavation amounted to 1,701,919 cubic yards and was principally by steam shovels. The dredges removed 929,357 cubic yards, and 60,477 cubic yards were sluiced, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 600,396 cubic yards. Of this total, 86,578 cubic yards were dry excavation, and the remainder was removed by the dredges in the Atlantic entrance.

The total excavation in the Central Division was 1,516,439 cubic yards, of which all but 10,336 yards were from the prism.

In the Pacific Division, the total excavation was 574,918 cubic yards, 415,539 cubic yards of which were taken out by the dredges at the Pacific entrance, and 33,509 by the sluicing plant.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work." Excavation.	"Plant." Excavation.	Total excavation

Total	2,661,088	30,665	2,691,753

Mean rainfall along Canal (twelve stations) 4 86 inches.

By "Work" Excavation is meant excavation actually made for one of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc.; that is, it represents material taken from the area to be occupied by the Canal, and constitutes excavation useful for the completed Canal.

By "Plant" Excavation is meant excavation outside of any of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc. It includes material necessary to be excavated for construction purposes only and is chargeable against the particular plant item for which it is performed, such as Prism, Diversions, Locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
Concrete laid in locks.	67,361	67,393	134,754
Concrete laid in dams and spillways	4,169	....	4,169
Fill placed in dams	573,788	81,360	655,148

Erecting the Lock Gates.

The first shipment of material for the gates of Gatun Locks has arrived on the Isthmus, and the work of erecting the south guard gates in the upper or lake level locks will be begun this week. The gates are built up of steel girders, covered with steel plate, forming water tight compartments. Each leaf, of which there are two in a gate, is 7 feet thick, 65 feet long, and range in height from 47 feet 4 inches to 82 feet, the total number for all locks being 92.

One method will be used in erecting all of them. It consists of lowering the material by locomotive crane, operating on a bridge over the lock chamber, and assembling it in false work, after which the gate will be moved into place, as a door would be set on its hinges. The false work, between which the leaves will be assembled, consists essentially of four steel columns, which not only carry the weight of the gate leaf, varying from 300 to 700 tons, but also act as a brace to prevent the leaf from overturning during erection. These columns rest upon a lowering device, which, in turn, rests upon rollers. The leaves are assembled on a radial line, four feet out from their true position, and swung partly open, leaving a 12-foot passage between their miter ends. After the quoin, or hinge end, of the leaf is completed, the whole structure will be rolled back against the hollow quoin, and lowered into position over the pintle.

The lowering device on which the columns rest has been used by the contractors in bridge construction in the States. It consists of two steel bars shaped like a broad "V," with the apexes facing one another. A steel plate passing through the apex of each bar joins them together, and yet permits free vertical movement of the upper bar. Between the adjacent faces of these triangular bars two steel wedges are placed. These wedges are bored and threaded, one right handed and the other left handed, and are moved toward or away from each other by turning a continuous threaded shaft passing through them, the first movement having the effect of forcing the triangular bars apart, and the second, that of drawing them together, the consequent effect on the columns being to raise or lower them. The device has been tested by the Bureau of Standards, and in actual service, for heavier loads than it will

NOTES OF PROGRESS.

(Continued.)

be obliged to bear in the erection of the lock gates. The maximum weight on each column and device, including men and tools, will not exceed 200 tons.

Sinking the Piers for Balboa Lumber Dock.

Work is in progress on nine of the 65 concrete foundation piers required for the new Panama railroad lumber dock at Balboa. The first of these piers had been sunk to a depth of 60 feet below sea level at the close of work on May 6, or within four or five feet of bed rock. At this point a vein of water-bearing gravel was struck, necessitating a continuous operation of the pumps and reducing the downward rate of progress to some extent. The other eight piers have been sunk to varying depths ranging from the first joint, or section, to 50 feet.

The first step in sinking the piers, which have an inside diameter of six feet, is to excavate a hole with a clam-shell bucket, operated by a locomotive crane, to a depth of about 10 feet. The heavy reinforced base of the pier, which somewhat resembles in form a flanged joint of sewer pipe, is then swung into the hole. The earth is next excavated from the bottom by two or more workmen, and is hauled to the surface by motive power furnished by old drilling machines, thence carried to nearby dumps in Decauville cars. The excavation of material continues until the base section has been sunk to a sufficient depth to permit the addition of a six-foot length of the main pier. The forms for this are then placed in position, the reinforcing material, consisting of steel rods arranged in circular rows, assembled therein, after which the concrete is poured, allowed to set, and the pier is then ready for a further descent.

The material encountered in excavating for the piers is mostly clay, and as the water is always present in the holes, it has to be removed in the form of sticky mud. Noisome gases frequently emanate from this mud, especially where rotten wood is encountered, and in these cases, the health and safety of the workmen employed in digging below ground is safeguarded by forcing air into the holes. Notwithstanding these precautions, workmen have been overcome and, in one case, temporarily incapacitated.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is about 60 per cent completed, 134,657 cubic yards, out of a total of 225,000, having been placed at the close of work on May 6. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	Cubic Mixers. No.
May 1	112	5:00	2
May 2	76	4:30	1
May 3	164	14:00	2
May 4	53	3:30	1
May 5	84	2:00	1
May 6	29	2:00	1
Total	518	31:00	1.33
Previously reported	134,139		
Grand total	134,657		

Empire-Chorrera Highway.

It has been decided to make the road from Empire to Chorrera, a distance of six miles, 16 feet wide on the metaled part, about 32 feet from center to center of the drainage ditches. Already the grading has been completed for a mile beyond Empire. The work is being done by penitentiary prisoners, 117 of whom are now employed, with headquarters at Culebra. As soon as two miles of the grading are completed, the prisoners will be moved to a stockade to be built at a point four miles from Empire, and the work will be carried on in both directions from that point. At a point about three-fourths of a mile outside Empire, there is a hill with an eight per cent grade, but barring this, the heaviest grades encountered on the location are not over six per cent.

It is proposed to build a road from the Chorrera highway to Arraijan, a distance of three miles, but this has not yet been determined upon.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 63 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 6, being 1,321,111½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending May 6, and of the total, follows. and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

STEAM SHOVEL RECORDS.

Work of Central Division and P. R. R. Relocation Shovels in April.

During the month of April the total amount of material excavated in the Central Division was 1,516,439 cubic yards, of which 271,650 cubic yards were classified as earth and 1,244-789 cubic yards as rock

Of this quantity, 1,470,752 cubic yards were removed by steam shovels, 2,788 cubic yards by scrapers, 8,956 cubic yards by bucket cranes, and 2,543 cubic yards by hand. Contractors removed 26,968 cubic yards by sluicing, and 4,432 cubic yards by hand.

The high record for the month was made by shovel No. 212, working 24 days in the Culebra district, which excavated 49,563 cubic yards of rock. The second best record for the month was made by shovel No. 206, working 24 days in the Culebra district, which excavated 49,290 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 124, working 24 days in the Culebra district, which excavated 39,652 cubic yards of rock and earth.

Shovel No. 215, working in the Empire district, made a high record for one day by excavating 2,945 cubic yards of rock on April 7. Shovel No. 128, working in the Chagres district, excavated 1,678 cubic yards of earth on April 4, and this is the high record for one day for a shovel of the 70-ton class, during the month.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown below:

Relocated Line, Panama Railroad.

The total excavation on the relocated line of the Panama railroad for the month of April was the largest since the work began, amounting to 414,130 cubic yards, place measurement. During March, which had three more working days, 408,180 cubic yards were taken out, the record until this time.

Of the April excavation, 192,269 cubic yards were classified as earth; 27,462 yards as loose rock, and 194,399 yards as solid rock. A total of 400,920 cubic yards was removed by company forces—366,194 yards by steam shovels, 31,180 yards by pan car task work, and 3,546 yards by culvert gangs. The contractor removed 13,210 cubic yards.

The best steam shovel record was made by steam shovel No. 257, on the Gatun section, which excavated 62,540 cubic yards of rock in 24 working days. In the 70-ton class, the best record was made by steam shovel No. 105, on the Monte Lirio section, which excavated 35,330 cubic yards of earth, and 5,400 cubic yards of rock, a total of 40,730 cubic yards in 24 working days.

The high record for one day for 5-yard shovels was made by steam shovel No. 262, working at Monte Lirio, which excavated 3,500 cubic yards of rock and earth on April 29. The high record for one day for 3-yard shovels was made by steam shovel No. 105, working near Monte Lirio, which excavated 2,200 cubic yards of earth on April 7.

BEST RECORDS FOR THE MONTH.

SHOVEL No.	Location.	Cubic Yards by Cross Section.			
		Days worked.	Earth	Rock.	Total.
257	Gatun	24	....	62,540	62,540
262	M. Lirio	24	21,000	33,000	54,000

110	Paraiso	24	25,921	12,720	38,641

Total output during month of April, 1911, 366,194 cubic yards.

Total number steam shovel working days, 212.

Average output per working day, 1,727 cubic yards.

Product of School Garden.

The garden at Empire school for colored children was planted in December, and the harvesting was begun in February. About one-half an acre was under cultivation in vegetables and 1½ acres in papayas and bananas. All the work, except the initial spading, was done by pupils under the direction of a scientific gardener, one of the aims being to teach the colored pupils how to make a living in truck gardening after their fathers can no longer procure work on the Canal. In this respect the results are encouraging, because both boys and girls have shown great interest in this practical work. The vegetables and bananas are given to the children, but a careful count is kept of all of them, and those harvested up to May 1 would have sold at the following prices in the Empire market:

ITEM.	Amount and Price.	Total.
Tomatoes	1,600 pounds at 10 cents	$160.00
Beans	350 pounds at 15 cents	52.50
Cabbage	208 pounds at 3 cents	6.24
Cucumbers	30 pounds at 12 cents	3.60
Radishes	250 bunches at 10 cents	25.00
Okra	50 dozen at 10 cents	5.00
Bananas	200 bunches at 35 cents	70.00
Total value		$322.34

Value of Property Purchased from French.

The value of property transferred to the United States by the New Panama Canal Company of France, under the $40,000,000 purchase, is to be determined by a committee, appointed by the chairman, consisting of Messrs. J. B. Bishop, A. B. Nichols, W. G. Comber, A. S. Zinn, Lieut. W. D. Smith, Messrs. Ad. Faure, R. W. Hart, and H. S. Farish. The amount of excavation by the French, which is useful in the present Canal, was determined, after investigation by a committee which reported on December 6, 1909, to be about 30,000,000 cubic yards. A similar determination will be made of the buildings, machinery, stores, Panama railroad shares, and other property included in the purchase.

Fire at Bas Obispo.

In a fire at Bas Obispo on the night of May 7, seven private buildings were destroyed, and the three months' old child of a colored woman named Maud Griffith was burned. The fire was in a private building of frame construction, and had gained great headway before an alarm was sent in.

A new school building for colored children will be erected at Cristobal on the Mount Hope road, to take the place of that destroyed in the Colon fire of March 23. It will be made of two laborers' barracks moved from Tabernilla, and will have four rooms, each 25 by 30 feet.

Pacific Division Sand Service.

Sand was supplied in April by the Pacific Division service, as follows:

DESTINATION.	Number of cars.	Cubic Yards.
Pacific Division	2,356	35,340
Central Division	18	270
Atlantic Division	18	418
Quartermaster's Department	3	75
Sanitary Department	2	50
Panama railroad	6	150
Miscellaneous	10	175
Total	2,413	36,478

Work of Central Division Unloaders.

The following statement shows the number of Lidgerwood cars unloaded by the Central Division during the month of April:

LOCATION.	No. of unloaders.	No. of trains.	No. of Cars.
Balboa	3	1,004	20,080
Miraflores	3	730	14,594
Gamboa	4	1,096	22,981
Total	10	2,830	57,655

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending May 6, follows:

DATE.	Hours worked.	Cubic Yards.
May 1	7:30	2,958
May 2	7:40	2,033
May 3	8:00	2,616
May 4	8:00	2,614

SEVEN YEARS OF CANAL WORK.

Progress of Construction—New Features Developed.

The seventh year of Canal construction by Americans ended on May 4, at which date about 138,000,000 cubic yards of excavation, or more than three-fourths of the entire amount estimated for the completed Canal, had been accomplished, leaving only about 44,000,000 cubic yards to be removed. The year was marked by a general advance of the work in amount accomplished, and by a constant decrease in the cost.

A new development of an old factor in the completion of the Canal was the increase in the slides in Culebra Cut, where the banks have broken in 22 places between Pedro Miguel Locks and the Chagres River at Gamboa, a distance of nine miles. An addition of 6,104,000 cubic yards was made to the estimate of the total amount to be excavated, as an allowance for the slides, and the amount in motion, or that has given an indication of probable movement, does not exceed this. This amount may be increased, but this causes no apprehension as after the locks are completed it will be possible to concentrate dredges for removal of the material that remains and which may slide in, enabling the work to proceed much more expeditiously and much more economically.

Profile of Culebra Cut
Showing Material Excavated and to be Excavated.

Of the total of 44,787,246 cubic yards of excavation remaining, 21,371,975 cubic yards are in Culebra Cut. The rate of progress in this section of the work, as compared with other years ending May 1, is shown in the following table, and graphically, by the profile published on this page:

May 1 to May 1.	Cubic Yards.
1904–1905	648,911
1905–1906	1,250,570
1906–1907	4,861,895
1907–1908	11,285,217
1908–1909	13,955,753
1909–1910	14,886,427
1910–1911	15,925,976
Total	62,814,749
Amount remaining	21,371,975

A statement showing the advance of excavation in all parts of the work is published elsewhere in this issue.

Lock Construction.

The placing of concrete in all the locks is 52 per cent completed, 2,153,386, out of a total of 4,284,000 cubic yards, having been placed up to May 1, and of this amount 1,694,086 cubic yards were placed in the past year. At Gatun, 951,661 cubic yards were placed during the year, and there remain to be placed 783,210 cubic yards before the concrete work is completed. The installing of the lock gates has been begun, and the installation of machinery for gate operation and towing of ships, of the emergency dams and operating machines, will be carried on in the upper locks, while concrete laying advances in the lower flights.

A total of 737,425 cubic yards of concrete was placed in the Pacific locks during the year, and there remain to be placed 1,349,576 yards. The locks at Pedro Miguel are nearing completion, and those at Miraflores are fairly begun, and will advance with greater rapidity as soon as the cantilever mixing and handling plant is fully installed.

Gatun Dam.

The estimated dry fill for the toes of Gatun Dam is 8,346,778 cubic yards, and there has been placed up to May 1 a total of 7,017,980 yards. It is probable that the amount of material actually dumped in the toes of the dam will greatly exceed the estimated total. The total hydraulic fill is estimated at 11,653,222 cubic yards, and of this amount 7,058,559 cubic yards were in place on May 1. The total estimated fill is 20,000,000 cubic yards, and 70 per cent of this amount was actually in place on May 1.

In the spillway the concrete work is 60 per cent completed, and has reached a stage where it may be continued during the rainy season. There remains to be constructed the concrete dam across the channel, and to be erected thereon the regulating gates.

Other Developments of the Year.

The relocation of the Panama railroad above Gatun Lake was completed to such an extent that regular trains may use it between Gatun and Bas Obispo in case high water in the lake region makes the old line between those points impassable. The location on the 95-foot level through Culebra Cut was changed to one parallel with the Canal, but far enough east of it not to be interfered with by slides.

The breakwater at the Pacific entrance to the Canal, extending from Balboa to Naos Island, was advanced to a point 13,000 feet from shore, and now lacks about 4,000 feet of completion. The breakwater at the Atlantic entrance, which will extend from Toro Point about 10,500 feet into Limon Bay, was begun in August, 1910, and on May 1, the fill had been advanced to 4,214 feet from shore.

Plans were approved for terminal docks and basins at both entrances. The basin at the Pacific entrance will be at Balboa, where work has been begun on the first of a series of reinforced concrete docks. The docks at the Atlantic entrance at Cristobal will consist of a series of reinforced concrete docks, or slips, reached from shore by a mole which will extend about 3,300 feet into the bay and serve as a breakwater to protect the harbor on the south.

Plans for buoying and lighting the Canal and its approaches have been adopted, and the work of clearing the ranges in the lake region has been begun.

The Government adopted the policy of fortifying the Canal on March 4, 1911, when the bill appropriating $3,000,000 for initial expenditures was approved.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Rev. W. W. Gray, who for two years has been pastor of the Methodist Episcopal church in Panama and visiting chaplain in the Commission service, has resigned and will leave the Isthmus accompanied by Mrs. Gray on May 31. His successor, the Rev. Harry Compton will sail from New York on May 12. Mr. Compton has been for 27 years in charge of the Methodist work in Ecuador, and has just completed a year's leave of absence in the States. He has a wife and two daughters who will accompany him. The pastor's family will occupy the rooms of the parsonage over the church on the sea wall.

There were 30 women present at the meeting of the Women's Foreign Missionary Society held at the home of Mrs. E. W. Keyser, Ancon, on Friday afternoon, May 4, among them visitors from Culebra and Paraiso, and the members of the Empire Auxiliary to the Christian League. The meeting was opened with a devotional service, followed by a program of special music. A window will be placed in the parsonage dedicated to the organizers of the society. Since the organization of the society two and a half years ago, scholarships have been maintained in the Methodist college in Panama. There are 15 active members, and two life memberships of $20 each, which have been paid by Mrs. Gray and Mrs. J. L. Webster. The study hour on Friday afternoon was devoted to the consideration of the lifes of Christian women in the Orient. Papers were read by Mrs. Gray, Mrs. Z. E. Bossomaier, Mrs. J. Stokoe, Mrs. E. W. Price, and Mrs. John M. Holt. Mrs. Andrew Atchison was in charge of this division of the program. Mrs. J. M. Holt has been elected treasurer, vice Mrs. Gray resigned. Mrs. Webster is also resigning from active membership and will leave the Isthmus on May 29 for an indefinite sojourn in southern California.

Miscellaneous Events.

On April 29, the Red Men, assisted by the auxiliary order, the Daughters of Pocahontas, held a masquerade ball at the lodge hall in Las Cascadas for the benefit of the order. There were 40 couples present.

At a dance held recently by the Pythian Sisters in Las Cascadas, $120 was made. The sum will be placed in the treasury of the order.

The Grand Auxiliary Order of the B. of L. E. held a dance in the lodge hall at Paraiso on April 22 for the benefit of the home for disabled railroad men at Highland Park, Ill.

Dinner of the 1904 Employes.

The fourth annual dinner of the employes, whose term of service with the Isthmian Canal Commission on the Isthmus began during the year 1904, was held at the Hotel Tivoli on Thursday evening, May 4, the day on which the French Canal Company formally turned over its possessions on the Isthmus to the United States. There was an attendance of 29, out of a total of about seventy-one 1904 men now on the Isthmus. The greater part of these men are still in the service of the Commission, although a few have left and engaged in other pursuits. The banquet was presided over by Col. W. C. Gorgas; Col. Tom M. Cooke acted as toastmaster, and informal speeches were made. Those present were: A. B. Nichols, D. E. McDonald, Patrick Kenealy, Thos. J. Walsh, Lloyd Noland, L. E. DuBois, W. L. Power, Alex A. Lundisheff, M. C. Pratt, M. W. Tenny, Geo. H. Ruggles, C. L. Stockelberg, J. J. Moran, F. E. Moore, A. B. Herrick, H. A. Gudger, C. C. Pierce, J. C. Perry, J. A. LePrince, O. S. Boyd, L. G. Thom, C. L. Parker, D. E. Wright, J. D. Illia, Tom M. Cooke, W. C. Gorgas, Frank Cotton, Earle C. McFarland.

During the evening an association was formed, with Col. Gorgas as its president, to be known as the "Incas."

St. Ferdinand's Church at Empire.

A Commission building opposite the garden of St. Ferdinand's church in Empire has been assigned to the church to be reconstructed into a parish house. There will be three rooms at the eastern end for the resident priests, a hall running through the center for social gatherings, and two additional rooms for visiting priests at the western end, where there will also be the refectory and kitchen. A social hall will be partitioned into two parlors for the meetings of the altar societies and other organizations, but it will be so arranged that it will be possible to throw the suite into one room. Several rooms down stairs will be converted into schoolrooms for the rector's Spanish classes, and it is also purposed to establish a night school for the young West Indian men of the parish. The building dates from the French occupation and has been used as bachelor quarters. The remodeling will be done at the expense of the church, and will cost $1,500, of which $1,000 have been paid. The building will be occupied in the beginning of June.

As a result of the recent visit of the Very Rev. Father McHale of the Vincentian Fathers, it is expected that, in addition to the Rev. Father Allot, the rector of the parish, two priests of the Order of St. Vincent will be sent to the work at Empire.

Easter gifts to the church in April were a brass sanctuary lamp, a private gift; a baptismal font, given by the Altar Society, and the Stations of the Cross, presented by the men's club.

A. A. O. N. M. S.

All nobles of the Ancient Arabic Order of Nobles of the Mystic Shrine on the Isthmus are requested to be present at a meeting to be held at Gatun on Sunday, May 14, 1911, at 3 p. m., to discuss a matter of importance.

FRANCIS W. WALRAVEN.

Las Cascadas, C. Z. May 3, 1911.

Observance of Fourth of July.

In a circular dated May 5, the Chairman has requested the heads of departments and divisions to appoint representatives to attend a meeting in the Administration building in Ancon on Saturday, May 13, at 2 p. m., to consider the question of a celebration of Independence Day by Americans on the Isthmus. The letter states:

> Among the questions which should be discussed and decided are:
>
> 1. Shall such a celebration be arranged for?
> 2. If so, the program and general location of the celebration, or celebrations.
> 3. Organization for making the necessary arrangements, raising subscriptions, etc.
>
> Such celebrations are intended to be arranged by, and for the benefit of Americans on the Isthmus, and it is intended that the planning and execution of any celebration shall be in accordance with the views of the majority.
>
> Please advise me as soon as practicable the representatives you designate to attend this meeting (who will be expected to act on this committee until further notice). Your representative should be instructed to canvass the sentiment among the employes in their department or division prior to the meeting on May 13, so that they may be able to act with a full knowledge of the views of those whom they represent at the meeting on May 13. The Disbursing Officer will be a member of this committee ex-officio, and any other head of a department or division may likewise act ex-officio as a member of this committee and be present at the meeting. The committee is authorized to appoint any additional members to act with it.

Commissioner H. H. Rousseau will act as General Chairman of the Fourth of July Celebration Committee, and Mr. George A. Ninas will be present as a member, and act as secretary of the committee.

PERSONAL.

Capt. F. C. Boggs is a passenger on the *Panama*, scheduled to arrive in Cristobal on May 12.

Mr. John M. G. Watt arrived on the *Zacapa* on Thursday, May 4, from his leave of absence in the United States.

Mr. Edward C. Sherman, Designing Engineer, accompanied by Mrs. Sherman and their daughter, sailed for the States on the *Ancon* on May 10. Mr. Sherman has completed the designs for the spillways at Gatun and Miraflores, of which he was in charge, and his resignation has been accepted to take effect at the expiration of his leave. He will engage in consulting engineering, as principal assistant engineer, with the firm of Barrows and Breed, at 6 Beacon street, Boston, Mass.

Berths on the "Panama".

CULEBRA, C. Z., May 6, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

As only a few scattered berths remain open for assignment on the steamship *Panama*, scheduled to sail from Cristobal on Thursday, May 18, any further requests submitted for this sailing should be confined to employes traveling alone. A few single berths are available for women unaccompanied by children.

By direction of the Chairman.

C. A. MCILVAINE, *Chief Clerk.*

Obituary.

Daniel Holland, son of Jeremiah Holland, living at Empire, died at Ancon Hospital on May 3. He was 12 years of age, and had been on the Isthmus nearly a month.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., on Sunday, May 14, 1911, at 7.30 p. m. The program follows:

1 March—*Jolly Pals*........................Kohn
2 Selection—*The Prince of Pilsen*...........Luders
3 Reverie—*Traumerei* (By request)........Shuman

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

A "social" was held at the clubhouse on Thursday evening. The program consisted of piano duets, vocal solos, singing by a male quartet, Indian club swinging, and the Corozal chorus appeard for the first time in concert. The refreshments were home made cake and lemonade.

A sacred concert will be given on Sunday evening, May 14, in the clubhouse. The chorus is composed of 17 voices. Programs are now being printed and will be distributed later. The Rev. A. A. Nellis will give a short address.

CULEBRA.

The Gorgona indoor baseball team defeated the Culebra team on the local floor on Saturday by a score of 14 to 8. Batteries: Gorgona—Weiser and Christenson; Culebra—Koperski and Cushing.

On Tuesday, May 2, C. H. Wilson engaged in a simultaneous chess match with seven Culebra players and succeeded in winning all.

The latest moves in the chess game "by wireless," between Porto Bello and Culebra are, as follows:

White. Porto Bello.		Black. Culebra.	
12.	K R—K Sq	12.	P—Q B3
13.	P—Q R4	13.	Q—B3
14.	Kt—K4	14.	P—K R3

The Boy Scouts went to Cruces on Sunday afternoon.

Arrangements are being made for a pool tournament. All interested should hand their names to J. T. Silver.

EMPIRE.

Cristobal took two out of three duckpin games from the Empire team on Saturday, May 6. Following was the score:

Empire.				Cristobal.			
Gustavson...	91	88	98	Smith.....	86	90	91
Potter......	112	87	86	Jacques...	79	84	90
Gorham....	99	80	78	DeCora...	80	89	86
Pearson.....	80	93	94	Sullivan...	101	82	88
Huson......	70	87	88	Herring...	82	99	90
Total.....	452	435	444	Total..	428	444	445

The following high scores were bowled during the past week: Duckpins—Reiman, 103; Gustavson, 107; Pinney, 109; Rodeghiero, 102, 105; Green, 101; Clark, 106; Gorham, 122, 100, 109, 102, 101; Huson, 102; Deakin, 104; Scheets, 109; Pearson, 100; Davis, 101; Bigpins—Myers, 215; Peterson, 212; King, 208; Parkis, 244, 227, 216, 203, 202, 201, 200.

Empire and Gatun will play indoor baseball on Saturday evening, May 13.

Residents of Empire who wish to become members of a conversational class in Spanish are invited to hand their names to the secretary.

GORGONA.

On Wednesday night at 7.30, E. A. Howe will lead the discussion club; his topic will be "It is easier to do right than wrong." All men are invited.

The following men lead in duckpins for the week ending May 6: Dunlop, 89; Haggerty, 86; Seebt, 85; Schofield, 84. The following men lead in high averages for bigpins during the same period: Arnold, 161; Haggerty, 161; Bordt, 157; Stoehr, 151; R. Varenkamp, 151.

CRISTOBAL.

The standing of the duckpin league at present is, as follows:

Team.	Won.	Lost.	Per cent
Cristobal....................	14	4	.777
Culebra......................	9	9	.500
Gorgona.....................	9	9	.500
Empire.......................	8	10	.444
Gatun........................	8	16	.333

Cristobal won three straight games in the duckpin league series at Cristobal on Saturday night, by the following scores:

Empire.				Cristobal.			
Davis......	89	89	98	Barrett....	97	103	98
Pinney.....	85	80	88	Howard...	100	89	80
Shaughnessy.	82	89	78	Herrington.	106	98	96
Giavelli.....	82	87	70	Furlong...	89	96	86
Rodeghiero..	81	90	109	Rosteck...	80	86	85
Total.....	419	435	443	Total..	472	472	445

Empire won the indoor baseball game in the league series at Cristobal on Saturday night, by the score of 27 to 10. Young and Mullane were the battery for Empire; Russell and McSparren for Cristobal.

Moving pictures will be shown on Friday night, May 12.

The subject for debate on Wednesday night was "Resolved that the resignation of President Diaz of Mexico would be for the best interests of that country." Ware and Yeiser debated for the negative, and Weaver Goodman for the affirmative; the affirmative won. The subject for May 10 will be "Resolved that the Panama Canal should not be fortified." The program committee, with Mr. Weatherbee, as chairman, has planned interesting meetings for June.

A new type of Cristobal pennant has been put on sale.

A new Columbia graphanola has been ordered for Cristobal, and until it arrives a temporary machine is in use.

On Monday night, May 8, a match game of indoor baseball was played between the regular team and a team of ex-stars of the diamond.

A local basketball league will be started next week. Five teams, captained by Weller, Sartor, Luce, Prather and Vifquain, numbering about 40 men, will play. Regular scheduled games will be played on Tuesday and Thursday nights.

Forty new library books will be placed on the shelves this week.

GATUN.

At the "smoker" on May 3, Franklin Matthews told of several incidents in his work as a news correspondent. Others who participated were: Alfred B. Dickson, piano selections; E. Emery Black, face sketches; J. Williamson, humorous monologue and song; R. E. Chatfield, slack wire and fancy balancing acts; W. C. Ross, tenor solos; Alonzo Stevenson, original poetry; M. Meeks, burnt-cork jokes; Huber and Wilson, wrestling match. During intermission, lunch and cigars were served. Two hundred men were present.

Gatun lost two out of three games of duckpins in the game with Gorgona on Saturday night, May 6.

The score of the indoor baseball game played at Gatun on May 6 was: Gatun, 30; Corozal, 15.

On account of the band concert, the "Life problem" club did not meet on May 7. The subject "The Church and the Y. M. C. A." will be discussed on May 14.

Among the events for the latter part of May are Prof. Hellerman in "A night of magic and mirth," and the Gatun high school entertainment.

A "smoker" and reception will be given in the near future in honor of the employes of the McClintic-Marshall Company.

Louis DePoorter made a run of 90 balls in a pool game on Wednesday evening, May 3.

Gatun pennants will be given to the bowlers who secure the highest scores for a single game in duckpins and tenpins during the month of May.

PORTO BELLO.

The local chess tournament for the period, April 6 to May 4, closed with the following standing:

Name.	Played	Won	Per cent
Morgan......................	15	13½	.900
Hanbury....................	12	10½	.875
Tuttle.......................	13	11	.846
Capt. Stickle................	7	5	.714
Honer.......................	8	5	.625
Nemec......................	12	7	.583
Arden.......................	11	5½	.500
Cornelison..................	5½	2½	.500
Hill..........................	12	6	.500
Mackintosh.................	15	7½	.500
Mitchell.....................	12	5	.385
Colberg.....................	14	4½	.321
Everett......................	14	4	.286
McDevitt....................	13	3	.231
Corrigan....................	12	1	.083
Rogers......................	14	1	.071

The members having the four highest standings will play simultaneous games with the club during the month of May. Mr. Morgan played his games on May 4, and won 7½ from his 13 opponents.

OFFICIAL CIRCULARS.

Charges for Electric Current.

CULEBRA, C. Z., April 28, 1911.

CIRCULAR NO. 336-B CORRECTED:

Effective May 1, and until further notice, the charges for electric light and current furnished by the Mechanical Division to all departments and divisions, including the Panama Railroad Company, will be as follows:

Per month for each 16 c. p. lamp.........	$.40
Per kilowatt hour for power and lights on meter basis, where the Mechanical Division does not furnish lamp renewals.....	$.02½

Other rates fixed by Circular No. 336-A of December 30, 1910, or as specially authorized as an exception thereto since that date, will remain in effect.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Shop Expense Percentage.

CULEBRA, C. Z., May 5, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS.

In accordance with the provisions of Circular No, 169-E, the following shop expense percentage for each shop is hereby fixed effective May 1, 1911, and will be applied, until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264-A, viz:

DIVISION OR SHOP.	Shop expense percentum.
Mechanical Division................	37.5
Empire shop.........................	40
Dry Dock shop......................	45
Balboa shop.........................	30
Porto Bello shop....................	25

Circular letter from this office dated January 6, 1911, is revoked.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Cost of Patterns.

CULEBRA, C. Z., May 6, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective July 1, 1911, the cost of patterns will be charged directly to the job, instead of to the foundry account.

All iron castings, except counterweights for spillway and locks, will be billed at the flat rate of three cents per pound.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Requests for Telephone Work.

CULEBRA, C. Z., May 1, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to my circular letter of March 23, 1911, concerning work requests on Form 159 C. E.–Revised. It will be necessary in future to furnish only seven copies of requests for the installation, removal, or repair of telephones, instead of nine copies, as heretofore.

C. A. MCILVAINE, *Chief Clerk.*

Sale of Public Buildings.

OFFICE OF CHIEF QUARTERMASTER.
ISTHMIAN CANAL COMMISSION.
CULEBRA, C. Z., May 1, 1911.

Sealed proposals for the purchase of any or all of one hundred and forty-three (143) buildings located along the line of the Panama Railroad Company, between Bohio and Cartagenita, will be received here until 3 p. m., Monday, May 15, 1911, and then opened. Information furnished on application to district quartermasters, or to this office. Envelopes containing proposals should be endorsed "Proposals for the purchase of buildings," and addressed to Lieut.-Col. C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Lease of Lots in Colon.

Sealed bids will be received up to 5.30 p. m., Wednesday, May 31, 1911 for lease to the highest bidder of lots in the newly filled section of Colon as shown on plans which may be seen at the Land Office in Colon and at the Land Office in Panama.

These sealed bids must be addressed to the General Superintendent of the Panama Railroad Company, Colon, and must be plainly marked on the outside of the envelope "Proposal for lot No. ——, block No. ——, Colon." Bids not marked in this manner will not be considered.

The minimum rental to be accepted for these lots may be ascertained by applying to either one of the above mentioned Land Offices.

Persons holding options on any lots in this district and having paid rental up to June 30, 1910, will have the privilege of taking the lot at the highest rate offered.

The lots to be leased are those on the west side of E street between 2d street and 14th street, and that district on the east side of E street bounded by 2d street on the north, 9th street on the south, E street on the west and G street on the east.

Those lots on the west side of E street will be available for building on or about June 1, 1911; the balance of the lots will not be available for building before October 1, 1911.

Parties submitting bids must state character and purpose of building they intend to erect, and must indicate period of time in which they expect to commence construction after assignment.

Application blanks may be obtained at the Land Office in Colon and Panama.

All rental is to be paid quarterly in advance.

The Panama Railroad Company reserves the right to reject any or all bids.

J. A. SMITH,
General Superintendent.

Colon, R. P., April 22, 1911.

Hamburg-American steamers leave Colon for New York via Kingston and Santiago, Cuba at 10 a. m.

A local run from Colon to Bocas del Toro and Port Limon will be made on Wednesday May 17 and 31; June 14 and 28.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (†) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

The Leyland line steamer *Jamaican* sails for New Orleans, via Port Limon, Costa Rica, on or about May 22.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MAY 17, 1911. No. 38.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Effect of Heavy Rain in Culebra Cut.

The heavy rain of May 11—2.57 inches—caused considerable inconvenience in Culebra Cut from noon of that day until the afternoon of the day following. The drainage ditch at the south end of the Cut, which carries water through the culvert under the old P. R. R. embankment west of the locks at Pedro Miguel, so that it may flow around the lock site, broke, and allowed the water to empty into the steam shovel cut which is being made to provide drainage through the center wall culvert of the locks. A battery of two 10-inch, and one 15-inch, centrifugal pumps, which had been installed in the new drainage ditch to take care of such water as might collect from rains, was flooded, and the pumps were forced to suspend temporarily. This new drainage ditch will be subject to similar inundations until it is completed to the culvert of the locks, that is, until the water from the south half of the Cut may drain through the locks at Pedro Miguel.

All the steam shovels south of the summit are working with the end in view of keeping open the central drainage ditch. Last year the slides at Culebra forced the bottom of the Canal up and closed this ditch, and it was necessary to maintain pumps in order to keep the water down in the Cut. Pumping is neither so economical nor so effective as gravity drainage.

North of the summit, the central drainage ditch has a slight grade from Las Cascadas to the sump at Gamboa, due to the fact that the excavation is so near to its ultimate depth in this section. The water drains off slowly, and, because of this, several steam shovels in the Empire district were obliged to suspend on May 11, due to the accumulation of water in the pits in which they were working.

At Culebra, on May 11, a portion of the west bank gave way, and one steam shovel was nearly overturned and obliged to suspend work. The portion that slipped was a ledge of lava rock about 40 feet above the level on which the shovel was digging, which was at a point where the bank seems uncommonly firm. The ledge of lava on top of this bank became watersoaked and gave way, tumbling over the firm bank into the Cut. On the east bank of the Cut at Las Cascadas, a mud slide was accelerated by the rains, and the track leading to two steam shovels was put temporarily out of service. This slide, although difficult to handle on account of its nature, viz., soft mud, now contains only a few thousand cubic yards of material.

Eleven shovels in all were forced to suspend work for part of the day on the 11th, on account of flooded pits, or covered tracks.

Land Office.

The land office authorized under the Executive Order of January 19, 1911, to be conducted under the Law Department, has been opened in Ancon, with A. A. Greenman, formerly land agent for the Panama Railroad Company, in charge. He is assisted by one clerk and a land inspector on the gold roll, and by two clerks on the silver roll. The land business of the Panama Railroad Company and Isthmian Canal Commission will be conducted through this office, but the payment of rent for Panama railroad lands will be continued, as heretofore, at the office of the General Superintendent at Colon, or at such places as he may direct. The payment of rent on Commission land will be made, as heretofore, to the district tax collectors.

Observation Car for Visitors.

Requisition has been placed in the States for a 50-passenger observation motor car for operation over the main line of the Panama railroad, and the Canal construction tracks, which will be supplied on bid. It will be of steel construction, with a length over all of between 50 and 60 feet, and a maximum width of 10 feet. The engine and motor are to be capable of driving the car, fully loaded, either forward or backward, over the main line at a speed of 45 miles an hour on level track, and with a running start up a five per cent grade, 1,000 feet long, at a speed of not less than 10 miles an hour. Instead of the solid roof usually provided with this type of car, one with a ventilating deck, containing side sashes, has been asked for. The interior finish is to be in mahogany; the head linings of sheet steel enameled and neatly striped; the windows to be large and to open as high as possible. The seats are to have reversible backs, with rattan covered back and seat cushions, and mahogany arm rests. An observation platform, 14 feet long, provided with suitable windows to afford protection from rain when running backward, will be installed at the rear end of the car. The motor equipment is to consist of a 6-cylinder, 4-cycle, water cooled engine, equipped with both high extension Bosch magneto, and storage battery ignition, and mechanically operated valves. The lighting will be either by means of a storage electric battery, or with acetylene gas stored in cylinders furnished from the Commission plant. The body of the car will be painted a chrome yellow, and the running gear green.

Engineering Changes.

On May 10, 1911, the engineering department of the Central Division was reorganized. Heretofore, the field and office work has been handled by the resident engineer at Empire, with offices in charge of assistant engineers at Paraiso and Las Cascadas. These two offices have been abolished, and the field and office work heretofore handled in them has been centralized in the Division Engineer's office at Empire, from which point all engineering work in the Central Division will be handled in future, under the jurisdiction of the resident engineer and one assistant engineer.

In making these changes, Assistant Engineer William L. Thompson, formerly in charge of the office at Las Cascadas, has been transferred to the Pacific Division, where he has been placed on work in connection with hydraulic operations below Miraflores Locks. Assistant Engineer Mark W. Tenney, formerly in charge of the Paraiso office, has been transferred to the office of the resident engineer at Empire.

Reservoirs Filling.

The copious rains that have fallen over the Canal Zone watersheds during the past 10 days have had the effect of causing a rise in all of the reservoirs, and of allaying any apprehension that may have been felt regarding a scarcity of water. The greatest rise reported up to May 13 was in the Rio Grande reservoir. The low record of the year at that point was on May 8, when the elevation of the water above sea level stood at 223.38 feet. On May 12, the water elevation had increased to 227.10, or 3.72 feet within a period of five days. About two and one-half feet of this rise came from the heavy rain in the afternoon of May 11. At 5 p. m. on May 14, the reservoir had filled to 229.89, or $6\frac{1}{2}$ feet above the low point. The low point in this reservoir in 1910 was on May 1, when the water elevation was 223.97 feet.

The low point in the Camacho reservoir, which supplies water to Empire and vicinity, was also reached on May 8, when the surface elevation was 341.9 feet above sea level. There has been a greater demand on the storage supply in this reservoir during the past dry season than for the same period in 1910, when the lowest point reached was 349.7 feet on July 12. The recent rains have augmented the supply, and on May 12, the

NOTES OF PROGRESS.

(*Continued.*)

surface elevation stood at 344.5, a gain of two and one-half feet. The Caribali reservoir at Gorgona is also filling. The low point this year was 70.3 feet on May 4, as compared with 76.0 feet on March 23, 1910. The water elevation on May 12 stood at 72.2 feet, a gain of 1.9 feet.

Some heavy showers have fallen on the Atlantic slope since May 1, the total precipitation at Cristobal from the 1st to the 14th being 6.43 inches, and at Brazos Brook, 9.76 inches. These, apparently, were not well distributed over the Brazos Brook watershed, as the elevation in the reservoir, which supplies water to Colon, Cristobal, and Mount Hope, on May 12 was only 37.5 feet, a rise of six inches from the low point of the year, viz., 37 feet, which was reached on May 8. The low point at this reservoir in 1910 was 41.8 feet above sea level on May 9.

The Agua Clara reservoir at Gatun was not in service at the beginning of the rainy season last year. The low point in the supply was reached on May 7, when the surface elevation stood at 56 feet. On May 12, it had risen to 56.5 feet.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 60 per cent completed, 135,211 cubic yards, out of a total of 225,000, having been placed at the close of work on May 13. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
May 8	94	6:00	2
May 9	36	3:00	1
May 10	132	6:00	1
May 11	84	2:00	1
May 12	112	6:00	1
May 13	96	5:30	1
Total	554	28:30	1.17
Previously reported	134,657		
Grand total	135,211		

The Lirio planing mill between Culebra and Empire was shut down in the latter part of April. The machinery is being removed to Gorgona shops.

Building Notes.

The concrete block plant at Ancon, which has been shut down for the past year or two, will possibly be operated again shortly to furnish the hollow concrete blocks of which the new fire station at Cristobal will be built.

The dismantling of the annex to the Culebra hotel is under way, and plans have been made for the removal of a number of other buildings which are in danger of becoming involved in the slide on the west bank. Three houses, one a type-5, and the others, type-18 quarters, will be taken down and moved to Corozal so that they can be used either as bachelor, or nonhousekeeping married quarters. They will probably be situated east of the railroad track.

The Culebra post-office will probably be moved to a site near the commissary, between the cinder path and the roadway. The fire station, which has already been carried about 12 inches out of line by the ground movement, may be relocated south of the Administration building. The site of the time office of the Central Division will probably be changed to north of the railroad station.

The buildings destroyed in the fire at Colon on March 23 are rapidly being replaced, about 15 having been erected to date, all of them of frame construction. Work on a new and larger schoolhouse for colored children, to replace the one burned, has been begun. It will be a one-story, four-room building, 51 by 62 feet, situated on the Mount Hope road, a little south of the former site, and will be constructed of lumber taken from two laborers' barracks at Tabernilla. The Salvation Army rest hall will probably be rebuilt by the Commission on a site about 1,500 feet south of its former location.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 64 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 13, being 1,338,957 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending May 13, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 353½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: May 8th, 46 yards; May 9th, 79½ yards; May 10th, 66 yards; May 11th, 58 yards; May 12th, 54½ yards; May 13th, 49½ yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 77 per cent completed, 647,628 cubic yards, out of a total of 837,400, having been placed at the close of work on May 13. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-Cubic yard mixers			AUXILIARY PLANT.						Large stone.	Total.
				2-cubic yard mixers.			½-cubic yard mixer.

MIRAFLORES LOCKS.

Over 17 per cent of the concrete for the system of two twin locks at Miraflores was in place on May 13, the total amount on that date being 234,636 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixer.

Grand total	....	....	......	....	....	......	....	....	......	3,693	234,636

*The 322 yards were mixed by a ½-yard mixer, the amounts for each day being: May 8th, 43 yards; May 9th 76 yards; May 10th, 43 yards; May 11th, 59 yards; May 12th, 38 yards; May 13th, 63 yards.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

At the meeting of the executive board of the Canal Zone Federation of Women's Clubs held at Cristobal on May 8, a committee on the year book was appointed, composed of the outgoing and incoming corresponding secretaries, the recording secretary, and the treasurer. The book will be issued as soon as possible, and will contain a review of the work and meetings of the Federation for the year 1910-11, with the revised by-laws, and greetings from the new officers. Mrs. A. O. Herman was appointed Federation librarian. She will have the charge of the Federation libraries, and will arrange for their exchange among the schools for the use of the pupils. She will also have charge of the Federation pictures and art library. Communications regarding any of these matters should be addressed to Mrs. Herman at Gorgona. The executive board will not meet again until October.

The Gatun Woman's Club has under consideration a course of study work for the next year. The meetings will continue weekly at the clubhouse for the present.

At the meeting of the Empire club on May 18, the guest of honor will be Mrs. Thomas E. Brown, Jr. The meeting will be held at the clubhouse.

At the meeting of the Paraiso Woman's Club on May 24, the members of the Empire Woman's Club, the teachers of the Paraiso schools, and the pupils of the upper grade will be entertained. There will be an exhibit of the Federation pictures, with an address. This meeting will close the club season which will reopen in September.

The Pedro Miguel Woman's Club held an election of officers in April, when the following were chosen: President, Mrs. George Brown; vice-president, Mrs. H. Girdner; secretary, Mrs. W. T. Piper; treasurer, Mrs. Mark White. The social meeting will be held at the home of the treasurer on May 24.

Church Notes.

The Wednesday evening services at St. Luke's Church, Ancon, have been discontinued. The litany is read on Wednesday and Friday mornings at 9 o'clock.

The annual meeting of the Juvenile Missionary Society of the United Methodist Church was held on Sunday evening, May 14, at the mission rooms, which are situated on the border between the Canal Zone and Panama city. This society is composed of young West Indian men and women. The Rev. C. M. Anderson is in charge.

Miscellaneous Events.

The University Club will give a dance, with German figures, at its clubhouse in Panama, on the night of May 20.

The corner stone of the new Masonic temple, to be erected on the corner of Eleventh and Bolivar streets, Colon, will be laid with appropriate ceremonies on Decoration Day, May 30.

Lawn Tennis.

The following is the result of the tennis tournament in singles held at the Cristobal-Colon courts on May 7:

First round—Farquharson, Colon, defeated Tupper, Culebra, 6-2, 6-1; Bartholomew, Empire, defeated Wells, Gatun, 6-4, 6-3; McMurdo, Ancon, defeated Guptil, Cristobal, 6-4, 6-2; Hunter, Tivoli, defeated Deane, Panama, 6-3, 6-3.

Semifinals—Bartholomew defeated Farquharson, 6-3, 6-1; McMurdo defeated Hunter, 6-2, 6-4.

Finals—Bartholomew defeated McMurdo, 6-2, 2-1, and default.

Corozal, Gorgona and the Marine Corps clubs failed to report for the tournament.

The next tournament will be in doubles at the Tivoli courts, Ancon, near the hospital gate, on May 30. Play will begin at 9 a. m.

Reunion of Employes.

All employes on the Isthmus, formerly in the Supervising Architect's and Master Builder's Departments, will please send full name and address to the undersigned, for the purpose of arranging a reunion banquet.

MAX HERZ.

Mount Hope, C. Z., May 16, 1911.

Red Cross Finances.

The financial condition of the Canal Zone Chapter, American National Red Cross, on May 1 was, as follows:

RECEIPTS.		
April 1. Balance on hand	$2,827.24	
April 5. From Panama Government, account Colon fire	5,000.00	
April 5. From Colonial Musical Association for relief of sufferers, Colon fire	7.50	
April 6. From Cristobal Y. M. C. A., account Colon fire	146.00	
April 11. Proceeds of benefit ball game, Cristobal, account Colon fire	708.15	
April 17. From Gorgona section, for endowment fund	55.00	
April 17. From Lieut.-Col. D. D. Gaillard, for endowment fund	10.00	
April 19. Proceeds of entertainment, National Theatre, April 7, for endowment fund	540.10	
April 24. Donated by Odd Fellows, Las Cascadas, for Colon fire sufferers	40.00	
April 29. Donated to Red Cross funds, employes of Panama railroad, Colon	16.28	
April 29. Membership dues during month	19.00	
Total receipts		$$9,369.27
DISBURSEMENTS.		
April 11. Relief of American at Cristobal	$15.00	
April 18. F. G. Smith, Gatun, printing supplies	2.84	
April 22. Postage	2.00	
April 27. Isthmian Canal Commission, printing and supplies, account entertainment, April 7, for endowment fund	40.62	
April 27. Empire Dramatic Company and Cristobal Vaudeville Company, account entertainment for endowment fund	100.00	
April 30. Disbursed to date on account of Colon fire	1,055.66	
Total disbursements		$1,216.12
April 30. Balance on hand		$8,153.15
On hand in general fund		$2,842.68
On hand in endowment fund		464.48
On hand in Colon fire fund		4,845.99
Total		$8,153.15

JOHN L. PHILLIPS, *Treasurer.*

Approved: C. A. DEVOL, *Chairman.*

Anti-Cigarette League.

The Boys' Anti-Cigarette League at Gorgona has just passed its second anniversary. Section No. 1, composed of boys from 12 to 16 years old, has held its meetings without a break in the schedule on alternate Wednesday evenings at the home of the league superintendent, Mrs. A. L. Hackenberg. It has a circulating library to which new books are added from time to time. The boys are interested in the Boys' Temple, which is to be erected in Chicago, and all of them have subscribed to the fund. At a recent meeting, Mr. Melville Booz addressed the boys on "Character building." There are 12 members in the section.

The membership of the junior section has increased from 11 to 23 during the past year. Their meetings are held at the home of the superintendent of the section, Mrs. J. B. March, on Friday evening of each week. There are no dues, but the treasury is maintained by a collection which is taken up at each meeting. The section has purchased a library of 30 books which are now in circulation among the members. Officers recently elected to serve for six months are: President, Carl Paulus; secretary, Ray Fisher; treasurer, Marcus Quinn; doorkeeper, Steven Duran.

The Anti-Cigarette League was organized on the Isthmus in 1909, by Dr. Dora Martin of Chicago, official representative of the National Anti-Cigarette League of America.

Memorial Day.

The United Spanish War Veterans, with the cooperation of the Red Men, Knights of Pythias, Odd Fellows and others, will hold memorial services at Mount Hope cemetery at 10 o'clock, Sunday morning, May 28

All American organizations in the Canal Zone are invited to attend these services; also, all other Americans who are not affiliated with any society. Judge Thomas E. Brown, Jr., of Cristobal will deliver the address.

Fourth of July Celebration.

At a meeting of the committee, appointed for the purpose of making arrangements for the celebration of the Fourth of July on the Isthmus, held at Ancon on May 13, it was decided to hold only one celebration and that at Cristobal. The chief clerks of the various departments and divisions will be requested to act as members of the finance committee for the purpose of furnishing subscription blanks and receiving money to pay for the celebration. The amounts remaining from last year's celebration will be available to help pay for this year's observance. The following executive committee was appointed, the members of which will act as chairmen, and select the members of the various committees:

Mr. H. H. Rousseau, Chairman.
Mr. Geo. A. Ninas, Secretary.
Capt. H. W. Stickle, Entertainment and Amusement.
Mr. J. A. Smith, Transportation.
Mr. E. J. Williams, Finance.
Capt. R. E. Wood, Fireworks.
Dr. J. C. Perry, Dance.
Mr. Tom M. Cooke, Publicity.

A meeting of the executive committee will be held in the Administration building at Ancon on Saturday, May 20, at 2 p. m.

Steam Shovel and Dredgemen.

The I. B. of S. S. and D. M. will hold its regular meeting on Sunday, May 21, at the I. C. C. lodge hall, Empire, at 12.15 p. m. We have some special business to transact, and it is absolutely important that all brotherhood men attend at this meeting.

WALTER P. TUDOR,
Secretary and Treasurer.

Empire, C. Z., May 11, 1911.

The British cruiser *Kent*, Capt. Stuart St.J. Farquhar, arrived at Panama on May 8, and the *Challenger*, Capt. Guy R. A. Gaunt, arrived on May 11. All the officers were given an opportunity to see the Canal works, and a special train was run along the line for the enlisted men.

CANAL MEDAL SERVICE BARS.

The following list contains the names of employes of the Isthmian Canal Commission, and Panama Railroad Company who completed six or four years' continuous service on the Isthmus, between January 1 and December 31, 1910, and for that reason are entitled to receive a medal bar. The list is published in order that it may be carefully checked by those interested. Any omissions, errors in the spelling of names or in the dates from which bars become due, should be reported to the Office of the Chairman at Culebra, for correction.

1910.

P. R. R. INSURANCE.

No Policies will be Carried Hereafter Covering Fire or Marine Losses.

The Sundry Civil Act of March 4, 1911, contained a provision that, "Hereafter, the Panama Railroad Company shall carry no insurance to cover marine or fire losses, nor make any further payment on the principal or interest on notes heretofore given by it to the United States for moneys appropriated for its use."

This law supersedes that of the Acts of 1908, 1909, and 1910, which provides that appropriations for Canal work might be used to reimburse the Panama railroad, for any marine and fire losses, and that the railroad company should no longer carry insurance. Under the new law, the railroad will neither carry insurance, nor be reimbursed for marine and fire losses from Canal funds, the Government policy of not carrying insurance, being established.

During the nine years and one month preceding July 1, 1908, the Panama Railroad Company paid for insurance: On account of the steamship line, aggregating $296,402.34; and for the 25 months ending July, 1908, premiums were paid on account of the railroad amounting to $48,529.20.

During this period underwriters reimbursed for losses, as follows: On account of steamship line $118,470.57; on account of the railroad $9,082.79.

Motor Car Repair Shop at Culebra.

An addition will be made to the motor car garage at Culebra, which will provide space for the installation of a lathe and other machinery for making ordinary repairs to motor cars. Some of the equipment for this purpose will be transferred from the Cocoli shop of the Pacific Division, which was shut down a short time ago. Three additional tracks will also be provided, making four in all, three of them to be used in housing the motor cars, and the fourth as a repair track, with a pit underneath. On the lower floor of the building, as enlarged, there will be, in addition to the track space and main repair shop, a forge room, store room, and quarters for three flagmen. On the second floor are quarters for three motor car drivers. There are six motor cars in the service of the Commission, one in each of the three engineering divisions, and three stationed at Culebra.

Postal Business and Canal Zone Revenues.

The report of the Director of Posts for the month of April shows that 17,933 money orders were issued, amounting to $450,472.57. Of this amount, $335,854.11 was issued payable in the United States, $113,893.76 payable in the Canal Zone, $565.70 in Martinique, and $159 in Costa Rica. The fees collected amounted to $1,976.87, and the amount paid and repaid was $121,382.72.

Postal sales during the month amounted to $6,051, and newspaper postage $0.10.

The revenue collections for the month were, as follows:

Distillation licenses	$264.16
Insurance companies' fees	50.00
Motor vehicle licenses	37.00
Taxes, licenses, etc	10,399.48
Total	$10,750.64

Care of Disabled and Indigent Canal Workers.

The following bill has been introduced in the House of Representatives by Representative G. W. Kipp of Pennsylvania, and has been referred to the Committee on Interstate and Foreign Commerce:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on and after July first, nineteen hundred and eleven, all disabled or indigent employes of the United States of America on the Panama Canal, or works adjacent thereto, shall be admitted, kept, and sustained by the United States of America in the several soldiers' homes of the United States, under such rules and regulations as the Isthmian Canal Commission may determine.

PERSONAL.

Maj. E. Eveleth Winslow, Corps of Engineers, U. S. A., arrived on the Isthmus on the *Panama* on May 12, for consultation regarding the fortifications of the Canal.

Lieut. Walter D. Smith left on the *Ancon*, on May 10, on his annual leave of absence in the United States.

Mr. Homer A. A. Smith, who has been appointed Examiner of Accounts, accompanied by his family, will arrive on the Isthmus on the *Advance* on May 19.

Rifle Match.

The Canal Zone Rifle Club met the Marine Corps riflemen in a match on the range at Gamboa on May 14, with the following result:

U. S. M. C., CAMP ELLIOTT.

Pilots, Masters, Mates, and Engineers.

A meeting of the Board of Local Inspectors will be held on Wednesday, May 24, at 8 a. m., at the Administration building, Ancon, at which time applicants for licenses as pilots, masters, mates, or engineers, who have submitted applications on the prescribed form, may appear for examination.

Examination of Colored Teachers.

Colored teachers not holding exemption certificates issued from this office, and all others who desire, may sit at the examination to be held on Saturday, June 10, 1911, at the Ancon schoolbuilding. There will be two sessions of this examination, the first from 8 to 11.30 a. m., and the second from 1 until 4 p. m. The subjects will be United States history, arithmetic, geography, grammar and hygiene.

The examination is open to all, and no application need be made to this office.

FRANK A. GAUSE,
Superintendent of Schools.

Ancon, C. Z., May 10, 1911.

The Hamburg-American Line announces a special rate of $50 between New York and Colon, for students under 20 years of age, presenting a certificate from the principal of the school which they are attending. The reduced rate will be in effect from June 15 to September 30.

EXECUTIVE ORDER.

Imprisonment for Return After Deportation.

By virtue of the authority invested in me, I hereby establish the following Order for the Canal Zone:

Article 1. If any person after having been convicted and having served a sentence of imprisonment in the Canal Zone, and after being deported therefrom, returns to the Canal Zone, he shall be deemed guilty of a felony and punished by imprisonment in the penitentiary for one year, and thereafter removed from the Canal Zone in accordance with the laws and orders relating to deportation.

Article 2. This order shall take effect from and after this date. WM. H. TAFT.

THE WHITE HOUSE, *May 2, 1911.*
[No. 1345.]

United Spanish War Veterans.

The next regular meeting of Col. Wm. L. Sibert Camp, No. 1, U. S. W. V., will be held in Gatun lodge hall on Sunday afternoon, May 28. All veterans are invited to attend. All men eligible to membership in the U. S. W. V. are invited to a "smoker" to be held in Gatun lodge hall on Saturday evening, May 20, under the auspices of Sibert and Chagres camps. Refreshments will be served.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending May 13, follows:

DATE.	Hours worked.	Cubic Yards.
May 8	7:35	2,538
May 9	7:40	2,479
May 10	6:10	2,566
May 11	7:20	2,567
May 12	6:40	2,714
May 13	7:45	2,991
Total	43·10	15,855

Porto Bello Crusher.

A statement of the work done at Porto Bello crusher, by days, for the week ending May 13, follows:

DATE.	Hours worked.	Cubic Yards.
May 8	4:44	1,890
May 9	5:12	2,295
May 10	5:15	2,205
May 11	5:03	2,284
May 12	4:07	2,092
May 13	4:13	1,587
Total	28:34	12,353

Obituary.

James B. Harlow, an employe of the Atlantic Division residing at Panama, died in Ancon Hospital on May 12. He was 36 years of age, and had been on the Isthmus five years, coming here from New York. He is survived by his wife.

William A. Skipper, an employe of the Panama railroad, died at the dispensary at Monte Lirio on May 11. He was 41 years of age, and had been on the Isthmus 15 years, coming here from Russ, Texas. He is survived by his wife, Catherine Skipper, living at Tabernilla, C. Z.

Missing Men.

Any one having information regarding the whereabouts of Edward Barclay, who is supposed to be on the Isthmus of Panama, is requested to communicate with W. M. Duncan of Russellville, Ky.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

The next entertainment to be given in the clubhouses will be that of Professer Erneste Kellermann, by the Hill Magical Company. Professor Kellermann has a complete outfit for his work valued at several hundred dollars. He performs mostly with apparatus, and the entertainment is, therefore, spectacular. The following dates have been arranged: Gatun, Monday, May 22; Gorgona, Friday, May 26; Cristobal, Tuesday, May 30; Empire, Wednesday, June 7; Corozal, Friday; June 16; Culebra, Thursday, June 22.

COROZAL.

The Culebra indoor baseball team defeated the local team on Saturday night, May 13, by the score of 18 to 17.

The Culebra boys played baseball with the Corozal boys on Saturday morning, and Culebra won.

At the concert on Sunday evening, a chorus of 16 voices assisted in carrying out the following program: Introduction, orchestra; song, "Holy, Holy, Holy," congregation; Bible reading and prayer, the Rev. A. A. Nellis; "Unfold the Portals" (Redemption, by Gounod,) Corozal chorus; address, the Rev. A. A. Nellis; tenor solo, "Rock of Ages," (H. Johnson,) Mr. Kramer, violin obligato, Miss LeMay; "Holy Art Thou" (Largo, Xesxes) "Ninety and Nine," (Campion,) Mrs. Boyd; "The Heavens Are Telling," (Creation,) Corozal chorus; "My Country 'Tis of Thee," congregation. Those taking part in the concert were; Soprano soloist, Mrs. A. P. Boyd; pianists, Mrs. A. G. Farmer, and Mrs. R. C. Hinton; tenor soloist, G. R. D. Kramer, Jr.; violinist, Miss L. LeMay; tenors, F. J. Wallace, A. R. Smith, A. Sales, G. R. D. Kramer, Jr.; sopranos, Mrs. A. P. Boyd, Mrs. R. A. Bennett, Mrs. V. T. Cornwell, Mrs. R. C. Hinton; basses, H. O. Cole, W. R. Catline, A. S. Garrison, R. A. Wilson, F. H. Nagle; altos, Mrs. R. Norton, Mrs. H. E. Walton, Miss A. Mostella, Miss L. LeMay; musical director, G. R. D. Kramer, Jr.

CULEBRA.

In the bowling match last Saturday night, Cristobal took three straight games from Culebra. The score follows:

Cristobal.				Culebra.			
Barrett	79	101	110	Conlon	83	84	104
Rosteck	82	90	93	Crain	91	89	79
Furlong	106	94	102	Hurst	87	97	69
Herrington	113	81	95	Judge	96	85	97
Louch	77	81	109	Mengel	86	84	110
Total	457	447	509	Total	443	439	459

A gymnasium class for men will be started next week, meeting on Monday and Thursday afternoons from 5.15 to 5.45. Systematic exercise of a recreative nature will govern the work and special stress will be laid on individual needs.

EMPIRE.

Empire took two out of three duckpin games from Gorgona on Saturday evening, May 13, by the following score:

Empire.				Gorgona.			
Davis	81	85	83	Simka	80	87	84
Pinney	87	87	81	Siebt	76	73	87
Sawtelle	87	89	108	Atkins	78	70	81
Giavelli	69	87	79	Orr	76	82	105
Rodeghiero	92	95	87	R. Van	80	89	....
				Haldeman			105
Total	416	443	438	Total	390	401	462

The following high scores were rolled in duckpins during the past week: P. F. Brown, 112, 100; Nelson, 101; Lippert, 105, 100; Pinney, 103, 100, 107; Van Brocklin, 104; Giavelli, 103; 105, 101, 102; Reiman, 107, 109; Gorham, 100, 103; Potter, 112, 103; Rodeghiero, 100; Akers, 104; Johnson, 110, 111; Parkis, 110.

The following program was given in the hall on Friday evening, May 12: Concert by Gilman's orchestra; reading, O. Harlan; discussion of the Mexican situation by Messrs. Zacharias and Simpson; and of "The rise and growth of socialism," by Mr. Sawtelle; refreshments.

The literary society is contemplating a debate by the older school boys of Empire in the near future.

All the May records have been added to the graphaphone library. Among them is one of the song of a captive nightingale, the first made of a bird's song.

A committee has been appointed to make an index, by subject, of the leading contents of the magazines and papers.

The baseball game scheduled for May 13 was forfeited to Empire, because of the nonarrival of the Gatun team.

GATUN.

A farewell reception was tendered to Archie O. Ludwig, physical director, and Mrs. Ludwig, on Tuesday evening, May 9. The hall was decorated with flowers pictures and pennants. The following program was given: Piano selections, medley of popular airs, A. B. Dickson; tropical male quartet, Messrs. Ross, Dickson, Young and Case; soprano and tenor duet "Il Trovatore," Mrs. Ludwig and Mr. Ross; baritone solo, Frank Young; tenor solo, A. B. Dickson; bass solo, E. Paul Case; humorous sketch, Frank Young; soprano solo, Mrs. A. O. Ludwig; tenor solo, W. G. Ross; selection, tropical male quartet; remarks by the secretary, the Rev. C. O. Purdy, C. C. Carr, and Charles E. Wood. Presentation of gifts to Mr. and Mrs. Ludwig and daughter, Dorothy, was made by the secretary in behalf of the council and Y. M. C. A., and a set of resolutions was also presented.

The "Life problem" club discussed "The church as an institution" on Sunday night, May 14, and will take up the problems of the physical life on Sunday evening, May 21.

At the literary club's meeting on May 10, Mr. Smith and Mr. Williams upheld the affirmative, and Mr. Gilkie and Mr. Dougherty the negative of a debate on "Resolved that every voter should have at least a common school education." On May 17, the subject for debate will be "Resolved that the world is growing better;" affirmative, Messrs. Cotton and Roudabush; negative, Messrs. Purdy and Rosselot. The chairman of the judges will be R. M. Sands.

The "D A K S" defeated the Gatun Ds two out of three games of duckpins on May 10.

CRISTOBAL.

The standing in the Isthmian Duckpin League is, as follows:

	Played.	Won.	Lost.	Per cent.
Cristobal	24	19	5	.797
Empire	24	13	11	.541
Culebra	24	11	13	.458
Gatun	24	9	15	.375
Gorgona	24	8	16	.333

Cristobal won two out of three games on Saturday night in the duckpin league series from Culebra in the following scores:

Culebra.				Cristobal.			
Fredericks	97	86	81	Smith	101	85	96
Huttlemeier	89	84	89	Jacques	93	79	82
Kersey	87	81	93	DeCora	92	87	114
Hill	87	95	97	Sullivan	84	97	91
Case	82	101	84	Herring	89	80	112
Total	442	447	444	Total	459	428	495

The literary and debating club met on Wednesday night, with the following subject for debate: "Resolved that the Panama Canal shall not be fortified." Messrs. Chambers and Elliott debated for the affirmative, and Messrs. Wempe and Richards for the negative. Messrs. Hoyt, Storla and Hackenberg acted as judges, rendering a decision in favor of the negative.

The Gatun debating society has challenged the Cristobal debating club to a joint debate to be held in the near future.

On Wednesday of this week, there is to be a discussion on New York City politics by Judge Thos. E. Brown, Jr., and C. J. Dinnon, both of whom have been actively interested in New York politics.

Lease of Lots in Colon.

Sealed bids will be received up to 5.30 p. m., Wednesday, May 31, 1911 for lease to the highest bidder of lots in the newly filled section of Colon as shown on plans which may be seen at the Land Office in Colon and at the Land Office in Panama.

These sealed bids must be addressed to the General Superintendent of the Panama Railroad Company, Colon, and must be plainly marked on the outside of the envelope "Proposal for lot No. ——, block No. ——, Colon." Bids not marked in this manner will not be considered.

The minimum rental to be accepted for these lots may be ascertained by applying to either one of the above mentioned Land Offices.

Persons holding options on any lots in this district and having paid rental up to June 30, 1910, will have the privilege of taking the lot at the highest rate offered.

The lots to be leased are those on the west side of E street between 2d street and 14th street, and that district on the east side of E street bounded by 2d street on the north, 9th street on the south, E street on the west and G street on the east,

Those lots on the west side of E street will be available for building on or about June 1, 1911; the balance of the lots will not be available for building before October 1, 1911.

Parties submitting bids must state character and purpose of building they intend to erect, and must indicate period of time in which they expect to commence construction after assignment.

Application blanks may be obtained at the Land Office in Colon and Panama.

All rental is to be paid quarterly in advance.

The Panama Railroad Company reserves the right to reject any or all bids.

J. A. Smith,
General Superintendent.

Colon, R. P., April 22, 1911.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending May 24, 1911, (75th meridian time):

Date.	Low.	High.	Low.	High.

OFFICIAL CIRCULARS.

Acting Chief Sanitary Officer.

CULEBRA, C. Z., May 10, 1911.

CIRCULAR No. 389:

During the absence on leave of Colonel W. C. Gorgas, Chief Sanitary Officer, beginning May 11, 1911, Lieutenant-Colonel John L. Phillips is designated as Acting Chief Sanitary Officer.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Transportation of Employes.

CULEBRA, C. Z., May 10, 1911.

CIRCULAR No. 175-F:

1. Effective this date, the following rules will govern the issuance of free and reduced transportation to employes on the steamers of the Panama Railroad Steamship Line, *upon termination of service*:

(*a*) *Free Transportation*—To American employes, irrespective of the origin of their appointment, who resign, or are discharged, after two year's continuous service; to American employes, irrespective of the origin of their appointment, whose employment is terminated by, or at the instance of the Commission, after less than two years' service, for any reason other than inefficiency or misconduct; to aliens appointed in the United States who resign, or are discharged, after two years' continuous service; to aliens appointed in the United States whose employment is terminated by, or at the instance of the Commission, after less than two years' service, for any reason other than inefficiency or misconduct.

(*b*) *Thirty Dollar Rate*—To American employes appointed after December 31, 1908, who resign, or are discharged for inefficiency or misconduct, after serving more than six months, but less than two years; to aliens appointed in the United States who resign, or are discharged for inefficiency or misconduct, after serving more than six months, but less than two years; to aliens appointed on the Isthmus who resign, or are discharged for inefficiency or misconduct, after serving two years; to aliens appointed on the Isthmus who are discharged on account of reduction in force, regardless of length of service.

(*c*) *Forty-five Dollar Rate*—To American employes who resign, or are discharged for inefficiency or misconduct, after serving less than six months; to aliens appointed in the United States who resign, or are discharged for inefficiency or misconduct, after serving less than six months; to aliens appointed on the Isthmus who resign, or are discharged for inefficiency or misconduct, after serving less than two years.

(*d*) *Fifteen Dollar Steerage Rate*—To all employes on the gold roll, and American employes on the silver roll, who may apply for it.

2. Employes entitled to free transportation to New York on the Panama Railroad Steamship Line may be granted instead free transportation to New Orleans on the United Fruit Company, or Leyland Line, if they so desire: or free transportation to San Francisco on the Pacific Mail Steamship Company's Line, provided they originally sailed from that port under regular appointment from the Washington office.

3. An employe entitled to free transportation to New York or New Orleans, however, who desires to return to the United States via San Francisco, will be granted a reduction of forty dollars (which the Commission pays for transportation to the former points) from the regular employe's rate to San Francisco, the forty dollars to be paid by the Commission direct to the steamship company.

4. Transportation must be applied for within 30 days from the date of termination of service, and will not be issued for a steamer scheduled to sail more than 60 days from the date of such termination.

5. An employe who enters upon leave of absence, and whose service will terminate at the expiration thereof, will not be granted free transportation, but only such transportation as he may be entitled to on account of leave.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

CULEBRA, C. Z., May 12, 1911.

CIRCULAR No. 175-G:

An employe appointed on the Isthmus for temporary service will not be accorded the benefits of Section "*a*," Paragraph 1, of Circular No. 175-F, upon the termination of such temporary employment.

Employes so appointed will be granted the thirty dollar rate upon termination of service, at the instance of the Commission, for any reason other than inefficiency or misconduct.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Patterns for Castings.

CULEBRA, C. Z., May 15, 1911.

CIRCULAR No. 197-I:

When a work request is submitted on Form 159 C. E. for the making of a casting by the Mechanical Division in accordance with a new drawing, the head of the division or department will send a print thereof to the Superintendent of the Mechanical Division with request that the number assigned to the pattern be entered on the print and the latter returned, in order that the correct pattern number may be entered on the tracing of the drawing. As far as practicable, prints of the tracing should be made for distribution to construction and shop officials, except the prints accompanying the work request for the castings, after the pattern number has been entered on the tracing.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Supplies for Canal Work.

The Hamburg-American steamers Prinz August Wilhelm and Prinz Joachim leave Colon for New York via Kingston and Santiago, Cuba at 10 a. m. on sailing dates.

A local run from Colon to Bocas del Toro and Port Limon will be made on Wednesday May 31; June 14 and 28.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (†) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

The Leyland line steamer *Jamaican* sails for New Orleans, via Port Limon, Costa Rica, on or about May 22.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MAY 24, 1911. No. 39.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of April is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of Canal work in all departments and divisions.

Contract for the Emergency Dams.

The contract for the six emergency dams for the locks at Gatun, Pedro Miguel, and Miraflores has been let to the lowest bidder, the United States Steel Products Company at $2,238,988.40. Three bids were received. The subbidders with the contractor are the General Electric Company for the electrical machinery, and the Otis Elevator Company for the hoisting machines. A description of the dams was published in THE CANAL RECORD of March 8, 1911. The total amount of material required is about 12,000 tons. The contract calls for the material, erection, and test of the dams in place by January 1, 1913, at Gatun and Pedro Miguel, and September 1, 1913, at Miraflores.

Panama Railroad Apartment House.

Plans have been approved for the erection, by the Panama Railroad Company, of a three-story apartment house of fireproof construction on the corner of Front and Eleventh streets in Colon, replacing the one-story wooden store building, and the frame cottage, now on the premises. The drawings provide for a building made of terra cotta hollow tile, 50 feet wide by about 120 feet long, with a 9-foot passageway extending north and south through the center. The lower floor will be divided into five stores, two, each 26 by 55 feet, facing Front street, and three, each 18 by 50 feet, facing Eleventh street. The floors will be of hollow tile filled in between with reinforced concrete, covered with a thin layer of concrete, and overlaid with pine flooring. The second and third floors will rest on I-beams supported by reinforced concrete columns reaching to the roof. The stores on the first floor will have modern plate glass fronts, and all window and door casings in the building will be of metal work. The walls will be of 6-inch, and the roof of 4-inch, hollow tile, the latter to have a 2-foot coping all around. The second and third floors will be fitted up for 5-room flats, four to each floor. A veranda will surround the building on both floors, ranging in width from 12 feet on the Eleventh street side, to 10 feet on Front street, 6 feet 6 inches on Bottle alley, and eight feet on the side north.

Test of Concrete Spraying Machine.

A pneumatic spraying machine for coating surfaces with concrete mortar has been sent to the Isthmus by the General Cement Products Company, and it will be tested for a period of 30 days in coating the surface of rock in Culebra Cut, for the purpose of preventing deterioration. Much of the rock in the Cut, which is hard and firm when first excavated, crumbles rapidly on exposure to the air.

Excavation at Mindi.

Three steam shovels are at work in the excavation below sea level at Mindi, and the material dug is used for back fill at Gatun locks, or dumped on the dam. Part of the excavation which can be much more economically handled by the sluicing method is washed into a sump from which it is raised out of the excavation by three 8-inch French pumps which form part of the plant installed for keeping the pit dry. About 15,000 cubic yards have been handled by this method, and there remain about ten thousand yards more. The steam shovel work will be completed in about six months.

Long Suction Dredge Line.

Dredge No. 86, which is making the fill of Colon, is now pumping through the longest line of discharge pipe ever laid on the Isthmus, and one of the longest, without relay, of record. By actual chaining, the pipe from the dredge to the fill at Colon hospital is 7,150 feet long. The material is delivered by the 20-inch pump without a relay. The pipe is laid on level ground, and the pressure required runs up to 70 pounds.

Transfer of Equipment.

Material for the construction and maintenance of the Panama railroad telephone lines will be transferred to the Quartermaster's Department, and kept in stock at the Empire store. In addition, all repairs to telephone equipment will be made at that store, and a shop for the purpose is being installed in the space allotted to the telephone department.

The upkeep of all steam shovel repair parts at the Empire store has been assumed by the Quartermaster's Department. Heretofore, this class of material has been requisitioned by the Central Division, when required, and held in stock subject to order. Under the new plan, it will become part of the regular stock in store.

Four of the 10 Model 60 Marion steam shovels on the Isthmus have been returned to stock at Empire, there being no place where they can be used to advantage at present. Five Bucyrus shovels, employed in the Chagres section, north of Gorgona, up to the time of the suspension of work in that locality, have been hauled to the shop yard at Empire, where they will be placed in thorough repair.

Map of P. R. R. Relocation.

A large map, showing the route of the Panama railroad relocation from Mount Hope to Bas Obispo, is being made in the offices of the railroad company at Colon. It is on a scale of 400 feet to the inch, and will show all the surveys that have been made for the relocated line, and also, the two surveys for the freight line which may be built between Monte' Lirio and the Cristobal railroad yards, following as direct a line as possible, to avoid the detour into Gatun. The earliest of the surveys, as shown on this map, will be that of July, 1906.

Derrick Barges for Colon Breakwater.

Two derrick barges, to be used in placing rock in the work of facing the new breakwater at Toro Point, are under construction at the Cristobal drydock shops. The hull of one is more than 65 per cent completed, and will be finished early in June, and construction of the second has been begun.

The hull is of wooden construction, with a length over all of 96 feet, beam 42 feet, depth 8 feet 6 inches, and is divided into four single water-tight compartments. The derrick is provided with a 75-foot boom, is of the stiff-legged type, having two A-frame legs and two stiff back legs. The height to the top of the A-frame is about 48 feet. The cast iron bull wheel is 16 feet in diameter, operated by double swinging lines. A friction brake will hold the boom at any desired position along the line of its horizontal movement. The boom hoist will have a vertical movement of about three-fourths of a foot a second, and will be rigged with a seven-part line; the load hoist will have a vertical movement of about one and one-half feet a second, and will be rigged with a four-part line. The turntable, on which the derrick will revolve, is of the dredge type, will weigh about 10,000 pounds, and will be cast in six segments. The total weight of the material entering into the derrick is about 75,000 pounds.

The machinery equipment of each barge will consist of a Scotch marine boiler 11 feet 6 inches in diameter by 9 feet in length, and 125-pound pressure; a double drum hoisting engine of the Lidgerwood type, with 14 by 18-inch cylinders, and an 8 by 8-inch compound geared swinging engine, with the necessary equipment of pumps, etc. An oil-burning system will be installed in the boiler, and tank

NOTES OF PROGRESS.

(Continued.)

capacity for 2,000 gallons of oil will be provided in the hold of the vessel. The machinery will be enclosed in a wooden deck house, 27 feet wide, 30 feet long, and 16 feet high, built so that the sides can be thrown open for ventilation. Mounted on top of the deck house will be the operating room, 8 by 10 feet in size, from which point the operator will be in control of all machinery.

In operation, the derrick barges will be stationed at desired points along the breakwater. Barges, loaded with rock from the Porto Bello quarry, will be towed alongside. The derrick will lift the pieces of rock, and place them on the outer or inner side of the breakwater, as the case may be.

Sale of Old Buildings.

Fifteen of the 143 old buildings advertised for sale on competitive bid have been sold, as follows: Cristobal, house 99, W. W. Wilson, $100.50. Bohio, house 66, E. Sardi, $12; house 75, Geo. Clarke, $10. Tabernilla, houses 34 and 35 at $20.50 each; house 36, $18.50; house 37, $20.50, all to J. L. Flowers. Mamei, house 209, A. J. Pareira, $10. Whitehouse, house 161, W. H. Decker, $55. Cucaracha, houses 186, 187, 188, 189, at $50 each, all to Alex. A. Spence; house 191, Wo Kee, $55. One bid of $3,003 was received for all the buildings, but since this was only about fifty per cent of the appraised value of the buildings to the Commission the bid was not considered.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 60 per cent completed, 135,987 cubic yards, out of a total of 225,000, having been placed at the close of work on May 20. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
May 15	116	5:00	1
May 16	164	7:00	1
May 17	152	8:00	1
May 18	148	8:00	1
May 19	88	6:30	1
May 20	108	8:00	1
Total	776	42:30	1
Previously reported	135,211		
Grand total	135,987		

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending May 20, follows:

DATE.	Hours worked.	Cubic Yards.
May 15	7:50	2,829
May 16	6:50	2,368
May 17	6:00	2,179
May 18	6:45	2,570
May 19	7:30	2,578
May 20	7:00	2,320
Total	41:55	14,844

A contract for 230,000 feet of long leaf yellow pine cross-ties has been let to William P. Cook & Company of New York at 78.8 cents a tie.

Transients at Washington Hotel.

The ground floor of the Bennington House, which adjoins the Washington Hotel at Colon, has been turned into rooms for transient guests. It contains ten rooms and two baths. The Bennington now has twenty-two rooms, with beds for from 35 to 40 people, for which a charge of from $2 to $3 a day is made for one person in a room, and from $4 to $6 a day for two persons. A monthly rate is made to employes of the Commission or Panama Railroad of $30 for one person, and $45 for two; for transients, $45 for one person, and $60 for two. Nonemployes who occupy a room regularly will be given a rate of $30 a month for the regular meals at the Washington Hotel.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 65 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 20, being 1,352,928 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending May 20, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours. The small output for the past week is accounted for by the fact that slides at the north end of the lower lock prevented the moving of the steel forming into that lock.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 436⅓ yards shown for the portable mixers are reinforced concrete, and were placed on the following days; May 15th, 58⅓ yards; May 16th, 37⅓ yards; May 17th, 59 yards; May 18th, 99 yards; May 19th, 82 yards; May 20th, 100⅔ yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is about 78 per cent completed, 651,080 cubic yards, out of a total of 837,400 having been placed at the close of work on May 20. The record for each of the six eight-hour working days of last week, follows.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.						Large stone.	Total.
				2-cubic yard mixers.			½-cubic yard mixer.

EXECUTIVE ORDER

Relating to the Arrest and Discharge of Deserting Seamen.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

1. If any seaman who shall have signed a contract to perform a voyage shall absent himself from an American vessel at any port or place in the Canal Zone, without leave of the master, or officer commanding in the absence of the master, such master or the Collector of Revenues or his deputy acting as the Shipping Commissioner may make complaint against such absent seaman to the judge of any Circuit Court of the Canal Zone, who, thereupon, shall issue his warrant against the seaman complained of, in order that he may be brought before him to answer the complaint; and, after a hearing before said judge, if it shall appear that the seaman had signed a contract to perform a voyage on the vessel and that the voyage agreed for is not finished or altered, or that the contract was not otherwise dissolved, and that such seaman has deserted the vessel, or absented himself therefrom without leave, the judge shall commit him to jail to remain there until the vessel shall be ready to proceed on her voyage, or until the master shall require his discharge, and then to be delivered to the master, the latter paying all the costs of such commitment which may be deducted by him from the wages due to such seaman.

2. If it shall appear on the hearing hereinbefore provided for that the voyage of the vessel is continued contrary to agreement, or that the vessel is badly provisioned, or unseaworthy, or that the officers of the ship have been guilty of cruel treatment toward the seaman, he shall be discharged and the judge shall require the master to pay such seaman one month's wages over and above the wages due at the time of discharge, and to provide him with adequate employment on board some other vessel, or provide him with a passage on board some other vessel bound to the port from which he was originally shipped, or to the most convenient port of entry in the United States, or to a port agreed to by the seaman, and the seaman shall have a lien on the vessel to compel compliance with the order of the judge, who shall have authority to issue all writs necessary to enforce his jurisdiction; and the judge shall cause to be entered upon the crew list and shipping articles and official log the cause of discharge and the particulars in which the cruel or unusual treatment consisted, and shall cause his name to be subscribed thereto officially, and shall cause the entry made in the official log to be read to the master. The latter's reply thereto, if any, shall likewise be caused to be entered and subscribed in the same manner.

3. If any consul or vice-consul of any foreign government, who is commissioned to the government of the Republic of Panama and is recognized by the United States in the Canal Zone, such foreign government having a treaty with the United States, or with the Republic of Panama, stipulating for the restoration of seamen deserting, shall make application in writing stating that the person therein named has deserted from a vessel of any such government while in any port of the Canal Zone, and shall furnish proof by the exhibition of the register of the vessel, ship's roll, or other official document, that the person named belonged, at the time of the desertion, to the crew of such vessel, it shall be the duty of any judge of any Circuit Court of the Canal Zone, to issue warrants to cause such person to be arrested for examination. If, on examination, the facts stated are found to be true, the person arrested, not being a citizen of the United States, or of the Republic of Panama, shall be delivered up to the consul or vice-consul, to be sent back to the dominions of any such government, or, on the request and at the expense of the consul or vice-consul, shall be detained until the consul or vice-consul finds an opportunity to send him back to the dominions of any such government. No person so arrested shall be detained more than two months after his arrest, but at the end of that time shall be set at liberty, and shall not be again molested for the same cause. If any such deserter shall be found to have committed any crime or offense, his surrender may be delayed until the tribunal before which the case shall be pending, or may be cognizable, shall have pronounced its sentence, and such sentence shall have been carried into effect.

4. This Order shall take effect from and after this date. WM. H. TAFT.

THE WHITE HOUSE, *May 6, 1911.*

[No. 1348.]

ORDINANCE

Prohibiting Hunting and Other Trespassing Upon Reservoirs and Watersheds of the Canal Zone.

Be it ordained by the Isthmian Canal Commission:

Section 1. It shall be unlawful for any person to hunt on any of the reservoirs of the Canal Zone, from which water is drawn for the use of the inhabitants of any city, municipality, district or settlement or on any of the established watersheds of any such reservoirs; and no person except under authority of the Isthmian Canal Commission or the Panama Railroad Company, shall enter upon any of said reservoirs or watersheds for any purpose.

Section 2. Any person who violates any of the provisions of this ordinance shall be deemed guilty of a misdemeanor, and shall be punished as prescribed by Section 16 of the Penal Code.

Section 3. This ordinance shall take effect 30 days after its approval by the Secretary of War.

Respectfully,

GEO. W. GOETHALS, *Chairman.*

Approved: J. M. DICKINSON,
Secretary of War.

April 26, 1911.

Mosquito Pests.

Concerning the unusual number of mosquitoes infesting the Canal Zone at the present time, a report has been made to the Sanitary Department by Mr. A. H. Jennings, Entomologist, which contains, among others, the following statements:

The great bulk of these mosquitoes are of a very widely distributed and annoying species *Aedes taeniorhynchus* of Weidman. The species is not infrequently mistaken for *Stegomyia*, to which it has a superficial resemblance, being dark in color with white banded abdomen and legs.

Its eggs are laid upon the mud at the margin of ponds and marshes, or at the bottom of puddles from which the water has evaporated. They must become dry before hatching, and in this condition retain their vitality for months. The first rains cause the eggs to hatch, and successive rains at short intervals develop the larvæ into enormous numbers of viciously biting mosquitoes. The ordinary methods of control are manifestly inadequate to suppress breeding under such conditions. Clearing away of brush in the neighborhood of settlements is the only effective method of preventing this phase in the breeding of the species, but as this mosquito is capable of prolonged flight and its invasions here usually of limited duration, the clearing of such areas, as would in most cases be necessary, is not justified.

The activity of this mosquito in past seasons has been confined to about two months, including the latter part of April and extending into June. The unusual number this year is attributed to the very favorable conditions created by the very intense dry season ending somewhat abruptly in regularly recurring rains. So far as medical knowledge goes, this mosquito is not a transmitter of disease.

Masonic Temple Corner Stone Laying.

The corner stone of the new Masonic Temple at the corner of Eleventh and Bolivar streets, Cristobal, will be laid on May 30, at 2 p. m. A special train will cross the Isthmus for the convenience of Masons and their friends. The schedule is, as follows: Leave Panama, 11 a. m.; Corozal, 11:07; Pedro Miguel, 11:18; Paraiso Junction, 11:21; Culebra, 11:24; Empire, 11:40; Las Cascadas, 11:46; Bas Obispo, 11:51; Gorgona, 12.02 p. m.; San Pablo, 12:12; Tabernilla, 12:18; Bohio, 12:30; Gatun, 12:47; arrive Colon, 1 p. m.

Tickets will be necessary for transportation on this train, and can be secured from members of Sojourners Lodge. or from the committee. Masons will meet at the lodge room, Fifth and Bolivar streets, at 1.30 p. m., and march to the building, headed by the U. S. Marine Band.

Observance of Memorial Day.

Empire Company, No. 2, U. R. K. of P., will turn out on Decoration Day, May 30, to observe with fitting ceremony the day set aside for the purpose of paying tribute to our dead. We also invite any member of the Uniform Rank on the Isthmus to participate with us.

Fraternally yours,

C. PETERS, *Recording Sergeant.*

Empire, C. Z., May 15, 1911.

Chaplain C. O. Purdy, U. S. W. V., will conduct Memorial Day services in Gatun chapel, Sunday evening, May 28, at 7:45 p. m. The United Spanish War Veterans will attend in a body. The public is invited.

S. A. CLARK, *Adjutant.*

Gatun, C. Z., May 20, 1911.

A special train will leave Panama at 7:30 a. m., on Sunday, May 28, for the benefit of those wishing to attend the memorial services to be held at Mount Hope cemetery. The same train will return about 12 noon, or later. All Americans are invited to attend.

Notice to Haymakers.

There will be a convocation of Chiriqui Hayloft, No. 1½, at Culebra, on Saturday, May 27, at 8 o'clock. All members in good standing, and visiting companions, are invited. Business of importance will be transacted.

By order of THOS. J. WALSH, *Col. of S.*

Gorgona, C. Z., May 22, 1911.

CANAL WORK IN APRIL.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., May 15, 1911.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of April, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	86,578	1,489,471	125,870	1,701,919
Work excavation, wet	Cubic yards	492,579	26,968	439,622	959,169
Total work excavation	Cubic yards	579,157	1,516,439	565,492	2,661,088
Plant excavation, dry	Cubic yards	....	....	....	....
Plant excavation, wet	Cubic yards	21,239	....	9,426	30,665
Total plant excavation	Cubic yards	21,239	....	9,426	30.665
Total Canal excavation	Cubic yards	600,396	1,516,439	574,918	2,691,753
Material placed in dams	Cubic yards	573,788	....	81,360	655,148
Concrete placed in locks and dams	Cubic yards	71,530	....	67,393	138,923
Explosives used	Tons (Gross)	76.05	265,39	30.94	372.38
Rock drilled	Feet	59,596	420,899	71,377	551,872
Tracks removed	Miles	....	26.13	....	26.13
New tracks laid	Miles	3.70	15.78	3.91	23.39
Rock crushed	Cubic yards	68,746	....	49,371	118,117
Cement used	Barrels	82,036 50	358	69,120	151,514.50
New roads built	Miles	1.53	....	0.04	1.57
Water mains laid	Feet	162	1,152	3,391	4,705
Sewers laid	Feet	....	1,003	....	1,003
Open drains and ditches dug	Feet	....	2,200	2,250	4,450
Average daily force	....	7,696	8,272	4,414	20,382
Average rainfall	Inches	4.72	4.52	6.31	4.85

Atlantic Division.

GATUN LOCKS.

Shovel excavation during the month was continued in the lower lock and outside the Canal prism for the purpose of obtaining impervious material for back fill. A total of 38,993 cubic yards of material was removed. Of this amount, 15,807 cubic yards were excavated outside the prism for back fill. On April 30 the total excavation amounted to 5,830,068 cubic yards, of which 5,009,924 cubic yards were removed from the prism. The shovel excavation in the locks was 99 per cent completed; the channel excavation 96 per cent completed, and the excavation of the culvert trenches by crane 80 per cent completed.

Back Fill—Back filling behind the walls of the upper and middle locks was continued. The quantity placed during April aggregated 77,880 cubic yards, increasing the total to 424,455 cubic yards. On April 30 the back fill was 34.94 per cent completed.

Receiving and Issuing Material—The receipts of all material during the month were satisfactory, and exceeded the consumption.

Mixing and Placing Plants—Both plants, and all portable mixers, were kept in satisfactory operation during the month.

Power Plant and Pumps—The operation of the power plant and pumps was satisfactory and economical.

Iron and Steel Work—During the month, the setting of steel for Stoney gate valves and hollow quoins was continued. A total of 254 tons of fixed steel, exclusive of reinforcement, was placed.

Concrete Work—There was a decrease of 19,523 cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 24 working days was 2,800 cubic yards, as compared with a daily average during March of 3,218 cubic yards. The total amount of concrete placed during the month was 67,361 cubic yards, including 3,734¾ cubic yards of large stone. The bucket measurement exceeded the place measurement by 220¾ cubic yards. Of the total concrete, 3,868½ cubic yards were placed in the upper lock, 26,005½ cubic yards in the middle lock, and 37,487 cubic yards in the lower lock. The concrete work for the entire lock system was 62.44 per cent completed at the end of April.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS, GATUN LOCKS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.03	8.50
Average number of hours per day worked per strand of cableway laying concrete and large stone (actual working time)	7.10	....
Average number of mixers per day	6.00	2.00
Average hourly output per mixer, (actual working time) cu. yds.	59.55	63.00
Average amount of concrete and large stone laid per hour, per strand of cableway, (actual working time) cu. yds.	34.61	....
Large stone laid, cu. yds.	3,025¾	709
Concrete laid, cableways, cu. yds.	44,346	....
Concrete laid, through chute into dump cars, cu. yds.	5,466	7,444
Concrete laid, derricks, cu. yds.	....	4,930
Concrete laid, portable mixers	....	1,661
Total amount concrete and large stone laid, cu. yds.	52,837¾	14,744

Concrete from the auxiliary plant was placed by five derricks, and through the chute on the east bank of the lower lock into dump cars below.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 575,788 cubic yards, making the total amount in place 13,447,713 cubic yards.

Hydraulic Fill—The dredges increased the hydraulic fill by 368,658 cubic yards. The total hydraulic fill in place on April 30 was 7,002,418 cubic yards.

Dry Fill—The material received from the Central Division, the locks, and steam shovels Nos. 51 and 134, amounting to 205,130 cubic yards, was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 6,445,295 cubic yards.

GATUN SPILLWAY.

Excavation—In preparing foundation of the spillway dam, 1,013 cubic yards of rock were excavated by steam shovel No. 134, 400 cubic yards by hand, and 365 cubic yards by derrick, increasing the total spillway excavation to 1,580,794 cubic yards.

Concrete—Construction work on the spillway dam was continued. Concrete was placed behind the east coffer dam, the coffer dam itself being extended to balanced valve pier, and 300 cubic yards of earth were placed in the coffer dam. The amount of concrete placed during the month aggregated 4,169 cubic yards, which increased the total to 135,260 cubic yards. The concrete work for the spillway was 60.2 per cent completed.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea Level at Mindi—During the month, three steam shovels removed 9,235 cubic yards of earth and 59,445 cubic yards of rock from the Canal prism. In addition, 5,350 cubic yards of earth were sluiced by pumping plant.

Dredging from the Ocean to Mindi—Five dredges removed 443,625 cubic yards of earth and 34,549 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 21,239 cubic yards of earth in Cristobal harbor, and 5,414 cubic yards of earth and 2,247 cubic yards of rock in the drydock slip. On April 30th, 40 feet of water could be carried from zero to zero plus 2,100 feet; 35 feet to mile 3 plus 100 feet; 30 feet to mile 4 plus 450 feet; 20 feet to mile 5 plus 2,438.9 feet, at the junction with the French canal.

Dredging from Mindi to Gatun Locks—The dredge *Sandpiper* removed 33,359 cubic yards of fill which had accumulated in the Canal prism.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working days—hours From 1st to 30th, inclusive	8.00
Average number of hours worked per day	6.80
Average number of cubic yards per hour of working day	358.10
Average number of cubic yards per working hour	421.30
Maximum day's output, (7 hours 15 minutes) cu. yds	3,726.00
Average day's output (24 days) cu. yds.	2,864.00
Average hourly output, (191 bours 7 minutes) cu. yds.	359.00
Total output for the month, cu. yds.	68,746.00

SAND, STONE, AND CEMENT SERVICE.

In connection with this service, plant steamed 11,225 miles, handled 797 barges, and carried 3,810 passengers.

TORO POINT.

Colon Breakwater—Forty-five thousand one hundred and thirty-two cubic yards of material were excavated, of which amount 4,433 cubic yards were placed in track fill, and 40,699 cubic yards in breakwater fill. The double track trestle was extended 616 linear feet. On April 30, the trestle extended 4,214 feet from shore. The total amount of rock dredged and dumped on the west breakwater to April 1, 1911, was 519,393 cubic yards. During the month, 36,796 cubic yards were dredged and dumped, increasing the total to 556,189 cubic yards. The amount of dry fill placed to May 1 was 271,401 cubic yards.

NOMBRE DE DIOS.

During the month, 99 barges, containing 47,801 cubic yards of sand, were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of April the total amount of material excavated in the Central Division was 1,516,439 cubic yards, of which 271,650 cubic yards were classified as earth and 1,244,789 cubic yards as rock. Of this quantity, 1,470,752 cubic yards were removed by steam shovels, 2,788 cubic yards by scraper, 8,956 cubic yards by bucket cranes, and 2,543 cubic yards by hand. Contractors removed 26,968 cubic yards by sluicing, and 4,432 cubic yards by hand. Of the total, 1,497,147 cubic yards consisted of primary excavation for the Canal prism, 10,336 cubic yards permanent diversion useful after the Canal is completed, and 8,956 cubic yards of silt deposited in completed sections of prism. The total work excavation amounted to 1,516,439 cubic yards. Owing to the completion of steam shovel work in the Chagres section, the total output for the Central Division for the month was not so great as in April, 1910, but the output from the Culebra section, 1,414,336 cubic yards, was the highest record in that section for the month of April, the previous high record for the month having been in April, 1909, when 1,291,844 cubic yards were excavated.

The daily average number of steam shovels at work during the month was 44.71, and the total number of shovel days was 1,073, as compared with 50.63 shovels at work during the month of March, with 1,367 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
April..	1,685,030	1,161,391	523,639	50 04	26	1,295 2
1911:						
April..	1,470,752	1,227,485	243,267	44.71	24	1,370.7

Rainfall at Empire: 1910, 4.24 ins.; 1911, 3.93 ins.

The above table shows the average output per shovel to be 5.83 per cent greater in April 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in April, 1911—1,404,000 cubic yards—was the highest record in that section for the month of April, the previous high record for the month having been in April, 1910, when 1,288,845 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division was 97,125,018 cubic yards, and up to May 1, 1911, 74,576,048 cubic yards had been removed, leaving 22,548,970 cubic yards to be removed, in order to complete all excavation in the Central Division. From these figures it will be seen that 76.78 per cent of all excavation in the Central Division had been completed up to the close of the month of April, and 23.22 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of April operations was, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	62,814,749
To be completed	21,371,975
CHAGRES SECTION.	
Completed	11,761,299
To be completed	1,176,995

From the above figures it will be seen that the Culebra section, locally known as the "Culebra Cut," was 74.61 per cent completed, with 25.39 per cent to be completed; the Chagres section was 90.91 per cent completed, with 9.09 per cent to be completed.

During the month, 41 800 cubic yards of material were hauled from the Canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad on the Gold Hill line, and 22,743 cubic yards south of Caimito. The total amount of spoil from the Central Division used for this purpose at the close of the month was 3,828,037 cubic yards. The Central Division also delivered at Gatun 208,067 cubic yards of rock and earth for use in the construction of the dam, making the total for this purpose at the end of April 3,355,867 cubic yards. In addition, the Central Division delivered 2,793 cubic yards of rock and earth to the Pacific Division to be used as back fill for the lock at Pedro Miguel, increasing the total for this purpose to 30,533 cubic yards. There were also 1,050 cubic yards of rock and earth transported to Colon to be used by the Panama railroad in building a new sea wall.

The daily average number of laborers at work on the whole division during the month was 7,418, and the daily average number of gold employes 854.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 125,870 cubic yards.

Filling and Embankment—During April, no additional dry filling was added to the prism of the west dam at Pedro Miguel, the total amount of material in place at the close of the month remaining at 260,852 cubic yards, as previously reported. The back fill at Pedro Miguel was increased by 61,379 cubic yards, the total in place at the end of the month amounting to 250,034 cubic yards.

At Miraflores, 67,260 cubic yards were added to the dry fill in the toes, and 14,100 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month 758,152 cubic yards, and 510,521 cubic yards, respectively. The back fill was increased by 6,540 cubic yards, increasing the total to 142,425 cubic yards.

PEDRO MIGUEL LOCKS.

The back filling of the east and west walls was continued. The dismantling of berm crane "G" was completed, and the tower and boom arm were erected at Miraflores. The 2-cubic yard auxiliary concrete mixer located in the east storage trestle was moved and erected beside the one in the west storage trestle, and the east trestle taken out to make room for a drainage channel from the Culebra Cut to the middle wall culvert of the locks. During the month, the amount of iron placed aggregated 521,834 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 28,635 cubic yards, as compared with 44,716 cubic yards during March. The concrete was placed, as follows: 11,833 cubic yards in the west wall; 739 cubic yards in the west head wall; 9,543 cubic yards in the center wall, and 6,520 cubic yards in the east wall.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)...	8.00	8.00
Average number of hours per day, worked laying concrete and large stone (actual working time)........	4.75	6.55
Average number of mixers per day........	2.00	3.50
Average hourly output per mixer (actual working time)........	*Cu. Yds.* 54.78	*Cu. Yds.* 27.96
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)........	53.68	....
Large stone laid........	....	....
Concrete laid........	20,900.00	7,735.00
Total concrete laid..........	20,900.00	7,735.00

Auxiliary plant consisted of three 2-cubic yard mixers and one ½-yard mixer. Placing plant consisted of locomotive cranes and derricks, averaging 1.25 units a day, and ½-cubic yard mixer dumping directly into forms.

MIRAFLORES LOCKS.

The dry excavation in the lower lock was continued by six steam shovels, and the excavation of the sump pit for draining the lock site was commenced. Back filling behind the east wall was started preparatory to laying material tracks to auxiliary mixing plant which will be installed in east side wall near lower end of upper lock. Filling was continued in the east and west toes of the west dam. During the month, the amount of iron placed aggregated 118,409 pounds.

Concrete Work—The total amount of concrete and large stone laid was 67,393 cubic yards, as compared with 31,173 cubic yards during March. The concrete was placed, as follows: 14,989 cubic yards in the east wall; 2,967 cubic yards in the center wall; 18,435 cubic yards in the west wall, and 2,367 cubic yards in the floors.

Total concrete laid..........	15.829.00	22.929 00

Permanent plant consisted of one berm crane for four days, and two berm cranes for 19 days.

Auxiliary plant consisted of two 2-cubic yard mixers: and seven ½-cubic yard, and one ¼-cubic yard mixers, averaging 5.15 mixers a day.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks.

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 40,400 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Cocoli Lake Pump—The 8-inch motor-driven centrifugal pump installed on the west side of the Miraflores west dam for the purpose of removing as much as possible the salt water which leaked through the west dam into Cocoli Lake, was operated 10 hours a day for the first 11 days of the month, and 24 hours a day for the remainder of the month. This pump draws water from a point 22 feet below the surface of the lake and discharges at the rate of 2,500 gallons a minute, or approximately 74,762,500 gallons for the month. The first six days of the month the percentage of chlorine in the discharge pipe of this pump was reduced from 1,950 to 1,750 parts per million; from that time to April 25, it was reduced from 1,750 to 1,550 parts per million.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the municipal improvements in the city of Panama.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day	9.00
Average number of hours per day (actual working time)	6.37
Average amount crushed per hour of working day	*C. Y.* 219.43
Average amount crushed per working hour	322.71
Total output for the month	49,371.00

The 12-hour shift at Ancon quarry was discontinued at the beginning of the month, and the crusher is now being operated nine hours a day. The crusher was shut down on April 10 and 11 on account of the babbiting of the eccentric on the large crusher becoming worn, which caused the bearing to run hot, and it became necessary to put in a new eccentric. The eccentric removed at this time had been in the crusher since it was first installed, and had been continually in use, crushing approximately 900,000 cubic yards of rock.

Relocation of Panama Railroad.

During the month, 414,130 cubic yards of material were excavated, increasing the total excavation at the close of the month to 6,685,624 cubic yards, and 488,640 cubic yards of material were placed in embankment, increasing the total for this purpose to 12,240,578 cubic yards.

The average daily number of steam shovels at work was 8.83, and the total number of working days 24.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			
April..	212,097	82,295	129,802	7.15	26	1,140
1911:						
March.	325.295	250,505	74,790	7.04	27	1,712
April..	366,194	205,731	160,463	8.83	24	1.727

During the month, 2,452 feet of temporary trestle were driven, and work on bridges and culverts was continued. Nine thousand three hundred and seventy-two linear feet of 70-pound track were relaid by 90-pound track, the total of 70-pound and 90-pound track at the end of the month being 148,372 linear feet, and 28,369 linear feet, respectively. The force averaged 2,232 men, in addition to those employed by contractors.

Quartermaster's Department.

Labor—There was some shortage of unskilled labor during the month and few applications for employment from either Spaniards or negroes. Although a number of laborers were released by the Central Divison in the Chagres district, they were apparently not sufficient to supply the demand. The Panama railroad and the Depot Quartermaster reported shortage of labor on the docks at Colon, and the storekeepers along the line found it difficult to secure unskilled labor. Requests were also received for additional laborers for the relocation of the Panama railroad.

Quarters—Employes of the Central Division were transferred from the Tabernilla-San Pablo district, and bachelor quarters at those points assigned as nonhousekeeping quarters to a number of families. The Central Division also made arrangements to transfer its employes from Gorgona, which will enable some of the men employed in the shops to obtain quarters at that place. The removal of certain buildings at Culebra necessitated the transfer of about 20 families to Tabernilla, Empire, and Paraiso. The number of laborers occupying Commission quarters showed a decrease of over 700.

Material and Supplies—During the month, the dredge store house operated by the Atlantic Division was transferred to the jurisdiction of the Quartermaster's Department, the value of material transferred amounting to $42,000.

Supplies during the month were delivered by 28 steamers, the total weight of cargo aggregating 39,818 tons, exclusive of 41,800 cross-ties and 137,189 feet, board measure, of yellow pine lumber. The total value of material received during the month was $838.039.56.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels, showed a net profit of $1,992.95. The operation of the Hotel Tivoli showed a net profit of $2,246.15, and there was a net profit on restaurants, penitentiary, tugs, and dredges of $135.95. The net profit on subsistence operations was $4,375.05.

Department of Civil Administration.

COURTS.

During the month, 69 civil and 38 criminal cases were diposed of in the Circuit Courts, and 51 civil and 491 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for April amounted to $450,472.57, and the fees to $1,976.87. Receipts from stamp and card sales, and newspaper postage aggregated $6,051.10. The total collection of revenues made by the division was $18,777.61, and the collection on account of court fines, costs and fees, $2,520.66.

Twenty-six vessels entered at and 24 vessels cleared from the port of Ancon; and 22 vessels entered at and 24 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 526, of whom 499 were men and 27 women. Fifty-one nationalities were represented. The total number of arrests for the month was an increase of 84, as compared with March. Thirteen convicts were committed to the penitentiary, and seven were discharged, leaving 143 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,533.55, and the value of their work on the Canal Zone roads was $2,053.40.

DIVISION OF FIRE PROTECTION.

Nineteen fires were reported in the Canal Zone during the month, as compared with 84 in March. The damage to Commission property was $47, and to private property $210.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,274,016 gallons, and in Colon 833,633 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The total enrollment in the white schools during the month was 1,091, and the average daily attendance 840.1, or 77 per cent of the enrollment; and in the colored schools the total enrollment was 1,466, and the average daily attendance 508.1 or 35 per cent. Forty-two white, and 25 colored teachers were employed in the division on April 30.

Department of Sanitation.

The total number of deaths from all causes among employes was 38. These were divided, as follows: From disease, 26, and from violence 12, giving the annual average per thousand of 6.42 and 2.96, respectively.

The annual average death rate per thousand among employes for the month of April in previous years since American occupation was, as follows:

1905	10.95
1906	30.00
1907	38.67
1908	7.77
1909	8.57
1910	13.04

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and nonemployes, was 17.74.

The annual average death rate per thousand for the month of April among the same class of population for previous years was, as follows:

1905	39.29
1906	39.06
1907	40.97
1908	20.04
1909	16.77
1910	19.73

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 2.85; blacks, 7.67, giving a general average of 6.42. For the same month during 1909, the annual average death rate per thousand from disease was: Whites, 6.65; blacks, 7.15, giving a general average of 7.01, and for the same month during 1910: Whites, 4.48; blacks, 9.97, giving a general average of 8.62.

Among employes during the month, deaths from the principal diseases were, as follows: Chronic nephritis, 3; dysentery, clinical, 1; malaria fever, E. A., 1; measles, 1; lobar pneumonia, 9; tuberculosis, 3; and typhoid fever, 1, leaving a balance of seven deaths from all other diseases, and 12 deaths from external violence.

The epidemic of measles, stated in a previous report, still continues, but is apparently on the decline, the number of cases reported being materially less.

No cases of yellow fever, smallpox, or plague were brought to, or originated on the Isthmus during the month. Respectfully,

GEO. W. GOETHALS, *Chairman.*

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

Twenty members of the Empire Woman's Club attended the meeting at the Commission clubhouse on Thursday afternoon, May 18. Mrs. Thomas E. Brown, Jr. of Cristobal spoke on child welfare. Selections for two violins were played by Mrs. W. H. Decker and Miss Jessie Smith. The club has decided to take up the study of India and China as given by the Bay View course.

Church Notes.

In response to a request from West Indians, living at Cana in Darien, the Rev. W. H. Decker of St. James Church, Empire, was sent to that station on April 26, and remained ten days, during which time he held six services, married three couples, and baptized 13 children. He organized a mission and placed a catechist in charge until such time as a regular clergyman can be sent to the station. Services are held in a building set apart for that purpose by the Darien Gold Mining Company. There are about 400 persons in the mission.

The Rev. Henry C. Pouget, pastor of the Roman Catholic church at East Balboa, has been transferred to Cristobal, where he is in charge of St. Joseph's church and parish, including Cristobal, Mount Hope, and that part of Colon south of Tenth Street. The Rev. Valeriano Tanco, O. S. A., formerly of the church of San José in Panama, has been assigned to the pastorate at East Balboa.

PERSONAL.

Col. Goethals will sail for the United States on Thursday, May 25 for an absence of about one month.

Fourth of July Celebration.

A meeting of the executive committee for the Fourth of July celebration at Cristobal was held at Ancon on Saturday, May 20. A tentative program was adopted, and the entertainment and amusement committee was delegated to arrange the details. A motion was adopted providing for free transportation on the Fourth on Panama railroad passenger trains to all Americans, and their families, and to others subscribing to the fund. Superintendent Smith advised that all northbound passenger trains would be stopped at Cristobal to unload, and that all southbound trains would leave the Colon station and pass Cristobal without stopping.

A motion prevailed that in case weather conditions prevented the display of fireworks at Cristobal on the night of the Fourth, the committee be authorized to distribute the fireworks among the American settlements in the Zone, and at Porto Bello. A motion was passed approving of the program of the dance committee which has arranged for a ball at the Lincoln House, and which will endeavor to arrange for other dances elsewhere, in order that the crowd may be comfortably distributed.

The Chairman reported the following committees:

Fireworks—Capt. R. E. Wood, chairman; M. A. Follman, James Avery, George Buchan, Frank Thompson, Frank Jury.

Publicity—Col. Tom. M. Cooke, chairman; John O. Collins, W. M. Garrett.

Transportation—J. A. Smith, chairman.

Entertainment and Amusement—Capt. H.W. Stickle, chairman; W. H. Brown, secretary. Subcommittee on athletics: W. G. Comber, chairman; M. E. Smith, Gatun; W. J. Earle, Gorgona; A. R. Richards, Cristobal; H. H. Hammer, Corozal; Charles Pulsifer, Empire; R. S. Mosier, Cristobal; Hugh S. Hunter, Ancon; John Weller, Colon; E. W. Tupper. Subcommittee on water sports: Capt. C. J. Anderson, chairman; H. R. Wilford, S. G. Forbes, C. C. Snedeker, C. T. Owens, Ed. Davis, W. T. Orr, A. R. McDaniels, C. E. Bradley, Jr., D. F. Rabbitt. Honorary members: All masters of American steamers in port at Ancon and Cristobal, July 4. Subcommittee on decoration and music: W. F. Shippee, chairman; S. M. White, J. H. Humphrey, A. L. McLean, Frank Jury, D. W. MacCormack. Subcommittee on comfort and refreshments: John Burke, chairman; J. B. Doyle, William Brugge, W. T. McCormick, Al. Lundin. Subcommittee on fire department contests: C. E. Weidman, chairman; C. F. Koerner, H. J. Wempe, W. J. Cuff. Subcommittee on marines: Lieut. H. S. Wirgman, U.S.M.C., chairman. Subcommittee on police department stands: Capt. C. W. Barber, chairman. Subcommittee on property: J. H. Humphreys, chairman; Clyde Hess, D. F. Fisher.

Finance—E. J. Williams, chairman; H. H. Rousseau, member ex-officio; W. I. Beam, Major S. D. Butler, R. W. Hart, C. H. Mann, George A. Ninas, R. M. Sands, A. B. Shippee, H. E. Bovay, T. L. Clear, J. C. Keller, C. A. McIlvaine, Capt. C. Nixon, C. M. Saville, William Taylor, John Burke, F. C. Freeman, C. W. Lee, R. L. Mock, Judge M. C. Rerdell, W. F. Shipley, R. H. Wardlaw.

Dance—Dr. J. C. Perry, chairman; Dr. M. E. Connor, Robert Beverley, H. S. Newcomb, Rex Sartor.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

Beginning with June 1, the Y. M. C. A. will place in the hands of every member on the Zone, free of charge, a monthly bulletin of health, which will deal with a different phase of personal hygiene each month. The articles will be written by specialists.

COROZAL.

A "smoker" is to be given on Saturday evening, May 27, to which every member and nonmember in Corozal is invited. The program will include piano, vocal and popular music, brass bar swinging, and wrestling. A mock trial will be the closing number. Cigars and refreshments will be served.

The next informal social will be given at the clubhouse on June 2.

CULEBRA.

In the bowling match last Saturday, Empire won two out of three games.

The following are the 100, or over, scores made during the week ending May 20: Huttlemeier, 101, 114; Conlon, 104, 104; Case, 102, 127, 101, 101; Hill, 102, 118; Brown, 100, 110, 100; Koperski, 106; Fox, 103, 101; Judge, 108; Crain, 102; Stearns, 105; Mengel, 110; Frederick, 101.

In a duckpin match Saturday morning, the Culebra boys won three games from the Empire boys. Two high scores were made: Bill Spur, 105; Paul Warner, 121.

EMPIRE.

In the bowling match last Saturday night, Empire took three straight games from Culebra.

The following high scores were rolled in duckpins during the past week: Garrett, 100; Redeghiero, 114, 108, 114, 106; Gorham, 100; Pearson, 104; Rieman, 100; Whalin, 103.

The Gorgona baseball team defeated the Empire team on Saturday night, May 20, by the score of 26 to 3.

The literary society will debate on Friday night, May 26, "Resolved, that the Canal shall not be fortified," Messrs. McLean and Morrowitz will lead.

GORGONA.

An athletic "smoker" was given under the auspices of the physical department committee on Monday evening, May 15, in honor of the track team that carried off the honors at the Empire field meet on Washington's Birthday. Mr. F. C. Freeman presented the medals and team trophy to the athletes. Mr. F. G. Swanson chairman of the physical department committee, was master of ceremonies.

Mr. William J. Earle has been elected captain of the track team for the Fourth of July meet. The candidates will be expected to report to Mr. Earle and Mr. Hopkins during the week of June 10. Mr. Earle represented Gorgona at a meeting of the Fourth of July athletic committee, held at Cristobal, on Friday, May 19.

GATUN.

The Hill Magical Company, necromancers and illusionists, presenting Prof. Kellerman and Assistant Ivanoff, appeared at the Gatun clubhouse on Monday evening, May 22.

A "Ragtime" indoor baseball game was played on Friday evening, May 19, between the "Fats" and the "Leans." The "Fats," captained by John Luckey, won by a score of 22 to 8.

A handsome cue will be given the member who makes the highest run in pool between May 15 and May 31. Mr. DePoorter will receive entries for a handicap pool tournament, and a three-cushion billiard tournament, which will begin on June 1.

Gatun took one out of three games at duckpins with Cristobal on Saturday, May 20.

CRISTOBAL.

Cristobal won two out of three duckpin games from Gatun, Saturday night.

Gatun forfeited the league game of indoor baseball Saturday night by failing to appear at Cristobal.

At the literary society, Wednesday, the 17th, Mr. Chas. J. Dinnin gave a talk on the game of politics, based on his experience in New York City. Tad Dickson, Jr., read an original story called the "Message of the postcard." About 50 men have now joined.

A local basketball league of five teams was formed last week Games will be played on Tuesday and Thursday nights during the next two months.

Special moving pictures will be shown on Friday night, May 26.

PORTO BELLO.

A pool tournament will be started on May 22. Prizes are to be given to the winners of first and second places.

In the simultaneous chess game on May 11, Mr. Hanbury won 5½ from 12 opponents. On May 18, Mr. Tuttle won 5½ games from 10 opponents. A handicap chess tournament is being arranged for the month of June.

OFFICIAL CIRCULARS.

May 30 A Holiday.

CULEBRA, C. Z., May 16, 1911.

CIRCULAR No. 390:

Decoration Day, Tuesday, May 30, 1911, will be observed as a holiday in the Canal Zone, and, as far as practicable, all public business will be suspended on that day.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Secretary to Chairman Assumes Duties Temporarily of Chief Clerk.

CULEBRA, C. Z., May 18, 1911.

CIRCULAR No. 391:

Effective this date, Mr. Wm. H. May will, in addition to his duties as Secretary to the Chairman, assume the duties of Chief Clerk during the absence on leave of Mr. C. A. McIlvaine.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Division Engineer.

CULEBRA, C. Z., May 18, 1911.

CIRCULAR No. 392:

Effective this date, Mr. A. S. Zinn will act as Division Engineer of the Central Division during the absence of Lieutenant-Colonel D. D. Gaillard on leave.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Restrictions on Garden Hose Revoked.

CULEBRA, C. Z., May 18, 1911.

CIRCULAR No. 365-A:

In view of the recent heavy rains the restrictions on the use of garden hose, ordered in Circular No. 365, are hereby revoked.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Injury Leave of Employe Lent by One Division to Another.

CULEBRA, C. Z., May 16, 1911.

CIRCULAR No. 357-B:

When an employe, temporarily loaned by one division to another, is injured, the cost of all injury leave incident thereto is borne by the division in which and for which he was working at the time the injury was sustained.

This extends the provisions of Circular No. 357-A, which applies only to employes of the Mechanical Division, to all departments and divisions.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Ice for Locomotives and Steam Shovels.

CULEBRA, C. Z., May 20, 1911.

CIRCULAR No. 393:

The following will hereafter be considered the standard allowance of ice for locomotives and steam shovels of the Isthmian Canal Commission and Panama Railroad Company:

Locomotives—Not exceeding twenty pounds per day, except

(1) Panama railroad passenger train locomotives and through freight train locomotives, for which the allowance will be five pounds per trip; and

(2) Panama railroad shuttle train locomotives and local freight train locomotives, for which the allowance will be ten pounds per day or per trip.

Steam Shovels—Not exceeding twenty pounds per day.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Cabins on the "Ancon".

HEADS OF DEPARTMENTS AND DIVISIONS:

CULEBRA, C. Z., May 20, 1911.

All available accommodations for cabin passengers on the steamship *Ancon*, scheduled to sail from Cristobal, on or about June 13, 1911 (replacing the scheduled sailing of the steamship *Panama*) having been reserved, no further requests for cabin passage will be issued.

Requests for steerage passage will be issued for this sailing until further notice.

By direction of the Chairman.

Respectfully,
W. H. MAY, *Secretary to the Chairman.*

Requests for Reservations on P. R. R. Steamers.

CULEBRA, C. Z., May 17, 1911.

Employes, when requesting reservations by mail on Panama railroad steamers, should always furnish the ticket agent the address on the Isthmus to which notices of assignment and tickets are to be mailed. Employes should read over carefully the instructions for securing reservations, which are printed on the request for reduced rate, before mailing the request to the ticket agent. Failure to observe these instructions will cause delay and confusion in arranging transportation.

By direction of the Chairman. Respectfully,
C. A. McILVAINE, *Chief Clerk.*

Price of Coal.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., May 19, 1911.

Supplement No. 1 to coal tariff effective May 1, 1911:

AT PANAMA.

United States and Panamanian warships, alongside in lighters.. $8.15

Sale of Building Material.

OFFICE OF CHIEF QUARTERMASTER,
CULEBRA, C. Z., May 20, 1911.

Sealed proposals will be received at this office until 3 p. m., Saturday, June 3, 1911, and then opened, for the purchase of all or any part of a miscellaneous lot of building material, viz., sash, doors, blinds, etc. A list of the material, showing sizes, can be obtained from the Quartermaster's storehouse, Empire, C. Z., where the material is now stored and open for inspection. Proposals should be accompanied by check, money order, or cash, for five per cent (5°/₀) of amount bid, endorsed "Proposal for purchase of building material," and addressed to C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gorgona, C. Z., on Sunday, May 28, 1911, at 6 p. m. The program follows:

1 March—*Give the Countersign*............Scouton
2 Selection—*Robin Hood*...............De Koven
3 Paraphrase—*Nearer, My God to Thee*......Reeves
In which the band will be assisted by a chorus of 100 pupils from the public schools of the Canal Zone.
4 Overture—*Zampa*..........................Herold
5 Wooden Shoe Dance—*Dutch Kiddies*...Trinkaus
6 Medley Selection—*Southern Plantation Songs*..........................Conterno
7 Idyl—*Love's Message*......................Brooks
8 Selection—*The Prince of Pilsen*..........Luders
9 Galop—*At the Races*.....................Barnard

CHAS. E. JENNINGS, *Musical Director.*

The next concert will be given at Balboa on Sunday, June 4, at 2 p. m.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, May 20, 1911. All heights are in feet above mean sea level.

Lease of Lots in Colon.

Sealed bids will be received up to 5.30 p. m., Wednesday, May 31, 1911 for lease to the highest bidder of lots in the newly filled section of Colon as shown on plans which may be seen at the Land Office in Colon and at the Land Office in Panama.

These sealed bids must be addressed to the General Superintendent of the Panama Railroad Company, Colon, and must be plainly marked on the outside of the envelope "Proposal for lot No. ——, block No. ——, Colon." Bids not marked in this manner will not be considered.

The minimum rental to be accepted for these lots may be ascertained by applying to either one of the above mentioned Land Offices.

Persons holding options on any lots in this district and having paid rental up to June 30, 1910, will have the privilege of taking the lot at the highest rate offered.

The lots to be leased are those on the west side of E street between 2d street and 14th street, and that district on the east side of E street bounded by 2d street on the north, 9th street on the south, E street on the west and G street on the east.

Those lots on the west side of E street will be available for building on or about June 1, 1911; the balance of the lots will not be available for building before October 1, 1911.

Parties submitting bids must state character and purpose of building they intend to erect, and must indicate period of time in which they expect to commence construction after assignment.

Application blanks may be obtained at the Land Office in Colon and Panama.

All rental is to be paid quarterly in advance.

The Panama Railroad Company reserves the right to reject any or all bids.

J. A. SMITH,
General Superintendent.

Colon, R. P., April 22, 1911.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line; the Panama Railroad Company's dates being subject to change:

The Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago, Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on June 14 and July 12, and for Port Limon at 6 a. m. on May 30, and 5 p.m. on June 14.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (*) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, MAY 31, 1911. No. 40.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Bridge Project Abandoned.

The board appointed by the Chairman to consider the question of the erection of a permanent bridge over the Canal, and which, in November, 1910, made a preliminary report favoring the construction of a bridge of the high, fixed type at Empire, has reconsidered the subject, and has submitted another report and recommendation to the effect that the project be abandoned. The action of the board has been approved by the Chairman and Chief Engineer.

In reaching its later decision, the board gave consideration to a number of developments that have occurred since the framing of its original report. One of these was the lessened necessity for a bridge to provide railway facilities. The survey of the Panama-David railroad, as made by the Panama Railroad Company, planned to have the new line cross the Canal in the vicinity of Empire. This arrangement has since been changed by the Panama Government, and it is now proposed, in case the road is built, to bring it to the Pacific slope, outside of the Zone line, connecting with Panama from this point by ferry.

Another reason that had considerable weight was the increased cost of a high level bridge, due to the increased amount of fill required to connect the east approach with the relocated Panama railroad. At the time the committee made its first report, no complete data were available on the Isthmus, and a clearance height of 175 feet above minimum sea level was tentatively taken as the basis of the committee's calculations. Since then, a change has been made in the alignment of the relocated line around Gold Hill, which has removed the tracks further away from the Canal in the vicinity of Empire. In addition, data received from various official sources, and from the different steamship lines and builders, both in the United States and abroad, indicate that a clear height of 175 feet would not be sufficient for the fixed wireless masts of the largest existing steamships, some of which would require a clear height of 212 feet.

In order to give the people living west of the Canal suitable means of communication, after rail connection over the canal is interrupted, the board favors the operation by the Panama railroad of an independent shuttle train service on the west bank, between a point approximately opposite Pedro Miguel, and as far north as the waters of Gatun Lake will permit, the transfer of passengers and freight across the Canal to be provided for by barge or ferry boat. The board also favors the construction of inclines to the 95-foot berms on each side of the Canal at one or more intermediate points for convenient access by foot passengers, horses, carts, etc., so that the transfer at such intermediate points can be made, if necessary, at any time by small boat or barge.

High Steam Shovel Average in Empire District.

On May 23 1911, seventeen steam shovels working in the Empire District excavated 25,999 cubic yards, or an average per shovel of 1,529 cubic yards, almost all rock, and difficult to handle.

This is the highest average per shovel in this district during the present fiscal year, the next highest being on March 31, 1911, when 20 steam shovels excavated 29,279 cubic yards, or an average of 1,464 cubic yards per shovel.

Old Ship at Nombre de Dios.

A second wreck has been found by the suction dredge which is excavating sand for Gatun locks at Nombre de Dios, an old hull at a point about 250 feet inside the shore line and 20 feet below the surface of the ground. No effort has been made to takeout the hulk, because the dredge operates easily over it, but it appears to be about 100 feet long. The pumps have drawn up a small figurehead of brass, an iron pestle, and a large number of lead bullets from three-fourths to two inches in diameter. A similar hulk was unearthed in September, 1910.

Life Line at Toro Point Beach.

The bathing beach south of Toro Point is used to a large extent by employes of the Commission residing at the settlement, and at points along the Panama railroad, particularly on Sundays. There is at times a strong undertow in the water off the beach, and it is believed that unless some form of protection is arranged, loss of life may occur. To avoid this danger, some old French rail will be jettied in the sand, and connected with discarded wire cable in a manner that will afford the desired protection. An expenditure of $150 has been authorized for the purpose.

Transportation on Commissary Train.

Employes of the Central Division will, in cases of emergency, be permitted to ride on train No. 1, the early morning commissary train from Colon, provided proper authority is exhibited in each case. This arrangement is made to facilitate the transfer of transportation and steam shovel men from Bas Obispo and Las Cascadas to other points in the division. In case an engine is left without an engineer at Pedro Miguel, it will now be possible to supply a man from Las Cascadas in time to take the locomotive out practically on its scheduled leaving time.

Telephone Notes.

The central telephone exchange at Cristobal has been moved from the building in the rear of the police station, to the upper floor of house No. 80, near the Roosevelt avenue railroad crossing. The change was made necessary by the work in connection with the new dock system.

The permanent telephone line along the Panama railroad relocation has been completed between Monte Lirio and Frijoles, and the construction force is now at work extending it south toward Caimito. It is proposed to put another new crew to work within a few days building the line from Gatun south to Monte Lirio.

Miraflores Locks Flooded.

The temporary spillway, which provides an outlet for the water in the hydraulic fill of the west dam at Miraflores, was undercut on Wednesday afternoon, May 24, and a torrent of silt and water rushed through the enlarged opening, the most of which found its way into the upper lock, about 100 yards distant, flooding it to a depth of three feet over the lock floor.

The spillway consisted of rock filling, built up gradually, as the hydraulic fill in the core of the dam was increased in height. The surplus water from the fill passed over this spillway, and was carried off in an artificial channel, finally wasting into the Rio Grande. It is supposed that a small stream of water, which had been percolating through the rock of the spillway, and the consequent disintegration of the underlaying material from this cause, combined with the constantly increasing back pressure created by the mud and water in the fill, had weakened the underlaying material, and finally forced out the bottom.

In the rush of silt and water, large rock boulders forming the spillway were carried away and distributed over the territory immediately below. One of these became lodged in the regular channel of the stream, thereby augmenting the overflow in the direction of the lock. No attempt was made to stop the outlet, as it would have been impossible to do so until the three or four feet of silt and water over the solid portion of the dam fill had run off to a depth that could be controlled by sand bags. In this way the flow was stopped after the expiration of about an hour and one-half.

The greater part of the silt and water

NOTES OF PROGRESS.

(Continued.)

entered the upper lock at the extreme north end, where a section of the bank had caved in. The cave-in, however, involved no great damage, as it would have been necessary to excavate the bank at this point later. in order to provide space for the wing walls. In its course to the lock, the flood encountered numerous obstacles, such as timbers, machinery parts, tracks, etc., thereby diverting a part of the flow, which ran along the tracks extending parallel with the west bank, leaving them completely covered in places with a deposit of slime. At low points along the bank, the material found its way into the lock, and while the flood was at its height, three points resembled small waterfalls.

In the lock chamber the slime and water rose three feet over the finished floor. The flooded conditions extended into the lower lock, and partially submerged two of the steam shovels at work there. A portable concrete mixer, situated in the west chamber, was involved, and a number of drills were forced to suspend work.

An 18-inch, motor-driven, centrifugal pump, with a capacity of 10,000 gallons a minute, originally designed for use as a relay pump in making the hydraulic fill of the west dam, was installed, together with its pipe connections, and on Friday evening, May 26, began emptying the locks, pumping the slime and water back into the core of the dam. When the water was lowered sufficiently, the work of sluicing the deposits of slime toward the sump was begun, and continued until the chambers were wholly cleared. This work was practically finished by Wednesday, May 31.

Practically none of the compacted filling of the dam was lost; the overflow consisted of the water and slime, which stood, as stated, three or four feet over the filling. The slime was pumped back into the dam, because it was the quickest and most economical way of freeing the lock, and most of it passed over the repaired spillway. The loss is confined principally to the delay in concrete construction and excavation, and to the expense of repairing the break, and clearing the lock of mud and water. The lock walls were in no way injured, and the total loss will probably not exceed $8,000. With the exception of Saturday, May 27, when the construction plant was shut down on account of the clogging of the circulating water tunnel at the power house, concrete operations, in part, have been continued uninterruptedly.

The spillway has been rebuilt, and a well-braced, firmly embedded wooden flume, with inside dimensions of three feet, for regulating the flow, has been constructed.

The Cruces Anchors.

A cable from the Secretary of War to the Chairman and Chief Engineer, dated May 21, reads: "There is a rumor that it is contemplated removing Spanish anchors from Isthmus to West Point. The President directs that this be not done."

These anchors, which were described in The Canal Record of April 26, 1911, were recently placed on a raft for transportation down the Chagres River. The raft broke loose from its moorings, and floated down stream until it became entangled in the branches of an overhanging tree near the Panama railroad gravel bed at Gamboa. Shortly afterward, a floating log collided with the raft, causing it to break in two, and allowing the anchors to sink to the bottom of the river. They were pulled out a few days ago by a Panama railroad locomotive, and are now at Mount Hope storehouse pending final disposition.

The Colon Humane Society has donated the sum of $100 to be distributed among needy cases in Colon or Cristobal, through Mr. William Bennyhoff, who had charge of the Red Cross camp in Colon.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 66 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 27, being 1,367,237¼ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending May 27, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

EXECUTIVE ORDERS.

To Provide for the Collection of a Distillation Tax.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. On and after the date on which this Order shall take effect, there shall be collected the sum of *ten cents* on each and every litre, or fraction thereof, of distilled spirits produced in the Canal Zone from grain, starch, sugar, molasses, or any other substance by distillation, or any other alcoholic liquors produced by distillation, for sale or consumption.

Section 2. Manufacturers or distillers of any of the spirits or alcoholic liquors mentioned in the preceding section shall make application in writing to the Collector of Revenues of the Canal Zone, upon a form prescribed by him, for license to engage in business as such manufacturers or distillers. No application shall be granted by the Collector of Revenues unless the applicant secures the the payment of the taxes that may accrue under the provisions of this law by executing a bond with two or more good and sufficient sureties to the satisfaction of the Collector of Revenues, conditioned upon the applicant's faithful compliance with this Order and the regulations issued thereunder, and that he will pay all taxes that may be assessed against him under this Order; or in lieu of said bond the Collector of Revenues, in his discretion, may require a money deposit from such applicant to secure the payment of such taxes. The said bond or deposit, as the case may be, to be subject to such rules and regulations in conformity herewith as the Isthmian Canal Commission may from time to time establish.

Section 3. The tax herein provided for shall be computed upon a meter measurement of the output of each still made through a meter of standard make, which shall be attached to the still under the supervision of the Collector of Revenues, or his Deputy, and in a manner satisfactory to said officer, and at the expense of the owner or operator of said still; and the Collector of Revenues shall withhold the license for the operation of said still until the said meter has been attached thereto in the manner herein provided for.

Section 4. The licensed manufacturer or distiller under this law shall be permitted to sell or otherwise dispose of the output of his still, at his place of manufacture or production, in quantities of not less than *five gallons* without the payment of any further license tax than that prescribed by this Order.

Section 5. Any person manufacturing or distilling any of the spirits or alcoholic liquors herein enumerated before obtaining a license to do so from the Collector of Revenues, or before installing the meter herein prescribed, or who shall tamper with any still or meter or connection thereof with intent to defraud the revenues of the Canal Zone, shall be guilty of a misdemeanor, and upon conviction, shall be punished by a fine not exceeding one thousand dollars ($1,000), or by imprisonment in the district jail for a term not exceeding twelve (12) months, or by both such fine and imprisonment, within the discretion of the court.

Section 6. The Isthmian Canal Commission may from time to time establish such rules and regulations as may seem necessary to execute the provisions of this Order.

Section 7. All laws, orders or decrees in conflict with the provisions of this Order are hereby repealed.

Section 8. This Order will be effective *thirty days* from this date.

WM. H. TAFT.

THE WHITE HOUSE, *May 13, 1911.*

[No. 1353.]

Relating to the Boarding of Trains in the Canal Zone.

By virtue of the authority in me vested, I hereby establish the following Order for the Canal Zone:

Section 1. Any person who shall board any passenger, freight, or other railway train in the Canal Zone, whether moving or standing, for any purpose and without in good faith intending to become a passenger thereon, and with no lawful business thereon, and with intent to obtain a free ride on such train, however short the distance, without the consent of the person or persons in charge thereof, shall be guilty of a misdemeanor, and shall be punished by fine of not less than five dollars, nor more than twenty dollars.

Section 2. This Order shall take effect thirty days from this date.

WM. H. TAFT.

THE WHITE HOUSE, *May 11, 1911.*

[No. 1352.]

Drowning.

Ambrose O'Neill, an American, employed as fireman in the Cristobal fire department, was drowned while bathing at Toro Point on Tuesday, May 30. He was born at Liberty, N.Y., was 34 years of age, and had been on the Isthmus since May 31, 1910. His father, residing at 81 McDougal street, Brooklyn, survives him.

Duty Exemption for Returning Employes.

Employes of the Isthmian Canal Commission and the Panama Railroad Company, returning to the States, are allowed $100 worth of merchandise in the nature of personal effects at their foreign value, free of duty, provided they are not intended for other persons, or for sale, or to be used in business, and are properly declared on regular form, issued by customs authorities. Under this ruling, employes are not allowed to carry articles of merchandise into the States, free of duty, for their relatives and friends.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 60 per cent completed, 137,327 cubic yards, out of a total of 225,000, having been placed at the close of work on May 27. A statement of the amount laid each day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
May 22	256	8:00	1
May 23	244	8:15	1
May 24	276	8:30	1
May 25	176	6:30	2
May 26	176	8:00	1
May 27	212	8:00	2

Married.

SHADY–BEELER—At Greencastle, Indiana, on May 11, Ada Mae, daughter of Mrs. Elizabeth Beeler, to Mr. Richard Carson Shady. Canal Zone residence, Gorgona.

LABOR FORCE AND QUARTERS IN APRIL.

The total of the Canal and Panama railroad force at work on April 26 was 35,259, as compared with 35,806 in March, 1911 and with 36,903 in April, 1910. Of the total in April, 1911, Canal employes numbered 28,132, and Panama railroad, 7,127. The force report follows:

Panama railroad force, 3,786; Panama railroad relocation force, 2,322; Panama railroad commissary force, 1,019. Total, 7,127. I. C. C. force, 28.132. Grand total, 35.259.

*All wages specified are in gold.

On May 1, there were 23,403 occupants of commission quarters. Of this number, there were 9,446 white Americans, including 5,438 men, 2,085 women, and 1,923 children. There were 5,562 Europeans, of whom 4,954 were men, 259 were women, and 349 were children. There were 8,395 negroes, of whom 5,945 were men, 1,125 were women, and 1,325 were children. The above figures include 30 Asiatics at Balboa, and two at Porto Bello.

ATLANTIC TERMINAL DOCKS.

Project Providing for Extensive System Approved.

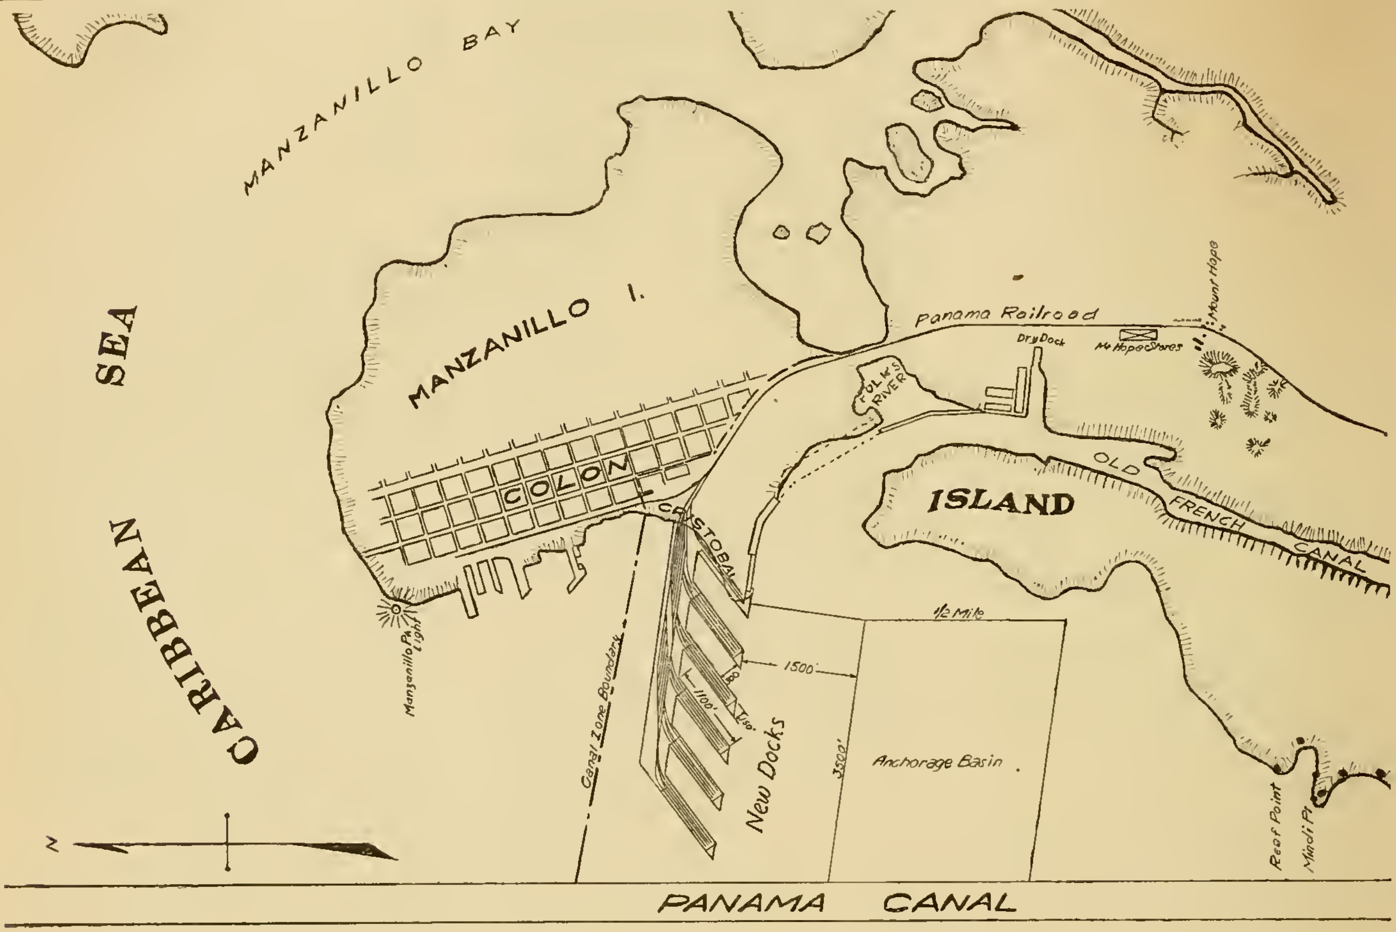
A project for terminal facilities at the Atlantic entrance of the Canal has been approved. It consists of a series of five reinforced concrete docks at which ten 1,000-foot vessels, or 20 vessels of the type now in the Isthmian trade, may tie up at one time and take on and discharge cargo. After consultation with representatives of the Navy, Cristobal Point was determined upon as the site, and borings are now being made to determine the nature of the material underlying the water at this place. A preliminary estimate, based on a preliminary survey, places the cost of the series of docks at $7,811,666, divided, as follows:

Breakwater and back filling	$958,100.00
Permanent extension, Dock 11 (Pier 15) and Pier 16	479,221.00
Pier 17	696,389.00
Piers 18, 19, 20, 21	2,785,556.00
Dredging 9,558,000 cubic yards	2,867,400.00
Construction plant	25,000.00
Total	$7,811,666.00

The docks and anchorage basin in their relation to Cristobal, Colon and the Canal entrance are shown in the accompanying illustration. The plan provides for an anchorage basin east of the Canal, an artificial mole projecting from Cristobal Point, and docks between this mole and the anchorage basin, and the construction of docks around Cristobal Point. It provides for complete shelter of vessels without the construction of the east breakwater, and will enable them to discharge and take on cargo without entering the Canal, an advantage over the plan heretofore considered of having an interior anchorage basin immediately north of Gatun.

Pending the result of investigations now in progress, the nature of the construction has not been determined. Borings so far made, however, indicate a good bottom, and the desirability of concrete bulkhead construction, and the preliminary estimate quoted above is based on this method. It contemplates the sinking of steel cylinders, 10 feet in diameter, spaced 20 feet from center to center, to bed rock. These cylinders will be filled with concrete and connected by a solid bulkhead of reinforced concrete sheet piles, 12 by 20 inches, driven to a point 15 feet below the lowest dredging of the channel. A steel girder encased in concrete, joining the tops of these cylinders, and a 24-inch I-beam encased in concrete and located 15 feet below the water line, take the thrust of the piling. The cylinders will be tied together in pairs directly across the width of each pier. The area with the bulkheads will then be filled to floor level, which will be 10 feet above mean tide, and covered with a floor of surface hardened concrete.

It is estimated that the breakwater and approaches to the docks will require 1,500,000 cubic yards of filling; and the piers themselves 913,000 cubic yards. There will also be required 675 steel cylinders, 152,565 cubic yards of concrete, 402,000 linear feet of reinforced concrete sheet piling, 1,498,560 pounds of steel girder, and 804,000 pounds of steel I-beam.



PLAN OF TERMINAL DOCKS AT ATLANTIC ENTRANCE.

Cristobal Drydock Operations.

The record of operations at the Cristobal drydock for the period from January 1, 1911, to May 20, inclusive, shows that 43 vessels had entered and had been given repairs. The vessels occupying the dock for the longest periods during this time were the suction dredge *Caribbean*, which received a general overhauling, and barge No. 7, which was beached and damaged by a "norther" at Colon in December last. Included in the list of vessels that underwent repairs were two schooners engaged in the West India trade, the *Eduardo* of St. Croix, and the *John Blackwood* of Barbados.

Spanish War Veterans.

Chagres Camp, No. 2, U. S. W. V., will hold a special recruiting meeting in Las Cascadas, on Sunday, June 4, at 7 p. m., in the lodge hall. For blank applications apply to adjutant or commander of camp at Culebra. All members are notified that a regular meeting will be held at Culebra on June 10, at 8 p. m., in the lodge hall. The department inspector will hold an inspection of the camp on that night, and it is requested that all comrades be present.

H. W. Coutermarsh, *Adjutant.*

Culebra, C. Z., May 26, 1911.

FRENCH CANAL PROPERTY.

Special Committee Estimates Its Value to the Isthmian Canal Commission at $42,799,826.

The following report has been approved by the Chairman and Chief Engineer, and the committee's valuation of the property acquired from the French Canal Company has been adopted as the official appraisement of the Isthmian Canal Commission:

Col. Geo. W. Goethals,
Chairman and Chief Engineer,
Culebra, C. Z.

Sir: The special committee appointed by you "to ascertain the value of what the United States received from the French, and for which the United States paid $40,000,000," have the honor to report.

In your letter dated May 3, 1911, appointing the committee, you said:

"Since the estimates were made which are now quoted in this matter, new information has developed that may affect the previous values. Just what figures shall be accepted will depend upon the assumptions on which they are based, and, therefore, any statement of valuation should be accompanied by a full explanation of such assumptions."

The estimate of $40,000,000 was made by the Isthmian Canal Commission of 1899–1901 in a supplementary report to the President, under date of January 18, 1902, and contained the following items:

Excavation already done	$27,474,033
Panama Railroad stock at par	6,850,000
Maps, drawings and records	2,000,000
	$36,324,033
To cover omissions	3,675,967
	$40,000,000

In making their investigation the present committee decided to take up the items of this estimate in their regular order considering first the question of excavation.

Excavation.

When the Isthmian Canal Commission of 1899–1901 made its estimate, it had in view a canal project which contemplated the use of 39,586,332 cubic yards of the excavation done by the French. This project was for a sea level channel from Cristobal to Bohio, a lake from Bohio to Pedro Miguel, an excavated channel from the locks at Pedro Miguel to Miraflores, and a sea level channel from Miraflores to the Bay of Panama. For the project now under construction, which was authorized in its general features in June, 1906, the volume of useful French excavation is much less than that estimated for the project of the Commission of 1899–1901, chiefly because a very large portion of the French canal between Gatun and Bas Obispo is below the + 40-foot grade of the present project. The committee of December, 1909, appointed to determine the volume of French excavation, which was useful to the present project, reported the amount as 29,908,000 cubic yards, classified, as follows:

	Cubic Yards.
Dry	23,138,000
Wet	6,770,000
Total	29,908,000

In determining the value of this excavation to the present project, consideration was given to the fact that it was pioneer work. It included clearing the ground and opening up the work, and also the diversion of several streams. It is probable that a large quantity of it was hand work, and, although it was mostly earth, pioneer excavation is expensive. There was also a considerable amount of rock removed at Gold and Contractor Hills, and at Bas Obispo. For these reasons it was decided by the committee to value this excavation at the average price of excavation under the present Commission previous to June 30, 1909, at which time a total of about 40,000,000 cubic yards of dry excavation had been removed. This average price was $1.03 for dry excavation, and 23 cents for wet. On this basis the value of useful French excavation to the present project is:

Dry, 23,138,000 c. y., at $1.03	$23,832,140
Wet, 6,770,000 c. y., at $0.23	1,557,100
Total	$25,389,240

In the judgment of the committee this is a very conservative estimate, inasmuch as no charge is included for waterworks or sanitation, expenses which would have been incurred had this excavation been done by the present commission.

Panama Railroad Stock.

Included in the purchase from the new Panama Canal Company were 68,888 shares of Panama Railroad stock, par value $100 each, leaving 1,112 shares in the hands of private parties. These 1,112 shares were purchased at a cost of $157,118.24, or an average price of $140. In arriving at the value to the Commission of the 68,888 shares, the average price paid for the outstanding shares was used. This gives a valuation of $9,644,300. When it is considered that the railroad is a very valuable asset to the Commission, and, that through ownership of the property, the Commission has secured the transportation of its freight and passengers at cost, besides using the Panama Railroad Company in many other ways, the valuation is thought reasonable.

Maps, Drawings and Records.

After careful consideration of this item, based on experience since the Americans began work, it was the unanimous judgment of the committee that the estimate of $2,000,000 was a conservative one, and should stand approved in the present valuation.

Material and Equipment.

A partial inventory of the material and equipment received from the French was made by the Commission in June, 1906, and this has been supplemented by members of the present committee with the following results:

Floating equipment	$651,000
Shop machinery and tools	111,076
Rolling stock	297,900
Scrap	294,071
Miscellaneous material	751,396
Air compressors	6,620
Total value	$2,112,063

Buildings.

An estimate of the value of the buildings received from the French Canal Company, by the Americans, based on the past value of the buildings at the time of the transfer, plus the value of repairs, minus 10 per cent to cover depreciation, was made by the architect of the Commission in 1908. There were 2,148 buildings in the Canal Zone turned over by the French, of which, on August 1, 1908, 1,536 had been repaired and were in use. Their estimated value was, as follows:

Quarters, gold	$625,483.63
Quarters, silver	443,800.30
Hotels	7,455.23
Hospitals	482,763.31
Jails	13,503.34
Schoolhouses	12,702.78
Shops	110,200.85
Storehouses	94,099.70
Structures	77,218.20
Miscellaneous buildings of old Department of Sanitation and Government	11,976.46
Total	$1,879,203.80

Not included in this list was the Administration building in Panama, and the residence at present used as the American Legation in Panama. The value of the former, in the judgment of the Committee, was $125,000; and of the latter, $50,000, making the total value of the buildings received from the French, $2,054,203.

Lands.

The French Canal Company purchased, during its existence, a total of 13,520 hectares of land, for which it paid $535,120.73 Colombian money, then equivalent to $428,096.58 gold. This land was included in the property transferred to the United States, but no estimate of its value was made by the Commission of 1899–1901. The price paid for those portions of these lands lying along the line of the Canal do not vary materially from the prices paid by the United States for lands which it has purchased in similar localities since construction began, but others of the French lands, notably those lying near the Pacific entrance of the Canal, were purchased at much lower figures than they could be purchased today. Taking as a basis for valuation the prices which the United States has paid for lands, both through private agreements and under awards made by joint commissions, it is the opinion of the committee that, if the United States was not the owner of any of these lands, and was obliged to acquire them today, in view of the certainty of the Canal's completion, the cost would not be less than $1,000,000.

Other Items.

The committee have considered that the French channel from Balboa to deep water, which was in use for approximately the first four years of American occupation was worth, to the Commission, the sum of $125,000 a year, or $500,000, this being the only approach for commercial shipping and for the delivery of supplies on the Pacific side during that period.

There was a considerable amount of clearing and roadmaking done by the French at several points in the Canal Zone, notably at Ancon, Cristobal, and Empire. The committee consider the sum of $100,000, a moderate estimate of the value of this work.

Recapitulation.

Excavation	$25,389,240
Panama Railroad stock	9,644,320
Maps, drawings and records	2,000,000
Material and equipment	2,112,063
Buildings	2,054,203
Lands	1,000,000
Use of Pacific ship channel	500,000
Roadmaking and clearing	100,000
	$42,799,826

In reaching their conclusions, the committee have ascertained from all available data, the value to the Commission at the present time of the various properties acquired. In their judgment, the aggregate valuation—$42,799,826—is as accurate an estimate as it is possible to make, and they recommend that it be adopted as the official appraisement of the Commission.

Very respectfully,
Joseph Bucklin Bishop, *Chairman,*
W. G. Comber,
A. S. Zinn,
Ad. Faure,
R. W. Hart,
H. S. Farish.

The Southern Baptist Conference will grant a loan to the Baptist mission in Colon for the reconstruction of their church building, which was destroyed by the recent fire.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

With the meeting on Thursday afternoon, May 11, the season of the Gorgona Woman's Club closed. The present officers will hold over until fall. Meetings will be resumed on September 14, when officers will be elected and the work for the year planned.

The season of the Paraiso Woman's Club closed on Wednesday afternoon, May 24, with a large attendance. Beside the club members, there were present members of the Empire Woman's Club, the teachers and pupils of the upper grade school at Paraiso, and other guests. The gallery of pictures belonging to the Canal Zone Federation of Women's Clubs was exhibited, and Mrs. A. O. Herman of the Cristobal Woman's Club spoke on the different schools of art and the masterpieces represented in the exhibit. Miss Jessie Smith played a violin selection, accompanied by her mother, Mrs. M. E. Smith. The "Current events" class was led by the chairman, Mrs. C. G. Hennigh. The program was followed by a general reception. Refreshments were served at tables decorated with ferns and roses. The club season will reopen in September.

Church Notes.

At a dance in the social hall over the Commission hotel, Las Cascadas, by the members of St. Bernardo's Church, on May 13, the receipts were $85. St. Bernardo's parish is about two years old. The building occupied by the church was given by the Commission, janitor service and light being furnished. In addition, there are two rooms for the resident priest in the rear of the building, which were furnished by the Commission. The pews and furnishings of the church, and the organ, were given by the members of the congregation, which is composed of about 20 American families residing in Las Cascadas. There are two societies connected with the church, viz., St. Elizabeth's Altar Society, which is composed of 14 ladies, and the St. Bernardo's men's club. Mass is celebrated every Sunday at 9:15 a. m.; Sunday school meets at 10 a. m., and vespers are sung at 7:45 p. m. The choir is composed of Americans.

At the invitation of Father Rojas, pastor of the Gorgona Catholic church, Messrs. Ergenzinger and Sheridan of Empire came to Gorgona on Sunday, May 7, and told the Catholic men of Gorgona of the work of St. Ferdinand's Society at Empire. Those attending decided to organize a similar society to that in Empire, and the Gorgona Catholic Club was formed. The purpose of the club is to promote acquaintance among the Catholics of Gorgona, and incidentally assure a fixed sum for the pastor of the church.

Officers were elected and permanent committees were appointed to look after the welfare of the club. The officers are: President, K. G. Faille; vice-president, George A. Ringger; secretary, A. P. Ridge; treasurer, John J. Purcell. The permanent committees are executive, membership, and entertainment. At a subsequent meeting it was decided to have general communion for the members of the club several times during the year. The first will be on Sunday, June 4, at 7 a. m.

Miscellaneous Events.

The Las Cascadas Euchre Club, a recently formed organization composed of twelve ladies, held a social meeting at the lodge hall on Tuesday evening, May 23. Cards were played and the evening closed with informal dancing. Refreshments were served. The club meets on the first and third Tuesday afternoons in each month, and social evening meetings are held monthly for members and their husbands.

The Las Cascadas Dancing Club held a dance in the lodge hall on Thursday evening, May 25.

The regular dance of the Pacific Dancing Club at Paraiso was held in the lodge hall on Saturday evening, May 27.

A "hard times" dancing party was given by the Empire Kangaroos in the lodge hall, on Monday evening, May 29.

The children at Bas Obispo were given an entertainment and "treat" in the gymnasium at Camp Elliott on Tuesday evening, May 9, a sum of money for the purpose having been donated by a recent visitor to the camp. Games were played, and refreshments, consisting of cake, ice cream, candy, and fruit, were served. Each child was presented with a souvenir of the occasion. There were about 50 children present.

Notice to Kangaroos.

The charters of Tabernilla Court, No. 2, and Las Cascadas Court, No. 4, Independent Order of Panamanian Kangaroos, have been annulled, and all members in good standing have been issued time demits. These demits must be deposited with a subordinate court on or before September 30, 1911, or said members become nonaffiliated Kangaroos. For further information, address the Clerk of the Supreme Court.

GEO. F. SWEENEY, *Clerk.*

Gorgona, C. Z., May 27, 1911.

A. U. of S. S. and D.

There will be a special meeting of the A. U. of S. S. and D. on Sunday, June 4, at the lodge hall, Culebra, at 2:30 p. m. All members are requested to be present, in order to transact important business.

Obituary.

R. H. Schofield, an employe of the Pacific Division at Balboa, died at Ancon hospital on May 13. He was twenty-five years of age, single, and had been on the Isthmus since October, 1910.

Missing Men.

Any one having information regarding the whereabouts of Whilliam Mohrenweiser and James A. Shank, who are supposed to be on the Isthmus of Panama, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of one Alonzo Arnold or Arnold Parrish, an ex-soldier, who is believed to have come to the Isthmus, is requested to communicate with the American Legation, Panama.

Sailing of the Cristobal.

The steamship *Cristobal* will sail for New York from Pier 11, Cristobal, at 3 p. m., on Wednesday, June 7.

Family Quarters.

Application for married quarters were on file on May 1, as follows:

PLACE.	No. 1 List.*	No. 2 List.
Ancon	2	32 (1)

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

The Boy Scouts are now beginning their regular work, in order that they may be able to take the "tenderfoot" test.

A "smoker" was given at the clubhouse on Saturday, May 27, with a large attendance. The program was, as follows: Orchestra; balancing act, Mr. Russell Chatfield; swinging Indian clubs, Kramer; orchestra; solo, Mr. Sales; brass bar swinging, Kramer; slack wire walking, Mr. Chatfield; dance, Mr. Holmes; "Get the buck," Messrs. Bunker and Cunningham; wrestling, Messrs. Collier and Weurz; popular songs and refreshments.

An informal "social" will be given on Friday, June 2. The ladies will furnish pies and cakes and a good program will be given. The bachelors are especially invited to attend.

CULEBRA.

The Culebra bowling team won three games from the Gatun team on Saturday, May 27. The scores are, as follows:

Culebra.				Gatun.			
Fredrick...	85	87	93	Atkins......	84	82	103
Huttlemeier	86	89	97	Adams.....	88	85	94
Conlon....	91	82	105	Rosselot....	81	89	93
Kersey......	77	88	84	Barte.......	94	86	111
Case.......	81	107	99				
Total....	420	453	478		347	342	401

The 100 duckpin scores for the week ending May 27, are, as follows: Conlon, 105; Brown, 102, 111; Crain, 128; Huttlemeier, 100, 101, 105, 100, 113; Case, 115, 103, 100, 102, 109, 100, 105.

The gymnasium class has begun and 15 men are taking advantage of the opportunity for physical work. There is room for several more men, and all members are welcome.

EMPIRE.

The following high scores were rolled in duckpins during the pst week: Dakin, 106, 107; Pinney, 116; Rodeghiero, 101, 107, 113, 111, 106; Rieman, 105, 103, 102; Sawtelle, 104; Garrett, 110, 101; Gorham, 102; Parkis, 106; Potter, 105.

In the duckpin match, Saturday morning, Empire won two out of three games from Culebra.

At the literary society, Friday, May 26, the debate "Resolved, that the Canal should be fortified by the United States," was won by the affirmative. The Rev. Mr. Decker spoke on his recent trip down the coast of Panama.

The Hill Magical Company, necromancers and illusionists, presenting Prof. Kellerman and Assistant Ivanoff, will appear at the Empire clubhouse, Wednesday, June 7.

GORGONA.

The local representative indoor baseball team defeated the "Outlaws" in a fast game, Saturday night, May 27, by the score of 14 to 10. Batteries: Regular team—Ridge and Christianson; "Outlaws"—Kenny and Bielaski.

The Cristobal duckpin team took three straight games from the local team Saturday night.

All men wishing to try for the Fourth of July track team should report for practice Mondays, Wednesdays and Fridays, at 5:15.

The leader's corps will meet every Thursday and Saturday at 5:15, to prepare for the coming gymnasium season in July.

The Hill Magical Company, presenting Prof. Kellerman, will be at the clubhouse, Friday evening, June 2.

GATUN.

A sacred concert was given by the Corozal Musical Society at the clubhouse, Sunday, May 28, at 6 p. m.

The high school of the Canal Zone will give its annual entertainment on Wednesday night, May 31. A cantata, entitled "Wreck of the Hesperus," and a play, "Our Bob," will be given.

The literary club had its largest attendance on May 24. The debate was "Resolved, that the Republic of Panama should be annexed to the United States." The affirmative speakers, Mr. Sands and Mr. Wantland lost to the negative, which was upheld by Mr. Wood and Mr. Carr. Mr. Young, former president of the society, spoke of his trip as a soldier to China, during the Boxer uprising. The literary club is considering a challenge from the Cristobal club for a debate in the near future. It has been suggested that an interassociation debating tournament be arranged among the Y. M. C. As. on the Zone.

Gatun took two out of three games of duckpins from Culebra, on Saturday night, May 27.

Mr. Jess T. Hopkins, physical director at Gorgona, will lead a discussion on "Health," at the "Life problem" club, on Sunday night, une 4. Mr. Hopkins is the head of the "Health league" on the Isthmus.

Mr. Alex. H. McLain has high-run in the pool contest for May. The contest closes at 10 p. m., May 31.

In addition to Col. Sibert and W. N. Windes, the following men of Gatun, representing different lines of work, have been added to the Gatun council: R. M. Sands, F. E. Shuck, Fred Huber, R. M. Gamble, W. C. Gayer, and Dan St. Clair.

CRISTOBAL.

The standing in the Isthmian Duckpin League is, as follows:

	Played	Won	Lost	Per cent
Cristobal...............	36	29	7	.805
Empire...................	30	18	12	.600
Culebra.................	36	16	20	.444
Gatun....................	36	13	23	.361
Gorgona..	30	8	22	.266

Result of games bowled at Cristobal, May 27:

Gorgona.				Cristobal.			
Miller.....	77	93	73	Barrett.....	108	87	101
Davenport.	83	84	78	Furlong....	103	92	93
Seebt......	76	75	77	Hess.......	75	82	85
Simka.....	84	95	98	Claherty....	82	109	80
Orr, J.....	82	77	73	DeCora.....	98	99	113
Total......	402	424	399		466	469	472

In the opening game of the basketball league Tuesday night, Luce's team defeated Morton's team by the score of 34 to 26. Two games will be played June 1.

Corozal forfeited the baseball league game Saturday night by failing to appear.

The literary society had for its subject, "Resolved, that the statehood of Utah be annulled, owing to Mormon duplicity." Messrs. Storla and Randolph upheld the affirmative, and Messrs. Hoyt and Wempe, the negative. The judges decided in favor of the negative. Singing of popular songs, and a reading by Mr. Goodman completed the program.

A committee composed of Messrs. Bullard, Weaver, Marsh, Mosher, and Goodman, have begun making plans for the anniversary banquet, to be held June 29, when the Cristobal Y. M. C. A will have been open for four years.

PORTO BELLO.

Great interest is being maintained in the different tournaments by the members of the Porto Bello chess club. Eighteen moves have been made to date in the tournament by wireless, between the Porto Bello and Culebra chess clubs. Two problems in chess have been played by the members. The third and last is to be played Tuesday night.

A pool tournament has been started, ten names being entered. First and second prizes are to be awarded.

The Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago, Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on June 14 and July 12, and for Port Limon at 5 p.m. on June 14.

The Leyland line steamer *Colonian* sails for New Orleans direct on or about Saturday, June 3.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (*) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JUNE 7, 1911. No. 41.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

NOTES OF PROGRESS.

Pacific Division Locks.

Operations with the permanent construction plant at Pedro Miguel Locks ceased on Saturday, May 20, when the second of the two berm cranes, formerly in use there, was shut down, preparatory to being dismantled for transfer to Miraflores Locks. Hereafter, the concrete mixing at Pedro Miguel Locks will be performed by the auxiliary plant, which now consists of two 2-cubic yard mixers, situated on the west storage trestle in the north forebay, one 2-cubic yard mixer on the east bank at the south end of the lock, and a portable one-half yard mixer. It has been decided not to move all the chamber cranes to Miraflores, but two will be retained at Pedro Miguel, as, in addition to placing concrete, they can be used to advantage in back filling the middle wall, and for miscellaneous handling purposes.

The permanent construction plant at Pedro Miguel Locks was first operated in its entirety on July 6, 1910. For a month or so prior to that time, however, one of the berm cranes and two of the chamber cranes were in use. When the complete plant was first placed in operation, there had already been laid in the locks upward of 175,000 cubic yards of concrete, mostly produced by an auxiliary plant. Between July 6, 1910, and May 20, 1911, there had been laid a total of about 475,000 cubic yards of concrete, mostly mixed and handled by the permanent plant, and of the total of concrete in place on May 20, 1911—651,080 cubic yards—over 400,000 yards had been mixed and placed by the permanent construction plant. There remained to be laid on June 3, 1911, about 180,000 cubic yards, which will be produced by the auxiliary plant.

At Miraflores Locks, two of the berm cranes are in operation, another is nearly set up, and the work of assembling a chamber crane has been begun. The handling system ultimately adopted for these locks, provides for building the side walls with the berm cranes, and for carrying forward the center wall construction with the chamber cranes. Under this arrangement, only two chamber cranes will be required, which will be transferred into the lower lock, as soon as center wall construction in the upper lock is far enough along. It is expected that by the middle of August, concrete operations in the upper lock will be under full headway. In one day recently, one of the berm cranes mixed and delivered directly into the side wall, 820 cubic yards of concrete.

Dynamite for 1911-12.

Bids for supplying 6,500,000 pounds of 45 per cent, and 3,500,000 pounds of 60 per cent, dynamite, a total of 10,000,000 pounds, the estimated amount required for the Canal work during the fiscal year 1911–12, were opened recently in Washington. Awards were made, as follows:

1,625,000 pounds of 45 per cent dynamite, to the Keystone Powder Company, at $12.25 per 100 pounds.

4,875,000 pounds of 45 per cent dynamite, to the DuPont-Nemours Powder Company, at $12.73 per 100 pounds.

1,750,000 pounds of 60 per cent dynamite, to the Keystone Powder Company, at $13.65 per 100 pounds.

1,750,000 pounds of 60 per cent dynamite, to the DuPont-Nemours Powder Company, at $13.82 per 100 pounds.

The price of the dynamite under these awards averages over one cent per pound higher than the figures at which it was supplied for the present fiscal year, which, in turn, were higher than for the previous fiscal year. The prices, under the awards, for the three years in question are, as follows:

FISCAL YEAR 1909-10.

45 per cent dynamite..........$10.60 per 100 pounds.
60 per cent dynamite..........$11.60 per 100 pounds.

One manufacturer was awarded the contract for the entire amount.

FISCAL YEAR 1910-11.

45 per cent dynamite—Keystone, $11.60; Du Pont-Nemours, $11.70, an increase of from $1 to $1.10 per 100 pounds over the previous year's bid.

60 per cent dynamite—Keystone, $12.65; DuPont-Nemours, $12.70, an increase of from $1.05 to $1.10 over the previous year's bid.

FISCAL YEAR 1911-12.

45 per cent dynamite—Keystone, $12.25; DuPont-Nemours, $12.73, an increase of from 65 cents to $1.03 over the previous year's bid.

60 per cent dynamite—Keystone, $13.65; DuPont-Nemours, $13.82, an increase of from $1 to $1.12 over the previous year's bid.

The estimate of dynamite required for the fiscal year ending June 30, 1911, was 13,727,000 pounds. The orders filled, or which remain to be filled, during the present fiscal year, aggregate 10,273,200 pounds; the difference between the estimate and actual requirements, therefore, being 3,453,800 pounds.

District Nursing in Colon.

The two nurses of Colon hospital, who were detailed to special duty as district nurses in the city of Colon, and in Cristobal, have returned to their duty at the hospital, because they can no longer be spared for outside work. This special work was begun on January 15, and the results are believed to have justified the experiment. The work of teaching the mothers to care for and properly feed their infants was difficult, but it is believed that could such teaching be continued over a longer period the benefits would be widespread. The nurse, whose district lay in that part of the city which was destroyed by fire in March, followed her patients into the Red Cross camp and continued her work under somewhat easier conditions. A number of cases of skin diseases broke out at this time, and these were handled by the district nurse. During the four months the two nurses made 3,565 visits. The question of placing nurses on duty in Colon and Cristobal will be again considered in the fall.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 61 per cent completed, 138,371 cubic yards, out of a total of 225,000, having been placed at the close of work on June 3. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
May 29	212	7:30	1
May 30 (Holiday)	....	....	....
May 31	224	8:00	
June 1	192	6:45	2
June 2	168	6:00	1
June 3	248	7:30	2
Total	1,044	35:45	1.40
Previously reported	137,327	....	....
Grand total	138,371		

Balboa Notes.

Two of the caissons for the foundation piers of the new Panama railroad lumber dock are being filled with concrete; two are being anchored to bed rock, and the work of excavation at 10 of the other pier locations is going forward. By an alteration in the plans, involving a slight change at one end of the dock, the number of piers required has been reduced to 53.

In making the borings for the proposed new drydock, there was recently brought out a drill core of solid rock, six feet six inches in length, and one inch in diameter. The core consists of the hardest kind of trap rock, without the least change in color or grain from end to end. It is believed that this is the longest core of the kind that has ever been produced intact on the Isthmus.

The steamship *David* of the National Navigation Company of Panama left the shipways on June 3, after receiving a general overhauling. Among the more important repairs made to the vessel, were the fitting of a new tail-end shaft, the fitting of both shafts with new stern bushings, reinforcement of the stern bearing struts, renewal of the rudder, inspection of boiler and application of

NOTES OF PROGRESS.

(*Continued.*)

hydrostatic test, overhauling of its lifesaving appliances, scraping and painting hull. The latter was found to be in good condition. The *David*, which was built in London in 1908, will take the place of the *Taboga*, recently lost off Guanico Point, province of Los Santos, on the run between Panama and Pedregal, the port of David, in Chiriqui. At the request of its owners, the vessel was given inspection by the Local Board of Inspectors.

The steamer *Coclé*, another vessel belonging to the National Navigation Company, which was damaged off the Panama coast a short time ago, is on the shipways undergoing numerous repairs, chief among which is the rebuilding of its engine, renewal of propeller, placing of ten feet of shoe fore and aft, inspection of boiler and application of hydrostatic test, scaling and painting. The vessel was constructed in Valparaiso in 1873, where it was brought, knocked down, from Scotland. The hull, made of Lowmore iron, was found to be in a good state of preservation.

Pacific Division Sand Service.

Sand was supplied in May by the Pacific Division service, as follows:

DESTINATION.	Number Cars.	Cubic yards.
Pacific Division	2,338	35,070
Central Division	29	435
Atlantic Division	26	608
Quartermaster's Department	4	100
Panama railroad	2	50
Miscellaneous	14	235
Total	2,413	36,498

Porto Bello Crusher.

A statement of the work done at Porto Bello crusher, by days, for the week ending June 3, follows:

DATE.	Hours worked.	Cubic Yards.
May 29	7:07	3,024
May 30..(Holiday)		
May 31	7:10	3,404
June 1	5:56	2,514
June 2	6:29	2,928
June 3	6:16	2,806
Total	32:58	14,676

Pilots, Masters, Mates, and Engineers.

A meeting of the Board of Local Inspectors will be held on Wednesday, June 21, at 8 a.m., at the Administration Building, Ancon, at which time applicants for licenses as pilots, masters, mates, or engineers, who have submitted applications on the prescribed form, may appear for examination.

Teachers and Clerks, Philippine Service.

Examinations have been announced by the Civil Service Commission, which may be held at Culebra about the middle of August, for assistant (male), teacher (male and female), and industrial teacher (male), in the Philippine Service, to fill vacancies which may occur in the positions of teacher, industrial teacher, and clerk in that service. The entrance salaries for male and female appointees will probably be from $1,000 to $1,200 per annum.

It is stated that excellent opportunities exist for employes who are efficient and faithful in performing their duties, as it is the practice to fill vacancies in the higher positions by promotion of the best equipped and most competent occupants of positions filled by appointment from the above examinations. It is also set forth that in many ways the opportunities under the Bureau of Education in the work of the United States in the Philippines are unique, and will probably not be equalled anywhere in their attractions for young people having the requisite qualifications and character.

A limited supply of the announcement of the above examinations has been received in this office. Persons interested should request a copy of announcement No. 442, which should be returned to this office as soon as practicable thereafter.

JOHN K. BAXTER, *Secretary,*
Isthmian Civil Service Board.
CULEBRA, C. Z., June 1, 1911.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

Over 66 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 3, being 1,377,685¾ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending June 3, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

Grand total								1,377,685¾

The 274½ yards shown for the portable mixers are reenforced concrete, and were placed on the following days: May 29th, 44 yards; May 31st, 88 yards; June 1st, 42 yards; June 2d, 42 yards; June 3d, 58½ yards.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is about 79 per cent completed, 657,270 cubic yards, out of a total of 837,400, having been placed at the close of work on June 3. The record for each of the five eight-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total
	2-cubic yard mixers.			½-cubic yard mixer.				
	Concrete placed.	Hours worked	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

EXECUTIVE ORDER.

Government of the Insane Asylum for the Canal Zone.

By virtue of the authority vested in me I hereby establish the following Executive Order for the Canal Zone:

Section 1. The asylum for the insane at Ancon, as heretofore, shall be under the jurisdiction of the Department of Sanitation. The object of said asylum shall be the curative treatment of the insane.

Section 2. The superintendent of the Ancon Hospital shall be the administrative chief of the asylum for the insane, subject to existing laws and orders, and to such rules and provisions as may be issued by the Department of Sanitation in accordance with existing laws and orders. He shall be in charge of the general inspection of buildings, grounds, and equipment, and shall have the supervision over the professional and administrative personnel of the asylum and over the inmates, and shall satisfy himself that all patients receive the care and medical treatment which is best adapted to their comfort and recovery.

He shall see that a proper register of the patients is kept, showing their names, previous residence, occupation, origin, and antecedents, and condition at the time of admission; and their mental and physical condition, as well as their medical treatment during the time of their stay in the asylum, shall be recorded. The death or discharge of patients shall be entered in the register.

Section 3. No person declared to be insane shall be kept in a jail, prison, hospital for the sick, or other similar institution, but shall be sent, with the proper precautions, to the asylum for the insane herein provided for.

Section 4. The superintendent of Ancon Hospital, through the physician in charge of the asylum, may discharge any patient upon filing in his office a written statement that, in his judgment, such patient has recovered, or that the discharge will not be detrimental or dangerous to the public welfare or injurious to the patient, provided, that before discharging any patient who has not recovered, the superintendent shall satisfy himself, by adequate investigation, that the relatives or friends of the patient are able and willing to receive and care for such patient.

No patient shall be discharged without suitable clothing.

The discharges referred to in this section do not apply to commitments on judicial orders in criminal cases, in which cases, the discharges can be granted only by the court which directed the commitment of the prisoner.

Section 5. No person shall be admitted as a patient in the asylum for the insane except upon the order of a circuit judge of the Canal Zone, provided, that if a patient is in a state of violent insanity he may be admitted at once into the quarters hereinafter provided for the observation of persons alleged to be insane, without an order of court, upon the written request of the district physician to the superintendent of Ancon Hospital, or the patient may be admitted to the observation quarters by said superintendent without such request, in the absence of the district physician.

It shall be the duty of the superintendent of Ancon Hospital to report the case in writing to the circuit judge, within twenty-four hours after the patient has been admitted to the observation quarters, and, as soon as the judge shall have received the report he shall proceed to examine and determine the case in like manner as if the petition had been presented to him prior to the patient's admission into observation quarters.

Section 6. To obtain the judicial order provided for in the preceding section, it shall be necessary for the nearest relative of the person alleged to be insane to present a petition, duly subscribed and sworn to by the petitioner, to the judge of any circuit court of the Canal Zone, which petition shall state the sex, age, and nationality, if known, of the patient, and the facts showing his mental infirmity, and, if possible, the history of the case, and the form of insanity with which he is suffering, and the attending circumstances making it necessary that he be confined in the asylum. The petition shall be accompanied by a certificate signed by one or more reputable physicians to the effect that such person is insane.

When the nearest relatives of the person alleged to be insane are absent, or refuse to act, the petition may be made by the district judge of the district in which the patient resides, or is to be found, at the time the application is made, and in that event it shall state that the nearest relatives of the person alleged to be insane are absent or refuse to act.

Section 7. The petition provided for in the preceding section shall take precedence over all other matters pending before the court, and shall be heard by the judge thereof without delay, and if the facts stated therein are sufficient to satisfy him of the insanity of the person sought to be confined, he shall issue orders at once directing that the person alleged to be insane be taken into custody and placed in quarters hereinafter provided, for the proper observation of the case.

The order of the judge directing that the person alleged to be insane be placed under observation, shall be sufficient authority for the superintendent of the asylum to admit the patient into the institution for the purposes of observation, there to remain until the observation is concluded; and the judge shall direct in said order that if the observation shall show that the patient is not insane he shall be set at liberty at once, and the medical officer in charge of such observation shall forthwith report his action thereon to the judge who issued the order.

The observation of the alleged insane person shall be made in suitable quarters within the asylum grounds, by the chief medical officer thereof, or under his direction, and shall be for a period of not more than thirty days, and the judge who issued the order for the detention of the patient may require the medical officer in charge of the case to make reports thereon to him from time to time.

Section 8. The observation provided for in this law may be carried on at the residence of the alleged insane person, when, in the opinion of the judge, that may be done with safety to the patient and the public; and, in such cases, the judge may impose such limitations and conditions as, in his judgment, the interest of the patient and the safety of the public demand.

Section 9. It shall be the duty of the physician in charge of the observation to examine the patient and observe the symptoms of the case. Within thirty days after the patient is placed under observation, the medical officer in charge of the case shall make his report thereon in writing, and shall state whether the patient is sane or insane. The report shall contain a statement of the facts upon which it is based, and shall be sent to the court having jurisdiction of the case, within twenty-four hours after the same has been subscribed by him.

Section 10. It shall be the duty of the judge having jurisdiction of the case, within twenty-four hours after the receipt of the report provided for in the preceding section, to render judgment therein, either committing the patient to the asylum for the insane, or directing that he be turned over to his relatives, able and willing to take care of him, or to order his discharge, in accordance with the findings of the medical officer in charge of the case.

Section 11. The relatives of the person alleged to be insane, or the public prosecutor, may appear and contest the report of the medical officer, and in such cases, the judge shall hear the evidence presented by the parties and render judgment thereon, either committing the patient to the asylum, or directing his discharge as the law and the facts in the case may justify.

Section 12. From the judgment of the court rendered in accordance with the preceding section, either of the parties may appeal to the Supreme Court of the Canal Zone, which Court shall hear and dispose of the case with all reasonable despatch, giving it precedence over all other matters pending therein.

When an appeal is taken the trial court shall issue such orders as it may deem necessary and proper for the custody and safekeeping of the patient during the hearing of the appeal.

Any person interested in an inmate of the asylum, who believes he is improperly detained therein, may make application to the circuit judge of the First Judicial Circuit for the discharge of such patient. Upon the receipt of such application, the judge shall issue an order to the superintendent of Ancon Hospital to make a report on the patient's condition, and upon the receipt of such report, the judge shall consider the same, and, in his discretion, may grant or deny the application. Should the judge be in doubt as to the proper action to take, he may cause the patient to be examined by two competent physicians, who shall report to the judge in writing as to whether the patient should be released or detained in the asylum. If the physicians recommend the detention of the patient, the court may deny the application; should they recommend his release, the judge may grant the petition and discharge the patient at once.

The relatives or friends of the patient, or the public prosecutor, if dissatisfied with the ruling of the judge, may appeal therefrom to the Supreme Court of the Canal Zone, which Court shall dispose of the appeal as in ordinary cases provided for under this Order; and, pending the appeal, the trial court may make such orders relating to the custody of the patient as may best subserve the interests of the patient and the public.

If the insane person shall be serving a sentence for the violation of the criminal laws, the circuit court of the circuit, wherein the conviction shall have been had, shall have jurisdiction of the petition for the discharge of the patient from the asylum.

Section 13. The order of the judge,

directing the patient be admitted to the asylum for the insane for care and treatment, shall also provide that the marshal, or police officer acting as marshal of the court, shall convey the patient promptly under proper escort to the asylum.

Section 14. If any person confined in a prison or penitentiary under the sentence of a court becomes insane he shall be committed to the asylum for the insane by the judge of the circuit court of the circuit wherein the patient received his sentence of conviction. In all such cases, the provisions of this Order, relating to the period of observation of the patient, and the trial of the issue as to his insanity, shall be observed, provided, however, that the period of observation shall be carried out in the infirmaryof the prison or penitentiary, unless the judge, on the advice of the Department of Sanitation, is of the opinion that it should take place elsewhere. Whenever a person is committed to the insane asylum under the provisions of this section, the order of commitment issued by the court shall include a statement of the offense of which the person was convicted, the term of his imprisonment and the date upon which said term is to expire. Should such person be discharged from the insane asylum before the date of the expiration of his term of imprisonment he shall be returned to the penal institution from which he was taken, in order that he may finish his term; and shall be set at liberty if his discharge from the asylum takes place subsequent to the date of the expiration of his term of imprisonment.

Section 15. All expenses connected with cases of insanity, including the cost of observation, transportation, care, treatment, and maintenance of the patients, shall be borne by their respective estates, to be paid in due order of administration of their estates in accordance with the probate laws of the Canal Zone, and if the patients are insolvent, then the expense shall be borne by the relatives responsible for the care and maintenance of such patients under the law to be recovered by the Isthmian Canal Commission against such relatives in any court of competent jurisdiction; and if the relatives of the patient are also insolvent, then such expenditure shall be paid out of the public moneys appropriated for such purposes.

Section 16. Nothing contained in this Order shall be construed to repeal or modify the provisions of the Code of Criminal Procedure of the Canal Zone, relating to the inquiry into the insanity of the defendants before trial or after conviction.

Section 17. Insane patients from the Republic of Panama may be admitted into the asylum for the insane, herein provided for, in accordance with the existing agreements between the Canal Zone authorities and the Panamanian authorities, or under such changes and modifications of said agreements as may be made from time to time.

Section 18. The Canal Commission is hereby authorized to establish rules and regulations from time to time as may be deemed necessary for the government of the asylum for the insane herein provided for, subject to the approval of the Secretary of War.

Section 19. This Order shall take effect thirty days from this date.

Wm. H. Taft.

The White House, *May 10, 1911.*

[No. 1351.]

COLON FIRE RELIEF.

Work Done by Red Cross for Government of Panama.

Culebra, C. Z., May 29, 1911.

Excellency:

I have the honor to enclose herewith, copy of financial statement rendered by the treasurer of the Canal Zone Chapter of the American National Red Cross, showing receipts and disbursements on account of the sufferers of the Colon fire, up to and including May 27, 1911. It will be observed there has been disbursed a total of $5,658.64.

The work of the Red Cross in connection with this disaster began on the morning of March 24, 1911, the day succeeding the fire, and practically ended on May 1, 1911, when the Cristobal relief camp was closed down. Mr. William T. Bennyhoff, chairman of the Cristobal district, was placed in charge, and gave a greater portion of his time and attention to this work, until the breaking up of the camp on the date indicated.

His Excellency, Governor Rafael Neira, gave every assistance to Mr. Bennyhoff, both in regard to police protection and information as to the status of those requiring assistance, and materially aided in the general work.

The $5,000 contributed by the Government of Panama very nearly accomplished the entire work, leaving but $658.64 to be applied from the amount received from other sources, as indicated by the report herewith.

There were about 3,000 people rendered homeless by the fire. About 500 people were given shelter in the camp daily, and a total of 17,818 rations were issued, both to people living in the camp and people living outside. The approximate cost of rations was 12 cents per ration.

In addition to housing and feeding the destitute, a systematic issue of the necessities of life was inaugurated, including clothing, dry goods, hardware, tools, cooking utensils, etc. One month's rental was also supplied in many cases, and also first payments on sewing machines; the general idea being to furnish practical charity.

For your information, I furnish herewith a list of the beneficiaries, 1,711 in all, which will show in detail how this aid was rendered.

The Y. M. C. A., at Cristobal, Commissary Department at Cristobal, Quartermaster's Department, Mount Hope, and Cristobal Health Office at Cristobal, all rendered valuable assistance, and I cannot close this report without testifying also to the work of Mrs. P. T. Murphy, who gave a large part of her time, and a great deal of most intelligent help to this work.

I am, Sir, with great respect,

Yours very sincerely,

C. A. Devol,

Chairman, Canal Zone Chapter,

American National Red Cross.

His Excellency, Federico Boyd,

Secretary of the Interior, Panama.

Below is a statement of receipts and disbursements on account of the sufferers from the Colon fire:

RECEIPTS.

Received from Panama Government	$5,000.00
Received from Colonial Musical Association	7.50
Received from Cristobal Y. M. C. A. benefit performance	146.00
Proceeds of benefit ball game, Empire and Commissary-Subsistence ball teams	708.15
Received from Odd fellowslodge, Las Cascadas	40.00
Total receipts	$5,901.65

DISBURSEMENTS.

For rent	$ 680.00
For food supplies	2,220.34
For clothing, dry goods and sundries	2,246.84
For bardware, tools, cooking utensils, etc	126.94
First payment on sewing machines	60.00
For meals furnished at I. C. C. hotels and messes	136.54
For printing and stationery (including $34.05 on account of benefit ball game)	105.43
For clerk hire	50.00
Miscellaneous expenses	32.55
Total disbursements	$5,658.64
Unexpended balance, May 27, 1911	243.01

Respectfully,

John L. Phillips, *Treasurer.*

Fourth of July at Cristobal.

The address of the day at the Fourth of July celebration in Cristobal, will be delivered by the Chairman and Chief Engineer, Col. Geo. W. Goethals.

Arrangements are in progress for the entertainment of visitors on dock No. 11, Cristobal, where there will be benches for every one, and light refreshments will be served free. Tables will also be provided for such people as wish to bring their own food and eat it there.

A tennis tournament in singles and doubles will form part of the celebration of July 4. Owing to the prospective large number of entries, the preliminaries, including the semifinals in singles, will be held June 25, and in doubles, on July 2, at courts of Tivoli and Panama clubs, the matches being best two out of three sets. The finals will be held on the Cristobal courts, best three out of five sets; singles at 9:30 a. m., and doubles at 2 p. m., on July 4. This arrangement of the tournament will allow entry in either singles or doubles, or both. All *bona fide* residents of Panama, Colon, and the Canal Zone, are eligible. Gold and silver medals will be given for first and second places. There will be no entry fee; no special entry blanks are required. Entries may be made to Y. M. C.A. secretaries, district quartermasters, or Panama Railroad station agents. All entries should be reported to Chase Pulsifer, Empire, on or before June 20, 1911.

Missing Men.

Information is requested with regard to the whereabouts of Erwin Salomon of Milwaukee, who is believed by his mother to be on the Isthmus.

Any one having information regarding the present whereabouts of Charles A. Nemitz, who left the service of the Commission in December, 1910, is requested to communicate with The Canal Record, Ancon.

Any one having information regarding the present whereabouts of Herbert W. Boddy of Thorofare, N. J., who is supposed to be on the Isthmus, is requested to communicate with The Canal Record, Ancon.

Any one having information regarding the whereabouts of Thomas E. Patterson, who left the service of the Commission in March, 1907, is requested to communicate with the postmaster at Ancon.

Any one having information regarding the whereabouts of Aubrey E. Passailaigue, who is supposed to be on the Isthmus, is requested to communicate with The Canal Record, Ancon.

Obituary.

Mary Enola, daughter of Mr. and Mrs. S. M. Kent of Paraiso, died at Ancon Hospital on June 3. She was fourteen years and seven months old.

COASTWISE TRAFFIC.

New Arrangement Entered Into Between the United States and Pacific Carriers.

The new terms fixed by the United States Government for the handling of coastwise freight by the Panama route, have been accepted by the only Pacific carriers now in that trade, the Pacific Mail Steamship Company, and the California and Atlantic Steamship Company. They are, as follows:

1. On and after June 1, 1911, on all traffic moving between ports upon the Pacific coast of the United States and ports upon the Atlantic coast of the United States upon which the annexed classified tariffs are charged, the division of tariff rates between the Panama Railroad Company and its steamship connections will be, as follows:

(*a*) Upon traffic where the water haul on the Atlantic side is performed by ships of the Panama Railroad Company, the division of rates will be forty (40) per centum to the Panama Railroad Company for joint rail and steamship service, and sixty (60) per centum to the connection.

(*b*) Upon traffic where no part of the water haul is performed by the ships of the Panama Railroad Company, the rate for rail transportation across the Isthmus will be twenty-five (25) per centum of the through rate.

2. In the event that any connection of the Panama Railroad Company should quote a through rate less than that set forth in the annexed classified tariffs, the percentage payable to the Panama Railroad Company will nevertheless be calculated upon the rates therein set forth, unless the Panama Railroad Company should voluntarily consent to accept proportions upon a lower rate.

3. The Panama Railroad Company, until further notice, will furnish its Pacific connection on the Pacific side, coal at the same rate as it is furnished at Balboa to the Isthmian Canal Commission, and will make no charge at Balboa for wharfage or craneage upon coastwise traffic carried under tariffs which the Panama Railroad Company has or shall hereafter agree to.

The terms above stated supersede those of the agreement of November 15, 1909, in which the Pacific cocarrier was given 70 per cent of the through rate, coal at cost at Balboa, and craneage and wharfage free; and a basic rate of $8 per net ton on eastbound, and $9 on westbound freight was established. By this agreement the contract might be annulled on 90 days' notice. When it was found that the cost to the Panama railroad of handling the freight was actually greater than the share it received of the total rate, the 90 days' notice was served by the Government on January 19, but the agreement was later extended until June 1.

Freight business by the Panama route has increased greatly since the opening of the service by the California and Atlantic Steamship Company in October, 1910; and within the last three months there has been a decided increase in the amount of freight from Europe for the west coast of South America. This rapidly increasing freight business is severely taxing the capacity of the Panama railroad box cars for the haul across the Isthmus, and of the docks to unload and load it. A comparison of the freight business for the nine months ending April 1, 1911, with the same period in 1910, follows:

WEST OR SOUTHBOUND FREIGHT OVER PANAMA RAILROAD FOR THE NINE MONTHS ENDING APRIL 1.

Infectious Disease Among Horses.

A circular has been issued from the office of the Chief Sanitary Officer, under date of May 10, approved by the Chairman and Chief Engineer, calling attention to a fatal infectious disease of horses, known locally by the names of *morriña de cadera, murrina, and derrengadera*, prevalent among native horses in the Republic of Panama, and in the Canal Zone. It first came to the notice of the authorities through an outbreak among the animals at Ancon and Gatun corrals a little over a year ago. The epidemic was brought under control by the adoption of certain methods tending to guard against the mechanical transmission of the disease. The disease, so far as known, is uniformly fatal to horses and mules. It lasts from a few weeks to several months, and may be recognized by the following signs:

General bodily weakness, the animals falling away in flesh and their coat becoming rough and staring. Fever is present at intervals, lasting from one to six or seven days, and, during these periods, the animals have a droopy appearance. At these times, there is frequently noticed a watery or mucous discharge from the eyes; later, toward the end of the disease, there may be some swelling of the lower part of the legs, or of the lower abdomen or sheath. At this time, their gait is frequently staggering in character, and there is weakness or partial paralysis of the haunches. Little spots of redness (hemorrhage) can be noticed on the inner surface of the whites of the eyes, and on the mucous membrane of the nose. A few days before death, the animals lean against the stalls and fences, and at these points of contact with the body, sores break out from which the virus of the disease escapes.

It has been noted that during the illness of the animals, their appetites are unimpaired; in fact, they seem to be abnormal. The disease is carried from infected animals to well ones by flies lighting on the sores, cuts, and galls of the sick, and transferring the virus to the sores, cuts, and galls of the well animals. It may be also transmitted by persons, who, in the act of dressing such sores or galls, carry the virus from sick to well animals on their hands, or any instruments that may be used.

The following precautions should be taken against the spread of the disease: All wounds, sores, galls, cuts, or other evidences of broken skin on suspected or infected horses or mules, as well as on animals that are not ill, should be thoroughly protected from flies by dressings impregnated with a two to five per cent solution of cresolin, kreso, or the larvacide manufactured by the Commission. These dressings should be kept in place by a material, such as bagging. The halters, instruments, and hands of attendants or other persons coming in contact with infected animals should be properly cleaned and thoroughly disinfected, for which purpose, a solution of some of the disinfectants mentioned above should be used. Stray animals should not be impounded in or near Commission corrals. All animals having a temperature above 101 degrees Fahrenheit should be isolated in a screened stable for observation and diagnosis by microscopic blood examination, and all such animals in the Canal Zone should be reported by telephone to the Board of Health laboratory at Ancon, in order that such blood examinations may be made.

Sanitary inspectors, and the police, are required to report all native, or other animals suspected of having the disease.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the two weeks ending June 3, follows:

Date.	Hours worked.	Cubic Yards.

Seventh Day Adventists to Rebuild.

A new building, to replace the one burned in the Colon fire, will be erected by the Seventh Day Adventist Conference on a lot given for the purpose by the Panama railroad at the corner of Fourteenth and Bolivar streets. The building will be a two-story frame structure, the church occupying the lower floor, with the apartment for the resident staff of the Conference above. No provision will be made for printing plant and offices, as in the former building. The church will be reerected at a cost of $4,000 gold. There are 500 adherents of the sect in the West Indian Conference, which includes the Canal Zone, and the territory surrounding.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Rev. Victor M. Kennedy, agent of the British and Foreign Bible Society for the Isthmus of Panama, has been called to the temporary charge of the Baptist church at Gorgona. Mr. Kennedy has been on the Isthmus about one year, taking charge, in addition to his duties as agent of the Bible Society, of the work of the Baptist church, a post left vacant by the death of the Rev. J. H. Sobey. The Rev. Mr. Witt has been assigned to that work, leaving Mr. Kennedy free to supply the pulpit in Gorgona during the absence, on leave, of the Rev. J. L. Wise, superintendent of the Baptist Mission on the Isthmus. Services are held at the Commission chapel, as follows: Every Sunday morning at 11 o'clock, and on the first, third and fifth Sunday evenings at 7:45 o'clock; the Rev. Mr. Kennedy, preacher. On Wednesday evenings, prayer meeting at 7:45. On the second Sunday evening in each month, service of the Protestant Episcopal Church, under Chaplain Henry A. Brown. On the fourth Sunday evening in each month, the united Christian bodies in Gorgona hold a "Sunset song service" in the Commission clubhouse, at 7 o'clock, when there is an average attendance of 75.

The Rev. Harry Compton has arrived on the Isthmus from Delaware, Ohio, to take charge of the missionary work of the Methodist church as superintendent. Up to a year ago he had spent twenty-seven years in South America as representative of the Methodist Mission Board, his field having been in Chile, Argentina, Uruguay, and Ecuador. For eight years he had charge of the government normal schools of Ecuador. Mrs. Compton and her daughter will arrive on the Isthmus in August. The Rev. W. W. Gray, who has been superintendent of the Methodist work on the Isthmus, accompanied by Mrs. Gray, left for the States on May 31.

The Praise and Song Association of Pedro Miguel, is a recently formed church organization, which holds meetings in the social hall on Thursday nights. The Sunday school at Pedro Miguel has an enrollment of 40 pupils, and an average attendance of 30. A preaching service is held every Sunday evening at the social hall, the duty being taken by the Rev. A. A. Nellis, the Rev. Carl H. Elliott, the Rev. Charles Ports, and Mr. A. E. Soule.

Decoration Day Observance.

On Decoration Day, a memorial service was held in St. Luke's hospital chapel in Ancon, under the auspices of the Canal Zone Department of the Army and Navy Union of America, when there were present about 200 men. Among these were representatives of the Uniformed Rank of the Knights of Pythias, a detachment of sailors from the *U. S. S. Birmingham*, and a full company of U. S. Marines from Camp Elliott. The memorial address was delivered by Major Henry A. Brown, chaplain, Corps of Engineers, U. S. A.

Following the service, the men marched to Ancon cemetery, where memorial exercises were held, and a detachment of marines went to Flamenco Island to hold services at the graves of the soldiers and sailors buried there.

At Camp Elliott, Memorial Day was observed by a program of athletic events in the afternoon, and in the evening, the Marine minstrels gave a performance in the gymnasium, in which forty men took part.

Salvation Army Institute.

The social institute of the Salvation Army, which was destroyed in the fire of March 23, in Colon, will be rebuilt by the Commission, and two buildings will be brought from Tabernilla for this purpose. The new building will be similar to, although somewhat larger, than the old one. The ground story will contain a restaurant and kitchen, reading room, dormitory, and store rooms; and the second story will be quarters for the use of the resident head of the work. The Salvation Army hall on D street, which was constructed about one year ago at the expense of the organization, was also burned, and, with its furnishing and equipment, represented a loss of about $5,000. It is proposed to erect a similar hall as soon as sufficient funds can be raised. The adjutant has received $500 from the Army headquarters in London with which to carry on the work. The territorial commander is now in London attending a conference called by General Booth. On his return he will visit the Isthmus in July.

The restaurant of the institute was largely patronized by Canal employes, especially those at work on the docks, and in the vicinity of Mount Hope. According to the records of the week of April 1 to 8, a fortnight before the destruction of the building, the number of meals supplied was 1,095. An average of 50 beds a night were occupied.

Officers of Volunteers.

In reply to a cable message from the Chairman of the Commission to the effect that employes desire to compete for appointments as officers of volunteer forces, and asking whether examinations can be held on the Isthmus, the Adjutant General of the Army states:

> Persons, who are fully eligible under the requirements of general orders, No. 57, War Department, 1909, copy herewith, for examination as to their fitness to hold commissions in the volunteers, may be examined on the Isthmus, but candidates for such examination must establish their eligibility before the War Department, before their examinations can be ordered.

The examinations are for the purpose of securing a list of persons specially qualified to hold commissions in any volunteer force, organized at any time under authority of Congress, other than a force composed of organized militia; and only such persons are eligible as may have served in the regular army, a volunteer army of the United States, the organized militia, or as may have pursued a regular course of instruction in any military school of the Army, or have been graduated from an institution in which an officer of the Army or Navy has been detailed as instructor, after having creditably pursued the course of military instruction. The rules governing applications for examination are established by the general orders of the War Department, referred to above, as follows:

* * * * * * * * * * * * *

> No applicant will be examined who is not a citizen of the United States or has not declared his intention to become such; who, in the judgment of the board, is not physically qualified to discharge all the duties of an officer in active service; who has any mental infirmity or deformity of body, or whose moral fitness has not been clearly established; who shall be less than 21 years of age, or who, being an applicant for commission as second lieutenant, shall be more than 30, as first lieutenant more than 35, as captain more than 40, as major more than 45, as lieutenant-colonel more than 50, or as colonel more than 55 years of age.
>
> No person shall be examined unless he has a letter from the War Department authorizing his examination.
>
> If an applicant has served in the Regular Army of the United States, or in any of the volunteer forces of the United States, or in the organized militia of any State or Territory, or the District of Columbia, he shall submit his discharge papers for each term of service; if still in service in any of the organizations mentioned, he shall submit recommendations of his immediate and higher commanders.
>
> If an applicant has attended or pursued a regular course of instruction in any military school or college of the United States Army, or has graduated from any educational institution to which an officer of the Army or Navy has been detailed as superintendent or professor pursuant to law, he shall be required to present the diploma or certificate of graduation from such military school, college, or educational institution.
>
> Applications for examination, accompanied by recommendations and other documents of a commendatory character, as above indicated, should be made to the adjutant general of the State, Territory, or District of Columbia, according to the legal residence of the applicant, in the month of May or November, to the end that the governor of the State or Territory, or the commanding general of the National Guard of the District of Columbia, may forward the accumulated applications, with his recommendations in each case indorsed thereon, to the Adjutant General of the Army, about January 1 and July 1 of each year: *Provided*, That persons who have served in the Regular Army or Navy of the United States, or in the United States Volunteers, shall be authorized to send their applications and the papers therewith, direct to the Adjutant General of the Army. * * * * * * * * * *

PERSONAL.

Mr. Joseph Bucklin Bishop, accompanied by his wife and daughter, sailed for the States on June 7, on the *Cristobal*, for his annual leave of absence.

Special orders No. 120 of the War Department, dated May 23, direct the transfer of Major Edgar Jadwin, Resident Engineer at Cristobal, and Capt. Horton W. Stickle, Assistant Engineer at Cristobal, from the Canal work, as soon as their services can be spared. Major Jadwin will report to the Chief of Engineers at Washington for assignment to duty, and Captain Stickle will report at Wilmington, N. C., to relieve the engineer officer at present stationed there.

Good Conduct of Prisoners.

Seventy-one of the prisoners at the Canal Zone penitentiary at Culebra have earned a total of 90 points in good conduct during the three months ending May 24, and have, therefore, been promoted to grade B, and have had their shackles removed.

The prisoners are graded on entering the penitentiary into two classes, outside and inside men, according as it is possible to utilize their services within or outside of the prison. The outside men are graded A, B, and C, the first class being clothed in stripes and wearing ball and chain; the second being clothed in stripes and not wearing ball and chain; and the third class wearing unstriped gray clothes and no shackles. The inside prisoners are graded D and E. Grade D men wear stripes, and grade E men wear unstriped gray. The course of promotion for outside men is from stripes and shackles to a plain gray uniform, and for inside men, from stripes to plain gray. A set of prescribed rules is placed before the prisoners, and for strict observance of them they are given credit of 30 points a month, and when they have accumulated 90 points they are promoted.

In the period of three months ending May 24 in addition to the 71 men whose shackles were removed, 12 prisoners were promoted to grade E, and clothed in the new gray uniform, which has been manufactured in the penitentiary tailor shop.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

An informal "Social" was held on Friday night, and the building was crowded. There was a program of music, readings, and dumb bell exercises.

The membership of the Corozal association in May was 204, or 97 per cent of the total population.

CULEBRA.

In the bowling match Saturday night, Culebra won two out of three games from Gorgona. The scores are, as follows:

Gorgona.				Culebra.			
Dunlop	99	80	99	Hepler	81	88	79
Miller	80	80	78	Dundas	83	83	68
Otis	90	85	108	Crain	78	82	83
Misal	85	101	87	Judge	96	98	89
Atkins	79	87	99	Mengel	99	93	86
Total	433	433	471		437	444	405

The 100, or over, duckpin scores for the week ending June 3, are, as follows: Mengel, 110, 109, 111, 100; Hepler, 114; Holden, 105; Huttlemeier, 100, 105, 102, 112; Kersey, 101; Case, 105, 103, 106; Baumer, 100.

On Saturday night, June 3, the Culebra indoor baseball team defeated the Cristobal team by a score of 16 to 10. Batteries: Cristobal—Russell and McSparran; Culebra—Tupper and Cushing.

The Culebra baseball team defeated the Corozal team in a game of outdoor baseball at Corozal, on the morning of May 30. The score was 3 to 2. Batteries: Corozal—Garlington and Cunningham; Culebra—Sollenberger and Cushing.

EMPIRE.

The following high scores were bowled in duckpins during the past week: Rodeghiero, 107, 108, 111, 106; Potter, 102, 121; Goolsby, 102, 101; Parkis, 103, 111; Garrett, 110; Giavelli, 102, 112.

The Gatun duckpin team took two out of three games from the local team on Saturday night, June 3.

A mock trial will be the feature of the literary society meeting on Friday evening, June 9.

The high school of the Canal Zone will give its entertainment on Friday night, June 16, consisting of a cantata, entitled "Wreck of the Hesperus," and a play, "Our Bob."

GORGONA.

Gatun indoor baseball team forfeited to Gorgona on Saturday night. The game was to have been played at Gatun.

The Gorgona athletes have started training for the Fourth of July meet. A meeting was held May 31, and Louis P. Robitoy was elected manager.

A wrestling class has been organized to meet every Wednesday evening. A wrestling mat has been secured, and a good live class is anticipated. Next Wednesday, in addition to the practice work, a match bout is scheduled between A. A. Simka and G. T. Aitken, and another between J. E. Ridge and L. Cole. All members interested in wrestling are urged to join the class.

A new class in Spanish for beginners has been organized, and all men interested are requested to join as promptly as possible. Enough have already enrolled to insure a good class.

The high school students will present their entertainment, consisting of a musical program and a two-act comedy, on the evening of June 6.

Culebra took three straight games in bowling from Gorgona, on Saturday night, with the following scores:

Culebra.				Gorgona.			
Gould	92	76	84	Davenport	80	85	89
Huttle	89	103	97	J. Orr	64	71	81
Conlan	96	76	87	Siebt	90	88	60
Kersey	91	93	73	Simka	88	80	89
Case	96	96	102	Haggarty	89	80	80
Total	464	444	443		411	404	399

GATUN.

A large audience attended the high school entertainment on Wednesday evening, May 31. A chorus of forty voices sang "The Wreck of the Hesperus." The soloists were Miss Hackenberg, soprano; Mr. Ross, tenor; Mr. Hull, baritone. A farce in two acts entitled, "Mr. Bob," included the following pupils: John Maloney, '13. Helen Calkins, '13; Marguerite Stevens, '11; Robert Somerville, '12; Corrine Browning, '13; Myrtle Lindersmith, '13. C. E. Jennings acted as musical director; C. C. Carr, as manager, and Fred. Jackson, '13, as property man.

Alex. J. McLane won a cue as first prize in the "High run" pool contest for the month of May. A cue will be given also for the highest run made during June. A handicap pool tournament was started June 5, the first prize to be a gold medal; second, cuff buttons. For the 3-cushion billiard tournament a gold medal will be given as first prize, and a silver medal as second prize.

Louis Durand won a Gatun pennant for rolling the highest game of duckpins during May. John Luckey received a pennant for high game in ten pins. H. S. Adams and W. A. Wells received second prizes. Prizes for the month of June will be announced later.

A "Smoker" will be held at the clubhouse on June 17. Every man in Gatun is invited to attend.

The "Boilers" from Gorgona won the game of indoor baseball from the "Locks" of Gatun, on Saturday, June 3; score, 18 to 9.

Jess T. Hopkins, physical director of Gorgona Y. M. C. A., and head of the Health League on the Isthmus, led the discussion on "Health," Sunday evening, June 4. Another phase of the subject will be taken up on June 11.

All members are invited to suggest the names of new books for the library. A large order will be placed in a few days.

Application blanks for the Fourth of July athletic meet at Cristobal may be secured at the office. It is hoped that a large number of Gatun men will enter the meet.

Mr. DePoorter challenges the pool players of Gatun that he will make 15 balls or no count against any one, straight pool, 45 balls to constitute a game.

CRISTOBAL.

The Cristobal literary and debating society held an open patriotic meeting on Wednesday night, May 31. There was music by the orchestra, popular singing by the audience, and solos by R. C. Mosher and Dr. Hill. Judge Jackson made an address. This is the first of a series of open meetings to be held every month.

The lineup and results in the local basketball contest, Thursday night were, as follows:

Luce.		Sterner.
Simonds	R F	Thompson
Luce	L F	Sterner
Jordon	C	Forstrom
Polson	L G	Humphreys
Thomas	R G	Wetherbee

Summary: Baskets thrown—Simonds 1, Luce 9, Sterner 10, Forstrom 1. Fouls thrown—Luce 6, Simonds 2, Sterner 8. One point awarded from foul.

Final score—Sterner 31, Luce 28.

Kavan.		Morton.
Ford	R F	Herrington
Martin	L F	Schleger
Jaap (Johnson)	C	Levy
Cousineau	L G	Seaborn
Vitel	R G	MacSparran
Newcomb (Sub.)		

Summary: Baskets thrown—Herrington 1, Schleger 7, Martin 1. Fouls thrown—Herrington 2, Ford 1, Johnson 1.

Final score—Morton 18, Kavan 4.

Moving pictures were given Saturday and Monday nights, the latter being the films and outfit belonging to the U. S. S. cruiser, *Birmingham*, anchored in Colon Harbor.

The standing of the Isthmian duckpin tournament at present is, as follows:

	Played	Won	Lost	Per cent
Cristobal	36	29	7	.805
Empire	36	21	15	.583
Culebra	42	21	21	.500
Gatun	42	16	26	.381
Gorgona	36	9	27	.250

The new Cristobal alleys will be opened with appropriate ceremonies on Saturday, June 10.

The following scores of 100, or over, were made during the week on the alleys: Wood, 105, 109; Furlong, 106, 102, 101, 100; Wheeler, 107, 108; Bullard, 101, 102; Gibson, 105; Louch, 102, 109, 115, 100; Jacques, 107; DeCora, 100, 100; Smith, 103, 115, 100; Barrett, 100, 104.

The following 200, or over, scores were made with bigpins during the week: Blackburn, 247; Bullard, 200.

PORTO BELLO.

The Porto Bello chess club started a handicap tournament on Wednesday night, sixteen players being present.

The weekly prize problem contest was held on Thursday night. The prize was won by Cornelison.

Last Sunday evening's song service was well attended. A vocal solo was rendered by Mrs. Van Fleet.

On Tuesday, May 30, a dance was held at the clubhouse.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending June 3, 1911:

Cristobal, May 29, from New York, with 20,815 barrels cement for Atlantic Division; 20,815 barrels cement for Pacific Division; 280 barrels coal tar for stock.

Prinz Joachim, May 29, from New York, with 200 cases fuses for stock.

Galveston, May 30, from Bridgeton, with 19,500 cases dynamite for stock.

Allianca, May 30, from New York, with 8 cases dredging sleeves, 20 cases dredge buckets for Atlantic Division; 100 car springs for Central Division; 13 steel castings for Mechanical Division; 15 cases coupon books for Examiner of Accounts; 24 barrels washing soda, 40 carboys acid, 12 cases sundries for Sanitary Department; 17 bundles pails, 27 cases A. B. material, 72 crates fire brick, 220 drums ships' bottom paint; 29 pigs tin, 19 cases cardboard for stock; and a miscellaneous cargo, the whole consisting of 716 packages, weighing 98 tons.

Zacapa, June 1, from New York, with 29 bundles brooms for stock.

Abangarez, June 1, from New Orleans, with 435 bales alfalfa hay, 165 bales colored cotton waste, 84 crates fire brick, 23,616 feet yellow pine lumber for stock.

Prinz Eitel Friedrich, June 3, from New York, with 200 barrels carbolic acid for stock.

Agenoria, June 3, from New York, with 13,397 barrels cement for Atlantic Division; 13,397 barrels cement for Pacific Division.

Haakon VII, June 3, from Baltimore, with 1,800 pieces angle reinforcement, 276 rolls concrete reinforcement for Atlantic Division; 77 tons lock construction material for Pacific Division; 300 car wheels for Mechanical Division; 175 pieces steel channels, 218 pieces steel bars, 345 pieces steel angles, 47 pieces steel beams, 383 tons coke, 500 cases dynamite, 1,139 bundles sheet iron, 175 kegs track spikes for stock.

Band Concerts.

A concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., on Sunday, June 11, 1911, at 7:30 p. m. The program follows:

1	March—*Give the Countersign*	Scouton
2	Selection—*Robin Hood*	De Koven
3	Waltz—*Skaters*	Waldteufel
4	Overture—Norma	Bellini
5	Wooden Shoe Dance—*Dutch Kiddies*	Trinkaus
6	Serenade—*Andolusian*	Bonnet
7	Selection—*Woodland*	Luders
8	Idyll—*Love's Message*	Brooks
9	Galop—*At the Races*	Barnard

A concert will be given by the Isthmian Canal Commission Band at Cristobal, C. Z., Wednesday, June 14, at 8 p. m. The program follows:

1	March—*Give the Countersign*	Scouton
2	Selection—*Robin Hood*	De Koven
3	Paraphrase—*Nearer My God to Thee* Assisted by pupils from the public schools.	Reeves
4	Overture—*Norma*	Bellini

Height of low water	.... 125.0	92.0	44.0		

The following vessels arrived at or departed from the port of Balboa during the week ending June 3.

Arrivals—May 28, *Limari*, from Valparaiso; May 29, *Pennsylvania*, from San Francisco; *Guatemala*, from Valparaiso; *Manavi*, from Buenaventura; June 1, *Stanley Dollar*, from San Francisco; June 2, *Acapulco* from San Francisco.

Departures—May 29, *Mantaro*, to Callao; May 30, *Quito*, to Guayaquil; May 31, *Chile*, to Guayaquil; June 2, *City of Sydney*, to San Francisco; *Limari*, to Valparaiso.

OFFICIAL CIRCULARS.

Manufacture of Bushings.

CULEBRA, C. Z., June 2, 1911.

CIRCULAR No. 396:

A special turret lathe has been installed in the Gorgona shops for the economical manufacture of bushings.

Effective June 15, 1911, all bronze and carbon steel bushings, of which the maximum diameter does not exceed five and three-quarters (5¾) inches, will be made by the Mechanical Division, except that bushings required in an emergency, and bushings of which the probable consumption per annum will not exceed three, may be made in other shops having proper facilities.

When the finished dimension of any surface of bushings ordered cannot be given in advance, a dimension should be prescribed for the surface that will leave sufficient metal for finishing to the required size, and the surface or dimension thereof marked "rough machine."

Effort will be made to standardize bushings wherever possible, with the view to reducing to a minimum the number of different sizes and shapes.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panamo Railroad Company.

Surcharge on Materials Sold.

CULEBRA, C. Z., June 3, 1911.

CIRCULAR No. 169-H:

In making sale of obsolete or unserviceable material, including sale at auction, sales at an upset price after sale by auction has not been effected, and all sales made at an appraised value, no surcharge will be added to prices accepted for such sales.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Applicants for Medical Examination.

CULEBRA C. Z., June 2, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to the Chairman's circular of the 3d ultimo, requesting that when applicants for employment are sent to authorized examining physicians of the Commission for medical and physical examination, they be given two copies of Form 167 C. E., for execution by the examining physician, instead of one copy of the above form, as had been the practice in the past.

The District Physician at Culebra states that applicants for employment are still being sent to him, accompanied by only one copy of Form 167 C. E.

Will you kindly give the necessary instructions in order that the provisions of the Chairman's circular of May 3, 1911, may be complied with.

By direction of the Acting Chairman.

W. H. MAY, *Secretary to the Chairman.*

Nonhousekeeping Quarters.

CULEBRA, C. Z., May 30, 1911.

DISTRICT QUARTERMASTERS:

Hereafter assignments to nonhousekeeping quarters will be made from applicants on the nonhousekeeping list.

Applicants for quarters on the No. 1 and No. 2 lists can have their names placed on the nonhousekeeping list if they make application in the regular way.

C. A. DEVOL, *Chief Quartermaster.*

Permits for Gatun Labor Train.

GATUN, C. Z., May 27, 1911.

TO ALL CONCERNED:

Permits for the Gatun-Culebra labor train are not transferable. Any such permits found in the hands of parties not entitled thereto will be taken up, and, if it is found that such permit has been sold or transferred by the party to whom it was originally issued, the facts will be reported to the Chairman and Chief Engineer for his action.

WM. L. SIBERT, *Division Engineer.*

Sale of Washstands, Roofing Iron, Etc.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 p. m., June 14, 1911, for the purchase of 175 second hand washstands, and a miscellaneous quantity of French galvanized roofing iron. The right is reserved to reject any or all bids or any parts thereof. Articles can be seen at Mount Hope during working hours Bids must be plainly marked "Proposals for purchase of washstands and galvanized roofing, to be opened June 14, 1911" and addressed to

C. NIXON, *Depot Quartermaster.*

Commissary Prices.

There have been no changes in the prices of cold storage articles from the list published in THE CANAL RECORD last week.

LOST—At Gorgona, May 20, a watch fob of a polished sea bean with gold band and gold figure of a kangaroo on a silk ribbon. Reward if returned to Commission clubhouse, or Chas. B. Bordt, Gorgona, C. Z.

Rainfall from May 1 to 31, 1911, Inclusive.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Excavation in Culebra Cut.

The excavation in Culebra Cut in May was the greatest of record for that month—1,298,600 cubic yards, as compared with 1,126.963 cubic yards for May, 1909. All but 360 cubic yards of this was excavated by steam shovel, the proportion of rock and earth being 1,149,886 and 148,354 cubic yards, respectively. The average number of shovels at work was 38.62, the working days 26, and the average excavation per shovel per day was 1,293 cubic yards. At the end of the month there had been excavated in this section 64,113,849 cubic yards, and there remained 20,072,875 cubic yards, the excavation, therefore, being over 76 per cent completed.

Canal Work in May.

The grand total of Canal excavation to June 1 was 140,321,112 cubic yards, leaving to be excavated 42,216,654 cubic yards, or less than one-fourth of the entire amount for the completed Canal.

The total for May was 2,570,592 cubic yards, as compared with 2,477,618 cubic yards in May, 1910, and 2,896.095 cubic yards in May, 1909. All the excavation was "work excavation," there being no "plant excavation."

The dry excavation amounted to 1,483,463 cubic yards and was principally by steam shovels. The dredges removed 1,062,225 cubic yards, and 24,904 cubic yards were sluiced, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 596,337 cubic yards. Of this total, 82,159 cubic yards were dry excavation, and the remainder was removed by the dredges in the Atlantic entrance.

The total excavation in the Central Division was 1,328,883 cubic yards, of which all but 500 yards were from the prism.

In the Pacific Division, the total excavation was 645,372 cubic yards, 548,047 cubic yards of which were taken out by the dredges at the Pacific entrance.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

Dry excavation	1,483,463	....	1,483,463
Wet excavation	1,087,129	....	1,087,129
Total..................	2,570,592	....	2,570,592

Mean rainfall along Canal (twelve stations) 13.78 inches.

By "Work" Excavation is meant excavation actually made for one of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc.; that is, it represents material taken from the area to be occupied by the Canal, and constitutes excavation useful for the completed Canal.

By "Plant" Excavation is meant excavation outside of any of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc. It includes material necessary to be excavated for construction purposes only and is chargeable against the particular plant item for which it is performed, such as Prism, Diversions, Locks, etc.

Gatun Locks Excavation Completed.

Excavation in Gatun Locks is finished, all the earth and rock in the chambers south of the caisson sill having been removed. What remains to be dug out is outside of the locks proper, in the approach channel on the north, and this will be excavated by suction dredge down to rock, and the rock will be removed by steam shovels.

The excavation in the locks has been practically completed for some time, but small slides on both banks of the pit prevented actual completion. One on the east bank, half the length of the lower lock, was particularly troublesome, but a toe wall of concrete has been constructed as far north as the caisson sill. and it is believed this will prevent any further movement of the bank. Small slides, amounting to 200 or 300 cubic yards at a time, have been causing considerable inconvenience on the west side of the locks, and these may continue three or four weeks more, or until a portion of the lock wall has been built across the front of the space where the material is sliding. The lock excavation was begun in October, 1906, and there had been removed to June 1. a total of 5,225,000 cubic yards.

Erecting the Lock Gates.

The work of erecting the guard gates in the upper or south locks at Gatun has been begun in accordance with the method outlined in THE CANAL RECORD of May 10. In the east lock, four stories of both leaves of the guard gate are in position, and in the west lock the first story has been erected. None of the outside plates have yet been riveted on. It is planned to erect the south guard gates in both locks, and turn them over to the riveters, who will drive the rivets while the erectors are working on the operating gates. In this way the work will be carried on in two parts, the erectors immediately preceding the riveters, until the whole 92 leaves for all the locks are completed. The contractor expects to have the first guard gates at Gatun erected by the end of July, when riveting will be begun on them, and the construction bridges will be moved northward over the location of the upper operating gates, so that the erection of the second line of gates may be begun Forty men are now at work, and about three times this number will be employed by the end of July.

The second shipment of gate material, about 2,000 tons, has arrived, making a total of about 3,500 tons now on the Isthmus. The contractors' plants in the States are turning out 150 tons of material for the lock gates each day.

Sluicing in Central Division.

Excavation in the lake region of the Canal, between Gatun and Bas Obispo, is now confined to the work of two contractors, one of whom is working at Bohio, and the other at Gorgona, both using a form of sluicing.

At Bohio, E. C. McFarland & Co. are excavating earth and soft rock by the sluicing

NOTES OF PROGRESS.

(Continued.)

method, and hard rock by pan car. They used the sluicing method on a contract of 35,500 cubic yards at Tabernilla, where all of the material was earth. The plant consists of two 8-inch three-stage turbine pumps, driven by an Ames engine of 200-horsepower, and discharging into a 12-inch main, from which there are leads for two monitors. Two or 3-inch nozzles are used, according to the character of the material to be cut. With the 2-inch, 150 pounds pressure is obtained at the nozzle, and with the 3-inch, 100 pounds. At Bohio, about 50 per cent of the material is soft rock and the sluicing plant handles this profitably on a grade as low as one per cent. In May, 15,300 cubic yards were excavated by this method at Bohio, and there still remain to be taken out about 110,000 cubic yards, out of a total of 160,000. It is believed that 110,000 cubic yards can be removed by the sluicing method.

Opposite Gorgona, the contractor, B. B. Duncan, is working with a 12-inch centrifugal pump, which raises water from the river into sluice boxes, through which it carries into the river material excavated with pick and shovel. In May, 9,600 cubic yards were excavated by this method.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending June 10, follows:

DATE.	Hours worked.	Cubic Yards.
June 5	6:55	3,296
June 6	6:30	1,913
June 7	7:20	2,479
June 8	8:35	2,588
June 9	8:00	3,066
June 10	6:45	2,738
Total	44:05	16,080

Porto Bello Crusher.

A statement of the work done at Porto Bello crusher, by days, for the week ending June 10, follows:

DATE.	Hours worked.	Cubic Yards.
June 5	3:05	1,773
June 6	5:01	2,142
June 7	6:06	2,769
June 8	6:22	3,080
June 9	5:46	3,054
June 10	6:28	3,241
Total	32:48	16,059

An excursion of the American Bankers' Association to the Canal Zone has been planned for November, 1911.

Work at Porto Bello.

The dock at Porto Bello for loading rock from the quarry upon barges, to be conveyed thence to Colon breakwater, has been completed. It is 128 feet long with a tail track of the same length, and contains two tracks for cars and one track for locomotive cranes. The cars will be loaded in the quarry by locomotive cranes and then hauled to the dock, where two cranes, operating along the front, will lift the rock upon barges.

In order to reduce the quantity of fine rock in the crushed stone for Gatun Locks concrete, a ½-inch screen has been placed in the chute from the crushers. This screen became clogged frequently during the month of May, and on that account, the quantity of rock crushed fell to 58,000 cubic yards. Steps will be taken to accomplish this screening without interfering with the movement of rock through the chute. The small rock screened from the large is being used in municipal work at Porto Bello, and is available for municipal work elsewhere, and for use in making concrete blocks.

The gasoline in a large tank in the rear of a general store at Gorgona exploded on the morning of June 7. Three Americans, and four negroes were burned, none fatally.

CONCRETE WORK IN THE LOCKS.

GATUN LOCKS.

About 67 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 10, being 1,389,898 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending June 10, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 322½ yards shown for the portable mixers are reenforced concrete, and were placed on the following days: June 5th, 64½; June 6th, 45; June 7th, 59½; June 8th, 61½; June 9th, 45½; June 10th, 46½.

†At 8.40 Monday morning, June 5, a carload of sand was accidentally dumped from the trestle at mixer No. 2 onto the mixer engine, resulting in the shutting down of the two mixers. An electric motor was installed and operations resumed the morning of June 7.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is about 79 per cent completed, 661,352 cubic yards, out of a total of 837,400, having been placed at the close of work on June 10. The record for each of the six eight-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total

MIRAFLORES LOCKS.

Over 19 per cent of the concrete for the system of two twin locks at Miraflores was in place on June 10, the total amount on that date being 262,902 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixer.

STEAM SHOVEL RECORDS.

Work of Central Division Shovels in May.

During the month of May the total amount of material excavated in the Central Division was 1,328,883 cubic yards, of which 165,897 cubic yards were classified as earth, and 1,162,986 cubic yards as rock. Of this quantity, 1,298,240 cubic yards were removed by steam shovels, 360 cubic yards by bucket cranes, and 1,863 cubic yards by hand. Contractors removed 24,904 cubic yards by sluicing, and 3,516 cubic yards by hand.

The high record for the month was made by shovel No. 206, working 24½ days in the Culebra district, which excavated 54,556 cubic yards of rock. The second best record for the month was made by shovel No. 208, working 26 days in the Culebra district, which excavated 48,908 cubic yards of rock and earth.

The best record for a shovel of the 70-ton class was made by shovel No. 109. working 21 days in the Culebra district, which excavated 30,045 cubic yards of rock and earth.

Shovel No. 218, working in the Empire district, made a high record for one day by excavating 2,945 cubic yards of rock and earth on May 8.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown below:

Accident in Cristobal Railroad Yard.

Passenger train No 3 on the Panama railroad, due to leave Colon at 5:25 daily, was struck by a line of moving freight cars while passing through Cristobal yards on Friday, June 9, resulting in injuries to four or five people and damage to four of the coaches. The accident occurred a short distance from the coal chute, at a point where there is a crossover from the yard tracks to the main line. As the passenger train neared this place, a switching engine, pushing a number of freight cars, began to move over one of the yard tracks in the opposite direction. A misplaced switch caused the train to take the crossover instead of continuing on its proper track, and, as a result, the end freight car struck the side of the third first-class coach obliquely, sheared along its entire length, collided with the end of the next car, the baggage coach, more nearly end on, overturning it, and, before coming to a stop, raked the side of one of the second-class coaches. The passenger cars involved in the accident contained comparatively few people. Among the injured were H. P. Warren, assistant construction engineer of the Panama railroad, who had a leg crushed and broken, and M. B. Connolly, superintendent of construction on the Panama railroad relocation, who was severely stunned and bruised. The baggageman was buried under a pile of trunks, which became lodged in such a manner as to protect him from serious injury.

In the collecting of old French machinery for sale in the States as scrap, care will be taken to preserve a number of typical machines and pieces of equipment, in order that they may be available for exhibition at the Panama-Pacific Exposition in San Francisco in 1915.

Improvements at Cold Storage Plant.

The increased space for cold storage of meat at the plant in Cristobal has made it possible to store 800 quarters of beef more than heretofore, bringing the capacity up to 2,400 quarters. Tanks for corning 2,000 pounds of beef a day have been installed. Kettles for the boiling of hams and making of soup stock have been ordered, and when they are installed, soup stock will be added to the list of cold storage supplies. A power meat chopper has also been installed, and Hamburg steak, and possibly some sausage will be made. These improvements will allow beef to be bought by the whole carcass, and in this way, the best beef will be obtained at the lowest possible price.

LABOR FORCE AND QUARTERS IN MAY.

There has been a lack of common laborers available for the Canal and railroad work for the past month, and recruiting in the West Indies will probably be necessary to increase the supply.

The total of the Canal and Panama railroad force at work on May 31 was 34,233, as compared with 35,259 in April, 1911, and with 36,796 in May, 1910. Of the total in May, 1911, Canal employes numbered 27,229, and Panama railroad, 7,004. The force report follows:

QUARTERS.

On May 31, there were 23,386 occupants of Commission quarters. Of this number, there were 9,336 white Americans, including 5,395 men, 2,043 women, and 1,898 children. There were 5,538 Europeans, of whom 4,944 were men, 253 were women, and 341 were children. There were 8,512 negroes, of whom 6,002 were men, 1,126 were women, and 1,384 were children. The above figures include 26 Asiatics at Balboa, and two at Porto Bello.

A large number of married quarters have been vacated during the month, and a corresponding number of applications filled. The number on the No. 1 waiting list has dropped from 77 to 27, and the No. 2 list from 752 to 685.

Bachelor quarters at Gorgona, which were so congested a few months ago, show 110 vacancies, and arrangements are being made to use some of the houses as nonhousekeeping married quarters.

WORK IN GORGONA SHOPS.

Sand Blast Cleaning and Pneumatic Painting of Cars—Foundry and Car Shop Work.

After a test of one month, the sand blast method of cleaning steel cars, and the pneumatic painters in use at Gorgona shops have demonstrated the economy of this method over the one formerly employed, viz., removing the scale by hammering the cars and painting them by brush. The steel dump cars in use on the Pacific and Atlantic Division work are subjected to excessive oxidization from the salt air and, on all the work, the cars are continually subject to rust, consequent upon hauling wet material and being subjected to the continuous rainy weather.

The sand blast machine installed at the shops about a month ago consists of a reservoir in which dried sand is placed, and three leads to which hose may be attached. An air pressure of 50 pounds forces the sand from the reservoir into the leads, where a pressure of 80 pounds is applied to drive it forcibly against the cars. Only two leads are commonly used, and the sand is projected through a ¼-inch nozzle. At present, Chamé sand is used, but this is so fine that it is not thoroughly effective, and an order has been placed for some coarser quartz sand, which occurs in small deposits at Chorrera. Six cars can be cleaned of scale in one day. The cars are run on a switch alongside the sand blast plant, and, after cleaning, are pushed forward a few feet to the place where the pneumatic painting is done. Coal tar paint is used, and it is ordinarily applied through two nozzles, thus making it possible to work on two cars at one time. Twelve cars may be painted by this method in an 8-hour day.

One of the items of work in the car shop that is little appreciated is the placing of 680 new car wheels a month on the cars. These wheels are brought from the States and are bored and mounted at the shops. An average month's work includes 300 new wheels on 20-yard flat cars, 200 on steel dump cars, and about 180 on other equipment. When cars come into the shops for repairs, the wheels are tested, and if they are flat beyond 2½ inches from normal, have a chipped or worn flange, or are worn through the chill, they are replaced with new wheels. Some old wheels are utilized by placing them on an axle on which is another old wheel, not sufficiently worn to be taken from service. From two to three tons of the old wheels are used each month in the cupola, being melted over into castings that do not require machining, such as counterweights for the spillway gates, and the balance are sent to the States as scrap.

From 420 to 450 wood cars of all classes are repaired each month, an average being about 150 twenty-yard flat cars rebuilt, 230 given light repairs, and from 10 to 20 cars of various kinds repaired or rebuilt. As high as 500 steel dump cars are repaired each month, the majority of these being for use of the Central Division. The cars that need it badly, and such others as can be expeditiously handled, are scaled and painted. Others are merely painted after the repairs are made, the object being, at all times to keep the cars in the shop as short a time as possible.

Last week, the foundry completed an order for 955,000 pounds of caisson seats for the locks at Gatun, Pedro Miguel, and Miraflores. These castings are made of gray iron; are "L" shape with stiffening webs, and will be placed on the ends of the walls and on the caisson sill at the upper and lower ends of all the locks, occupying a position on the wall and sill such as the jam and sill of a door. Upon them the caissons will rest when it is necessary to unwater the locks for examination or repair. They will be situated in front of the movable dams, and their use will also permit examination of the sill of the dam. There are 300 of these castings, 100 for Gatun, 104 for Miraflores, and 96 for Pedro Miguel.

The foundry is now at work on an order of 345 tons of gray iron castings to be used as plates to face the baffle piers in Gatun spillway. There will be 73 of these plates, 31 of them 10x6x1 foot, and 42, 10x4x1 foot. The planer in the shops is too small to take the larger plates, and in machining the joints it will be necessary, therefore, to fix the plates on the floor of the shop, fix the tool on the bed of the planer, and machine them in this manner. An order for 3,888 stationary, and 4,888 movable, buffers for use in the guide walls of the locks has been placed by the Pacific Division. The stationary parts will be fixed in the wall, and the movable parts will form a cap to fit upon the fixed portions, a spring between the two absorbing the force of any blow that may be dealt by a ship bumping against the walls.

A night force of 200 men, 50 of whom are on the gold roll, is kept at work in the foundry, boiler, machine, and wood shops, on account of the emergency repairs and manufacturing that the shops are continually called upon to do. Maintaining this night force accelerates delivery of rush orders, and at the same time, avoids payment for overtime, which would be necessary if men from the day force were detailed to night work.

Gatun Cableway Withdrawn from Service.

Concrete laying at Gatun Locks is now being carried on with only three of the four duplex cableways. One of the cableways was moved to the upper lock on May 17, where it is engaged in handling fixed steel, and earth, for backfilling in the center wall. It will not be returned to the concrete work, which is going forward rapidly in the middle and lower locks.

Reorganization in Atlantic Division.

The work now included in the Cristobal residency of the Atlantic Division, namely, dredging in the Atlantic entrance, steam shovel excavation at Mindi, direction of Cristobal marine shops, construction of Colon breakwater, and the conduct of the quarry and crusher at Porto Bello, and the sand excavation at Nombre de Dios, will be placed in charge of Major Chester Harding, Assistant Division Engineer of the Atlantic Division, upon the departure of Major Edgar Jadwin, the present resident engineer, for Washington. No assistant engineer will be assigned to the work at Porto Bello to succeed Captain Horton W. Stickle.

Sailing of the "Ancon."

The sailing of the steamship *Ancon* from pier No. 11, Cristobal, scheduled for Tuesday, June 13, has been postponed until 3 p. m., Saturday, June 17.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 62 per cent completed, 139,645 cubic yards, out of a total of 225,000, having been placed at the close of work on June 10. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No Mixers.
June 5	174	7:00	1
June 6	144	7:00	1
June 7	280	8:00	2
June 8	232	7:00	1
June 9	240	8:00	2
June 10	204	8:30	1
Total	1,274	45:30	1.33
Previously reported	138,371	....	....
Grand total	139,645		

I. B. of S. S. and D. M.

The I. B. of S. S. and D. M. will hold its regular meeting on Sunday, June 18, at the lodge hall in Empire at 12.15 p. m. All members interested in the welfare of the brotherhood are requested to attend this meeting.

ORDINANCE

Establishing Rules, Regulations, and Instructions for the Government of the Division of Fire Protection of the Canal Zone.

Be it ordained by the Isthmian Canal Commission that the rules and regulations and instructions for the Division of Fire Protection of the Canal Zone, approved by the Chairman and Chief Engineer on February 14, 1911, and effective April 1, 1911, are hereby established for the Canal Zone

This Ordinance shall take effect from and after the date of its approval by the Secretary of War. Geo W Goethals, *Chairman.*

—

Enacted by the Isthmian Canal Commission, April 29, 1911.

Approved by the Secretary of War, May 19, 1911.

CLASSIFIED EXPENDITURES.

A statement of classified expenditures of the Isthmian Canal Commission to April 30, 1911, follows:

Total	$4,788,228.77	$12,901,642.28	$119,552,981.83	$83,432,116.72	$220,674,969.60

SOCIAL LIFE OF THE ZONE.

Women's Organizations.

At the meeting of the ladies' auxiliary of the Empire Christian League, held on Friday, June 2, the study program was supplemented by a series of tableaus in which four little girls represented American missionaries in China and the far east. The auxiliary held a "market sale" of home baked goods—pies, cakes, and candies, at the Commission clubhouse on Saturday afternoon, June 10, the proceeds from which will be devoted to mission work on the Isthmus.

The Empire Women's Club held a "Current events" day on Thursday, June 1. The social meeting of the club will be held at the home of Mrs. Lingo, house No. 26, Las Cascadas, on Thursday, June 16.

A meeting of those who signed the petition for a chapter of the Order of the Eastern Star in the Canal Zone will be held at the lodge hall, Gorgona, on Sunday, June 18, at 2:30 p. m. The petition was signed by 96 persons.

At the meeting of the auxiliary order of the Daughters of Rebekah, held at Gorgona on Friday, June 9, nominations were made for the officers for the term of six months, beginning July 14. Mrs. Charles Beetham, the present vice-grand, will pass to the chair of noble grand at this time. The order has nearly one hundred members.

The ladies' auxiliary of the Gatun Christian League recently gave a bachelor supper in the chapel, from which the net receipts were $100. Sixty dollars of this money was given to complete the payment on the piano in the chapel, and the remainder will be devoted to painting and improvements in the interior of the chapel. The auxiliary was organized in April, its object being to assist the Gatun Christian League in its social work. The society is divided into three committees, as follows: Membership, for the purpose of keeping up the membership and arousing interest in the organization among the women of Gatun; social, to arrange for entertainments and to assist the league whenever called upon; deaconess, which will visit the women of Gatun in their homes and in the hospitals, and have charge of the preparation for the communion service in the chapel on the first Sunday in each month. The officers are: President, Mrs. E. Bath; vice-president, Mrs. Ben Jenkins; secretary-treasurer, Mrs. W. N. Windes.

Gatun Sunshine Society.

At the annual meeting of the Gatun Sunshine Society, the following officers were chosen: President, Mrs. William L. Sibert; vice-president, Mrs, Charles Wood; secretary, Mrs. W. N. Windes; treasurer, Mrs. F. O. Whitlock. At the close of the business meeting tea was served. The society has forwarded $50 to the international headquarters in New York, which will be used in the purchase of a supply of linen for a bed in the Arthur Home at Summit, N. J.

Church Notes.

A class of American children, four boys and six girls, made their first communion at St. Ferdinand's Roman Catholic Church, Empire, on Sunday morning, June 2. After the benediction, photographs of the class were taken, following which, the children adjourned to the parish house, where they were joined by the boys and girls of the choir, and breakfast was served. This is the first class of white children to be prepared for this service on the Isthmus. The Sunday school of St. Ferdinand's church held an outing on Sunday, June 11, going to Camacho dam, accompanied by their rector and several adults. There are 22 pupils in the school.

The Young Men's Christian Association, in connection with the United Methodist Church, will give its first public entertainment at the mission room in San Miguel, Panama, on June 25, at 7 p. m., on behalf of the new church. Subject, "The Bible, its preservation and moral effects."

Vacation School in Gatun.

A vacation school will be opened in Gatun early in July, in the public school building. There will be classes in basketry, drawing, water color, sewing, and a kindergarten class. A department for boys' manual training will be opened, if a sufficient number are enrolled. The school is independent of the Canal Zone public school. Twenty pupils have been enrolled.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of May, follows:

RECEIPTS.

May 1, On hand	$8,153.15	
May 15, Proceeds of cricket match at Ancon	52.50	
May 18, Donated by Dr. Pablo Arosemena, President of the Republic of Panama, to the endowment fund	12.50	
May 31, Interest credited by bank, March 21 to May 31	26.72	
May 31, Receipts from membership dues during month	14.00	
Total receipts		$8,258.87

DISBURSEMENTS.

May 6, Deportation of widow and child, Empire	$ 50.00	
May 6, Relief of destitute American, Ancon	5.00	
May 16, Draft to treasurer, American National Red Cross to cover one-half annual dues received during quarter, Feb. 1 to April 30, inclusive	440.50	
May 19, Paid to Mr. T. L. Clear, treasurer, endowment fund committee, balance of fund on hand	476.98	
May 31, Expenditures on account of Colon fire, as per vouchers attached	4,622.53	
Total expenditures		$5,595.01
May 31, Balance on hand		$2,663.86
On hand in general fund		$2,440.40
On hand in Colon fire fund		223.46
Total		$2,663.86

JOHN L. PHILLIPS, *Treasurer.*

Lawn Tennis Championship.

The Isthmian Tennis Association completed its tournaments for the season of 1911 in a doubles tournament at Empire on June 4. The winners for the season are, as follows:

SINGLES.

Tournament.	First.	Second.
Jan. 8, Panama	Runyan	Chase Pulsifer.
March 5, Empire	Ross	G. T. Stokes.
May 7, Colon-Cristobal	Bartholomew.	McMurdo.

DOUBLES.

Tournament.	First.	Second.
Feb. 5, Colon-Cristobal	Farquharson. R. W. Hart.	Pulsifer. G. T. Stokes.
May 30, Tivoli	Runyan Ross	Coffin. Guptil.
June 4, Empire	Hunter F.E. Pearman.	Runyan. Troy Earhart.
Maduro-Lupi cup, April 2, at Panama	Herrick. Runyan.	

Fourth of July Celebration.

The committee in charge of the athletic games at the Fourth of July celebration in Cristobal has decided to hold the games on Roosevelt avenue, and has prepared a program of fourteen standard field contests, and eight special contests, entries in the regular contests not being eligible to compete in the special. Application for entry may be made at the office in any Commission clubhouse, or to H. H. Hammer, Corozal. The events are, as follows:

Standard—120-yard low hurdle; discus throw; 100-yard run for boys; pole vault; 100-yard run; running high jump; 220-yard run; shot put; running broad jump; 440-yard run; one mile run; 4-boy relay, 880 yards; 880-yard run; 4-man relay, 4 laps.

Special—Sack race; potato race; fat man's race; ladies' egg race; equipment race; pipe race; wall scaling contest; three-legged race.

PERSONAL.

Mr. H. F. Tucker has resigned his position as designing engineer in the office of the assistant engineer, and will engage in business in Boston as consulting engineer. Accompanied by Mrs. Tucker, he sailed for the States on the *Cristobal* on June 7.

Married.

CONGER-SCHUBER—At the church of the Sacred Heart, Ancon, Dolores Josephine, daughter of Mr. and Mrs. Edward Buchanan Schuber, to Lieutenant Edward Haggard Conger, U. S. Marine Corps, Saturday evening at 8.30, the Reverend Father Quijano officiating. Canal Zone residence, Camp Elliott, Bas Obispo.

REIDY-SULLIVAN—On June 1, 1911, in New York City, Helena G. Sullivan of Newport, Rhode Island, to John J. Reidy of Boston, Mass. Canal Zone residence, Cristobal.

CLAUSE-HABERKOST—At Cristobal, C. Z., Sunday evening, June 4, Eleanor Caroline Haberkost to Frederick W. Clause, both of Akron, Ohio; the Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

BROWN-MEAHR—At Cristobal, on June 8, Mabel Sophia Meahr of Northville, N. Y., to Frank N. Brown of Amsterdam, N. Y.; the Rev. C. O. Purdy officiating. Canal Zone residence, Tabernilla.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Culebra, C. Z., on Sunday, June 18, 1911, at 5:45 p. m. The program follows:

1 March—*The Hustler*........................Alford
2 Selection—*The Prince of Pilsen*............Luders
3 *a* Intermezzo—*Garden of Roses*..............Pratt

COMMISSION CLUBHOUSES

Activities of the Young Men's Christian Association.

CULEBRA.

High scores in duckpins for the week: Case, 106, 103, 111; Cornthwaite, 110, 101; Brown, 101, 100; Mengel, 101, 103; Driscoll, 100.

A match game in duckpins was held on Saturday morning between the boys of Empire and Culebra, the home team winning the three games.

A track team has been organized with E. W. Tupper as captain, to compete in the Fourth of July events at Cristobal. There is need of more men to complete the team. The team will practice on Tuesday and Friday nights.

EMPIRE.

The following high scores were bowled in duckpins last week: Pinney, 106, 101, 102; Gustavson, 106, 107, 94; Akers, 110; Reed, 105; Goolsby, 103, 103; Rodeghiero, 97, 102.

The Culebra indoor baseball team defeated the Empire team on Saturday, June 10, by the score of 19 to 3. The battery for Empire was Young and Mullane, and for Culebra, Cushing and Tupper.

Application blanks for the Fourth of July athletic meet at Cristobal may be secured at the office. Empire men are urged to enter.

The May pool tournament was won by E. E. Barnes. There were 22 entries.

The gymnasium will be used for handball every Wednesday evening, and, as soon as a number of men are interested, there will be a tournament.

The high school students will present their entertainment, consisting of a musical program and a two-act comedy, on the evening of June 16.

GORGONA.

The wrestling matches Wednesday evening were witnessed by a small, but interested, audience. Ridge secured one fall from Cole in two 5-minute bouts, which were fast and hard contested. Simka secured two falls from Aitkens in three and five minutes, respectively. No matches have been arranged for next Wednesday, but the class will meet for the usual practice. All men interested are invited to attend. The class meets in the gymnasium at 7.30 every Wednesday evening.

The Gorgona indoor baseball team won from Corozal on the local floor Saturday night, by a score of 25 to 5. Christianson, pitcher for Gorgona in the first six innings, struck out nine men, and Weiser, in the last three innings struck out six men. This completes Gorgona's ninth game of the series with a percentage of 100.

GATUN.

Over 100 people were present at the meeting of the Gatun Literary Society, held on Wednesday evening, June 7. R. E. Chatfield presided and introduced Judge Wm. H. Jackson, who delivered a patriotic address. A violin solo was rendered by Miss Maria Elise Johnson, a piano solo by Miss Lucy Partello, and a bass solo by Mr. Case of Culebra. Refreshments were served.

At a meeting of the executive council on Friday night, June 9, the following officers were elected: Chairman, Col. Wm. L. Sibert; vice-chairman, R. M. Sands; recording secretary, W. N. Windes; chairman membership committee, Dan St. Clair; chairman educational committee and religious work, W. N. Windes; chairman gymnasium and games committee, Fred Huber; chairman library and reading room committee, W. C. Gayer; chairman house and decorating committee, R. M. Gamble; chairman social and entertainment committee, R. M. Sands. The council voted to hold its regular meeting on the last Friday night of each month.

The charges to members for hair cut and shave at the clubhouse have been reduced from 40 cents and 20 cents, to 35 cents and 15 cents, respectively.

Dr. M. E. Connor gave a talk on tuberculosis Sunday evening, June 11. A discussion followed the lecture.

A "smoker" will be held for the men of Gatun on Saturday night, June 17.

The "Smiths" defeated the "Bartes" in a match game of duckpins on Tuesday night, June 20.

CRISTOBAL.

In the local basketball league this week, Kavan's team was defeated by Luce's and Stearner's teams.

The subject of the debate at the meeting of the Cristobal literary society was, "Resolved, that women should have equal suffrage with men." E. B. Nelson and J. M. Weaver were on the affirmative side, and E. J. Dinnan and J. R. Stewart on the negative. The debate was decided in favor of the affirmative. The next meeting of the society has been postponed until Wednesday, the 21st on account of the I. C. C. band giving a concert on Wednesday night, the 14th. "What is socialism?" will be the subject of the next discussion of the society.

An entertainment was given by the Canal Zone high school students on Friday night. A cantata was rendered by forty voices and the following soloists: Soprano, Miss Hackenburg; tenor, Mr. Ross: baritone, Mr. Hull. The pupils also acted a farce entitled "Mr. Bob."

Dr. W. A. Blackburn has offered a prize to the bowler showing the greatest improvement in tenpins in the next 60 days.

The new alleys were thrown open to the public on Saturday night. In the tournament following the formal opening, the following scores were made:

TENPINS.

Gorgona—					
Roper	160	174	183	517	
Haldeman	189	169	147	505	—1022
Empire—

OFFICIAL CIRCULARS.

Requests for Steamship Transportation.

CULEBRA, C. Z., June 7, 1911.

CIRCULAR No. 175-H:

Attention is called to the fact that requests for steamship transportation will not be issued by this office more than thirty days in advance of the date upon which it is desired to sail.

Requests for such transportation should not be submitted, therefore, more than two or three days in advance of the thirty-day time limit.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Color of Hand and Push Cars.

CULEBRA, C. Z., June 7, 1911.

CIRCULAR No. 397:

Hereafter, the standard color for hand and push cars in the service of the several departments and divisions of the Isthmian Canal Commission and relocation will be box car red.

Yellow will be the standard color for all hand and push cars in the service of the Panama railroad, as heretofore directed.

As a distinguishing mark the several departments and divisions will use the distinctive diamond now used on rolling stock, with the initial showing division to which assigned. Cars in the service of the Quartermaster's Department will be marked with a diamond, the letters, "Q. M. D." appearing therein, while the Mechanical Division will use a diamond with the lettering "Mech. Div." appearing therein.

Cars painted other than directed by this circular to be changed to standard as soon as necessity for repainting the cars now in service becomes apparent.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Pay and Promotion of European Laborers

CULEBRA, C. Z., June 10, 1911.

Referring to the Chairman's circular letter of May 24, and to the various replies thereto, concerning the pay of European laborers:

It appears to be the consensus of opinion that the pay of noncontract laborers should be increased from 16 to 20 cents an hour at the expiration of six months' satisfactory service automatically, and without the formal recommendation of the foreman or superintendent. It is accordingly directed that all 16-cent European laborers, who have served continuously and satisfactorily for six months, or more, be immediately promoted, and that in future, and until further notice, all such laborers be promoted to 20 cents an hour as they complete six months' satisfactory service.

Respectfully,
H. F. HODGES, *Acting Chairman.*

Expenditures for Repairs to Equipment.

CULEBRA, C. Z., June 9, 1911.

CIRCULAR No. 370-B:

Effective at once, expenditures for repairs to equipment transferred from one department or division to another will be distributed in the following manner:

When equipment is transferred from one division to another, the division last using the equipment will pay for such repairs as are necessary to put the equipment in operating condition.

If further repairs or improvements are required by the division to which the equipment is transferred such expense will be borne by the latter division.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Acting Local Auditor.

COLON, R. P., June 6, 1911.

ALL CONCERNED:

During the absence of Mr. R. W. Hart, Local Auditor, on leave, effective June 7, Mr. M. L. Duff will act as Local Auditor.

J. A. SMITH, *General Superintendent.*

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending June 21, 1911, (75th meridian time):

DATE.	Low.	High.	Low.	High.
	A. M.	A. M.	P. M.	P. M.
June 15	......	5.57	12.13	6.03
June 16	12.29	6.32	12.51	6.40
June 17	1.07	7.12	1.34	7.20
June 18	1.47	7.53	2.20	8.08

FOUND—An umbrella. Owner can have same by calling at Ancon pay office.

COMMISSARY DEPARTMENT.

The hours during which the commissaries are open are, as follows:

Cristobal and Culebra, 8 a. m. to 12.30 p. m.; 2 p. m. to 7 p. m.

All other commissaries, 8 a. m. to 1 p. m.; 3 p m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning June 10.

FRESH MEATS.	*Price.*
Mutton—Stewing per pound	6
Shoulder, neck trimmed off, (4 pounds and over), per pound	9
Entire forequarter (not trimmed) 10 pounds and over, per pound	8
Leg (8 to 10 pounds), per pound	17
Cutlets, per pound	18
Short cut chops, per pound	20
Lamb—Stewing, per pound	6
Entire forequarter, neck trimmed off, per pound	9
Leg (5 to 8 pounds), per pound	20
Chops, per pound	24
Cutlets, per pound	24
Veal—Stewing, per pound	10
Shoulder, for roasting (not under 4 pounds), per pound	12½
Chops, shoulder, per pound	16
Chops, per pound	24
Loin, for roasting, per pound	24
Cutlets, per pound	28
Pork—Loin chops or roast, per pound	14
Beef—Suet, per pound	2
Soup, per pound	5
Stew, per pound	8
Corned, No. 1, per pound	12
Corned, No, 2, per pound	10
Chuck roast (3 pounds and over), per pound	12
Pot roast, per pound	12½
Rib roast, second cut (not under 3½ pounds), per pound	16
Rib roast, first cut (not under 3 pounds), per pound	18
Sirloin roast, per pound	19
Rump roast, per pound	19
Porterhouse roast, per pound	20
Steak, chuck, per pound	12½
Round, per pound	13
Rib, per pound	18
Sirloin, per pound	19
Rump, per pound	19
Porterhouse (not less than 1½ pounds), per pound	20
Tenderloin (Western), per pound	24

MISCELLANEOUS.	
Caviare, Russian per tin	47, 89
Livers—Beef, per pound	7
Calf, each	60
Half, each	30
Sausage—Pork, per pound	17
Bologna, per pound	10
Frankfurter, per pound	12
Lieberwurst, per pound	10
Sweetbread—Veal, per pound	1.20
Beef, per pound	25
Eggs, fresh, dozen	†24
one-half dozen only	†13
Bluefish, fresh, per pound	14
Halibut, fresh, per pound	15
Shads, fresh, each	70
Shad roes, fresh, per pair	35

POULTRY AND GAME.	
Chickens—Fancy roasting, milk fed, large, each	1.25
Fancy roasting, milk fed, med., each	1.00
Fancy roasting, corn fed, about 4½ pounds, each	90
Fowls, each 60, 70, 80, 90.	1.00
Ducks, Western, about 4½ pounds, each	1.00
Long Island, each	1.30
Long Island, each	1.10
Broilers, milk fed, each	60
corn fed, each	55
Turkeys, per pound	26
Squabs, each	35
Capons	2.10
Partridges, each	50
Grouse, each	50

CURED AND PICKLED MEATS.	
Ham—German, Westphalia, per pound	36
Sugar cured, per pound	16
Sliced, per pound	18
Half, for boiling, per pound	17
Boiled, per pound	22
Hocks, per pound	‡8
Bacon—Breakfast, whole piece, per pound	22
Breakfast, sliced, per pound	23
Pork, salt family, per pound	14
Ox Tongues each	75
Pig's feet, per pound	9
Tongues, per pound	14
Sliced bacon in 1-pound tins, per tin	30
In 1-pound jars, per jar	30

DAIRY PRODUCTS.	*Price.*
Butter—Creamery special, per pound	30
Cheese—Roquefort, per pound	38
Philadelphia cream, cake	18
Young America, per pound	18
Swiss, per pound	26
Edam, each	1.00
Camembert, in small tins, tin	14
Neufchatel, cake	6
Gouda, per pound	34
Milk (Certified), per bottle	**25
Buttermilk, bottle	**15
Ice cream, quart	‡25
½-gallon	‡50

VEGETABLES AND FRUITS.	
Asparagus, per bunch	18
Beets, per pound	6
Carrots, per pound	†4
Cabbage, per pound	†3
Cucumbers, per pound	10
Egg plant, per pound	10
Lettuce, per pound	14
Onions, per pound	5
Potatoes, white, per pound	3
sweet, per pound	2
Parsnips per pound	†6
Peppers, green, per pound	10
Rhubarb per pound	5
Tomatoes, per pound	†8
Turnips, per pound	†5
Yams, per pound	3
Apples, fancy table, per pound	10
Lemons, dozen	24
Limes, per 100	80
Oranges, Jamaica, per dozen	12
Oranges, California, per dozen	36
Watermelons, each	40

Liquor Licenses.

ANCON, C. Z., June 7, 1911.

By authority of the Acting Chairman of the Isthmian Canal Commission, the following applicants will be granted licenses for the retail sale of intoxicating liquors in the Canal Zone, for the year commencing July 1, 1911:

Rio Grande—
- Vicente Camañes, E.
- Kwong Hing Jan.
- Low Chong.
- Julio Victorero.
- Hop Lee Chong.
- Lee Hop.

Culebra—
- Pedro Colomar, R.
- Francisco Wong.
- Woo Chan.
- Ho Chong & Loon Chow.
- Chong Jan.
- Nemesio Victorero.
- William G. Bell.

Empire—
- Mezele Gustave.
- Manuel Leones.
- José Sandi.
- Lai Hing & Co.
- Juan Ansola Martinez.
- Chee Hing.
- Yuen Hing Chong.
- Chong Tai.
- Charles Bryant.
- Wing Wo.
- Wai Loy.
- Edward J. Kennedy.

Las Cascadas—
- Lai Wo
- Antonio Enseñat.
- Pedro Ross.
- Tomas Santi.

Matachin—
- Chee Chung Hing.
- See Lee.
- Kwong Sang.
- Agapito Centeno.

Gorgona—
- Esteban Duran.
- Jacob Kowalsky.
- Antonio Mas.
- Lin Tai Chong.
- George Andrade.
- Tracy Smail.

Gatun—
- Pedro Grau.
- Yee San Lung.
- Yee Kee.
- Dario Rodriguez.
- John B. Schuetz and Timothy J. Murphy.
- Julien Joly.
- Prudencio San Martin.
- Chow Bing.
- John R. Drummond.
- Vincente Wing.

TOM. M. COOKE, *Collector of Revenues.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending June 10:

Oratava, June 4, from New York, with 400 pieces steel plate for stock.

Atenas, June 8, from New Orleans, with 15 barrels manganese steel link pins for Pacific Division; 110 sacks bran, 35 packages car parts, 2,400 sacks oats for stock.

Almirante, June 8, from New York, with 21 pieces castings for Atlantic Division; 12 tons lock construction material for Pacific Division; 250 kegs bolts, 7 cases filing boxes, 17 bundles brooms for stock.

Ancon, June 8, from New York, with 15,085 barrels cement, 5 pieces dredge parts for Atlantic Division; 15,085 barrels cement, 20 pieces cable chain, 13 cases motor and accessories, 8 cases pumping machinery for Pacific Division; 15 cases drugs and sundries for Sanitary Department; 11 crates filing cabinets for Chief Engineer; 20 cases metal polish, 1,500 cases refined petroleum, 12 cases copper tacks, 145 bundles steel bars, 426 pieces steel bars, 20 bundles steel angles, 50 kegs bolts for stock; and a miscellaneous cargo, the whole consisting of 122,996 packages, weighing 6,172 tons.

Commodore, June 10, from Liverpool, with 73 pieces lips for dredge buckets for Central Division; 3 reels wire rope for Pacific Division.

The following vessels arrived at or departed from the port of Balboa during the week ending June 10: June 5, *Ucayali*, from Callao, June 6, *Peru*, from Guayaquil; June 7, *Huasco*, from Valparaiso; *Ecuador*, from Guayaquil.

Departures—June 4, *Navajo*, to San Francisco; *Riverside*, to San Francisco; June 5, *Guatemala*, to Valparaiso; June 6, *Manavi*, to Buenaventura; June 8, tug *Hercules* and ship *Mango Reva*, to San Francisco; *Rupanco*, to Guayaquil in ballast.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line; the Panama Railroad Company's dates being subject to change:

The Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago, Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on June 14 and July 12, and for Port Limon at 5 p.m. on June 14.

The Leyland line steamer *Louisianian* sails for Tampa, Fla., via Port Limon, on or about Sunday, June 25.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships designated (*) for New Orleans via Port Limon and Puerto Barrios on Thursday at 4 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JUNE 21, 1911. No. 43.

The Canal Record

Published weekly under the outhority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission ond Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer

NOTES OF PROGRESS.

Acting Chairman's Report.

The report of the Acting Chairman of the Isthmian Canal Commission for the month of May is published in full in other columns of this issue of The Canal Record. It gives a detailed account of the progress of Canal work in all departments and divisions.

Culebra Cut Slides.

In carrying out the plan of reducing the amount of material that will slide into Culebra Cut from the banks by lightening the mass that has broken away from the hill on both sides of the Canal at Culebra, a steam shovel has been set at work on the east bank taking earth from the top. This shovel is now digging through a dump formed by the French in their work. A trestle is being driven extending across the lowland, from a point about half a mile from the center line of the Canal, a distance of 1,400 feet, and the material dug out will be wasted over this trestle. It will have a capacity of 60,000 cubic yards, and the dump can be extended indefinitely by merely shifting the tracks.

On the west side of the Canal at Culebra, three steam shovels are digging from the top of the slide. The work of tearing down buildings in the area that threatens to move is advancing rapidly. The post-office is being reerected near the railroad station on the west slope of the hill, and not far from it a mess hall of the pavilion style is practically completed to take the place of the old hotel. Several cottages for American employes, formerly situated on the site of the slide, are likewise being reerected near the new post-office. The fire company house, which is now on the edge of the Cut, will be moved to a site alongside the Administration Building, and work on the foundations is under way.

Three small slides in the east bank opposite Empire have made it necessary to move the highway back from the edge of the Cut in three places, the average detour being about 150 feet at each place.

There have been no new breaks in the slides, and the five largest ones are not moving at present. At Cucuracha, only a thin stream of mud is moving toward the Canal, and one steam shovel has no difficulty in controlling the whole slide. Of the total of about 19,000,000 cubic yards yet to be taken from Culebra Cut, it is estimated that over 2,000,000 yards are in slides.

Machines for Operating Lock Gates.

Award has been authorized for two miter gate moving machines (item 1, class 1, circular No. 627), for operating the lock gates, to the Wheeling Mold and Foundry Company, the lowest bidders.

Award has also been authorized, conditionally, for one sample miter forcing machine to the Richard Manufacturing Company of Bloomsburg, Pa. This is item 1, class 2 of circular No. 627.

Award on classes 3 and 4, circular No. 627, for motors to actuate the machines in classes 1 and 2, is withheld until further study has been made.

In case the sample machines, purchased in accordance with the awards as indicated above, give satisfaction on test and trial, 90 more of the miter gate moving machines, and 45 more of the miter forcing machines will be ordered from the same contractors. In that event, the total cost of the miter gate moving machines will be about $652,000, and of the miter forcing machines, $41,200.

Ten bids were received for the miter gate moving machines, varying from $652,000 to $862,000. The lowest bid is about ten per cent less than the estimated cost. Twelve bids were received for the miter forcing machines, varying from $41,200 to $71,500.

An article descriptive of the machines was published in The Canal Record of April 26.

Reclaiming Swamp Land at Balboa.

The reclaiming of tidal swamp land in the reservation between the line of the Panama railroad, the wagon road to Balboa, and Sosa and Ancon hills at East Balboa, has been begun. This will be accomplished by dumping spoil from Culebra Cut to an average depth of six feet. which will bring the area to the elevation of the Panama railroad tracks. The filling will be done in such a manner that the land will slope from the center toward either hill, thus insuring natural drainage. It is estimated that about 600,000 cubic yards will be dumped there, and that about 66 acres will be reclaimed. The land is now flooded at high tide, and, although drained, it is never entirely dry.

Naos Island Breakwater.

The end of the trestle on the breakwater at the Pacific entrance to the Canal is now only 2,700 feet from Naos Island, the outer terminus. Since December, 1910, it has been extended 1,850 feet, and, although there has been a constant sinking of the track, the advance has also been constant. The total disappearance of parts of the fill below the water surface, and the continued sinking of large sections of the trestle and fill, which characterized the work in 1909 and 1910, have ceased, and it seems probable that the most difficult part of the filling is over.

Changes in Hydraulic Excavation Work.

Some important changes have been made in the method of excavating hydraulically in the lower lockpit at Miraflores, and in the Canal prism south of that point. Heretofore, the plan has been to dislodge the material in the sides and at the bottom of the excavation by monitors, which sluiced it to where the dredge pumps mounted on concrete barges, could lift it into the fill of the west dam, or elsewhere, as desired. This plan provided for settling the concrete barges into sumps, and it is owing principally to the difficulty experienced in getting the barges in a suitable working position that it has been decided to abandon them. Stumps and the trunks of old trees that had become buried in the soil covering the site of the hydraulic operations in the lower lock at some previous period were among the obstacles encountered in settling the barges effectively. Under the new arrangement, sumps will be created to various depths in the area to be excavated, and the pumps removed to positions alongside. This will do away with any need for the three concrete barges built expressly for mounting the dredge pumps and motor equipment, and one of them has already been dynamited and removed. It is proposed to break up a second one due to the difficulty of getting it out of its present position, but the third may be removed and used elsewhere.

The depth has reached a stage that permits a change in the method of working the hydraulic monitors. or giants. Instead of directing the play of the water against the surface of the material, the process of undercutting, which will allow the overhead mass to fall in as the work proceeds, will, in future, be employed. Hydraulic operations, which were temporarily suspended on account of the break at the Miraflores dam spillway, were resumed last week with two of the four dredge pumps, Nos. 1 and 3, the first working at the lower lock site, and the latter in the prism south of the old dike, both pumping into the fill of the west dam. Dredge pump No. 2 has been shipped to Gorgona shops for repairs, and it is proposed to install temporarily in its place, the relay pump originally purchased for relaying the material into the fill of the dam. The relay pump will be located directly in front of Cocoli Hill, a section of which, extending back as much as 200 feet in one place, will have to be removed in excavating the Canal prism to the required width. The face of this hill contains a great many small boulders which the relay pump is particularly well adapted to handle, inasmuch as its impeller admits pieces of rock eight inches

NOTES OF PROGRESS.

(Continued.)

in size, compared with six-inch pieces, the maximum size handled by the other pumps. It is estimated that the greater proportion of the boulder material found in this locality can be sluiced and pumped out in this manner. The sump where the relay is to be situated will be the main one; it will be sunk to 55 feet below sea level, and the dredge pump will occupy a position on a bench alongside about 25 feet below sea level.

P. R. R. Steam Shovel Records for May.

For the fifth consecutive month, the excavation on the Panama Railroad relocation exceeded all previous records, amounting to 416,518 cubic yards. Of this amount, 164,363 cubic yards were classified as earth, 13,670 cubic yards as loose rock, and 238,485 cubic yards as solid rock. Company forces removed 406,613 cubic yards, and 9,905 cubic yards were removed by contractor. Steam shovels excavated 387,427 cubic yards, pan car task gangs took out 16,660 cubic yards, and 2,246 cubic yards were excavated for culvert foundations.

The best steam shovel record was made by steam shovel No. 257, working in the Gatun section, which excavated 70,030 cubic yards of rock. This shovel has held the record on the Isthmus for the past four months.

In the 70-ton class, the best record was made by steam shovel No. 110, working near Paraiso on the Gold Hill line, which excavated 25,635 cubic yards of earth, and 11,555 cubic yards of rock, a total of 37,190 cubic yards.

A high day's record for shovels with 5-yard dippers was made by steam shovel No. 262, working at Monte Lirio, which took out 4,330 cubic yards of earth and rock on May 31.

The best day's record for 70-ton shovels was made by steam shovel No. 105, working near Monte Lirio, which excavated 2,060 cubic yards of earth on May 26.

Month's records are place measurement, and days' records are car measurement. All material is loaded in 10-yard Western dump cars.

BEST RECORDS FOR THE MONTH.

Shovel No.	Location.	Cubic Yards by Cross Section.			
		Days worked.	Earth	Rock.	Total.
257	Gatun	26	....	70,030	70,030
262	M. Lirio..	26	19,240	38,400	57,640
110	Paraiso ...	26	25,635	11,555	37,190
113	Bas Obispo.	26	3,697	33,210	36,907

Total output during month of May, 1911, 387,427 cubic yards.

Total number steam shovel working days, 248.

Average output per working day, 1,562 cubic yards.

Lights on Pacific Coast of Panama.

At the request of the Government of Panama, Mr. Walter F. Beyer, formerly of the lighthouse establishment in the United States, now assistant engineer in charge of the work of lighting the Canal, has been directed to assist in the work of providing lights for the Pacific coast of the Republic. Among the locations where it is proposed to place lights are Cape Mala, Melones, Bonas, and Tortolita Islands, and San José Island in the Pearl Islands archipelago. The supply boat Chamé, belonging to the dredging fleet at the Pacific entrance, will leave Balboa on Wednesday night, June 21, with Mr. Beyer and a party of Panama officials, to inspect the proposed sites.

Sinking of Dredge "No. 6."

No. 6, one of the old French ladder dredges at work in the Atlantic entrance to the Canal, sank about one o'clock Monday morning at a point in the channel near the intersection of the French canal, and rests on the bottom in about 40 feet of water. The vessel is thought to have sprung a leak, and turned over. Four of the crew were on board at the time. Two of them, colored men, were drowned; the other two swam to safety.

CONCRETE WORK IN THE LOCKS.

About 55 per cent of the concrete for all the locks is in place, the amount at the close of work on June 17 being 2,338,051½ cubic yards, out of a total of approximately 4,284,400. A total of 23,899½ cubic yards of concrete was laid in the locks during the week ending June 17.

GATUN LOCKS.

Over 67 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 17, being 1,402,998½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending June 17, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 6 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

Previously reported	....	....	......	....	....	......	....	1,389,898
Grand total	....	....	......	....	....	......	....	1,402,998½

*The 323 yards shown for the portable mixers are reenforced concrete, and were placed on the following days: June 12th, 28; June 13th, 56½; June 14th, 62½; June 15th, 44; June 16th, 64; June 17th, 68.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 79 per cent completed, 665,766 cubic yards, out of a total of 837,400, having been placed at the close of work on June 17 The record for each of the six eight-hour working days of last week, follows:

Date.	Auxiliary Plant.						Large stone.	Total
	2-cubic yard mixers.			½-cubic yard mixer.

MIRAFLORES LOCKS.

About 20 per cent of the concrete for the system of two twin locks at Miraflores was in place on June 17, the total amount on that date being 269,287 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant.							Total.
				2-cubic yard mixers.			½-cubic yard mixer.

ORDINANCE

Providing for the Licensing and Regulation of Bicycles in the Canal Zone.

Be it enacted by the Isthmian Canal Commission:

Section 1. Before any bicycle shall be ridden or operated over any of the streets or roads of the Canal Zone, the owner or custodian of such bicycle shall secure from the Collector of Revenues a license authorizing the use of such bicycle over said streets and roads, and the owner or custodian shall also secure from the Collector of Revenues a metal tag bearing thereon, in plainly visible numerals not less than two inches in height, the serial number of the license issued to cover the use of such bicycle.

Section 2. The Collector of Revenues shall register the name of the owner or custodian of each bicycle licensed by him, together with the number of the license and metal tag furnished the owner or custodian, and a brief description showing the name of the manufacturer and factory number of the bicycle.

Section 3. No bicycle shall be ridden or operated over the streets or roads of the Canal Zone unless it shall bear thereon the aforesaid numeral metal tag prominently displayed beneath the saddle thereof; nor shall it be so ridden or operated between the hours of 6:30 p. m. and 6 a.m., unless it shall also carry and prominently display a headlight. No bicycle shall be operated unless it carries a bell or horn whereby signals of warning shall be given by the rider to persons and vehicles met or overtaken on the aforesaid streets or roads.

Section 4. It is hereby made the duty of all persons who may rent bicycles to others for use to keep a full record, showing the name of each person to whom such rental is made, the license number of the bicycle, and the hour it returns; and it shall be the duty of each person renting bicycles to others to carefully preserve such record and to at all times permit the members of the Zone police or of the office of the Collector of Revenues to examine such records.

Section 5. The bicycle license herein provided for shall be issued to cover the unexpired portion of the fiscal year in which it is issued, and the party receiving same shall pay to the Collector of Revenues the sum of one dollar ($1) for the license and numeral metal tag, which shall entitle the bicycle so licensed to be ridden over any of the streets of the Canal Zone during the license period.

Section 6. No bicycle shall be ridden over the streets or roads of the Canal Zone at a greater speed than seven (7) miles an hour in cities, towns, or villages, nor at a greater rate of speed outside of cities, towns, or villages than fifteen (15) miles an hour on straight roads, or eight (8) miles an hour when approaching curves, forks, or crossroads.

Section 7. The Collector of Revenues shall promptly furnish to the Chief of Police statements showing to whom he has issued the bicycle licenses herein provided for, and the Chief of Police shall, in turn, transmit to the Canal Zone police stations the information shown by such statements.

Section 8. Any person who rides a bicycle over any road or street of the Canal Zone, without there being displayed thereon the license numeral tag herein required, or who fails to comply with the requirements of this Ordinance as to lights and signals, or any owner or custodian who shall rent or loan to another any bicycle for the use of which the license herein required has not been secured, or any other person who shall fail to comply with any requirement herein imposed on him, shall be deemed guilty of a misdemeanor, and upon conviction, shall be fined not exceeding twenty-five dollars ($25) for each offense.

Enacted by the Isthmian Canal Commission at its 160th meeting, April 15, 1911.

Approved by the Secretary of War, April 26, 1911.

Observance of Coronation Day.

The West Indian negroes employed on the Canal and railroad, who are British subjects, will celebrate the coronation of King George the Fifth and Queen Mary on June 22, by a general holiday. The Commission has granted a day's leave, without pay, to all British subjects.

There will be services in Christ Church, Colon, and in St. James' Church, Empire, at 7:30 a. m., the hour which will correspond with the time of the coronation service in Westminster Abbey. An official service will be held in Christ Church at 9:30 a. m., following which there will be a procession of the members of the congregation, headed by the school children and the "lads' brigade," with fife and drum corps. The parade will proceed to the British consulate, where the children will sing the national anthem, and the special coronation hymn written and composed by C. D. Nurse and B. Clinton Davis, the latter the organist of Christ Church. The governor of Colon has granted the use of the playground for the children of the parish school, where a treat will be served. The municipal band will play. In the evening, there will be a parade of the different societies, followed by a display of fireworks. At New Gatun, there will be a street parade and athletic sports in the afternoon.

The West Indians from the other villages in the Canal Zone will unite with those of the city of Panama in a street parade. They will proceed to the British legation, thence to the National theatre, where there will be addresses. A song service will be held in the Wesleyan Methodist Church, Panama, on the evening of June 22, and the coronation service will be held on Sunday morning, June 25.

The British subjects in the Canal Zone and on the Isthmus have subscribed a fund of $3,500 for a coronation memorial. A cable message will be sent to the King and Queen, and, as a souvenir of the day, each subscriber will receive a King George button and a lithograph copy of the cable message.

The Fourth of July at Cristobal.

The water sports will form one of the most interesting features of the celebration of July 4 to be held at Cristobal. They will begin at 2 o'clock in the afternoon and be over about 4.30; and at night there will be the illuminated boat parade in the harbor. The afternoon events will include a sail boat race, aquatic boxing contest, Navy steam cutter race, swimming contest, three races for lifeboats, two races for gasoline boats, a race for native canoes, American canoes, dorys, and life rafts, relay swimming contest, fancy diving contest, swimming race for boys, human duck hunt, tub race, climbing a greased spar. All the events are open and free, and entries should be made to the chairman of the aquatic committee, dock No. 13, Cristobal, on or before June 30.

Details of the decorations have been completed. The center of the exercises will be the Court of Honor, built near the Subsistence Department office on Roosevelt avenue. In it will be erected stands for the speakers, the children, and the bands. Nearby there will be stands for the sale of light refreshments, and for the playing of county fair games. A light lunch will be served on dock No. 11 free, from 11 to 2 o'clock.

Captain Horton W. Stickle, under whose direction the plans have advanced so far, has resigned as chairman of the committee, and Mr. W. G. Comber has been named in his stead.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 62 per cent completed, 140,643 cubic yards, out of a total of 225,000, having been placed at the close of work on June 17. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 12	128	4:00	1
June 13	136	6:00	1
June 14	260	8:00	2
June 15	148	6:30	1
June 16	192	6:00	1
June 17	134	5:00	1
Total	998	35:30	1.16
Previously reported	139,645	....	....
Grand total	140,643		

Red Cross Announcement.

The Red Cross has an organization in each district, with chairmen, as follows: Dr. A. J. Orenstein, Ancon; Alexander P. Crary, Corozal; J. T. Smith, Pedro Miguel; Edw. Schildhauer, Culebra; T. L. Clear, Empire; J. B. Fields, Las Cascadas; W. B. Wheeler, Bas Obispo; B. M. Litt, Gorgona; Dr. Geo. H. Gorham, Tabernilla; Major Chester Harding, Gatun; Wm. F. Bennyhoff, Cristobal.

The organization is prepared to take up the relief of any case recommended by the local chairman within 24 hours, or earlier, if practicable, after receipt of notice.

A monthly notice of the expenditures of this organization, showing individual cases of relief, is published in THE CANAL RECORD for the information of all concerned.

C. A. DEVOL,
Chairman, Canal Zone Chapter,
American National Red Cross.

CULEBRA, C. Z., June 14, 1911.

United Fruit Company's Transatlantic Service.

The United Fruit Company has discontinued its coastwise service between Colon and New Orleans, maintained by the steamships *Heredia*, *Parismina*, and *Cartago*, and, beginning June 29, will place them in service between Colon and Southampton, England. The first steamer to leave Colon on the new schedule will be the *Heredia*, its departure being set for Thursday, June 29. It will leave Limon on July 1, and arrive at Port Morant, Jamaica, on July 3, sailing from there direct for Southampton, where it is due to arrive about July 17. The *Parismina* will leave Colon on July 13, and the *Cartago* on July 27, the sailings being fortnightly. Passengers from Colon for Puerto Barrios, Guatemala, will be transferred at Limon.

CANAL WORK IN MAY.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., June 15, 1911.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of May, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	82,159	1,303,979	97,325	1,483,463
Work excavation, wet	Cubic yards	514,178	24,904	548,047	1,087,129
Total work excavation	Cubic yards	596,337	1,328,883	645,372	2,570,592

Average rainfall	Inches	18.51	13.83	9.21	13.78

Atlantic Division.

GATUN LOCKS.

Shovel excavation in the lower lock, south of the caisson sill, was completed. Considerable difficulty was experienced, due to slides, on both the east and west sides of the lower lock. Clay excavation for obtaining impervious material for back fill was continued. A total of 26,411 cubic yards of material was removed. Of this amount, 11,726 cubic yards were excavated outside the prism for back fill. On May 31 the total excavation amounted to 5,856,479 cubic yards, of which 5,024,609 cubic yards were removed from the prism. The shovel excavation in the locks was 99.5 per cent completed, and the excavation of the culvert trenches by crane 85 per cent completed. The channeling work for lateral culverts was completed during the month.

Back fill—Back filling behind the walls of the upper and middle locks was continued, and back filling in the center wall of the upper lock commenced. The quantity placed during May aggregated 66,108 cubic yards, increasing the total to 490,563 cubic yards. A new estimate was prepared during the month of the total amount of back fill necessary, including the amount required in the center wall and in the extension of the side walls to the north. On the basis of the new estimate, the back filling was 30.33 per cent completed. On May 15 one of the duplex cableways used in placing concrete was permanently detached from that service, and will be utilized in future in placing back fill in the center wall; and for miscellaneous steel work; and for finishing work.

Receiving and Issuing Material—The receipts of all material during the month were satisfactory, and exceeded the consumption.

Mixing and Placing Plants—Both plants, and all portable mixers, were kept in satisfactory operation during the month.

Power Plant and Pumps—The operation of the power plant and pumps was satisfactory.

Iron and Steel Work—During the month, 333.4 tons of fixed steel, 83.6 tons of rail reinforcement, and 13,617 feet of reinforcing rods were placed.

Concrete Work—There was an increase of 483 cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 26 working days was 2,609 cubic yards, as compared with a daily average during April of 2,806 cubic yards. The total amount of concrete placed during the month was 67,844 cubic yards, including 5,406¾ cubic yards of large stone. The bucket measurement exceeded the place measurement by 215 cubic yards. Of the total concrete, 5,629½ cubic yards were placed in the upper lock, 15,536 cubic yards in the middle lock, and 46,678½ cubic yards in the lower lock. The concrete work for the entire lock system was 65.7 per cent completed at the end of May.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS, GATUN LOCKS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	11.56	8.50
Average number of hours per day worked per strand of cableway laying concrete and large stone (actual working time)	6.50	....
Average number of mixers per day	5.50	2.00
Average hourly output per mixer, (actual working time) cu. yds.	58.43	66.63
Average amount of concrete and large stone laid per hour, per strand of cableway, (actual working time) cu. yds.	31.39	....
Large stone laid, cu. yds	2,969¾	2,437
Concrete laid, cableways, cu. yds.	41,749	....
Concrete laid, through chute into dump cars, cu. yds	4,878	....
Concrete laid, derricks, cu. yds	....	3,644
Concrete laid, dump cars, cu.yds.	....	10,822
Concrete laid, portable mixers	....	1,559¼
Total amount concrete and large stone laid, cu. yds.	49,596¾	18,462¼

Concrete from the auxiliary plant was placed by five derricks, and with dump cars.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 627,099 cubic yards, making the total amount in place 14,074,812 cubic yards.

Hydraulic Fill—The dredges increased the hydraulic fill by 419,348 cubic yards. The total hydraulic fill in place May 31 was 7,421,766 cubic yards.

Dry Fill—The material received from the Central Division, the Locks, Mindi, and steam shovels Nos. 51 and 134, amounting to 207,751 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 6,653,046 cubic yards.

GATUN SPILLWAY.

Excavation—In preparing foundations of the spillway dam, 2,051 cubic yards of rock were excavated, of which 251 cubic yards were excavated by steam shovel No. 51, and 1,800 cubic yards by hand. On May 31 the total spillway excavation amounted to 1,582,845 cubic yards.

Concrete—The work of placing concrete behind the east coffer-dam was continued. The amount of concrete placed during the month aggregated 3,656 cubic yards, which increased the total to 138,916 cubic yards. The concrete work for the Spillway was 61.74 per cent completed.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea Level at Mindi—During the month, three steam shovels removed 16,210 cubic yards of earth and 42,772 cubic yards of rock from the Canal prism. In addition, 5,500 cubic yards of earth were sluiced by pumping plant.

Dredging from the Ocean to Mindi—Five dredges removed 471,653 cubic yards of earth and 42,520 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 800 cubic yards of earth at the cement dock in Gatun. On May 31st, 40 feet of water could be carried from zero to zero plus 2,600 feet; 35 feet to mile 3 plus 900 feet; 30 feet to mile 4 plus 700 feet; 20 feet to mile 5 plus 2,438.9 feet, at the junction with the French canal.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working days—hours From 1st to 31st, inclusive	8.00
Average number of hours worked per day	5.65
Average number of cubic yards per hour of working day	281.20
Average number of cubic yards per working hour	397.60
Maximum day's output, (7 hours 10 minutes) cu. yds	3,404.00
Average day's output (26 days) cu. yds.	2,249.00
Average hourly output, (208 hours) cu. yds.	281.20
Total output for the month, cu. yds.	58,383.00

SAND, STONE, AND CEMENT SERVICE.

In connection with this service, plant steamed 8,452 miles, handled 811 barges, and carried 2,509 passengers.

TORO POINT.

Colon Breakwater—Thirty-eight thousand five hundred and thirty-four cubic yards of material were excavated, of which amount 1,375 cubic yards were placed in track fill, and 37,159 cubic yards in breakwater fill. The double track trestle was extended 558.5 linear feet. On May 31 the trestle extended 4,772.5 feet from shore. The total amount of rock dredged and dumped on the west breakwater to May 1, 1911, was 556,189 cubic yards. During the month, 42,520 cubic yards were dredged and dumped, increasing the total to 598,709 cubic yards. The amount of dry fill placed to June 1 was 308,560 cubic yards.

NOMBRE DE DIOS.

During the month, 78 barges, containing 38,653 cubic yards of sand, were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of May, the total amount of material excavated in the Central Division was 1,328,883 cubic yards, of which 165,897 cubic yards were classified as earth, and 1,162,986 cubic yards as rock. Of this quantity 1,298,240 cubic yards were removed by steam shovels, 360 cubic yards by bucket cranes, and 1,863 cubic yards by hand. Contractors removed 24,904 cubic yards by sluicing and 3,516 cubic yards by hand. Of the total, 1,328,383 cubic yards consisted of primary excavation for the Canal prism, and 500 cubic yards for permanent diversion useful after the Canal is completed. The total work excavation amounted to 1,328,883 cubic yards.

The daily average number of steam shovels at work during the month was 38.62, and the total number of shovel days was 1,004, as compared with 44.71 shovels at work during the month of April, with 1,073 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
May....	1,331,758	954,325	377,433	44.80	23	1,189.10
1911:						
May....	1,298,240	1,149,886	148,354	38.62	26	1,293 08

Rainfall at Empire: 1910, 11.08 ins.; 1911, 13.74 ins.

The above table shows the average output per shovel to be 8.74 per cent greater in May, 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in May, 1911—1,298,600 cubic yards—was the highest record in that section for the month of May, the previous high record for the month having been in May, 1909, when 1,126,963 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division was 97,125,018 cubic yards, and up to June 1, 1911, 75,904,931 cubic yards had been removed, leaving 21,220,087 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures it will be seen that 78.15 per cent of all excavation in the Central Division had been completed up to the close of the month of May, and 21.85 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed, and that to be completed, at the close of May operations were, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	64,113,849
To be completed	20,072,875
CHAGRES SECTION.	
Completed	11,791,082
To be completed	1,147,212

From the above figures it will be seen that the Culebra section, locally known as the Culebra Cut, was 76.16 per cent completed, with 23.84 per cent to be completed; the Chagres section was 91.13 per cent completed, with 8.87 per cent to be completed.

During the month, 2,100 cubic yards of material were hauled from the Canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad at Frijoles. The total amount of spoil from the Central Division used for this purpose at the close of the month was 3,830,137 cubic yards. The Central Division also delivered at Gatun 209,594 cubic yards of rock and earth for use in the construction of the Dam, making the total for this purpose at the end of May, 3,565,461 cubic yards. In addition, 350 cubic yards of rock and earth were transported from Culebra Cut to Colon to be used by the Panama railroad in building the new sea wall.

The daily average number of laborers at work on the whole division during the month was 7,041, and the daily average number of gold employes 795.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 97,325 cubic yards.

Filling and Embankment—During May, no additional dry filling was added to the prism of the west dam at Pedro Miguel, the total amount of material in place at the close of the month remaining at 260,852 cubic yards, as previously reported. The back fill at Pedro Miguel was increased by 14,420 cubic yards, the total in place at the end of the month amounting to 264,454 cubic yards.

At Miraflores, 30,032 cubic yards were added to the dry fill in the toes, and 18,353 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month 788,184 cubic yards and 528,874 cubic yards, respectively. The back fill was increased by 16,021 cubic yards, the total aggregating 158,446 cubic yards at the end of the month.

PEDRO MIGUEL LOCKS.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day, worked laying concrete and large stone (actual working time)	7.68	4.49
Average number of mixers per day	*2.00	†2.77
Average hourly output per mixer (actual working time)	*Cu. Yds.* *40.46	*Cu. Yds.* 20.49
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)	57.00	....
Large stone laid	....	2.00
Concrete laid	11,388.00	7,745.00
Total concrete laid	11,388.00	7,747.00

*1 berm crane from 1st to 19th, inclusive. Dismantling began on 20th.

†Auxiliary plant consisted of 1.12 half-yard mixers per day and 1.65 two-cubic yard mixers per day, and locomotive cranes and derricks placing; 1 half-yard mixer discharging directly into forms.

The back filling of the east and west walls was continued. Chamber cranes Nos. 2 and 4 were dismantled by the McClintic-Marshall Construction Company, and the work of reerecting No. 2 in the east chamber of the Miraflores upper lock was 90 per cent completed at the end of the month. The dismantling of berm crane E was begun by the McClintic-Marshall Construction Company. During the month, the amount of iron placed aggregated 442,350 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 19,135 cubic yards, as compared with 28,635 cubic yards during April. The concrete was placed, as follows: Two hundred and thirty-five cubic yards in the lower center guide wall; 1,325 cubic yards in the floors; 6,205 cubic yards in the east wall; 6,375 cubic yards in the west wall, and 4,995 cubic yards in the center wall.

MIRAFLORES LOCKS.

The dry excavation in the lower lock was continued. The excavation of the sump pit for draining the lock site was completed, and two 12-inch motor-driven centrifugal pumps were installed. These pumps were put out of commission on May 23, due to the flooding of the pit and lock site, caused by the spillway of the west dam giving away and discharging part of the hydraulically filled core into the lock site. Back filling behind the east wall was continued, and the auxiliary mixing plant, which is being installed in the east side wall near the lower end of the upper lock, was about two-thirds completed at the end of the month. Filling was continued in the east and west toes of the west dam. During the month, the amount of iron placed aggregated 225,040 pounds.

Concrete Work—The total amount of concrete and large stone laid was 36,154 cubic yards, as compared with 67,393 cubic yards during April. The concrete was placed as follows: Fourteen thousand eight hundred and eighty-eight cubic yards in the east wall; 16,875 cubic yards in the west wall; 1,391 cubic yards in the center wall, and 3,000 cubic yards in the floors.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	6.39	5.78
Average number of mixers per day	3.70	3.81
Average hourly output per mixer (actual working time)	*Cu. Yds.* 42.90	*Cu. Yds.* 20.12
Average amount of concrete and large stone laid per hour per berm or chamber crane (actual working time)	78.95	....
Large stone laid	....	....
Concrete laid	24,230.00	11,924.00
Total concrete laid	24,230.00	11,924.00

Permanent plant consisted of two berm cranes mixing and placing.

Auxiliary plant consisted of one 1-3 cubic yard, five ½-cubic yard, and two 2-cubic yard mixers, averaging 3.8 mixers per day, the output of which was discharged directly into forms or placed with derricks.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 38,500 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

TEMPORARY WATER SUPPLY FROM CAIMITILLO RIVER.

From May 1 to 28, inclusive, a daily average of 600,000 gallons of water was pumped from the Caimitillo River to the tanks of the Cocoli pumping station, for the purpose of reducing the chlorine content of the water pumped from Cocoli Lake into the 16-inch Rio Grande supply main.

On the afternoon of May 28, work was begun laying 700 linear feet of 10-inch pipe from a point about 500 feet south of Miraflores yard office, connecting into the discharge line of the Caimitillo pump at the latter point, and running down the forebay to the concrete floor of the Miraflores upper lock chamber. This work was completed on May 29, and was performed for the purpose of supplying water to assist in flushing out mud and silt deposited in the lock chamber during break in the spillway of the west dam. This line is discharging approximately 3,000 gallons of water a minute in the lock chamber.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the municipal improvements in the city of Panama.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day....................	8.00
Average number of hours per day (actual working time).......................	6.56
Average amount crushed per hour of working day.................................	*C. Y.* 283.12
Average amount crushed per working hour..	345.27
Total output for the month...............	58,893.00

Relocation of Panama Railroad.

During the month, 416,518 cubic yards of material were excavated, increasing the total excavation at the close of the month to 7,102,142 cubic yards, and 505,697 cubic yards of material were placed in embankment, increasing the total for this purpose to 12-746,275 cubic yards.

The average daily number of steam shovels at work was 9.54, and the total number of working days was 26.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			
May....	212,135	25,870	186,265	7.15	26	1,140
1911:						
April..	366,194	205,731	160,463	8.83	24	1,727
May....	387,427	242,885	144,542	9.54	26	1,562

During the month, 2,488 feet of temporary trestle were driven, and work on bridges and culverts was continued. No permanent track was laid during the month, the amount of 70-pound and 90-pound track remaining at 148,372 linear feet and 28,369 linear feet, respectively, as previously reported. The force averaged 2,298 men, in addition to those employed by contractors.

Quartermaster's Department.

Labor—The shortage of unskilled labor continued, and a number of applications from the construction divisions and from the relocation of the Panama railroad could not be filled. It is hoped that the shortage in the labor supply will be temporary.

Quarters—A large number of family quarters were vacated during the month, and a corresponding number of applications filled. Bachelor quarters at Gorgona were congested a few months ago, but there are now 110 vacancies, and arrangements are being made to use some of the houses as nonhousekeeping family quarters.

Buildings—Four of the five traveling gangs were engaged at Culebra on the work of demolishing and reerecting buildings. The post-office, time office, news stand, four laborers' barracks, and houses 6 and 65 were demolished during the month. It will also be necessary to remove the fire station and a type-5 house. The job work along the line during the month was unusually heavy, owing to the number of sanitary requests for repairs to screening.

Material and Supplies—Supplies during the month were delivered by 32 steamers, the total weight of cargo aggregating 40,823 tons, exclusive of 1,633,978 feet, board measure, of yellow pine lumber, 678,855 feet, board measure, Douglas fir lumber, and 2,903 crossties. The total value of material received during the month was $625,940.15.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels showed a net profit of $2,014.73. The operation of the Hotel Tivoli showed a net profit of $2,307.30, and there was a net profit on restaurants, penitentiary, tugs, and dredges of $123.41. The net profit on subsistence operations was $4,445.44.

Department of Civil Administration.

COURTS.

During the month, two civil and one criminal cases were disposed of in the Supreme Court; 21 civil and 36 criminal cases in the Circuit Courts, and 81 civil and 496 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for May amounted to $390,285.20, and the fees to $1,757.61. Receipts from stamp and card sales, and newspaper postage aggregated $6,256.23. The total collection of revenues made by the division was $18,381.25, and the collection on account of court fines, costs and fees $2,454.60.

Twenty-nine vessels entered at and 25 vessels cleared from the port of Ancon; and 27 vessels entered at and 26 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 469, of whom 418 were men and 51 women. Forty-four nationalities were represented. The total number of arrests for the month was a decrease of 57, as compared with April. Sixteen convicts were committed to the penitentiary, and 14 were discharged, leaving 145 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,606.25, and the value of their work on Canal Zone roads was $2,234.

DIVISION OF FIRE PROTECTION.

Ten fires were reported in the Canal Zone during the month, as compared with 19 in April. The damage to Commission property was $25, and to private property $30,725. Of this latter amount, $30,700 was due to the fire at Bas Obispo on May 7, seven buildings being consumed.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,321,721 gallons, and in Colon 856,562 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The total enrollment in the white schools during the month was 1,127, and the average daily attendance 792.3, or 71 per cent of the enrollment; and in the colored schools, the total enrollment was 1,473, and the average daily attendance 471.5, or 32 per cent. Forty-three white and 24 colored teachers were employed in the division on May 31.

Department of Sanitation.

The total number of deaths from all causes among employes was 44. These were divided, as follows: From disease, 33, and from violence, 11, giving the annual average per thousand of 8.17 and 2.72, respectively.

The annual average death rate per thousand among employes for the month of May in previous years since American occupation was, as follows:

1904	5.35
1905	16.65
1906	24.79
1907	30.15
1908	10.44
1909	9.45
1910	7.72

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and nonemployes, for the month of May in previous years was, as follows:

1905	41.95
1906	43.32
1907	31.57
1908	20.87
1909	15.77
1910	18.69
1911	22.32

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 5.81; blacks, 8.97, giving a general average of 8.17. For the same month during 1909, the annual average death rate per thousand from disease was: Whites, 4.03; blacks, 5.82, giving a general average of 5.36, and for the same month during 1910: Whites, 5.42; blacks, 4.55, giving a general average of 4.77.

Among employes during the month, deaths from the principal diseases were, as follows: Nephritis, acute and chronic, 5; lobar pneumonia, 6; malaria fever, 6; tuberculosis, 4; and typhoid fever, 2, leaving a balance of 10 deaths from all other diseases, and 11 deaths from external violence.

No cases of yellow fever, smallpox, or plague were brought to, or originated on the Isthmus during the month.

Respectfully,
H. F. Hodges, *Acting Chairman.*

Physical Examination of Silver Employes.

To guard against fraudulent injury claims, and to prevent the employment of men who would be peculiarly subject to injury on account of some latent disability, it has been decided to require all silver employes entering the service to appear before the nearest district physician for examination. A form of request for physical examination has been drafted, copy of which has been submitted to the heads of departments and divisions.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Methodist Episcopal Church in Panama has issued the first number of a bulletin which contains a schedule of the services to be held in the church in the current month, notes of general interest, and a brief review of the activities of the church under the two pastors, the Rev. Harry Compton, pastor of the English section, and the Rev. Charles W. Ports, pastor of the Spanish section. There will be a communion service in the church on the first Sunday in July at 10 a. m.

"Children's day" will be observed in the Gatun Sunday school on Sunday, June 25. A choir has been organized for the Union League services, composed of about twelve men and women. Mrs. Nat Johnson is the accompanist, and Mrs. Hughes the leader. E. C. Soule has resigned as superintendent of the Gatun sunday school, and H. A. Smith has been appointed in his stead. A new piano has been purchased for the chapel, the money being donated by the Sunday school and the Christian League.

Three entertainments have been held in the social hall at Pedro Miguel, under the auspices of the Pedro Miguel Song and Praise Association. The object is to maintain a fund for incidental expenses, and for the purpose of holding entertainments open to all the residents of the village. The association has made arrangements with the superintendent of the Commission clubhouses for the appearance in Pedro Miguel of the States entertainers that visit the Isthmus. A schedule of Sunday evening meetings includes the following speakers: First Sunday of the month, E. C. Soule of Gatun; second, A. H. Shrimpton of Pedro Miguel; third, the Rev. Harry Compton of Panama; fourth, the Rev. Charles W. Ports of Panama. At the Thursday evening song services, the Rev. Mr. Nellis of Empire, the Rev. Mr. Purdy of Gatun, and the Rev. Mr. Elliott of Cristobal are the speakers. The membership of the association is about 80.

The annual "Week of missions" was observed in Christ Church, Colon, from June 5 to June 11. A new feature of the observance was a nightly procession held each evening at 7:30 o'clock, when the vested clergy and the choir went in procession through the different sections of the city singing missionary hymns. The rector of Christ Church was assisted by the clergy of the Protestant Episcopal Church on the Isthmus, who delivered the addresses at the services. The week closed with a review of the work of the various missions throughout the world by the rector. The offerings for the week were devoted to missionary purposes.

Marines Minstrel Show at National Theatre.

The Camp Elliott minstrels will give their two-part show at the National Theatre in Panama on the night of July 3, for the benefit of the post exchange at Camp Elliott and the Fourth of July celebration at Cristobal. The show will consist of two parts, the olio, and the specialties; in short, it will be a minstrel show of the type of 20 years ago. The Marine band will be present to play the national airs of Panama, and the United States; and the theatre will be decorated. A special train will leave Colon for Panama at 6 o'clock in the evening, and the show will begin immediately after its arrival in Panama. Tickets will cost 50 cents for admission, 75 cents for pit seats, and $1 for box seats; and they will include transportation from any point on the line to Panama and return.

PERSONAL.

The *Army and Navy Journal* of June 10 prints the following:

"Secretary of War Stimson is planning a trip of inspection of the Panama Canal work in July, if he is able to leave Washington at that time. It will be Mr. Stimson's first visit to Panama. He is interested in the construction work there, and eagerly accepted the invitation of Col. George W. Goethals, C. E., Chairman and Chief Engineer of the Isthmian Canal Commission, who is in this country on a month's leave of absence. Secretary Stimson hopes to spend about two weeks on the Isthmus, for the purpose of familiarizing himself with the work which is under his supervision."

Col. Geo. W. Goethals sailed from the States on the *Allianca* on June 17, due to arrive at Cristobal on June 23.

Mr. Maurice H. Thatcher, with Mrs. Thatcher, returned from his leave in the States on the *Colon*, which arrived at Cristobal on June 18.

A cable message received in Panama on June 19 announced that Claude Coventry Mallet, British minister resident to Panama, had been made a Knight of St. Michael and St. George. Sir Claude has been in the consular and diplomatic service in Latin-America since 1883, and his present assignment in Panama began in 1891.

Spanish War Veterans.

A meeting of Chagres Camp, No. 2, U. S. W. V., was held at Culebra on June 10, and the following officers were installed: Commander, Frank J. Hoffman; senior vice-commander, Frank Bronson; junior vice-commander, Edmund H. Tracy; officer of the day, William W. John; officer of the guard, Okey J. Rice; adjutant, H. Wm. Coutermarsh; chaplain, A. S. Boyd; quartermaster, John Abramse. At 11:15 p. m., the meeting was adjourned and refreshments served. The next meeting of Chagres Camp will be held in the Commission lodge hall at Paraiso on June 25, at 7 p. m.

There will be a meeting of the Spanish War Veterans in the Gatun lodge hall on Sunday afternoon, June 25, at 1.30 o'clock.

Steam Shovel and Dredge Men.

The next regular meeting of Panama Local, No. 5., A. U. of S. S. and D. will be held in the Culebra lodge hall, Sunday, June 25, at 2:30 p. m.

Electrical Workers.

The members of Local Union, No. 677, I. B. E. W. of Gatun, were entertained at their last meeting on June 10, with a lecture on "Transformers," illustrated with diagrams, by Mr. E. W. Nick of Gatun. After the lecture refreshments were served.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Las Cascadas, C. Z., on Sunday, June 25, 1911, at 6 p. m. The program follows:

1	March—*The Hustler*	Alford
2	Selection—*Robin Hood*	De Koven
3	Waltz—*Skaters*	Waldteufel
4	Wooden Shoe Dance—*Dutch Kiddies*	Trinkaus
5	Overture—*Norma*	Bellini
6	Intermezzo—*Garden of Roses*	Prats
7	Selection—*Woodland*	Ludert
8	Medley—*Southern Plantation*	Conterno
9	March—*Give the Countersign*	Scouton

Oliver Kimball, *Acting Musical Director.*

The next concert will be given at the Hotel Tivoli on Sunday, July 9.

OFFICIAL CIRCULARS.

Fourth of July.

Culebra, C. Z., June 19, 1911.

Circular No. 398:

Independence Day, Tuesday, July 4, 1911, will be observed as a holiday in the Canal Zone, and, as far as practicable, all public business will be suspended on that day.

H. F. Hodges,
Acting Chairman and Chief Engineer.

Reservation of Canal Zone Lands.

Cubebra, C. Z., June 13, 1911.

Heaos of Departments and Divisions:

The Act of Congress, approved February 27, 1909, entitled, "An Act relating to the use, control, and ownership of the lands in the Canal Zone, Isthmus of Panama," provides that 'no public lands in the Canal Zone shall be leased until a statement is filed by the Isthmian Canal Commission with the Collector of Revenues, by which it shall be made to appear that it is not contemplated to use such lands in the work of Canal construction, nor to set the same aside as town sites.

In order that the Canal Commission may prepare the statement required by the Act of Congress, it will be necessary to obtain full information respecting the lands that may be needed by the departments and divisions of the Canal Commission.

I desire a statement from the respective heads of the departments and divisions as to the lands that will be needed by them in the work under their control and direction. The engineers in charge of the Atlantic, Central, and Pacific Divisions will submit statements showing the lands that may be required in their respective divisions for the construction of the Canal, and the auxiliary works in their charge, the Army and Navy reservations that may have been set aside in their respective divisions, and any other lands that may be needed for the work under their charge; also, the lands, if any, that should be set aside as town sites.

I desire that full statements be submitted respecting the lands that may be needed for lighthouses; telegraph, wireless, seismograph, and other stations.

I also desire statements respecting lands that may be needed in connection with the work of the Sanitary Department.

The Department of Civil Administration will submit statements of the lands that may be needed in any of the divisions of that department.

It is also desired that these statements be accompanied by maps and descriptions of the lands to be reserved by the respective departments and divisions, so that such lands may be easily identified and located upon the ground. The statements will be submitted to the Chairman and Chief Engineer before the 15th day of July, 1911.

H. F. Hodges,
Acting Chairman and Chief Engineer.

Promotion of Spanish Laborers.

Culebra, C. Z., June 14, 1911.

Referring to my letter of the 10th instant, wherein it is directed that the pay of European laborers be increased from 16 cents to 20 cents an hour as they complete six months' service. If the end of the six months' period falls in the middle of the month, as will usually be the case, the increase may be made to take effect on the 1st of the following month.

Respectfully,
H. F. Hooges, *Acting Chairman.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending June 17:

Prinz August Wilhelm, June 12, from New York, with 500 kegs track spikes for stock.

Advance, June 13, from New York, with 84 cases drugs and sundries for Sanitary Department; 30 cases cartridges, 8 cases fire hose for Department of Civil Administration; 3 cases electrical machinery for Pacific Division; 5 pieces steel castings for Central Division; 12 bundles fittings, 65 bags stock food, 5 cases chloride of lime, 21 bundles cotton mops, 14 cases cardboard, 2 cases injectors, 6 cases rubber hose for stock; and a miscellaneous cargo, the whole consisting of 320 packages, weighing 51 tons.

Hoyle Bank, June 13, from New York, with 14,152 barrels cement for Atlantic Division; 14,152 barrels cement for Pacific Division.

Turrialba, June 15, from New Orleans, with 1 dredge dipper for Central Division; 106 barrels fire clay, 500 sacks bran for stock.

Santa Marta, June 15, from New York, with 1 bale rubber belting for Pacific Division; 2 crates manganese wheels for Mechanical Division; 7 cases electrical material, 15 bundles brooms for stock.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

The Cristobal bowling team won two out of three games on Saturday, June 17. The score follows:

Culebra.				Cristobal.			
Huttlemeier	101	81	99	Gibson	93	83	98
Conlon	87	73	78	Jacques	80	104	108
Dundas	89	89	68	Wheeler	83	83	87
Kersey	95	88	79	Bullard	77	87	92
Case	81	116	80	De Cora	91	97	91
Total	453	447	404		424	454	476

The 100, or over, duckpin scores for the week ending June 17 are, as follows: Huttlemeier, 110, 104, 102, 111, 116, 101, 101; Brown, 101, 100, 101; Case, 100, 106, 109, 116; Judge, 120; Mengel, 100; Silver, 109.

The Hill Magic Company, necromancers and illusionists, will be at the clubhouse on Thursday evening, June 22. Because of the length of program, this entertainment will begin promptly at 8 o'clock.

EMPIRE.

The following high scores were bowled in duckpins last week: Pinney, 107, 104, 118, 104; Dakin, 107; Rodeghiero, 111, 105, 102; Goolsby, 107, 112; Gustavson, 101, 103.

The Empire duckpin bowling team took two out of three games from the Gorgona team on Saturday, June 17, on the Empire alleys. The score was: Gorgona, 442, 433, 462; Empire, 458, 545, 453.

The Empire indoor baseball team won from the Cristobal team on Saturday, June 17, by the score of 34 to 9.

The weekly meeting of the Empire Literary Society will be held on Friday evening, June 23. The election of officers will take place.

GORGONA.

Gorgona won three games in bowling from Empire on Saturday night on the local alleys. The score follows:

Gorgona.				Empire.			
J. Orr	87	83	79	King	77	92	88
Sims	84	81	104	Nitneer	84	78	85
Haldeman	82	93	70	Pinney	96	84	86
Simka	83	87	92	Sawbelle	86	89	86
Haggerty	94	95	107	Rodeghiero	70	77	96
Total	430	439	452		413	420	441

Next Saturday night the Gorgona indoor baseball team will play the last game of the season, meeting Culebra on the local floor.

Sunday night, June 25, the monthly song and devotional services will be held at the clubhouse, at 7.30 o'clock. Mr. Safford of Camp Elliott will deliver the address. Mr. Glen Pierson will sing, and Mrs. Booz will play the piano.

GATUN.

A concert was given by a German orchestra on Tuesday evening, June 13.

Forty-five men listened to Dr. Reeder, specialist at Ancon Hospital, give a talk on "The eye and its care," on Sunday evening, June 18.

Two hundred men attended the "Vaudeville smoker" on Saturday evening, June 17. The program was, as follows: Selection, Marine orchestra; humorous recitations, H. A. Guerard; piano solo, Arthur Howard; boy from the Bowery, Wm. Everett; half-hour of magic, Prof. Galatas of Hill Magical Co.; comedy sketch, Richards and Robertson; the boy soprano, Eddie Walsh; baritone solo, S. F. Hull; patriotic selection, Marine orchestra; recitations, J. H. Silver; fancy roller skating, Jack Downey; tenor solo, G. Lowninghoener; facial expressions, H. A. Guerard; song, Camp Elliott quartet; finale, Marine orchestra.

CRISTOBAL.

Tuesday night the basketball game between the Sterner and Morton teams resulted in favor of the latter, 15 points to 16.

Sterner's team—Sterner, F., 2 goals, 11 foul goals' total 15 points; Thompson, F; Humphreys, C; Wetherbee, G; Cousineau, G.

Morton's team—Levy, F, 1 goal; Schlager, F, 4 goals; Morton, C, 2 goals, 2 fouls; McSparren, G; Herrington, G.

Saturday night the Culebra duckpin team failed to send a team to bowl, as scheduled, and three games were forfeited to the Cristobal team. The home team scored: 473, 434, 450.

The high duckpin scores for the week are, as follows: Orr, 109, 102; Hess, 106,116; Jacques, 103, 106, 100; Louch, 107, 112, 105, 101, 102, 101; Wheeler, 103, 103; Smith, 106, 108; Furlong, 112.

High scores in tenpins: Blackburn, 213; Furlong, 201; Russell, 201.

A class in catch-as-catch-can wrestling was organized on Monday night. This class will meet every Monday night. Instruction will be given in the various holds and breaks for a period of twelve weeks, after which, matches will be held for the championship of the class at the different weights.

An office men's gymnasium class will meet every Tuesday and Thursday at 5:30 p. m. The regular gymnasium class will meet every Tuesday and Thursday at 7:30 p. m. Men interested in physical instruction are urged to join one of the classes during the rainy season.

PORTO BELLO.

Thursday afternoon an indoor quoit tournament was held for the ladies of Porto Bello.

Nearly hald the members of the clubhouse are interested in chess. Twenty are now engaged in a handicap tournament. In the game being played by wireless with Culebra, twenty-four moves have been made, and the game is about even.

Rainfall from June 1 to June 17, 1911, Inclusive.

The Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago, Cuba, on both outward and homeward voyages.

The Leyland line steamer *Louisianian* sails for Tampa, Fla., via Port Limon, on or about Sunday, June 25.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursday at 11 a. m.: for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JUNE 28, 1911. No. 44.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Fuel Oil.

The Union Oil Company delivered 74,929 barrels of fuel oil to the Commission in May, the largest monthly delivery yet made. This amount, however, is only a little in excess of the February deliveries, which amounted to 72,939 barrels, the greatest amount pumped into the Commission tanks in any one month up to that time. The point of greatest increase in the oil takings for May was Gatun, where the deliveries amounted to over 18,000 barrels.

Three tank vessels are now engaged in bringing fuel oil to the Isthmus from the California fields, the *Pectan*, of 62,000 barrels capacity, and the *Oberon* and *Trinculo*, each of 45,000 barrels capacity. Two cargoes are received, on an average, each month. Most of the oil is delivered to the tank steamers from the company's storage tanks at Port Harford, but a small quantity has been shipped from Oleum, another of the company's oil ports.

The oil company has removed a part of its transisthmian pipe line to the Panama railroad relocation, and the remainder will be transferred as soon as the railroad work is far enough along. At Caimito the pipe line crosses over to a point on the present operated road, near Barbacoas bridge, a distance of about 7,000 feet. Another crossover is made from the old and new lines of railroad near the Miraflores power house, the relaid oil line following the railroad relocation from a point south of the tunnel to Paraiso Junction. The company is using some of its old pipe in this work, but much of the material is new.

Fire Protection Measures.

A 10-inch pipe has been laid from the 20-inch Rio Grande main to the high pressure reservoir on Ancon hill. It is intended for use in case of fire in Ancon, or in the city of Panama, when there is an unusual demand on the water supply in the reservoir.

Upon recommendation of the Chief of the Canal Zone Fire Department and the Superintendent of Public Works, approved by the Chairman and Chief Engineer, a chart will be prepared in the drafting office of the Pacific Division for the use of the Panama authorities, which will show the water system of the city of Panama in colors, together with the number of hose connections which may be made in the various districts of the city on the various mains. In addition, the location of all hydrants will be indicated in order that the Panama firemen may be able to make proper connections in time of fire.

Concrete Ditching.

Permanent concrete drains are being laid along the beds of small ravines and gullies at Empire, which, in the rainy season, serve to carry off storm water. A total of about 9,000 feet of concrete drainage ditch will be constructed, the work involving excavating and straightening the natural bed of the watercourses to established lines and grades, the building of suitable culverts where roads cross them, and placing concrete in the drains. This work is confined to the section in which the American quarters are situated, and is a sanitary measure, as it will obviate the necessity of removing obstructions which are constantly washing into the ditches, including dirt from cave-ins, and, in addition, will reduce the amount of grass cutting to be done. Similar ditches have been constructed at Las Cascadas, and a system of permanent drains will probably be installed at Gatun during the next dry season.

Erosion of Slopes of Culebra Cut.

Arrangements have been made to sow various kinds of grass seeds on the slopes of Culebra Cut, with a view to reducing erosion. The seed has arrived and will be planted under the direction of Mr. H. Pittier, a botanist from the Smithsonian Institution.

Canal Zone Road Building.

The concrete wagon bridge over the Mandingo River, near Bas Obispo, was completed and thrown open to traffic shortly after June 1. This terminates construction work, as far as has been planned on the wagon road, extending north and south through the Canal Zone, from Panama to Gorgona, a distance of 19.7 miles. The highway lies to the east of and parallels the Panama railroad from Panama to Pedro Miguel. Here, it crosses to the west side of the railroad relocation, and, near Paraiso Junction, crosses over again to the east side. It extends back of Gold Hill, and approaches the east bank of the Cut between Culebra and Empire, where slides have recently encroached on the right-of-way. From Empire to Gorgona, the road lies to the west of and follows the double track line of the Panama railroad. With the exception of a few hundred yards at Pedro Miguel, the road is above the proposed summit level of the water in the Gatun and Miraflores lake regions. No extension of this road to bridge the gap between Gorgona and Gatun is at present contemplated. The widths and lengths of the various sections of the road are, as follows:

SECTION.	WIDTH.	LENGTH.
	Feet.	*Feet.*
Panama to Corozal	16	17,100
Corozal to Cardenas River	16	9,020
Cardenas River to Pedro Miguel	18	18,000
Pedro Miguel to Paraiso	14	5,713
Paraiso to Empire	12	18,800
Empire to Las Cascadas	14	11,900
Las Cascadas to Mandingo River	12	6,350
Mandingo River to Gorgona	12	16,810
Total		103,693

The Marine Corps at Camp Elliott is engaged in building a road to connect the camp with the main highway. It begins at the railroad station at Bas Obispo, crosses the Mandingo River on a bridge, supported by 60-pound French and 70-pound American iron rail and joins the Zone road a short distance away. The labor and $150 worth of material are furnished by the Marine Corps, and material to the value of not to exceed $200 is to be paid for out of Canal Zone funds.

The new Empire-Chorrera road has been graded for a distance of about a mile and one-half out of Empire. The heaviest construction on the entire route is probably at the Empire end, where the roadbed has been excavated from the side of a steep hill to get over the ridge. In surmounting this ridge, the original plans provided for a six per cent grade, but to secure this grade required the building of 4,500 feet additional roadbed. It was therefore determined to shorten the route this much, the higher line adopted increasing the grade only two per cent. The old Chorrera trail enters Empire directly west of the town; the new road joins one of the streets of the settlement further to the south, and nearer the railroad. In excavating the roadbed out of the hillside, a thin layer formation of loose trap rock was encountered, requiring very little breaking up, which is being used advantageously in making the outside embankment fill on the steep hill slope, and in a rubble fill in sections where the road is over clayey ground. The method employed in making the rubble fill is to remove the earth from the roadbed, after the grading has been done for a width of 16 feet, the excavation thus formed being filled in on the sides to a depth of 10 inches, raised toward the center to form a 6-inch crown, with large pieces of rock. The material is transported to the point desired in Decauville cars, and the rubble fill will be continued until the road is extended too far from the rock supply.

The new road follows the high, well drained land of the ridges, rather than the route of the old trail, which, for much of its distance, extends over low land, boggy, and at times al-

NOTES OF PROGRESS.

(*Continued.*)

most impassable in the rainy season. Only onestream of importance is to be crossed, and, with the possible exception of this, the Mandingo River, no bridges will be required, although there are many culverts to be built. A stockade, constructed from native materials, such as thatch and cane, and surrounded by a barb wire fence, will be located at the Mandingo River crossing about midway between the Zone boundary line and Empire, in which the convicts employed in building the road will be housed. A survey is proposed for a branch road to Arraijan, and, in case it is decided to build it, the stockade will be useful, as the road will join the main line nearby.

Hostling Locomotives.

A statement of the cost of hostling locomotives at the various engine houses during March, follows:

Pedro Miguel—2,082 locomotives, 62 cranes, 124 others; unit cost $1.09.

Las Cascadas—1,628 locomotives, 60 cranes; unit cost $1.112.

Gorgona—705 locomotives, 297 cranes; unit cost $1.14.

Gamboa—607 locomotives, 1 crane, 123 others; unit cost $1.23.

Balboa—363 locomotives, 124 others; unit cost $1.29.

Caimito—200 locomotives, 30 cranes; unit cost $1.95.

Rio Grande—110 locomotives; unit cost $3.08.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is about 63 per cent completed, 141,493 cubic yards, out of a total of 225,000, having been placed at the close of work on June 24. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 19	176	7:30	2
June 20	226	8:00	2

Tug Service to Porto Bello, Nombre de Dios, and Toro Point.

Effective June 26, the following schedule will be maintained between Dock 13, Cristobal, Nombre de Dios, Porto Bello, and Toro Point.:

Tug *Reliance* will leave Dock 13 daily, except Sundays, at 7 a. m., with two barges for Nombre de Dios, returning at once with two barges to Gatun.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 9 a. m., with three barges for Porto Bello, returning to Gatun as soon as barges are loaded

Tug *Porto Bello* will leave Dock 13 Saturdays at 9 a. m., light, for Porto Bello. This tug will leave Porto Bello, light, at 2 p. m., arriving at Dock 4, Colon, in time for passengers to catch train No. 7, leaving Colon at 4.35 p. m.

Tug *Porto Bello* will leave Dock 13 Sundays at 7 p. m., for Porto Bello, returning at once.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 6.30 a. m., for Toro Point, returning at once.

Tug *Mariner* will leave Dock 13 Sundays at 9.30 a. m., for Toro Point, returning at once.

A tug will leave Dock 13 on Wednesdays, Saturdays, and Sundays, at 4.30 p. m., for Toro Point, returning at 5.30 p. m.

A tug will leave Dock 13 on the 20th of each month at 6 a. m , for Porto Bello and Nombre de Dios, returning to arrive at Dock 4, Colon, about 4.30 p. m.

CONCRETE WORK IN THE LOCKS.

Over 55 per cent of the concrete for all the locks is in place, the amount at the close of work on June 24 being 2,361,638¾ cubic yards, out of a total of approximately 4,284,400. A total of 23,587¼ cubic yards of concrete was laid in the locks during the week ending June 24.

GATUN LOCKS.

About 68 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 24, being 1,414,382¾ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending June 24, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 6 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

ORDINANCE

Providing for the Licensing of Chauffeurs for Automobiles.

Be it enacted by the Isthmian Canal Commission, as follows:

Section 1. That hereafter it shall be unlawful for any person to operate over the streets and roads of the Canal Zone any automobile without first having obtained a license as chauffeur as in this ordinance provided.

Section 2. Each person desiring to operate any automobile over the streets and roads of the Canal Zone shall first make written application to the Board of Local Inspectors of the Canal Zone, stating his nationality, age, and character of experience in the operation of automobiles, and gasoline, and electric machinery; and shall also have his application endorsed by two reputable citizens of the Canal Zone, or of the cities of Colon or Panama, Republic of Panama, vouching for his sobriety and trustworthiness. The Board of Local Inspectors shall thereupon examine the applicant touching his knowledge of gasoline and electrical motors and machinery, and of the mechanism and operation of automobiles, as well as upon his knowledge of the English or Spanish language, and upon laws and regulations of the Canal Zone relating to the operation of automobiles over the streets and roads of the Canal Zone. In order to determine the skill of any applicant, said Board may require him to make a practical demonstration thereof.

Section 3. No person shall be granted a chauffeur's license unless he is not less than eighteen years of age, is of sober habits, is able to read either the English or Spanish language, and shall prove to the satisfaction of the Board of Local Inspectors that he has the knowledge, skill, and judgment necessary for the safe and skilful driving and handling of automobiles.

Section 4. The Board of Local Inspectors shall meet at Ancon, Cristobal, or at such other points in the Canal Zone as it may designate, at such times as may be convenient to it, and shall examine applicants for licenses hereunder; and the Board shall keep a careful record of all such applications, and of its action thereon, together with any papers submitted in connection with such applications and examinations.

Section 5. Upon the completion of an examination, as herein provided for, the Board of Local Inspectors shall make a report to the Head of the Department of Civil Administration, showing whether the applicant is competent under the provisions of this ordinance to operate automobiles over Canal Zone streets and roads, and if the Board's recommendation is to the effect that the applicant is thus competent, the Head of the Department of Civil Administration shall thereupon issue to the applicant a license in form, substantially, as follows:

THE GOVERNMENT OF THE CANAL ZONE.

License to Chauffeurs.

No.........

Whereas, it has been reported to me by the Board of Local Inspectors that............ has given satisfactory evidence to said Board that he is a skilful chauffeur or operator of automobiles, and can be entrusted to perform the duties of chauffeur upon the streets and roads of the Canal Zone, he is, therefore, licensed to act as such chauffeur until such time as this license may, for cause, be revoked.

Witness my hand and seal this.......... day of..........19..

....

Head of Department of Civil Administration.

Countersigned:

....

Chairman, Board of Local Inspectors.

Section 6. Coincident with the issuance of any chauffeur's license, the Collector of Revenues, upon the direction of the Head of the Department of Civil Administration, shall deliver to the licensee a metal check or badge having stamped thereon the serial number of the licensee's license, and the words and letters "Chauffeur's license, C. Z." It shall be the duty of each person holding such chauffeur's license to wear or carry with him said check or badge when he is driving any automobile over Canal Zone streets or roads. For such badge and license, each such licensee shall pay to the Collector of Revenues one dollar ($1), same to become a part of the revenues of the Canal Zone Government. Upon the request of any Canal Zone police officer, any such licensee, while in charge of any automobile on Canal Zone streets or roads, shall exhibit such badge.

Section 7. The said chauffeur's license shall continue in force until it may be revoked for cause, as herein provided for.

Section 8. The Head of the Department of Civil Administration is hereby given the right to revoke any license hereunder issued when it shall appear to him that the holder thereof, because of drunkenness or lack of skill in operating automobiles, should not be further entrusted with the operation of automobiles over Canal Zone streets and roads.

Section 9. The term "Automobile," as herein used, shall apply to all vehicles of automobile, or similar, construction and operation.

Section 10. Any person who operates an automobile over the streets and roads of the Canal Zone without first having obtained a license as herein provided for, and without complying with any other requirements of this ordinance applicable to him, shall be guilty of a misdemeanor, and upon conviction thereof, shall be subject to a fine of not less than $25; and upon any subsequent conviction may, in addition to having such fine adjudged against him, be confined in the district jail for a period not to exceed thirty (30) days.

Enacted by the Isthmian Canal Commission at its one hundred and sixtieth meeting, April 15, 1911.
Approved by the Secretary of War, April 26, 1911.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry, by days, during the week ending June 17, follows:

DATE.	Hours worked.	Cubic Yards.
June 12	3:10	1,549
June 13	6:55	2,277
June 14	6:25	2,210
June 15	6:15	1,980
June 16	6:45	2,128
June 17	7:15	2,891
Total	36:45	13,035

At a recent meeting of the Board of Governors of the Colon Club it was decided to discontinue dances during July and August. The next dance will, therefore, be held on the first Saturday in September.

EXECUTIVE ORDER.

Distillation Tax Effective August 13.

By virtue of the authority vested in me, the Order of May 13, 1911, providing for the collection of a distillation tax in the Canal Zone, is hereby amended so as to be effective August 13, 1911.

WM. H. TAFT.

THE WHITE HOUSE,
June 12, 1911.

[No. 1372.]

Unauthorized Subscription for K. of P.

To Whom it May Concern:

Subscription lists are being circulated in the Canal Zone purporting to be under the auspices of the order of Knights of Pythias and another organization.

Members of the order, and the public generally, are hereby advised that no subscription lists under the auspices of the Knights of Pythias have been authorized by competent authority, and any such lists bearing the name of the order do so illegally.

All concerned will govern themselves accordingly.

A. M. WARNER,
District Deputy Supreme Chancellor.

LAS CASCADAS, June 24, 1911.

Pilots, Masters, Mates, and Engineers.

A meeting of the Board of Local Inspectors will be held on Wednesday, July 5, at 8 a. m., at the Administration Building, Ancon, at which time applicants for licenses as pilots, masters, mates, or engineers, who have submitted applications on the prescribed form, may appear for examination.

Missing Men.

The American Legation in Panama requests information regarding the whereabouts of William McCulloch, employed on the Canal work until March 25, 1910, and Guy L. Disler of Lansing, Mich., who has not been heard from since October, 1910.

Information is requested by the American consulate in Panama regarding the whereabouts of Joseph H. F. Smith of Brooklyn, employed as a boilermaker at Gorgona shops up to April 15, 1911.

Any one having information regarding the whereabouts of Geo. Barlow, who left the service of the Isthmian Canal Commission in 1907, is requested to communicate with THE CANAL RECORD.

Any one having information regarding the whereabouts of William McFarland, who is supposed to be on the Isthmus, is requested to communicate with Dan. St. Clair, Gatun.

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the two weeks ending June 24, follows:

DATE.	Hours worked.	Cubic Yards.
June 12	5:37	2,734
June 13	5:28	2,597
June 14	5:05	2,486
June 15	4:08	2,055
June 16	5:43	2,581
June 17	5:56	2,703
Total	31:57	15,156

DATE.	Hours worked.	Cubic Yards.
June 19	4:37	2,153

June 21	3:30	1,639
June 22	4:46	1,984
June 23	4:15	1,928
June 24	4:40	2,251
Total	26:35	11,979

SOCIAL LIFE OF THE ZONE.

Church Notes.

A series of free lectures for the people of Colon are in progress in the schoolroom of Christ Church parochial school. At the first lecture, the speakers were the Rev. Edward J. Cooper, and Dr. M. E. Connor, health officer in Colon and Cristobal, who spoke on tuberculosis, the nature of the disease, preventive measures to be used, and the care of those already affected. The lantern slides, which were to be shown in connection with this lecture, were not exhibited, owing to the lack of electric current sufficiently strong for the lamp. It has been arranged, however, to have the current supplied from the Canal Commission wires, and in future, these educational lectures will be illustrated. They will be given monthly in the schoolroom at the corner of Cash and D streets. The date set for the second series of lectures is June 29. Dr. M. E. Conner will be one of the speakers, and there will be a program of music in addition to the addresses.

The dime savings bank in connection with Christ Church, Colon, has 200 depositors, and the funds in the bank have reached the sum of $750. Deposits are made in sums from one cent to one dollar. The object of the institution is to encourage thrift among the West Indian people. The bank has been opened about six months.

There will be a special service at Christ Church, Colon, on July 4, at 9 a. m., at which time the rector, the Rev. E. J. Cooper, will deliver an address.

Anti-Cigarette League Anniversary.

The senior section of the Boys' Anti-Cigarette League, Gorgona, celebrated its second anniversary at the home of the section superintendent, Mrs. A. L. Hackenberg, on Wednesday evening, June 21. A program was given, consisting of songs and quartets by LaRock, Otis, Ward, Burns, and Henter; a violin solo by Henter; a recitation by Grow; selections by the league orchestra, and choruses.

High School Commencement.

On Sunday, June 25, exercises in connection with the first commencement of the Canal Zone high school were held in the Commission clubhouse, Gatun, when Chief Justice Gudger, of the Canal Zone Supreme Court, delivered an address to the graduates. Others taking part in the exercises were the Rev. Mr. Purdy, Commission chaplain, and the choir of the Gatun Christian League. The commencement exercises will be held in the clubhouse on Friday evening, June 30, at 8 o'clock. The program is, as follows: Selection by orchestra; chorus, "Oh, Italia, Italia, beloved," by the high school; selection by orchestra; address by Mr. Maurice H. Thatcher; Selection by orchestra; history thesis by Miss B. Marguerite Stevens; violin solo by Miss Maria Elise Johnson; quartet by high school girls; presentation of diplomas by the principal of the high school, Mr. C. C. Carr; music by the school, accompanied by the orchestra.

The graduates are Miss Blanche Marguerite Stevens of Gorgona, and Miss Maria Elise Johnson of Gatun, the latter having completed her four years' work in the school.

There are 50 students in the high school. The junior class has eight members. In order to accommodate a small number of students at the Pacific end of the line, a freshman class was opened in the Ancon school in 1910. The class will pass to the Gatun school in October.

The spring number of *The Zonian*, the high school paper, has been received, and is on sale in the Canal Zone, Colon, and Panama.

A special train for the commencement exercises will leave Panama at 6 o'clock, and returning, will leave Gatun at 10.30 p. m.

Marine Minstrel Show on July 3.

A special train will be run on the night of July 3 to carry people from along the line of the Canal to the minstrel show, which the men of the Marine Corps, stationed at Camp Elliott, will give at the National Theatre in Panama. Tickets to the show will be good for transportation on this train. The schedule follows:

Leave	P. M.	Leave	P. M.
Colon	6.00	Bas Obispo	7.14
Mount Hope	6.05	Las Cascadas	7.20
Mindi	6.10	Empire	7.25
Gatun	6.18	Culebra	7.30
Bohio	6.36	Paraiso Junction	7.39
Frijoles	6.42	Pedro Miguel	7.41
Tabernilla	6.48	Miraflores	7.46
San Pablo	6.53	Corozal	7.53
Gorgona	7.04	Camp Diablo	7.55
Matachin	7.09	Panama (Arrive)	8.00

Returning, the special train will leave Panama thirty minutes after last curtain fall of the show.

Steam Shovel Men's Ball.

A benefit ball will be given by the Associated Union of Steam Shovel Men on July 1, 1911, at the Tivoli Hotel. A special train will leave Colon at 6.15, making regular stops. The return trip will be made on the passenger train scheduled to leave Panama at 12.01 a. m., July 2.

Public Installation and Dance of K. of P.

On Monday evening, July 3, Balboa Lodge, No. 4, Knights of Pythias of Las Cascadas, will hold a public installation of officers in the Commission lodge hall. Following the installation ceremonies, there will be an entertainment and dance. All Pythians, their families and friends are invited to attend. The committees are: Arrangements—J. M Wilkins, Jr., H. P. Williams, John A. Mitchell. Refreshments—David U. Scribner, J. H. Hughes, J. E. Martin.

Rifle Match.

A match at the Gamboa rifle range on June 18, between the Canal Zone Rifle Club, and the Marine Corps, was won by the former, by the following score:

CANAL ZONE RIFLE TEAM.

	200 Yds.	300 Yds.	500 Yds.	600 Yds.	Total.
Kane	43	44	48	45	180
Walraven	43	43	46	45	177
Gill	42	43	45	44	174
Blaisdell	42	42	44	45	173
Total					704

U. S. MARINE TEAM.

	200 Yds.	300 Yds.	500 Yds.	600 Yds.	Total.
Bleicher	43	42	44	45	174
Brong	41	40	42	44	172
Meginess	42	41	42	45	170
Descer	40	42	40	46	168
Total					684

Lawn Tennis.

The singles tournament preliminary to the Fourth of July tournament was held June 25 on courts of the Ancon, Tivoli, and Panama clubs. There were thirty-six entries, making this the greatest tournament in singles ever held in the Zone. Mr. Fechtig of Tivoli club won through the semifinals. Dr. Ross of Ancon, and Mr. Tupper of Culebra, who won through the third round, will play the semifinals on July 2, and the winner will play Mr. Fechtig in the finals at Cristobal on July 4. An interesting match is expected. The doubles preliminary to the Fourth of July will be held on July 2 on courts of Panama and Tivoli clubs.

Physical Examination of Silver Employes.

It has been determined, upon further consideration, that the inconveniences which would result from the physical examination of silver employes outweigh the advantages. The proposed system of examination will, consequently, be abandoned.

PERSONAL.

Major Edgar Jadwin, Corps of Engineers, U. S. A., resident engineer at Cristobal, left on the *Turrialba* on June 22 for the States. At the expiration of his leave of absence he will be assigned to duty there.

Captain Horton W. Stickle, Corps of Engineers, U. S. A., assistant engineer at Porto Bello, accompanied by Mrs. Stickle, will leave for the States on the *Abangarez* on June 29. Upon the expiration of his leave he will take charge of the U. S. engineer work at Wilmington, N. C.

Among the passengers on the *Allianca*, which arrived at Cristobal on June 23, were Quartermaster General, U. S. A., James B. Aleshire and family, Mrs. Geo. W. Goethals, and Captain Geo. B. Pillsbury, Engineer Corps, U. S. A.

Misdirected Letters.

ANCON, C. Z., June 29, 1911.

FOUND—Opposite the Division Engineer's office at Corozal, one pair of gold rimmed eye glasses. Owner should apply to Mr. F. Rawley, Corozal.

CANAL LEGISLATION.

Bills Introduced Providing for Operation of Canal and the Government of the Zone.

Two bills have been introduced in the House of Representatives providing for the operation of the Panama Canal, and for other purposes. One of them (H. R. 8664) was introduced on May 4 by Representative Mann of the minority, and the second (H. R. 11587) on June 13 by Mr. Adamson, chairman of the committee on Interstate and Foreign Commerce.

The bill introduced by Mr. Mann provides for tolls for the use of the Canal to be based upon registered, displacement, cargo, or other tonnage, not to exceed one dollar and fifty cents per net ton, based upon registered tonnage, nor be less (other than for vessels of the United States or its citizens, and vessels of the Republic of Panama) than fifty cents per net ton. It is provided

"That in fixing the charges for the use of the Canal, the President may prescribe that any vessel engaged in the coastwise trade of the United States, which is owned in whole or in part by any railroad company, or which is owned by any company the stock of which is owned in whole or in part by any railroad company, or which is controlled directly or indirectly by any railroad company, shall pay the highest charges prescribed for any vessel, and that the determination of the question of fact in each case shall be made in such manner, and by such person or persons, as the President may, by general or specific order, require: *And provided further*, That the foregoing proviso shall not apply to the Panama Railroad Company or vessels owned by it."

The measure proposed by Mr. Adamson provides for a maximum charge of $1.25 per ton, based upon registered tonnage, and provides further:

"That any vessel owned in whole or in part by any railroad company, or by any company the stock of which is owned in whole or in part by any railroad company, or which is controlled directly or indirectly by any railroad company, or has any director in common with any railroad company, shall pay double the usual charges prescribed for any vessel, and that the determination of the question of fact in each case shall be made in such manner, and by such person or persons, as the President may by order direct: *Provided further*, That the foregoing proviso shall not apply to the Panama Railroad Company or vessels owned by it: *Provided further*, That, under regulations prescribed by the President, a vessel without cargo paying toll going through the Canal shall, on its return trip through the Canal, laden with cargo, be entitled to receive a rebate of fifty per centum of the tolls just previously paid going through in the opposite direction without cargo."

Both of the bills contain provisions for the establishment and maintenance by the Government of drydocks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary appurtenances for the purpose of supplying coal and other materials, labor, repairs, and supplies to passing vessels. The Adamson bill also provides:

"That the President is hereby authorized to acquire by purchase as rapidly as possible at reasonable prices, the title and rights of private landholders and owners of private lands in the Canal Zone, so as to extinguish all private and individual title and rights and claims to land as far as possible in the Zone, and vest in the United States, for Canal purposes, all the land comprised in the Canal Zone."

Mr. Mann has also introduced a bill (H. R 8663) providing for the government of the Canal Zone, and the construction and operation of the Canal under a director to be appointed by the President with the consent of the Senate, and to be removable by the President at his pleasure. It also provides that the judicial power in the Canal Zone be vested in a circuit court under the Supreme Court of the United States; that a trial by jury be given in all cases where a felony is charged, and that the extradition laws and treaties of the United States be extended to the Canal Zone. The provision for tolls is also made a part of this bill.

Canal Medal List Corrections.

The following corrections and changes have been made in the third service, or 1910, Canal medal and bar lists:

I. C. C. MEDAL LIST—1908.

Kirby, Edward, January 1, change to Weber, Edwin L.
Foust, Samuel M., February 5, omit, appears under March 5.
Hauschild, Fernand, W. F., March 1, add to list
Howard, George E. L., March 3, omit from list.
Giles, Jessie H., March 14, change to Giles, Jesse H.
McKeever, Barnard E., March 14, change to McKeever, Bernard E.
Kelley, Martin J., April 3, change to Kelly, Martin J.
Frahn, August, April 22, change to Frahm, August.
Dickinson, Thomas, May 13, add to list.
Moore, Charles G., May 16, add to list.
Macfarlane, James, May 19, add to list.
Clayborn, Norl C., June 7, change to Claybourn, Noel C., June 2.
Cornwell, Varney T., June 12, change to March 3.
Allen, Sydney G., June 19, change to Allen, Sidney G.
Goddum, William, July 7, change to Gaddum, William J.
Coit, John J., July 11, change to Thull, Paul J.
Mullane, Dennis E., July 18, change to Mullane, Denis E.
Polson, Thomas, August 1, change to March 3.
Balling, Frank J., August 17, omit from list.
Gage, Genevieve, August 17, change to April 27.
Hodges, Hugh F., August 17, change to Hodges, Hugh H.
Keppell, Marian J., August 18, change to Keppell, Marion J.
O'Neil, John J., September 2, change to O'Neill, John J.
Speicher, Maude L., September 2, add to list.
Thompson, Drayton, September 2, add to list.
Walling, Loring A., September 15, change to Walling, Loren A.
Sapusnik, Leon, September 17, add to list.
Covelski, Joseph P., September 18, change to Coveleski, Joseph P.
Patheier, John A., September 29, add to list.
Bliss, Gertrude, October 1, change to Hoffman, Gertrude B.
Scheitzer, William F., October 11, change to Scheltzer, William F.
Olson, Edvart J., October 28, change to Olsen, Edvart J.
Eggleston, J. Allan, November 4, add to list.
Voight, Albert D., December 3, change to Voigt, Albert D.

I. C. C. BAR LIST—1910—(FIRST.)

Anger, George F., February 11, omit from list.
Smith, Peter, February 24, omit from list.
Hofman, Otto W., March 22, change to Hofmann, Otto W.
Reeder, Dennis F., April 8, change to Reeder, Dinnis F.
Payne, Burd F., May 21, change to Payne, Burd W.
Drennan, Nelle, September 17, omit from list.
Bryant, Edward J., December 5, omit from list.

I. C. C. BAR LIST—1910—(SECOND.)

Tenny, Mark W., June 2, change to June 8.
Rerdell, M. C., August 9, change to August 16.
Leonard, Harry, October 17, omit from list.

P. R. R. MEDAL LIST.

Gross, J. J., January 13, change to Gross, T. J.
Beverly, May, March 1, change to Beverley, May.
Pierce, E. F., May 24, change to Peirce, E. F.
Pierce, R. T. B., May 24, change to Peirce, R. T. B.
Britten, Cyrus C., October 13, add to list.
Akins, C. C., November 21, change to February 3.

In the bar list published in THE CANAL RECORD of May 3, twelve names were printed with the date of service as May, instead of June. These should be: Randall, Ortez G.; Underhill, Percy H.; Wolverton, David R.; Wuerz, Robert; Young, Thomas H.—June 9; Leonard McLean—June 13; Matthew Wilson.—June 14; Gorham, Frederick L.; Jury, Frank J.; Loulan, James A.; Richmond, John; Robinson, R. R.—June 15.

Spanish War Veterans.

A special recruiting meeting of Chagres Camp, No. 2, United Spanish War Veterans, will be held in the I. C. C. lodge hall at Gorgona, C. Z., July 2, at 5.30 p. m.

Postal Business and Canal Zone Revenues.

The report of the Director of Posts for the month of May shows that 16,564 money orders were issued, amounting to $390,330.20. Of this amount $292,031.59 was issued payable in the United States, $97,895.91 in the Canal Zone, $355.70 in Martinique, and $47 in Costa Rica. The fees collected amounted to $1,757.63, and the amont of orders paid and repaid was $119,774.58.

Postal sales during the month amounted to $6,255.78, and newspaper postage to 45 cents.

The revenue collections for the month were, as follows:

Distillation licenses	$343.25
Insurance companies' fees	.71
Motor vehicle licenses	48.00
Taxes, licenses, etc.	9,969.05
Miscellaneous collections	6.40
Total	$10,367.41

Obituary.

The death of Captain Edwin Hammond of the Panama railroad steamship *Colon* occurred at a Philadelphia hospital on May 22, 1911, after a short illness. The funeral services were held at Philadelphia on May 23, and his body was cremated in accordance with a wish expressed before he died. A widow and one child survive him. Captain Hammond was born in Boston on July 25, 1870, and from 1884 to 1891 was employed as sailor on ships of various companies. From August, 1891, to September, 1896, he served as quartermaster, third, and second officer, successively, on the Pacific Mail Steamship Company's vessel *Costa Rica*, and from November, 1897, to May, 1898, with the exception of two months, when he was detailed for land duty on the Isthmus, he was quartermaster of the *Allianca*. Later, he was promoted to third, then to second, and, on April 12, 1901, to first officer of that ship. On December 20, 1901, he was reported by Captain Phillips of the *Advance* as "displaying coolness, nerve, and good seamanship in rescuing the crew of the schooner *Edward W. Young*," and, on the strength of this report, he was commended by the company. On August 21, 1902, he was appointed commander of the *Advance*, replacing Captain Phillips, lost at sea, and, on February 23, 1903, on account of the laying up of the *Advance*, was temporarily first officer of the *Allianca*. On July 21, 1905, he was reappointed commander of the *Advance*; in July, 1909, he was appointed commander of the *Allianca*; and, on September 15, 1909, he was placed in charge of the *Colon*.

Robert Mealey of Ogdensburg, N. Y., aged 46 years, employed as a powderman in Culebra Cut in 1907 and 1908, was killed in a blasting accident at Oruro in Bolivia, a few weeks ago. The contractors for whom he was working would like to know the whereabouts of his relatives.

The death of L. R. Dennis, an American, employed in the Atlantic Division, living at Mamei, occurred at Colon Hospital on Tuesday, June 20, of hæmoglobinuric fever. He was a native of Norwich, Connecticut, 41 years of age, and had been on the Isthmus seven years. A wife and five children survive him.

Unloaders in May.

The following statement shows the number of Lidgerwood cars unloaded by the Central Division during the month of May:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	3	984	19,680
Miraflores	3	737	14,740
Gamboa	4	992	20,827
Total	10	2,713	55,247

FOURTH OF JULY.

Outline of Program for Celebration at Cristobal—Conditions of Free Transportation.

The program for the observance of Independence Day at Cristobal on July 4 is, as follows:

MORNING.

Athletic events on Roosevelt avenue, 9 a. m. to 1 p. m. Twenty-two events are scheduled, eight of which will be laughable contests, and the remainder, standard events. Cash prizes, except in contested events, will be paid on July 4. The I. C. C. Band will play at the athletic games.

Baseball game at Colon park at 10 a. m. The Marine Band will play.

AFTERNOON.

Patriotic exercises in the Court of Honor on Roosevelt avenue, 1.15 to 2 o'clock. Program is, as follows:

Flag raising by Boy Scouts.
Introduction by presiding officer, Maj. Henry A. Brown.
Reading Declaration of Independence, Chief Justice Gudger, Canal Zone Supreme Court.
Address, Chairman and Chief Engineer, Col. Geo. W. Goethals.
National airs sung by school children, accompanied by I. C. C. Band.
"Flag of the free," Canal Zone high school.

Fire department drill, 2 to 3.30 o'clock.

Aquatic sports, 2 to 5 o'clock. The Marine Band will play.

Fire department ladder exhibition, 6 o'clock.

Band concert by the I. C. C. Band, 6 to 7 o'clock.

NIGHT.

Fireworks, Marine Band concert, 8 to 9 o'clock.

Dance at the Lincoln House, 9 o'clock.

TRANSPORTATION.

The following rules for the use of free transportation should be read carefully by all intending to take part in the celebration:

Passes are good for one person only, and an employe must obtain from the chief clerk of his department or division an additional pass for each member of his family who desires to ride free. These passes are good only from Panama, or any intermediate station, to Cristobal and return, transportation thereon southward being furnished only when Cristobal is the initial station. In other words, they are not good for transportation on southbound trains starting at any point other than Cristobal, and they will not be good on southbound trains unless they have been first punched, showing that they have been used for transportation to the Fourth of July celebration at Cristobal from some point along the line. The regular rates of transportation will be charged and collected for all other transportation than that covered by the special ticket, except that regular tickets, card, and trip passes over the Panama railroad will be honored on all trains on the Fourth of July, as on other days.

A light lunch will be served on dock No. 11 between 11 a. m. and 2 p. m. Drinking fountains will be installed at various points in Cristobal. Shelter will be provided, so that the races in the bay may be witnessed even if there is rain. Retiring rooms for ladies will be arranged for in the old DeLesseps' house at Cristobal Point, and the public school building, near the Commission clubhouse. Dressing rooms for the athletes will be arranged in building No. 1 on Cristobal Point.

The chairman of the finance committee reports that subscriptions are coming in from Canal employes rather slowly for the Fourth of July celebration. The committee was pleased to receive, during the past week, a number of contributions from residents of Panama and Colon, among them a subscription of one hundred dollars from President Arosemena of the Republic of Panama, which the President forwarded with an expression of his interest in Canal employes, and the celebration which will be held on the Fourth of July.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

The Culebra indoor baseball team defeated the Gorgona team on the local floor on Saturday night, 21 to 2. The batteries for Culebra were Tupper and Cushing; for Gorgona, Weiser and Christiansen, pitchers, and Ridge, catcher. Tupper struck out 18 men and allowed only five hits. This was the last game of the season, and the first Gorgona has lost. The standing of the teams at the close of the season follows:

	Won	Lost	Percentage
Gorgona	9	1	.900
Culebra	8	2	.800
Empire	6	4	.600
Gatun	3	7	.300
Cristobal	2	8	.200
Corozal	2	8	.200

CULEBRA.

The high duckpin scores last week were, as follows: Huttelmeier, 104, 108, 104, 100, 101, 108; Mengel, 118; Silver, 110; Kennedy, 101; Helper, 106.

The afternoon gymnasium class which meets Mondays and Thursdays at 5.15 is well attended. More members are invited to join. An evening gymnasium class will be started for the purpose of carrying on apparatus work, tumbling, basketball, and exercise of a heavier nature.

EMPIRE.

The Cristobal duckpin bowling team took two out of three games from the Empire team on Saturday evening, June 24.

At a meeting of the Empire Literary and Debating Society held on Friday, June 23, the following officers were elected to serve six months beginning July 1: President, A. L. Zacharias; vice-president, H. W. Sawtelle; secretary-treasurer, H. W. Dorhmann; executive committee, O. Harlan and A. B. Dickson; program committee, F. W. Conner and Mark A. Hall; membership committee, W. G. Ross and O. King.

Forty new books have been added to the library, including some late fiction.

All those wishing to enter the handicap pool tournament for July will hand their names to manager of the pool room, or to the office. The tournament will begin on July 5.

A meeting of the old gymnasium class members, and those interested in the coming gymnasium work was held on Monday evening, June 26. Medals were presented to Charles Feurtado, G. R. Adams, F. Lang M. W. Jones, R. A. Koperski, and Mark A. Hall.

GORGONA.

The bowling match scheduled with Gatun on Gorgona alleys for last Saturday was postponed until July 1, when Gorgona will send a team to Gatun.

The high duckpin scores for the week ending June 24 were, as follows: J. Orr, 108; Haggerty, 107; Davis, 105; Sims, 101, 112, 104. High scores in tenpins: Weigold, 208; Bordt, 205; Stoehr, 202; Roper, 200.

The wrestling class has been temporarily disbanded, as a number of the wrestlers are training for the Fourth of July meet. The class will be reorganized after that date.

GATUN.

At a meeting of the literary club on Wednesday, June 21, M. S. Fox upheld the affirmative and R. M. Gamble the negative, in a debate on the subject, "Resolved, that the right of suffrage should be granted the women of the United States." Others taking part in the discussion were Messrs. Cotton, Smith, Wood, and Hill. A selection from Eugene Field was given by F. G. Smith. The club has accepted the challenge of the Cristobal literary club to debate the subject, "Resolved, that the railroads of the United States should be owned and operated by the Federal Government." Each club will be represented by six men, three of whom will debate at home and three away from home, taking opposite sides of the question. A general discussion on the subject will take place at the meeting of the Gatun club on Wednesday evening, June 28. A committee, composed of Messrs. Chatfield, Smith, and Shafer, will select the men to represent Gatun.

The executive council met on Friday evening, June 23. Reports of various chairmen of committees show the clubhouse to be in a flourishing condition. The membership on June 1 was 382.

Members interested in basketball met on Tuesday night, June 27, and organized a local league. Fred. Huber, chairman of athletics, will have charge.

Among those entered from Gatun for the Fourth of July meet are Shortt, Chatfield, Ottman, Mitchell, Hooker, Lincoln, Garrison, Billett, Porter, Ketalik, Jadwin, Bailey, and Cooling.

One hundred new books, mostly fiction, have been added to the library. More will be purchased in the near future.

Dr. Orenstein gave a sex talk on Sunday night, June 25. Seventy men were present.

CRISTOBAL.

The basketball games on Tuesday and Thursday night resulted as follows:

Tuesday—Sterner vs. Kavan, score 23 to 16 in favor of Sterner's team. Sterner, 2 goals, 7 foul goals; Thompson 4 goals; Frostrom, 1 goal; Wetherbee, 1 goal; Levy; Kavan, 4 goals; Ford, 2 goals; Guptil, 2 goals, 1 free throw; Simons, 1 goal, 1 free throw; Cousineau.

Thursday—Sterner vs. Luce, score, 24 to 12 in favor of Luce's team. Sterner, 1 goal, 9 free throws, 1 point awarded on foul; Thompson; Frostrom; Wetherbee; Levy. Luce, 5 goals, 5 free throws; Thomas; Jordan, 3 goals; Simons, 1 goal; Schwallenberg; Polson in place of Simons during second half.

The Wednesday night literary and debating club met, and the topic discussed was "Socialism." This week, the debate will be, "Resolved, that the Government should own and operate the railroads." Affirmative, Messrs. Chambers and Yeiser; negative, Messrs. Richards and Ware.

Thursday night, the anniversary banquet will be held at Cristobal hotel at 8 p. m. The occasion celebrates the fourth year this clubhouse has been open.

Empire took two games of duckpins from Cristobal on Saturday night with the following scores:

Empire.				Cristobal.			
Gustavson	89	101	96	Smith	92	88	94
Potter	107	102	91	Jacques	83	82	82
Gorham	81	83	94	DeCora	88	91	76

OFFICIAL CIRCULARS.

Consumption of Lubricating Oils.

CULEBRA, C. Z., JUNE 20, 1911.

CIRCULAR No. 290-C:

In order to obtain an accurate record of the consumption of lubricating oils, etc., on each item of equipment of the Isthmian Canal Commission and Panama Railroad Company, a "Lubricant request" (Form C. E. 303) has been provided, a suitable supply of which should be secured from the Depot Quartermaster on requisition in the usual manner. For convenient use, the form is bound in pads of 100.

In all cases where lubricants are desired for any piece of equipment, the engineer or other employe in charge of the operation of such equipment must fill out one copy of this form, sign it, and present it to a lubricating oil supply station, where the oil requested will be furnished, the date and place of filling request inserted in the spaces provided, and the form retained on file at the supply station.

The approved allowances of lubricating oils and other conditions in respect to the issue of lubricating oils will be observed in the use of this form. To prevent any delay or inconvenience in the use of this form a supply of same will be maintained at all lubricating oil supply stations, in addition to those supplied to engineers, etc., in charge of equipment, who, alone, shall be permitted to sign "Lubricant request."

At the end of each month the requests filled shall be used in compiling report on Forms C. E. 273-a and 273-b of lubricating oil consumed on each item of equipment.

No lubricants shall be issued from the different oil supply stations except on properly filled out "Lubricant request."

Suitable supply of this form should be secured at once and place in use without delay. A sample copy of same is enclosed herewith.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Wrong Use of the Penalty Envelope.

DEPARTMENT OF CIVIL ADMINISTRATION.
DIVISION OF POSTS, CUSTOMS, AND REVENUES.
ANCON C. Z., June 26, 1911.

The attention of the public, and especially the officials of the United States Government on the Isthmus, is invited to the wrong use of the penalty envelope in official correspondence carried on by officers of the Government of the Canal Zone with foreign postal administrations. In order that situations, not only embarrassing to the writers in the Canal Zone, but also to foreign postal administrations, may not arise, attention is called to provision of the postal laws covering this situation, as follows:

"*Matter entitled to admission to the international mails free of postage.*—The following articles are entitled to transmission in international mails free of postage, viz.: Official correspondence exchanged between postal administrations, between these administrations and the international bureau, and between the exchange offices of different countries, as well as correspondence concerning prisoners of war, and for or from them without regard to the locality of the prisoners or the manner in which the correspondence is transmitted. Postage upon all other articles can be prepaid only by means of postage stamps. The reply half of a double postal card, bearing a postage stamp of the country which issued the double card, is to be considered as prepaid."

TOM. M. COOKE, *Director of Posts.*

Family Quarters.

Applications for married quarters were on file on June 1, as follows:

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending June 24:

Colon, June 18, from New York, with 22 dredge buckets, 9 packages launch parts for Atlantic Division; 43 barrels alcohol for Sanitary Department; 8 cases fire hose for Department Civil Administration; 3 cases tinware, 20 cases picks, 10 cases stove parts, 4 cases agate pitchers, 32 incandescent lamps, 34 barrels rosin for stock; and a miscellaneous cargo, the whole consisting of 230 packages, weighing 65 tons.

Euxenia, June 20, from New York, with 15,230 barrels cement for Atlantic Division; 15,230 barrels cement for Pacific Division.

Metapan, June 22, from New York, with 100 coils Manila rope, 540 pices black rope, 135 coils wire rope, 14 bundles brooms for stock.

Abangarez, June 22, from New Orleans, with 25 cases cold shuts for Central Division; 10,826 feet white oak lumber for Mechanical Division; 3,530 bales hay for stock.

Allionco, June 23, from New York, with 7 cases dredging sleeves for Atlantic Division; one cement gun and appurtenances for Central Division; 40 cases gauze, 90 kegs green soap for Sanitary Department; 1 case auto fire alarm apparatus for Mechanical Division; 14 cases tent flies, 12 cases waiters' trays, 40 cases insect exterminator, 6 cases mattress ticking, 8 cases Gem clips, 4 casks crockery for stock; and a miscellaneous cargo, the whole consisting of 365 packages, weighing 89 tons.

Sale of Buildings.

OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., June 22, 1911

Sealed proposals will be received at this office until 3 p. m., Thursday, July 6, 1911, and then opened, for the sale, either one or both, on the ground as they stand, of the residence and store buildings at present occupied by Mr. J. L. Kerr, and situated on lots Nos. 356 and 358, city of Colon.

The successful bidder to remove said buildings from their present location within twenty days' time after notification that bid has been accepted.

Envelopes containing proposals should be endorsed "Proposals for the purchase of buildings," and addressed to J. A. Smith, General Superintendent, Panama railroad, Cristobal, C. Z.

The Panama Railroad Company reserves the right to reject any or all bids.

J. A. SMITH, *General Superintendent.*

Married.

ADAMS-HUDELSON—On May 18, 1911, in Gooding, Idaho, Mary Helen Hudelson of Gooding, to Roger H. Adams of Quitman, Miss. Canal Zone residence, Culebra.

The following vessels arrived at or departed from the port of Balboa during the week ending June 24:

Arrivals—June 19, *Montaro*, from Callao; June 20, *City of Panama*, from San Francisco; June 21, *Quito*, from Guayaquil; *Paleno*, from Valparaiso; June 24, *Peru*, from Guayaquil; *Mackinow*, from San Francisco.

Departures—June 19, *Mexico*, to Valparaiso; June 20, *San Juan*, to San Francisco; *Chile*, to Guayaquil; June 21, *Stanley Dollar*, to San Francisco; June 23, *Manavi*, to Buenaventura.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line; the Panama Railroad Company's dates being subject to changes.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago de Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on July 12, and August 9; and for Port Limon at 5 p. m. on July 12, July 26, and August 9.

The Leyland line steamer *Mexican* sails for New Orleans direct, on or about Wednesday, July 5.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JULY 5, 1911. No. 45.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Central Division Excavation.

The excavation in the Central Division in June was 1,433,304 cubic yards, which makes the total for the fiscal year 18,479,642 cubic yards, the largest fiscal year excavation on record, exceeding the best previous, that of 1909, by 37,018 cubic yards. This total includes Culebra Cut, concerning which, an article is published elsewhere in this issue, and the Chagres River section, where the bulk of the work was ended in March, and in which there has been but little done to swell the yardage during the past three months. At present, there are only two pieces of work in progress in this section, viz., where contractors are excavating at Gorgona and Bohio, the total for the former place in June being 11,216 cubic yards, and for the latter, 21,072 yards.

New Filtration Plant at Gatun.

The new filtration plant for the Agua Clara water works at Gatun is completed, with the exception of the exterior and interior stairways and a small amount of work remaining to be done on the sedimentation basin, and the installation of the piping system. The latter has been purchased in the States, and will probably be delivered on the Isthmus within the next thirty or forty days.

The filter building is of reinforced concrete, 41 by 54 feet in size, and three stories high. On the first floor will be located the controllers and the general pipe system; the second floor supports the valve stands for controlling the piping system, filter tables, and gives access to the tops of the filters. The third floor provides storage room for the aluminum sulphate supply. The concrete work is approximately 95 per cent completed. The contract for most of the piping, controllers, and regulators, and loss of head gages, air compressors, and hydraulic valves, was awarded to the American Water Softening Company.

During the time which will elapse before the plant will be ready for operation, a small experimental filter will be set up at the Mount Hope pump station, adjacent to the sedimentation basin at that place. Water from this basin will be used in the experimental filter for the purpose of determining the grade of sand most suitable for the filter beds in the new filter plant at Gatun. as well as for the pressure filters at Mount Hope. Chamé sand, Porto Bello sand, and a much coarser and sharper grade of sand from the vicinity of Chorrera will be experimented with.

In addition to the filtration plant at Gatun, a laboratory building of reinforced concrete, having a floor plan of approximately 20 by 20 feet will be erected for conducting analyses of water to determine the amount of aluminum sulphate to be used in connection with the water supply for both the Agua Clara and the Brazos Brook reservoirs.

846 Tons of Dynamite in Single Shipment.

The largest cargo of dynamite ever brought to the Isthmus on one vessel was unloaded from the Munson Line steamship *Alm*, which arrived at dock No. 14, Cristobal, on June 27. The shipment consisted of 29,363 cases, the contents of which aggregated 1,691,191 pounds, equivalent to about 846 tons, and was applied on the requisition for explosives placed in the United States for the fiscal year ending June 30, 1911. The shipment, divided into its various classes, is given below:

KIND.	No. Cases.	Pounds.
60 per cent saltpetre dynamite...	8,105	676,191
45 per cent saltpetre dynamite...	3,758	
60 per cent Atlas dynamite......	8,000	464,000
45 per cent Atlas dynamite......	9,500	551,000
Total........................	29,363	1.691,191

Freeing Cocoli Lake of Chlorine.

The chlorine content in Cocoli Lake, caused by salty water leaking through a toe of the west dam at Miraflores, has been reduced since early in April, when an analysis showed 1,950 parts of chlorine to a million parts of water. On May 3, an analysis showed 480 parts of chlorine to a million of water, both at the lake surface and at the intake, which is 10 feet below the surface, while at the Ancon filter, after the lake water had become mixed with the flow from the Rio Grande reservoir the content was 180. A late analysis, that of June 24, showed but 220 parts to the million on the lake surface and at the intake, and only 120 parts at Ancon filter.

An 8-inch, motor-driven centrifugal pump was installed on the bank of the lake in April to remove as much as possible of the salty water. It was operated with good results, but when the break occurred in the temporary spillway in the Miraflores dam on May 24, the pump was removed to the lock site to assist in freeing the pit of the flood water. It is now proposed to install at Cocoli Lake, in place of this pump, one of the four 20-inch dredge pumps, purchased for use in connection with hydraulic operations, and thus hasten the work of ridding the lake of its chlorine content. The pump will probably be ready for service this week, and as its maximum capacity is about 10,000 gallons a minute, it is expected that a month's operation of it will be sufficient. There has been no further leakage from the hydraulic fill through the toe of the dam into the lake.

Culebra Cut Transportation.

A new incline into Culebra Cut, between Paraiso and Cucaracha, on the east side of the Canal, is about to be constructed. It will utilize the 95-foot berm part of the distance. By means of this new track, trains which now enter the Cut by way of the Contractor's Hill incline, on the west side of the Canal, and shift back and forth in order to reach the shovels on the east side, south of Gold Hill, will save considerable time in entering the Cut, and the amount of spoil hauled out each day will be increased by several hundred cubic yards

Buoys Near Pacific Entrance.

Two mooring buoys have been received on the Isthmus by the Panama railroad and will be placed near the south end of the wharf at Balboa. They are to be anchored at this point, in order to permit United States and other vessels to coal from lighters under more favorable conditions than at the present anchorage, east of Flamenco Island, and to lessen the danger to the lighters on account of heavy weather. The new buoys are 12 feet in diameter, 10 feet deep, and are complete with fenders, etc. They will be anchored in position by six mushroom anchors, each weighing about 4,000 pounds, and connected by a total of 1.200 feet of 1½-inch short link chain. They are the largest buoys now in these waters, and when placed on a flat car for transportation across the Isthmus, overlapped the required clearance in passing trains on the Panama railroad double track line by about two feet six inches, necessitating a specially arranged trip.

Six mooring buoys, each eight feet in diameter, and nine feet deep, were received by the Pacific Division on February 18, for marking purposes. Two of these have been placed at Punta Chamé, two at Naos Island, near the place where the suction dredge *Culebra* is beached when extensive repairs are made to the vessel, and two are in stock.

Work at Cristobal Marine Shops.

The work at the Cristobal drydock shops on July 1 included repairs to seven vessels, and the construction of two derrick barges, a description of which appeared in THE CANAL RECORD of May 24. One of these barges was launched on Thursday, June 15, and with the exception of building the boiler house, work on it is at a standstill pending the arrival of the engine equipment. Work on the shear legs and the boom of the derrick equipment is under way, and the boom base castings, manufactured at Gorgona shops, are being

NOTES OF PROGRESS.

(*Continued.*)

machined and finished at the marine shops. Structural work on the other derrick barge has been started at the marine ways.

Dredge *No. 5*, which has been given a general overhauling, will go into commission again this week, replacing dredge *No. 6*, which sank in the Canal, near Mindi, on June 19. The dipper dredge *Chagres* is receiving a complete overhauling, and, in addition, is being fitted with a new boom of the type carried by the dredge *Mindi*, together with a new turntable and base casting. The Panama railroad tug *Phoenix*, barges *Nos. 5* and *14*, and scow *No. 112*, are being thoroughly overhauled, the work including renewal of the combings, repairs to the towing machines on the barges, and the repainting of all the vessels.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry, by days, during the two weeks ending July 1, follows:

DATE.	Hours worked.	Cubic yards.
June 19	7:50	2,641
June 20	7:00	2,435
June 21	7:25	2,449
June 22	3:20	1,982
June 23	7:25	2,466
June 24	7:20	2,647
Total	40:20	14,620

DATE.	Hours worked.	Cubic Yards.
June 26	7:30	2,702
June 27	8:30	3,120
June 28	7:40	2,952
June 29	7:00	2,979
June 30	7:00	2,693
July 1	6:40	2,698
Total	44:20	17,144

Pacific Division Sand Service.

Sand was supplied in June by the Pacific Division service, as follows:

DESTINATION.	Number Cars.	Cubic Yards.
Pacific Division	2,523	37,845
Central Division	19	285
Atlantic Division	11	259
Mechanical Division	2	50
Quartermaster's Department	4	100
Panama railroad	6	150
Miscellaneous	20	330
Total	2,585	39,019

New Home of University Club.

Plans have been completed for the new clubhouse of the University Club in Panama, the majority of whose members are Canal and Panama railroad employes. The building will be situated on property recently purchased by the club, on the peninsula upon which the walled section of the city was situated. This site is immediately back of Las Bovedas, the old fort and prison, commonly known as "the sea wall," and the building will front upon an arm of the bay looking towards Balboa, and Ancon Hill. The Spanish mission style has been followed in the plans, and it is proposed to finish the interior in the same style. The building will be 106 feet long, 42 feet wide, and two stories high, with light on four sides. A recessed entrance will lead into a center hallway, from which steps to the second floor will branch off near the entrance, so that persons wishing to use the library, or the ladies' rooms, may do so without passing through the men's part of the house. On the ground floor will be billiard and card rooms, a grill and café, kitchen, pantry, store room, and dining room, the last named looking out upon First street and the sea wall. On the second floor, will be the library, and dining and retiring rooms for ladies. This floor will be so arranged that it may be cleared for dancing, leaving a ballroom about 40 by 75 feet. The plans and specifications may be seen at the store of Vibert and Dixon on Central avenue in Panama. It is expected that the bids will be opened the last week in July.

CONCRETE WORK IN THE LOCKS.

About 56 per cent of the concrete for all the locks is in place, the amount at the close of work on July 1 being 2,390,192 cubic yards, out of a total of approximately 4,284,400. A total of 28,553¼ cubic yards of concrete was laid in the locks during the week ending July 1.

GATUN LOCKS.

About 69 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on July 1, being 1,429,709 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each day for the week ending July 1, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 6 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

TEST OF CEMENT GUN.

Machine for Coating Surfaces to be Tried on Sides of Culebra Cut.

A test of the cement gun as a means of coating the surface of rock in Culebra Cut to prevent disintegration is in progress. The so-called "gun" is a compressed air apparatus for forcing cement and sand from a tank through a nozzle, at the mouth of which, water is mixed with these materials, forming a concrete which is cast upon the surface to be coated with such force as to become part of the rock itself.

For the work in Culebra Cut, the apparatus is mounted on a flat car, at one end of which, is a bin for mixing the sand and cement. One day's supply is carried, or enough to coat 200 square yards with a layer one inch thick, in nine hours of work. The car was rigged up at Empire shops, and the machine was tested by allowing it to coat a boiler with asbestos. Five men are required in operating the plant, their work including mixing and delivering the materials, and operating the gun.

The first work to be undertaken is coating the surface of the soft rock which the excavation has uncovered in Contractor's Hill. This soft rock is a fine grained clay transported and deposited by water, moderately hard when first exposed, but crumbling rapidly when in contact with the air. Of it, the chief geologist of the United States Geological Survey said, in his report of November 15, 1910:

"Under certain conditions, this surface disintegration becomes a more serious matter. For example, the contact between the intrusive andesite of Contractor's Hill, and the sedimentary clays, dips away from the Canal at an angle of 55 degrees. The crumbling of the clays below the contact leaves the andesite mass overhanging, and the overhang will increase as the Canal is carried to its full depth and more clay is exposed. With a rock so much fractured as the andesite, this condition is unsafe, and the exposed surface of the underlying clay should, therefore, be protected from further disintegration."

Knights of Pythias Subscription.

In case the letter signed by A. M. Warner, which appeared in the current issue of THE CANAL RECORD, should create a wrong impression upon the readers, I wish to make the following explanation:

Knowing that individual members of the K. of Ps., like most other organizations, regarded charity as one of the cardinal virtues, more especially to the widow and the fatherless of its late members, I, in ignorance of their by-laws, thought it would be a matter of courtesy to them to combine their name with the Army and Navy Union in soliciting subscriptions to assist the family of a former member of both organizations, and, therefore, on the spur of the moment, issued appeals with the following heading:

"Your sympathy and assistance is solicited on behalf of.......... This list is issued jointly by the Knights of Pythias, and the Army and Navy Union, and these subscriptions are being made in order that they may be cared for while on the Isthmus, and to see them through to their home in Washington, D. C."

On hearing that this was against their rules, I at once had the names of both organizations crossed off of the three lists that had been issued, and published others without the so-called illegal heading. I accept full responsibility for what has been done, and feel confident that Mr. Warner's concluding paragraph. that "all concerned will govern themselves accordingly," will result in their further assistance to those who have had their "bread winner" taken from them at a time when they were incapable of taking care of themselves.

ALFRED SMITH,
Adjutant, Army and Navy Union.

EMPIRE, C. Z., June 30, 1911.

Knights of Columbus.

A party of eighteen members of the Order of the Knights of Columbus arrived in Colon from New Orleans, on Thursday, June 29, for a six days' visit to Panama and the Canal Zone. On Saturday, there was a meeting with exemplification of the third degree at the old administration building in Panama. On Sunday, the party attended service at the cathedral in Panama at 9 o'clock, and at 10.15 left for a sightseeing trip over the Canal work, returning over the relocation of the Panama railroad. On Monday evening, an open meeting was held in Ancon Hall, the Bishop of Panama attending. On Tuesday, the visitors participated in the celebration of the national holiday. On Wednesday, they spent the day in sightseeing in the city of Panama, and on Thursday, they will sail for New Orleans by the steamer *Atenas*.

Improved Order of Red Men.

A meeting will be held in the Kangaroo hall, at Empire, Sunday, July 9, to raise the chiefs for the ensuing term to their respective stations. All the chiefs-elect of the eight tribes are requested to be present, and as many others as can make it convenient to be there. After the raising of chiefs, matters of interest to the tribes in common may be brought up by duly authorized representatives of the tribes, for discussion and decision.

Refreshments will be provided by Cocles tribe.

W. H. KROMER, *D. G. I.*

CRISTOBAL, C. Z., July 5, 1911.

Rifle Match for Silver Cup.

A members' match for the silver cup donated by a Panama City hardware company will be shot at the Gamboa range by the Canal Zone Rifle Club on July 9. The cup will become the property of the person making the highest score in the four regular matches.

Fourth of July Fire Department Contests.

The winners in the Fourth of July fire department contests at Cristobal were, as follows:

Hose races between volunteer fire companies, consisting of a run of 125 yards to hydrant with reel, laying 150 feet of hose, breaking coupling on last section, putting on nozzle, and turning on water. Winners—Gatun Volunteer Company No. 3, first prize, $75; Gatun Volunteer Company No. 2, second prize, $50; Gorgona Volunteer Company, third prize, $25. Time, 36 seconds.

Coupling contest between individual members of volunteer fire companies, consisting of running 50 feet, breaking coupling, and putting on nozzle. Winners—Gatun Volunteer Company No. 3, first prize, $7.50; Gatun Volunteer Company No. 2, second prize, $5. Time, 9 2-5 seconds

Contest between volunteer fire companies in taking out middle section of a charged line of 150 feet of hose, with nozzle attached, without shutting down hydrant, and connecting the first and third sections. Winners —Gatun Volunteer Company No. 3, first prize, $7.50; Gatun Volunteer Company No. 2, second prize, $7.50. Time, 16 9-10 seconds.

An interesting Pompier ladder and life saving exhibition was held at the Cristobal fire station tower at 6 o'clock in the evening.

Licenses for Chauffeurs.

The Board of Local Inspectors will hold an examination for chauffeurs' licenses in Cristobal, at the office of the deputy collector of revenues, on Saturday, July 15, at 8 a. m. All applicants are required to have their application blanks properly filled and endorsed before entering the examination.

An examination for the same purpose will be held in Ancon on Wednesday afternoon, July 19, at 2 o'clock.

For information, address Board of Local Inspectors, Ancon, C. Z.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is about 64 per cent completed, 142,889 cubic yards, out of a total of 225,000, having been placed at the close of work on July 1. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 26	152	7:00	1
June 27	236	7:30	1
June 28	208	7:30	2
June 29	260	8:00	2
June 30	244	8:00	1
July 1	296	8:00	2
Total	1,396	46:00	1.50
Previously reported	141,493	....	....
Grand total	142,889		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending July 1, follows:

DATE.	Hours worked.	Cubic Yards.
June 26	3:53	1,748
June 27	3:56	2,056
June 28	4:28	1,973
June 29	3:27	1,731
June 30	3:32	1,743
July 1	4:19	2,010
Total	23:35	11,261

Homicide Cases.

Herbert Berkley, a native of St. Kitts, shot a negro woman named Priscilla Muir at Mount Hope on the night of June 25, and she died on June 27. Berkley is in jail awaiting trial.

Alexander Mitchell, a Greek citizen of the United States, was struck on the head with an iron pipe by Jeremiah Wayland of St. Kitts, while both men were on a Canal clapet at dock No. 13, Cristobal, on the night of June 29. Mitchell died that night, and Wayland is in jail awaiting trial.

Ensigns David G. Copeland and Greer A. Duncan, U. S. N., special students in engineering at Rensselaer Polytechnic Institute, have been assigned to observation of the Canal work during the summer school vacation, at the close of which, they will return to their studies in the States.

PACIFIC COAST LIGHTS.

Recommendations for Aids to Navigation in the Gulf of Panama.

Shortly after the wreck of the steamer *Taboga* off Cape Guanico on the Pacific coast of Panama, the Government of Panama requested that the assistant engineer employed by the Commission on the lighting of the Canal, be detailed to investigate the question of placing lights and other aids to navigation at various points in Panama Bay, where they will be of most assistance to vessels seeking the port of Panama and the Pacific entrance to the Canal. In company with an engineer employed by the Government of Panama, the Commission engineer made a four days' trip along the coast, and to the Pearl Islands, June 21–24, and his report, with estimates, has been forwarded to the Government of Panama.

It is recommended that lights be established at Cape Mala, San José Island, Bona, and Melones Islands, an abstract of the recommendations being, as follows:

Cape Mala—This is a low, rocky point at the easterly extremity of the peninsula, comprised in the provinces of Veraguas and Los Santos, and is important and dangerous to all shipping entering Panama. It should be marked by a light of the first order. It is recommended that a reinforced concrete octagonal tower, 100 feet high from base to focal plane, be erected on a site about 40 feet above mean high tide, giving a total height of 140 feet, from which the light may be seen a distance of 18 miles at sea. A light showing a double flash every ten seconds, with incandescent oil-vapor illuminant, is recommended in preference to acetylene gas, because, in the long run, it will be cheaper, although the initial cost will be more. This station will require the service of a light keeper, and one assistant, and the station must include quarters for them. Estimated cost, $56,700.

San José Island—This is the southwesterly island of the Pearl Island group, and a light is recommended for this point, because of the strong and irregular currents in the Gulf of Panama, making it necessary that ships leaving Panama Bay have a positive point for departure. The site selected is about 100 feet above mean high tide on the southwesterly point of the island, and the tower should be 50 feet from base to focal plane, thus giving a total height of 150 feet, from which the light will be visible 16 miles at sea. A skeleton tower, constructed of reinforced concrete, surmounted by a third order lantern, showing a single flash every five seconds, is recommended. The illuminant will be acetylene gas, and the lantern will be seen through 270 degrees of the horizon. Estimated cost, $13,500.

Bona Island—This island is situated about 25 miles south of Panama, and a light established there will be an aid, both to coastwise and general shipping. Since the range of visibility of this light need not be greater than 11 or 12 miles, it is recommended that an acetylene lamp, mounted upon a reinforced concrete post, be established. The site for the light is at the top of the highest part of the island, about 670 feet above mean high tide, and the post should be about 30 feet high, with a small house at the base to protect the gas accumulators, and the valves. It would be preferable to have this lamp at a lower elevation, but this is not feasible, because the light must be visible over the whole horizon. The light recommended is one showing a group of four flashes every 10 seconds. Estimated cost, $3,850.

Melones Island—This is a small islet, northwesterly from Taboga Island, and a light on it will serve as an aid to coastwise shipping, and likewise guard against the dangerous Melones Rock. It is recommended that a small post of reinforced concrete be erected, surmounted by an acetylene gas lamp, showing a group of three flashes every nine seconds. The site new occupied by a temporary light installed by the Canal Commission is recommended. Estimated cost, $1,750.

The high pressure system of acetylene illuminant recommended for the three small lights provides for the generating, purifying, drying, and storing of the gas in steel cylinders, or accumulators, at a central charging plant, where the cylinders are charged at a pressure of 150 pounds per square inch. The cylinders are packed with asbestos discs, and filled with acetone, the pressure of the latter increasing the storage capacity of the cylinders, and it and the asbestos together, obviating any danger of explosion. The cylinders are transported to the lights whenever recharging is necessary, which, in the case of the lamps recommended, will be about once in six months.

With regard to other lights recommended by local shipping interests, the report says:

A number of other aids to navigation have been recommended by captains of vessels plying up and down the coast, but as they are of local interest, the proposed sites were not visited. The recommendations are, as follows: Puerto Obaldía, province of Coclé, beacon, 35 feet high, green light; Puerto Posada, province of Coclé, beacon, 35 feet high, red light; Aguadulce, Banco Negro, province of Coclé, beacon 35 feet high, white light; Montijo Bay, province of Veraguas, beacon, 15 feet high, white light; David Bay, Chiriqui, beacon, color of light not specified; Boca San Pedro, Chiriqui, buoy with green light; Boca Brava, Chiriqui, buoy with red light; Pacheca Island, northerly one of Pearl Island group, beacon, 50 feet high, with white light, Garachiné Point, beacon, 50 feet high, white light.

The localities recommended for these local aids are accessible for erecting post lights and tripods at small cost, and lights should be established by the Republic of Panama, if the commerce of those places warrants their establishment. In this connection, it is proper to mention that the establishment of lights and buoys by steamboat companies, and other private parties, for their own convenience, should not be encouraged. Private lights are usually established and extinguished without notice, much to the annoyance of mariners, who are confused and misled by irregular lights.

Should the Republic of Panama decide to establish lights at the aforementioned places, I would respectfully recommend that red and green lights be omitted, and that the distinctive characteristics be given the lights by means of white flashes. The white light is visible for a greater distance, and, by the use of flashes, a less amount of gas is consumed. I would recommend the following characteristics:

Puerto Obaldía—One group of five flashes every eleven seconds; acetylene; estimated cost, $2,000.

Puerto Posada—One group of six flashes every twelve seconds; acetylene; estimated cost, $2,000.

Aguadulce—One group of seven flashes every thirteen seconds; acetylene; estimated cost, $2,000.

Boca Brava—Ten seconds, light; ten seconds, dark; acetylene gas buoy; estimated cost, $3,000.

Boca San Pedro—0.3 seconds, light; 2.7 seconds, dark; acetylene gas buoy; estimated cost, $3,000.

The total estimated cost for all the lights recommended, with cost of launch, $4,000, and $4,200 for contingencies, is $100,000.

Sowing Grass Seed on Canal Banks.

The sowing of grass seeds of various kinds on the slopes of Culebra Cut to arrest erosion, has been begun on the dead slide on the west side of the Canal, about one-fourth of a mile south of Contractor's Hill. The material here is clay. The grass will be sown only on slides no longer in motion, and on sections of the bank not yet affected by slides.

Station Boards in Culebra Cut.

Following the plan of mile posts as a means of reference, used on railroads in the States, station boards have been placed every thousand feet through Culebra Cut for purposes of reference. There are 47 of these stations. Hereafter, daily reports of steam shovels and drill gangs will be made with reference to these station boards, and reports of accidents will also give location by this means.

Sailing of the "Cristobal."

The sailing of the Panama railroad steamship *Cristobal* has been set for Wednesday, July 12 at 5 p. m. from Pier 11, Cristobal.

Married.

On July 1, in Cristobal, James Hervey Kenneth Humphrey of Minneapolis, Minn., and Miss Natalie Mathilde Hine of Bay City, Mich., Rev. Carl H. Elliott officiating. Canal Zone residence, Corozal.

On July 1, in Cristobal, George Warren Butters and Miss Lucy Amelia Abrams, both of Somerville, Mass., Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

Tug Service to Porto Bello, Nombre de Dios, and Toro Point.

Effective June 26, the following schedule will be maintained between Dock 13, Cristobal, Nombre de Dios, Porto Bello, and Toro Point:

Tug *Reliance* will leave Dock 13 daily, except Sundays, at 7 a. m., with two barges for Nombre de Dios, returning at once with two barges to Gatun.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 9 a. m., with three barges for Porto Bello, returning to Gatun as soon as barges are loaded.

Tug *Porto Bello* will leave Dock 13 Saturdays at 9 a. m., light, for Porto Bello. This tug will leave Porto Bello, light, at 2 p. m., arriving at Dock 4, Colon, in time for passengers to catch train No. 7, leaving Colon at 4.35

Tug *Porto Bello* will leave Dock 13 Sundays at 7 p. m., for Porto Bello, returning at once.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 6.30 a. m., for Toro Point, returning at once.

Tug *Mariner* will leave Dock 13 Sundays at 9.30 a. m., for Toro Point, returning at once.

A tug will leave Dock 13 on Wednesdays, Saturdays, and Sundays, at 4.30 p. m., for Toro Point, returning at 5.30 p. m.

A tug will leave Dock 13 on the 20th of each month at 6 a. m., for Porto Bello and Nombre de Dios, returning to arrive at Dock 4, Colon, about 4.30 p. m.

The following vessels arrived at or departed from the port of Balboa during the week ending July 1:

Arrivals—June 25, *Barracouta*, from Central America; June 26, *Guatemala*, from Valparaiso; *Urubamba*, from Callao; June 30, *Peru*, from San Francisco; July 1, *Pleiades*, from San Francisco.

Departures—June 26, *Mantaro*, to Callao; June 27, *Quito*, to Guayaquil; June 29, *Aztec*, to San Francisco; *Palena*, to Valparaiso; *City of Panama*, to San Francisco; June 30, *Peru*, to Guayaquil.

CULEBRA CUT.

Status of the Excavation at Close of Fiscal Year.

At the close of the fiscal year, June 30, there had been excavated from the section of the Canal known as Culebra Cut, 65,514,865 cubic yards, and there remained to be dug 18,671,859 yards. This section is, therefore, 78 per cent completed. The advance of the work each year is shown in the following table:

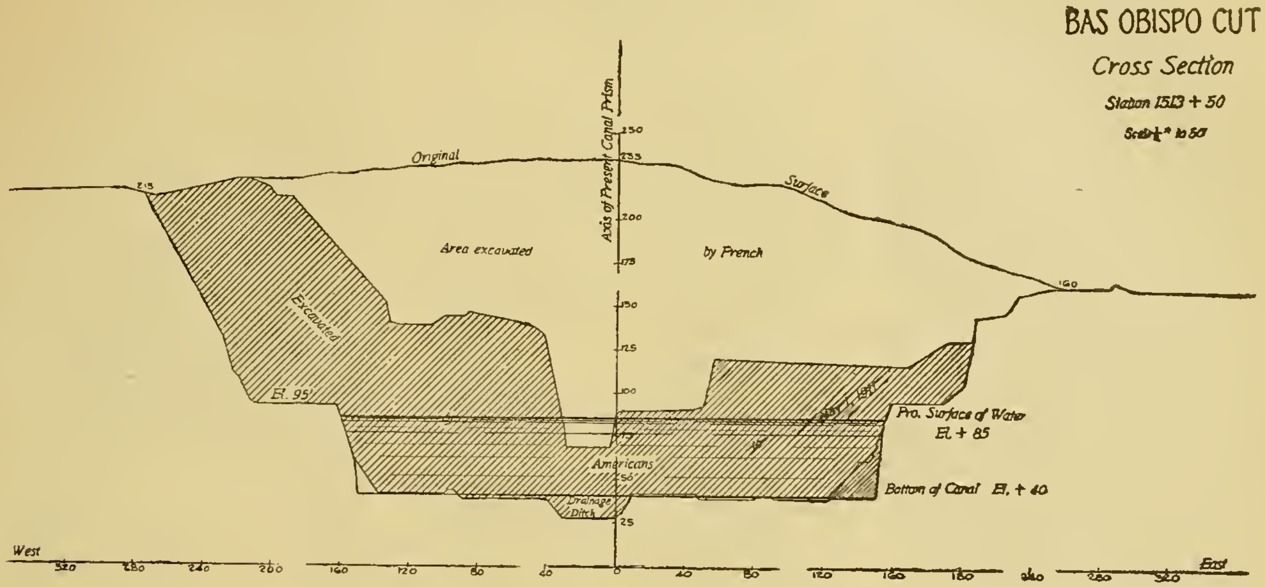
EXCAVATION.

Fiscal Year.	Cubic Yards.
1904 (2 months)	60,107
1905	741,644
1906	1,506,562
1907	5,768,014
1908	12,065,138
1909	14,229,978
1910	14,921,750
1911	16,221,672
Total	65,514,865

The amount of excavation has increased each year, and there has been an increase also in the average excavation per steam shovel, due to the increasing effectiveness of the working force, and a consequent decrease in the cost per cubic yard excavated. In the quarter ending March 31, the cost of excavation in the Central Division, which includes Culebra Cut, was 56.92 cents a cubic yard, while the cost for the whole period up to March 31, was 88.01 cents a cubic yard.

A section of the Cut that is practically completed is the rock excavation at Bas Obispo. At this point the French had been digging the emplacement for one of the locks on the three-level canal projected by the New Panama Canal Company. The digging was through a hill of trap rock. A cross section of the Canal at this point shows the excavation for the French locks, and the work done here by the Americans since 1904. All but a small bit of excavation at the toe of the east slope is completed, and this is represented in the illustration by the white triangle, at the lower left corner of the cross section. The section that is completed is about 600 feet in length, and for half a mile above this point, the work is merely a "clean-up job," on which three steam shovels are making shallow cuts. The old incline into the Canal at Bas Obispo on the east side is being dug out.

There has been less inconvenience from the sliding banks so far this rainy season than was anticipated. The longest of the slides, that at Cucaracha, is at rest, and a shovel cut has been made in front of it on the 95-foot berm, and has been maintained without difficulty. No new movements occurred at Culebra, up to July 1, where the lightening of the slides, by excavating them on top, is in progress.



BAS OBISPO CUT

Cross Section

Station 1513 + 50

PERSONAL.

A cable message from Washington states that the Secretary of War, and Mrs. Stimson, and Brigadier General C. R. Edwards will sail on the *Santa Marta* from New York for the Isthmus on July 6, and that the following members of the Panama Canal Fortification Board will sail for the Isthmus on the *Ancon* on July 10: Major General Leonard Wood, Brigadier Generals W. W. Wotherspoon and W. H. Bixby, Colonel Erasmus M. Weaver and Captain S. D. Embick of the Army, and Commander W. J. Maxwell of the Navy.

Captain J. C. Colwell, U. S. N., retired, and Lieut. Walter D. Smith and family, were among the passengers on the *Cristobal*, which arrived at Cristobal on July 2.

Examinations for Canal Service.

Examination will be held probably on July 30 for typewriter, and for stenographer and typewriter, Isthmian Canal Service. Request should be made for application form 304 and information in regard to the above examinations, the name of the examination for which it is desired to apply being stated. Applications should be filed before July 22.

Applications should be filled out carefully, and all instructions should be thoroughly understood beforehand. The following is to be noted in executing all applications for civil service examinations: In questions regarding *bona fide* residence, such residence does not require continuous bodily presence, but constitutes the place at which the applicant, if a voter, is legally entitled to vote.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
CULEBRA, C. Z., June 28, 1911.

Promotion of Rodmen and Levelmen.

An examination to test the fitness of rodmen and levelmen for promotion will be held at Culebra on Sunday, July 16. Employes wishing to enter this examination should forward their applications through the head of the department or division in which they are serving, to Mr. A. B. Nichols, chairman of the examining board, Culebra.

Injury Pay for P. R. R. Employes.

The following resolution was adopted by the board of directors of the Panama Railroad Company on April 3, 1911:

"*Resolved*, That in every case where an employe of the Panama Railroad Company upon the Isthmus of Panama shall receive injuries in the course of such employment, which are not due, in the opinion of the president of the company, to the wilful misconduct or negligence of such employe, and such injuries shall result in his incapacity or death, there shall be paid to such employe, in event of incapacity, his regular pay for the period of incapacity, not to exceed one year, or, in event of his death, to his widow, child, or children under the age of sixteen years, or dependent parent or parents, his regular pay for the period of one year, deducting therefrom any payments made by reason of incapacity growing out of the same accident.

Application for such compensation shall be made by the employe, or, in event of his death, by his beneficiaries, upon approved forms, which shall show the date and character of the injury, and shall be supported by a certificate of the attending physician, showing the incapacity of such employe throughout the period for which compensation is claimed, or his death as the result of such injury, all of which shall receive the approval of the president of the company, or of an official to be designated by him; provided, however, that no compensation shall be paid except upon the execution by the injured employe, or by his beneficiaries in event of his death, of a release to the Panama Railroad Company of all liability to such employe, or beneficiaries, as the result of such injury or death."

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

There will be a social meeting of the Gatun Woman's Club on Thursday, July 5. The club will then close, and the opening of the regular season will be in September.

The members of the Las Cascadas Euchre Club were entertained at the home of Mrs. Charles R. Lingo on Thursday, June 27. Beside the regular members, there were present a number of guests from Paraiso.

Church Notes.

The pastor of the Methodist Episcopal Church in Panama solicits donations of old magazines and periodicals for the prisons and asylums under his ministry. The pastor may be addressed at Ancon, or books and magazines may be delivered at the church on the sea wall in Panama.

At the Thursday evening meeting of the Pedro Miguel Song and Praise Association on June 29, the Rev. Harry Compton was the speaker. Following the service, the association tendered a reception to Mr. Compton as a welcome to the new pastor.

The Ladies' Auxiliary and the Ladies' Aid Society of the First Baptist Church of Empire united in tendering a reception, on Wednesday evening, June 27, to the pastor of the Baptist Church of Colon, and his wife, the Rev. and Mrs. Stephen Witt, who reside in Empire. Each society presented them with a gift.

The Southern Baptist Mission Board has made a grant of $3,000 toward the construction of a new church building at Cristobal, to replace the one destroyed by fire in March. It is proposed to construct a new building, with mission house attached, within the Canal Zone limits, and to reconstruct the ruins of the old concrete building for the schoolhouse. The school had an enrollment of 200 pupils. Services are being held in a temporary building which was purchased by the church immediately after the fire.

A mission service will be held in the Commission chapel in Empire on Sunday evening, July 30, under the auspices of the ladies' auxiliary of the Empire Christian League. The auxiliary will hold a missionary meeting at the chapel on Friday afternoon, July 7.

The Gatun Christian League held an election of officers on Thursday evening, June 29, when the following were chosen: President, W. N. Windes; vice-president, E. C. Ryles; secretary, W. H. Brown; treasurer, Mrs. Ben Jenkins.

The rector of Christ Church, Colon, entertained the Woman's Altar Guild at tea at the rectory on Friday afternoon, June 30.

Fraternal Organizations.

The Isthmian Canal Rebekah Lodge, No. 1, Independent Order of Odd Fellows, Gorgona, elected the following officers on Tuesday evening, June 23: Noble grand, Mrs. Marian Beetham; vice-grand, Mrs. Agnes Martin; secretary, Charles Beetham; financial secretary, Henry Lots; treasurer, Mrs. Annie L. Calvit. The appointive offices will be filled at the installation which will be held in July. Rebekah Lodge, No. 1, was organized on October 10, 1908, with 31 charter members. Officers are elected semiannually, the present election marking the opening of the sixth session.

Balboa Lodge, No. 4, Knights of Pythias, Las Cascadas, held a public installation of officers on July 3. The ceremony was followed by a dance and supper. On the same evening, Paradise Lodge, No. 6, Paraiso, held its installation and third anniversary dance at the lodge hall.

The Masonic Club of Empire held its meeting on Tuesday evening, July 27, when the speakers were Mr. Gibbs of the Texas Oil Company, who spoke on oil; Mr. McCombs of the International Banking Company in Empire, who spoke on banking; and Mr. Christopherson of the Canal Zone high school, who spoke on the flora and fauna of the Isthmus. On Sunday morning, June 25, the Masonic club attended the service at the Commission chapel, when the Rev. A. A. Nellis delivered the address. About 100 Masons were present.

Resolutions of sympathy have been adopted by Paradise Lodge, No. 6, Knights of Pythias, Paraiso, on the death of Mary Enola, the young daughter of Thomas L. Kent, which occurred on June 3.

School Notes.

The pictures and art folios belonging to the Canal Zone Federation of Women's Clubs were on exhibit at the Gorgona school for two weeks in June. During this time talks on art were given, the pictures being used as illustrations. Instruction in art in connection with the English course in the grade schools is projected for the coming year.

The juniors of the Canal Zone High School held a promenade on Thursday afternoon, June 29, in the entertainment hall of the Commission clubhouse.

The Canal Zone public schools closed on Friday, June 30, and will reopen on October 2.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending July 1:

Prinz Joachim, June 26, from New York, with 200 barrels kerosene, 20 cases paper, for stock.

Border Knight, June 26, from New York, with 3,005 barrels cement for Atlantic and Pacific Divisions.

Alm, June 28, from Baltimore, with 400 pieces angle reinforcements for Atlantic Division; 29,363 cases dynamite, for stock.

Atenas, June 29, from New Orleans, with 2,260 bales prairie hay, 38,407 feet white oak lumber, 20 packages lantern globes, 12 cases paint, 9 crates ink and mucilage, for stock.

Panama, June 30, from New York, with 600 tower knuckles for Mechanical Division; 8 cases fire hose for Department of Civil Administration; 5 cases dipper bails for Central Division; 22 cases drugs and sundries for Sanitary Department; 47 drums marine engine oil; 500 kegs white lead in oil; 25 cases ink, 10 cases steel nut locks, 13 cases insulated wire, 200 cases washing powder, 17 cases incandescent lamps, for stock; and a miscellaneous cargo, the whole consisting of 1,552 packages, weighing 125 tons.

Zacapa, June 30, from New York, with 6 cases electric laundry material for Sanitary Department; 15 cases machinery, 100 coils Manila rope, for stock.

Belle of Spain, July 1, from Tacoma, with 354,631 feet Douglas fir lumber for stock.

Prin Eitel Friedrich, July 1, from New York, with 100 kegs nails, 200 cases electric fuses for stock.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli on Sunday, July 9, at 7:30 p. m. The program follows:

1	March—*The Conciliator*	Scouton
2	Selection—*The Girl of My Dreams*	Hoschna
3	Waltz—*Campus Dreams*	Blke
4	Intermezzo—*The Dawn of Love*	Benaix
5	Overture—*Norma*	Bellini
6	Popular Number—*On, Wisconsin*	Purdy
7	Selection—*Robin Hood*	De Koven
8	Idyl—*Garden of Roses*	Pratt
9	March—*Monstrat Viam*	Joy

OLIVER KIMBALL, *Acting Musical Director.*

The next concert will be given at Empire on Sunday, July 16.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

The high duckpin scores for last week were, as follows: Huttlemaier, 101, 111, 119, 103, 114, 107, 100, 101, 105, 108; Mengel, 113, 104, 102; Silver, 102; Case, 106, 105, 115, 103.

The Culebra Boy Scouts took a "hike" last week to the old city of Panama.

An informal social was held on Wednesday evening, June 28, when a musical and literary program was rendered.

EMPIRE.

The following high scores were rolled in duckpins during the past week: Witmer, 113; Goolsby, 112; Rodeghiero, 104, 100, 104, 102; Ground, 100.

At a meeting held on Monday night, July 3, plans were made for a local handicap tenpin tournament. All tenpin bowlers are urged to take part in this tournament.

The basketball men are practising two nights a week. Enough men have reported for two teams, and it is hoped that enough more will come out, so as to make possible a local basketball league.

The regular gymnasium class work will start the week of July 9, meeting twice weekly. The regular meeting of the Empire Literary Society will be held on Friday, July 7. The "Income tax" will be discussed.

GATUN.

It has been decided by the athletic committee, of which Fred Huber is chairman, to organize a local basketball league. Eighteen men were out for practice on June 27. It is expected that there will be five teams in the league. Any man in Gatun is eligible to attend the practice games.

A class in wrestling will be started this week under the direction of Messrs. Huber and Wilson.

The motion picture entertainment on Monday, June 26, was unusually well attended.

The literary club met on Wednesday evening, June 28. The subject for discussion was "Resolved, that the railroads of the United States should be owned and operated by the Federal Government." Messrs. Fox, Wilson, and Baite spoke in the affirmative, and Messrs. Gilkey, Smita, Huber, and Dougherty spoke in the negative. R. E. Chatfield, presided.

The following is a list of the 12 highest bowlers in duckpins for the last half of June:

NAME.	Games.	Pinfalls.	Aver.
Atkins	4	370	93
DePoorter	2	182	91
Barte	30	2703	90
DeMoll	4	354	88
Wells	24	2098	87
Dalton	5	438	87
Bailey	12	1035	86
Dillon	5	430	86
Wurster	28	2399	85
Zeal	40	3345	84
Green	15	1261	84
Rosselot	42	3501	83

Dr. Orenstein will give the second of a series of three talks on "Sex life" on Sunday evening, July 9, in the game room.

CRISTOBAL.

The Cristobal association held its fourth anniversary banquet at the Cristobal hotel on Thursday evening, June 29. Dr. Claude C. Pierce acted as toastmaster, and the following program was given: Invocation by Rev. C. H. Elliott; address, "Four years' old," by F. C. Freeman; baritone solos by W. G. Ross; address, "Our country," by C. J. Dinnin; historical sketch, "The early history of the Panama railroad," by J. A. Smith; remarks by E. A. Putnam; song, "Star Spangled Banner." Music was furnished throughout the evening by the Panama railroad orchestra. About 200 men were present. The banquet committee consisted of Messrs. C. M. Bullard, W. H. Marsh, R. C. Mosher, J. M. Weaver, and R. G. Goodman.

E. A. Putman will succeed R. G. Goodman as secretary of the Cristobal association, who has resigned, effective August 1.

PORTO BELLO.

Thursday afternoon has been set apart for the ladies. During the past few weeks quoit tournaments have taken place among them, there being ten participants.

A motion picture machine has been installed in the clubhouse, and, as soon as arrangements are completed, a show will be held every week or two.

The Porto Bello chess club's handicap tournament is about half completed. The membership is being lowered by the transfer of men. Twenty-eight moves have been made in the tournament by wireless with Culebra.

LOST—On June 28, between Empire and Toro Point, a circular piece of jade set with two Chinese letters in gold. Reward on return to F. Weitzenberg Empire.

COMMISSARY DEPARTMENT.

The hours during which the commissaries are open are, as follows:

Cristobal and Culebra, 8 a. m. to 12.30 p. m.; 2 p. m. to 7 p. m.

All other commissaries, 8 a. m. to 1 p. m.; 3 p m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning July 1.

OFFICIAL CIRCULARS.

Board of Local Inspectors.

Culebra, C. Z., June 28, 1911.

Mr. D. R. Aitken,
Balboa, C. Z.

Sir: Under authority conferred upon me by Executive Order of the President, No. 1131, dated October 2, 1909, you are hereby appointed a member of the Board of Local Inspectors, to serve during the absence on leave of Mr. James Macfarlane.

Respectfully,
Geo. W. Goethals, *Chairman.*

Use of Government Tugs.

Culebra, C. Z., June 27, 1911.

Lieut.-Col. W. L. Sibert, *Division Engineer, Gatun.*
Mr. S. B. Williamson, *Division Engineer, Corozal.*
Mr. J. A. Smith, *General Superintendent, Colon.*

Gentlemen: In accordance with the recommendations contained in report of committee, dated May 23 and approved May 29, I have this day addressed a communication, reading, as follows:

"The Isthmian Canal Commission and the Panama Railroad Company are now allowing the shipping interests the use of their respective tug boats as an accommodation, and at a very moderate charge for the service rendered. In consequence, I have to advise you that such service may be obtained hereafter by your Company only upon the understanding that your Company assumes all risks of injury or damage to your Company's vessels, their equipment, or cargo, while such vessels are being handled by the tug boats of the Commission or the Panama Railroad Company, and that no liability for such injury or damage will attach to the United States, or the Panama Railroad Company. Please advise me of your assent to this condition."

To the following:

Mr. H. B. Parker, General Agent, Royal Mail Steam Packet Company, Colon.
Mr. A Schang, Acting Agent, Compagnie Gènèrale Transatlantique, Colon.
Mr. Paul Miller, Agent, Hamburg-American Line, Colon.
Mr. J. Fidanque, General Agent, La Veloce, Colon.
Mr. I. R. Garcia, Agent, Cia. Transatlantica de Barcelona, Colon.
Capt. W. L. Alley, Agent, United States Sbipping Company, Colon.
Mr. H. R. Wilford, Agent, United Fruit Company, Colon.
Mr. A. C. Parke, Agent, Pacific Mail Steamship Company, Balboa.
Mr. C. S. Peebles, Agent, Pacific Steam Navigation Company, Balboa.
Mr. P. L. Fellinger, Agent, Peruvian Line, Balboa.
Mr. James Stokoe, Special Agent, Union Oil Company, Balboa.
American Trade Developing Company, Agents, Kosmos Line, Balboa.
Messrs. Pinel Brothers, National Navigation Company, Balboa.
The Panama Agencies Company, representing W. R. Grace & Company, Balboa.
Messrs. Bates & Chesebrough, General Agents, California-Atlantic S. S. Company, Balboa.
Messrs. Ehrman & Company, Agents, Cia. Sud-Americana de Vapores, Balboa.
Panama Railroad Company, Agents, Earn Line S. S. Company, Colon.
Messrs. W. Andrews & Company, Agents, West India S. S. Company, Munson Line, and Leyland & Harrison Lines, Colon.
Mr. R. Wilcox, owner of schooners, Colon.
Mr. M. A. de Leon, owner of schooners, Colon.
Captain W. L. Alley, owner of schooners, Colon.
Mr. D. L. Lynton, owner of schooners, Colon.
Mr. W. O. Forde, owner and agent of schooners, Colon.

If there are any other individuals or companies to whom copies of this notice should be sent, please advise me at once.

Until the conditions specified in the notice are accepted by the individuals and companies to whom same has been addressed, the furnishing of tug service to them will be on the alternative basis recommended by the committee above referred to, to-wit:

"That tug boat service not in conformity therewith (as contained in notice above) shall be furnished only after an agreed price is arranged, based on the condition of service called for and the marine risks apparent to the party under whose jurisdiction the tug service is operated."

Respectfully,
Geo. W. Goethals,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Lost—A Delta Phi Nu fraternity pin, with skull and cross bones, ruby eyes. Return to R. L. Sommerville, Pedro Miguel.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago de Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on July 12, and August 9; and for Port. Limon at 5 p. on July 12, July 26, and August 9.

The Leyland line steamer *William Cliff* sails for New Orleans, via Port Limon, on or about July 29.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JULY 12, 1911. No. 46.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Slides in Culebra Cut.

On July 4, a mass of earth and soft rock on the east side of Culebra Cut at Culebra, immediately north of Gold Hill, fell into the Cut, and so covered steam shovel No. 225 that only the end of the boom is sticking out of the mass. The movement occurred early in the morning, and no one was injured by it. It is not known how badly the shovel was damaged, because it is not yet freed from the slide. Another steam shovel is excavating the material to the end that shovel No. 225 may be extricated.

On July 10, the mud slide on the east side of the Cut at Las Cascadas, having become saturated by the rain, moved into the Canal prism, blocking all tracks on the east side of the center drainage ditch, and thus reducing the output from the north end of the Cut.

The total amount of material in motion, or about to move, into Culebra Cut, does not exceed the estimate of excavation yet to be done there, as indicated elsewhere in this issue.

Freshet of July 5 and 6.

On July 5 and 6, a freshet in the Chagres River reached the following elevations:

DATE.	Station.	Low water.	Rise began.	Crest.	Height. Feet.
July 5.	Vigia.......	125.0	A.M. 11.30	P.M. 7.00	141.4
July 5.	Alhajuela....	92.0	2.10	8.00	103.0
July 6.	Gamboa.....	44.0	3.00	A.M. 12.45	58.3
July 6.	Bohio.......	......	P.M. 5.00	8.00	22.9
July 7.	Gatun.......	......	8.00	P.M. 7.00	19.4

The estimated discharge at Alhajuela, at the crest, was 37,200 cubic feet a second, and at Gamboa, 34,500 cubic feet a second.

Canal Work in June.

The grand total of Canal excavation to July 1 was 142,967,554 cubic yards, leaving to be excavated 39,570,212 cubic yards, or less than one-fourth of the entire amount for the completed Canal.

The total for June was 2,646,442 cubic yards, as compared with 2,616,609 cubic yards in June, 1910, and 2,895,793 cubic yards in June, 1909. All the excavation was "work excavation," there being no "plant excavation."

The dry excavation amounted to 1,588,388 cubic yards. and was principally by steam shovels. The dredges removed 1,028,198 cubic yards, and 29,856 cubic yards were sluiced, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 516,095 cubic yards. Of this total, 63,997 cubic yards were dry excavation, and the remainder was removed by the dredges in the Atlantic entrance.

The total excavation in the Central Division was 1,433,304 cubic yards, all of which was from the prism.

In the Pacific Division, the total excavation was 697,043 cubic yards. 522,242 cubic yards of which were taken out by the dredges at the Pacific entrance, and 53,858 by the hydraulic excavation plant at Miraflores Locks.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

Total....	2,646,442	....	2,646,442

Mean rainfall along Canal (twelve stations) 7.14 inches.

By "Work" Excavation is meant excavation actually made for one of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc.; that is, it represents material taken from the area to be occupied by the Canal, and constitutes excavation useful for the completed Canal.

By "Plant" Excavation is meant excavation outside of any of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc. It includes material necessary to be excavated for construction purposes only and is chargeable against the particular plant item for which it is performed, such as Prism, Diversions, Locks, etc.

DAM AND LOCK CONSTRUCTION.

Concrete laid in dams and spillways.......	4,830	....	4,830
Fill placed in dams....	660,004	82,173	742,177

Construction of Naos Island Breakwater.

During June, an average of about 1,000 cubic yards of material from Culebra Cut was dumped on the Naos Island breakwater. In order to complete the breakwater to the island before the spoil available from Culebra Cut will be exhausted, it will be necessary to dump on an average about 3,500 cubic yards daily. A committee has been appointed to determine upon a method of accomplishing this end, consisting of Messrs. S. B. Williamson, W. G. Comber, M. W. Tenny, and W. T. Reynolds, representing the Pacific and Central Divisions.

Draining Culebra Cut Through Pedro Miguel Locks.

Drainage from the south end of Culebra Cut will, henceforth, pass through the culvert in the center wall of Pedro Miguel Locks. Excavation was completed on July 12, connecting the pioneer shovel cut in the south end of Culebra Cut with the culvert at elevation 28 feet above sea level, 12 feet below the bottom of the Cut. All the water drained south from the summit between Culebra and Empire, which heretofore has passed through the site of Pedro Miguel dam, will pass through the culvert, which has a diameter of 18 feet. This will ensure quick drainage of the Cut, and will also enable the Pacific Division forces to complete the dam, work on which could not be finished while the drainage was passing through the site.

Compressed Air Leakage.

A series of tests has been made of the air mains in the Central and Pacific Divisions to determine the amount of waste from all causes, and the proportionate share of the cost that should be borne by each division. It was found that there was practically no leakage in the main between the Rio Grande compressor, and the beginning of the Pacific Division lines. On June 11, a test of all the mains and laterals showed a total loss of air of 24.89 per cent on the basis of the output for May, of which only 5.8 per cent was on Pacific Division lines. At the time of the test, the flow of air into the Pacific Division mains

NOTES OF PROGRESS.

(*Continued.*)

was measured by a meter. It has been determined to cut out all laterals for the Pacific Division, north of the flow meter, and, since there is practically no leakage between the compressor plant and the meter, the proportion of cost of air compressing to be borne by the Pacific Division will be determined by the flow through the meter.

Electric Flat-irons for Ancon Laundry.

The Ancon hospital laundry will be equipped with electric flat-irons, replacing the ordinary ones heated over gasoline burners, now in use. They include ten 6-pound, fifteen 7-pound, and twenty 8-pound flat-irons, aluminum finish, each fitted with a cartridge unit, and a detachable wooden handle. In addition, six extra cartridge units for the 6-pound irons, six for the 8-pound, 12 extra attaching plugs for the 6-pound irons, and 12 for the 8-pound, together with 1,000 feet of No. 12 two-conductor heater cord, have been furnished. Current from present electric light wires will be used. The new method is expected to increase the efficiency of the plant, and to lessen the operating cost.

Gatun Dam Spillway.

The concrete work in the spillway of Gatun Dam is over 64 per cent completed, 144,193 cubic yards, out of a total of 225,000, having been placed at the close of work on July 8. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
July 3	308	8.00	2
July 4 (Holiday)	....	....	....
July 5	192	7.30	2
July 6	292	8.00	1
July 7	244	7.30	1
July 8	268	8.00	1
Total	1,304	39.00	1.40
Previously reported	142,889		
Grand total	144,193		

Ancon Crusher.

A statement of the rock crushed at Ancon quarry, by days, during the week ending July 8, follows:

DATE.	Hours worked.	Cubic yards.
July 3	6.15	2,347
July 4 (Holiday)	....	....
July 5	6.40	2,600
July 6	7.35	2,894
July 7	6.55	2,973
July 8	7.05	2,180
Total	34.30	12,994

Additional Mixers at Miraflores Locks.

The concrete output in the upper lock at Miraflores will be increased by the placing in operation, this week, of an auxiliary mixing plant, situated in the east wall. It consists of two 2-cubic yard mixers, formerly in use in the east storage trestle at Pedro Miguel. The output from this plant will be utilized in the construction of the center wall, and will be handled in buckets and conveyed by the narrow-gage equipment to the chamber cranes, which will lift it into place. The method of transportation is similar to that employed at Pedro Miguel, except that the operation of the narrow-gage equipment, as well as that of the cranes, will be confined to the east chamber, the cantilever arms of the latter having sufficient reach to carry on the construction of both sides of the wall. In building the center wall in the lower lock, it is proposed to continue the use of the auxiliary plant in its present position, and to extend the narrow-gage track into the lock by means of an incline. It is expected that the additional mixers, when running at full capacity, will increase the output at these locks from 800 to 1,000 cubic yards a day.

The third berm crane at the upper lock, completing the two on the west bank, will be ready for operation this week. It will be used primarily in excavating a projecting section of the west bank at the upper end of the lock. Seven steam shovels are now excavating in the lower lock.

CONCRETE WORK IN THE LOCKS.

Over 56 per cent of the concrete for all the locks is in place, the amount at the close of work on July 8 being 2,413,616 cubic yards, out of a total of approximately 4,284,400. A total of 23,424 cubic yards of concrete was laid in the locks during the week ending July 8.

GATUN LOCKS.

Over 69 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of the work on July 8 being 1,443,415 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each working day for the week ending July 8, and of the total, follows; and a similar statement for the work in the spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 274 yards shown for the portable mixers are reinforced concrete, and were placed on the following days: July 3d, 61½; July 5th, 61; July 6th, 48; July 7th, 55; July 8th, 48½.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 81 per cent completed, 679,528 cubic yards, out of a total of 837,400, having been placed at the close of work on July 8. The record for each of the five 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixer.

STEAM SHOVEL RECORDS.

Work of Central Division and P. R. R. Relocation Shovels in June.

During the month of June, the total amount of material excavated in the Central Division was 1,433,304 cubic yards, of which 140,605 cubic yards were classified as earth, and 1,292,699 cubic yards as rock. Of this quantity, 1,399,458 cubic yards were removed by steam shovels, and 1,558 cubic yards by bucket cranes. Contractors removed 29,856 cubic yards by sluicing, and 2,432 cubic yards by hand.

The high record for the month was made by shovel No. 207, working 24 days in the Culebra district, which excavated 49,409 cubic yards of rock and earth. The second best record for the month was made by shovel No. 219, working 26 days in the Culebra district, which excavated 49,172 cubic yards of rock and earth.

The best record for a shovel of the seventy-ton class was made by shovel No. 109, working 21 days in the Culebra district, which excavated 37,072 cubic yards of rock and earth.

Shovel No. 230, working in the Culebra district, made a high record for one day by excavating 3,097 cubic yards of rock on June 24.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown below:

STEAM SHOVELS ON RELOCATED LINE.

The total excavation on the relocated line of the Panama railroad, in June, amounted to 394,665 cubic yards. Of this amount, 137,205 cubic yards were classified as earth, 24,010 cubic yards as loose rock, and 233,450 cubic yards as solid rock. Company forces removed 385,435 cubic yards, and 9,230 cubic yards were removed by the contractor.

Steam shovels excavated 370,440 cubic yards. Pan car task gangs took out 21,835 cubic yards, and 2,390 cubic yards were excavated for culvert foundations.

The best record was made by steam shovel No. 257, working on the Gatun section, which excavated 58,850 cubic yards of rock. This shovel has held the record on the Isthmus for the past five months.

In the 70-ton class, the best record was made by steam shovel No. 110, working near Paraiso, on the Gold Hill line, which excavated 26,790 cubic yards of earth, and 16,450 cubic yards of rock, a total of 43,240 cubic yards.

The best day's record for shovels with 5-yard dippers was made by steam shovel No. 262, working at Monte Lirio, which took out 3,130 cubic yards of earth and rock on June 14.

The best day's record for 70-ton shovels was made by steam shovel No. 110, working near Paraiso, which excavated 2,260 cubic yards of earth on June 12.

Month's records are place measurement, and day's records are car measurement. All material is loaded in 10-yard Western dump cars.

BEST RECORDS FOR THE MONTH.

Shovel No.	Location.	Cubic Yards by Cross Section.			
		Days worked.	Earth	Rock.	Total.
257	Gatun	26	....	58,850	58,850
262	M. Lirio	26	....	51,700	51,700
110	Paraiso	26	26,790	16,450	43,240
105	M. Lirio	26	28,700	12,300	41,000

Total output during the month of June, 370,440 cubic yards.

Total number of steam shovel working days, 252½.

Average output per working day, 1,467 cubic yards.

Saved a Spanish Laborer.

Under date of July 6, the Senior Traveling Engineer made the following report:

"While handling engine No. 657 on train No. 133, on July 4, and while engine was passing the passenger station at Las Cascadas at 6.40 p. m., a Spanish laborer walked over from the left side of the train, and stopped directly in front of the engine. Edgar Girdner, craneman on crane No. 36, attached to the Las Cascadas wrecker, without thinking of the danger to himself, jumped out of the crowd standing on the station platform, and, grasping the man by the coat, pulled him clear of the engine, which was just about to strike him."

Water Pressure in City of Panama.

Work has been completed on the 10-inch main to connect the high pressure reservoir at Ancon, with the 16-inch main which carries water from the Rio Grande reservoir to the city of Panama. By simply opening a valve, this main can be made to feed into the city system, raising the pressure at once to 85 pounds. With the old 8-inch main from the reservoir, also feeding into the city system, the pressure can be increased at once to 100 pounds.

Steam shovel No. 266, at work in the borrow pit in the Brazos bottom, on the relocation of the Panama railroad on July 2, was caught in an unexpected slide of earth and heavy rock, which broke and bent several I-beams, and damaged the engine. The operators were not injured.

Accident in Culebra Cut.

Locomotive No. 316, drawing a flat car loaded with coal for the steam shovels in Culebra Cut, ran upon a piece of track undermined by a slide on the west incline into Culebra Cut, near Las Cascadas, on the night of July 8. The track gave way, and the locomotive and car were thrown into the Cut, a distance of about 40 feet, carrying eight men with them. Harold Springer, Barbadian, brakeman on the train, I. C. C. check No. 121,606, was killed. The injured were George L. Jenkins, American, conductor; George Lewis, Panamanian, brakeman; Nathaniel Rollins, Barbadian foreman; Joseph Williams, St. Lucian, laborer. They will recover.

Chame Light Service.

Lightning struck the lighthouse at Chamé Point on the night of July 3, and shattered the light and substructure. This was one of the five 8-day coal oil lights established between Balboa and the sand boats at Chamé to guide the tugs in the Pacific Division sand service. It was a white light on a wooden tower 30 feet high, and the range of visibility was 20 miles.

At Melones Island, the Commission has a double white light on a post; on Tortolita a single fixed white light and house; off Tortolita, a double horizontal white light on floating buoy; on Changarmi Island, a double white light on a post.

Installation of Officers.

At a meeting of Local Union, No. 677, I. B. E. W., held at Gatun, Sunday, July 9, the following officers were installed: President, W. E. Mitchell; vice-president, Sam King; recording secretary, A. M. Harle; financial secretary, C. J. MacNelley; treasurer, A. Woolnough; first inspector, W. E. Kemper; second inspector, C. F. Smith; foreman, F. Metzger. President Mitchell delivered a short lecture on "Multiple unit control," after which refreshments were served.

Obituary.

Marie Emile Pierre Gey, French vice-consul at Colon, died at Ancon Hospital on Thursday, July 6, from a stroke of paralysis. He was a native of France, born April 8, 1852, and had been connected with the French consular service on the Isthmus, in various capacities, since June 1, 1892, with the exception of about six years, during which period he was consular clerk at Sierra Leone, and later, vice-consul, at Las Palmas, Spain. He was an employe of the first French Canal Company in the '80s., and later became interested in one of the contracts for canal excavation at Pedro Miguel.

SPILLWAY REGULATING GATES.

Description of Gates for Controlling Surfaces of Gatun and Miraflores Lakes.

Twenty-two spillway gates to regulate the surface of Gatun and Miraflores Lakes, and caissons to ensure a means of repairing these gates, are part of the material advertised for in Circular 636, bids on which will be opened at the Washington office on July 24. These gates will be mounted on the spillway dams at Gatun and Miraflores. Delivery is desired by October 1, 1912.

The Spillway of Gatun Dam is a concrete lined channel, which runs through a hill about midway between the ends of the dam. It is 280 feet wide, but at the upstream, or lake end, widens much as a flat bottle does at the point where the neck joins the body. Across this wide part, at the south end of the channel, a concrete dam is being built in ogee form, with its crest on the arc of a circle. This dam is 630 feet long on the crest line across the channel, 93.04 feet wide from heel to toe, and the crest will be 69 feet above sea level, or 16 feet lower than the normal level of the lake. On the top of this dam will be the regulating works, the main part of which are the sluice gates of the Stoney type. An article in THE CANAL RECORD of September 8, 1909, gave details of Gatun Spillway, with drawings, showing the location of the regulating works.

After study of the maximum flow to be cared for, and the probable rate of discharge over the dam, it has been determined that 14 gates, each 45 feet wide, with sill elevation at 69 feet above sea level, will give absolute control of the lake under all possible conditions. The top of these gates, when closed, will be 88 feet above sea level, and the bottom, when they are open, will be at 92 feet. Since little drift will have to be taken over the spillway dam, owing to the large size and irregular outline of the lake, and the prevailing direction of the winds, the opening at elevation 92 will allow any drift that may reach the dam to pass over.

At Miraflores, there will be a straight concrete dam of ogee section, 432 feet long on the crest, connecting the east wall of the upper locks with the rock in the side hill. The crest will be 38.67 feet above sea level, 16 feet below the ordinary level of Miraflores Lake. On this dam, as at Gatun, the regulating gates will be erected between concrete piers, eight gates being required, each closing an opening 45 feet wide. The gates may be lifted 23 feet, allowing a maximum flow of 92,000 cubic feet per second. An article, with drawings illustrating the structure of Miraflores spillway, and showing the location of the regulating gates, was published in THE CANAL RECORD of September 28, 1910.

GATES.

The gates will be identical in size and construction for both spillways, and will be of the Stoney type, traveling on two roller trains, which will run on a track located in a niche $15\frac{1}{2}$ inches deep in the sides of the piers. Each will consist essentially of a system of horizontal girders, vertical end posts, cross frames, and intercostals, forming a skeleton, and of steel plate sheathing, extending from top to bottom on the upstream side of the gate. In each gate there will be three vertical frames, built in between the horizontal girders, and extending from the bottom to the top of the gate. Each will be 46 feet $3\frac{1}{2}$ inches long 19 feet high, and will weigh $42\frac{1}{2}$ tons. It will have a range of motion of 22 feet 6 inches, and, while in operation, must stand a maximum head of 18 feet. At each end, on the downstream side of the posts, the gates will be provided with a rocker-bearing device to equalize the distribution of pressure on the roller train bearings. The gates will have a play of from $\frac{1}{4}$ to 3-8 inch upstream from bearings, and of $\frac{1}{4}$ inch lengthwise of the leaf. A water-tight seal will be accomplished by vertical seals of the spring type moving along finished surfaces on castings in the walls of the piers, and on the bottom, by the lower edge of the face of the gate sheathing and bottom angle coming in contact with a babbitt strip, placed in a casting across the crest of the wiers.

In both the spillways, the operating machinery will be erected in a tunnel in the concrete dam. This machinery forms a separate contract. Two valves of the Stoney type, but of the size to be used in the locks, are being tested at Gatun to determine their efficiency, and the tests will be completed before the construction of the spillway gates is begun.

CAISSONS.

Two caissons will be required, one for each spillway, but they will be interchangeable, and may be towed through the Canal, so that both may be used at one place, if desired. Their office is to form a dam across the apertures on the upstream side of the gates, and to this end, a proper bearing for them will form part of the construction of each pier and the sill. Each caisson will consist of a framework of vertical frames and horizontal steel girders, which will support a system of intercostals to form the skeleton, and, over this framework, steel sheathing plates will be riveted to form a water-tight box. The deck will be of yellow pine, and the keels and sills of white oak. In the bottom of each caisson, there will be a monolith of concrete for ballast, 2 feet $6\frac{1}{2}$ inches thick, with a sump for the suction pipe of the pump. On this permanent ballast will be a layer of concrete blocks, 8 inches square by 6 inches, which can be moved as required to provide suitable adjustment of amount and position of ballast. The caisson will be filled through one 10-inch and two 4-inch pipes fitted with valves. Each caisson will be fitted with a horizontal, hand-operated force pump, 6-inch stroke, 3-inch diameter bottom suction, $2\frac{1}{2}$-inch discharge, and will be brass lined throughout.

The caissons will be 49 feet long, and 24 feet 4 inches high, and will be erected on the bank of the lake ready for launching. When used, they will be towed light to the seats provided for them in the piers of the regulating gates. When in position, they will be lowered by opening the valves, allowing them to fill with water.

BRIDGES.

The bridges will connect the piers in which the gates are erected, making a footway across the top of the dams, thus giving easy access to the gates and piers, and affording a convenient means of crossing the spillway. Each span, or bridge, will be built of two plate steel girders, bolted to cast iron seats in the concrete of the piers or abutments. Upon these girders will be fastened checkered steel plates, forming a walk, or floor. Each bridge, or span, will be 45 feet long, and 3 feet wide, and the heaviest member will weigh only 4,300 pounds, and will, therefore, be easily removable. The total weight of the 22 bridges will be about 215 tons. Across the top of each dam, in two parallel lines, will be erected galvanized, wrought iron railings to guard the passageway.

Crane Accident.

On July 3, five Western dump cars were being placed on a track in the forebay at the Miraflores Locks, and failed to uncouple. When the engine backed up a second time to uncouple, a pin was drawn by the brakeman before the cars stopped, and they struck a locomotive crane belonging to the McClintic-Marshall Construction Company, knocking it over the mitre wall. The crane can be repaired.

PERSONAL.

Major Edgar Jadwin has returned to the Isthmus to await the arrival of orders directing him to take command of the Nashville and Chattanooga engineer districts, with headquarters at Nashville.

Knights Templar.

All Knights Templar and 32-degree Masons on the Isthmus are requested to forward their names to secretary, Panama Shriners' Club, Gatun.

F. H. WANG, *Secretary.*

Empire Ladies' Auxiliary.

On Friday, July 7, the ladies' auxiliary of the Empire Christian League held a missionary meeting in the chapel, when the guest and speaker was Miss Blackmore, who has been engaged in missionary work in Nicaragua for eight years. The auxiliary held a public meeting on Tuesday evening, July 11, when Miss Blackmore was again the speaker. The offerings at these meetings were presented to Miss Blackmore for use in her work. On Sunday evening, July 30, the auxiliary will hold a missionary meeting in the chapel, beginning at 8 o'clock, when the following program will be given: Hymn, by the congregation; devotional, Mrs. H. A. A. Smith, leader; song, "The Christian Flag," by Mrs. Helmer, assisted by a class of girls; exercise, by seven little girls; review of the study work of the year, by the leaders, Mrs. Stephen Witt, Mrs. A. A. Nellis, and Mrs. Glaw; missionary hymn, by the auxiliary; recitation, Miss Phyllis Kelly; offering; hymn, by the congregation; closing prayer. The offering will be devoted to missionary work in the Canal Zone. At the recent sale held at the clubhouse, the sum of $16 was made. The auxiliary has completed the study of the book "Western women in Eastern lands," and will begin a new work at the meeting on August 4. The meetings of the organization are held on the first and third Fridays in each month; the program on the first Friday is devoted to the study of mission work, and on the second, the program consists of miscellaneous papers on various topics.

Steam Shovel and Dredge Men.

Local 19, I. B. of S. S. and D. M., will hold their regular meeting on Sunday, July 16, at Empire lodge hall at 12.15 p. m. All members are expected to attend.

A. EDMONSON, *Secretary and Treasurer.*

Rodmen and Levelmen.

The examination to test the fitness of rodmen and levelmen for promotion, announced to be held at Culebra on Sunday, July 16, has been postponed to Sunday, July 23.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The Gatun Woman's Club held a social meeting on Thursday afternoon, July 6, when a program was given, consisting of a piano selection by Miss Neville, songs by Mr. Smith, and a series of charades under the direction of Mrs. John Murray, assisted by Miss Teese. Following the program, refreshments were served. This meeting marked the close of the club year. Officers were elected for the ensuing year, as follows: President, Mrs. W. H. Allen; vice-president, Mrs. W. M. Martin; secretary, Mrs. George H. A. Barte; treasurer, Mrs. J. F. Hanna. The opening meeting for the next club year will be held on October 5.

Baptist Church Extension Work.

The new Baptist church building in Empire, the corner stone of which was laid in April, is completed. The building, which is located near the market, is a frame structure, with a seating capacity of 150, and cost $600. It is sufficiently furnished for the conduct of public worship, and, as soon as funds are available, a bell and baptistery will be added. This is the third building to be constructed under the pastorate of the negro representative of the National Baptist Convention. The church in Panama will celebrate its third anniversary on July 16. The preacher at the morning service will be the Rev. Harry Compton, pastor of the Methodist Episcopal Church in Panama, and the Rev. Carl H. Elliott of the Cristobal Union Church will preach at 3 o'clock. The church has recently installed a new organ, which was purchased for $500. The Panama Baptist Church is organized with 260 members. The second church is located at Pedro Miguel, and has an organized congregation of 50 members. The new church at Empire has a membership of 35.

Adventist Church in Colon.

The members of the Seventh Day Adventist Church, Colon, are desirous of erecting a new church and mission building to replace the one destroyed by fire in March, as soon as funds are in hand to undertake the work. An appeal, for the purpose of raising the money, has been issued, and it is desired that all who are interested in the work send their contributions to the special secretary, fire relief fund, Room 1, House 140, Cash street, Colon, or to the pastor of the church, H. C. Goodrich, Colon, or to the secretary of any Commission clubhouse, designating, in this case, the purpose for which the contribution is made.

Fourth of July Events.

Between eleven o'clock in the morning and five o'clock in the afternoon, 4,200 lunches were served by the committee in charge of the free lunches at the Fourth of July celebration in Cristobal.

In lawn tennis, the singles were won by Fechtig of Ancon, who defeated Ross of Ancon, by the following score: First set, 1–6; second set, 6–4; third set, 3–6; fourth set, 4–6.

The other contests resulted, as follows:

ATHLETIC EVENTS.

Pole vault—De Cora, 10 feet 4 inches, Barcroft, 10 feet 4 inches; Sims, 8 feet 10 inches; tie jump won by De Cora.

Discus throw—Herring, 107 feet 8½ inches; Sollenberger, 98 feet 11 inches; Shaffer, 98 feet 2½ inches.

Shot put, 12 pounds—Herring, 45 feet 7¼ inches; Sollenberger, 42 feet 1¼ inches; Shaffer, 35 feet 9½ inches.

High jump—R. A. Koperski, 5 feet 3 inches; Clark, 5 feet 2 inches; L. Koperski, 5 feet 1 inch.

Broad jump—Herring, 20 feet 9 5-8 inches; Sollenberger, 18 feet 9 5-8 inches; Feld, 18 feet 1 7-8 inches.

100-yard run, boys—Jadwin, Lincoln, Warner; time, 12 2-5 seconds.

Boys' relay—Won by Gatun.

100-yard low hurdles—Kenealy, L. Koperski, Robitoy; time, 13 2-5 seconds.

100-yard run—Fitts, Earle, Robitoy; time, 11 2-5 seconds.

220-yard run—Herring, Tupper, Fitts; time, 25 seconds.

440-yard run, less 30 yards—Edwards, Meyers E. L. Koperski; no time taken.

880-yard run, less 60 yards—Scherzberg, Mangle, Russell; time, 2 minutes, 5 seconds.

One mile run, less 120 yards—Scherzberg, Butt, Koehler; time, 4 minutes 39 4-5 seconds.

One mile relay, less 120 yards—Won by the Ancon team, consisting of Edwards, Fitch, Kenealy, and Scherzberg; no time taken.

Wall scaling contest—Marine Company C, second team, 53 1-5 seconds; Marine Company C, first team, 1 minute 5 4-5 seconds; *Paducah* team, 1 minute 11 3-5 seconds.

Sack race, 50-yard—Guy Morrison, G. E. Scnlager, Ed. Otis; time, 17 2-5 seconds.

Potato race—Won by boys' team; time, 37 4-5 seconds.

Fat man's race—C. B. Sexton, E. Hunderlack; time, 15 seconds.

Three-legged race—Parkis–Mayhew, Wood–Morrison, Fee–Ray; time, 17 1-5 seconds.

Points by teams—Ancon, 38; Gorgona, 26; Culebra, 22; Camp Elliott, 6; Empire, 5; Cristobal, 4; *Paducah*, 1. Boys' races—Gatun, 13; Culebra, 1.

AQUATIC EVENTS.

Sailboat race, triangular course—J. Langenfeldt, *Caribbean*; Willliam J. Burn, *Cristobal*.

Aquatic boxing contest, four rounds, A. A. U. rules—J. S. Wilson, Cristobal.

U. S. Navy steam cutter race, triangular course, about five miles—Launch *Ruth*.

Swimming contest for men, distance, 100 yards—Harry Cooling, Gatun; A. V. Mitchell, Porto Bello; Joseph Mitchell, Gatun.

Life-boat race, class 2, four-oared, single scull, and coxswain, two miles; from off Pier 11, around buoy and return—W. J. Dempsey and crew of the *Phoenix*, first; Charles McCabe and crew of the *Carribbean*, second.

Canoe race from buoy off Pier 11, around buoy off Pier 13, and return, single scull—J. L. Greene, Cristobal.

Gasoline boat race, class 1, lengths 28 feet to 38 feet, from Pier 11, around buoy in bay and return—Quartermaster's Department launch.

Cutter race—Cutters from U. S. S. *Paducah*, Nos. 1 and 2. No. 1 won the race.

Life-boat race, class 3, two-oared, single-scull, and coxswain, one mile, from off Pier 11, around buoy in bay and return—M. O. Peterson, barge 16; E. Erickson, barge 15.

Relay swimming contest, four men, off Pier 11, 100 yards—Porto Bello team, consisting of J. E. Carpenter, captain; A. V. Mitchell, G. L. Bowes, J. F. Everett, won.

Gasoline boat race, class 2, less than 28 feet long from off Pier 11, around buoy in bay, and return—Launch *Anna*, Karl Edholm, Nombre de Dios.

Fancy diving contest—J. Fehrman, *Paducah*; H. N. Sollenberger, Culebra; A. V. Mitchell, Porto Bello.

Dory race, four-oared, double scull, from off Pier 11, around buoy in Limon Bay, and return—Erickson, and Benson, first; Coe and Walters, second; Parsons and Parsons, third; *Paducah* team, fourth.

Human duck hunt, four-oared yawl or whaleboat, and coxswain, chasing one man in dory or small boat, who was given 50 yards start—Erickson and crew, first; S. Benson, second.

Swimming contest for boys, 100 yards—P. C. Geyer, jr., Ancon; C. C. Jadwin, Gatun; Joe Burgoon, Colon.

Tub race, with shovels, 50 yards—T. Jones of the *Mariner* first; A. Fraser, Cristobal, second.

Greased horizontal spar, 60-foot long, supported on lighter off Pier 11; winner to leave lighter, go to end of spar, and return—Edward Atkins, Gatun.

Life-raft race, with shovels, six men to raft, three on a side; 75 yards and return—H. Cooling's team, Gatun.

The entertainment and amusement committee for the Fourth of July celebration of 1911 desires to express its appreciation of the services rendered on that day by the Marine Band. It also desires to tender thanks to Sergeant Allen and twenty privates of the Marine Corps, who ably assisted the decorating committee on July 2 and 3.

The chairman of the decorating committee, Mr. W. F. Shipley, has requested that it be announced that Mr. Frank Jury, of the Quartermaster's Department, Cristobal, had active charge of the designing and planning of the decorations.

The chairman of the committee begs to thank all the chairmen of subcommittees for their cordial cooperation and support, and especially Mr. W. F. Shipley, chairman of the subcommittee on decorations; Captain C. J. Anderson, chairman of the subcommittee on aquatic sports; and Mr. F. A. Gause, chairman of the subcommittee on exercises by the schoolchildren.

W. G. Comber, *Chairman.*
Entertainment and Amusement Committee.
Balboa C. Z., July 5, 1911.

Any one who wishes to have a program of the day's events to preserve as a souvenir can obtain it at the office of any district quartermaster.

Rifle Match.

The Canal Zone Rifle Club, held its second shoot on July 9, for the challenge cup, with the following results:

Walraven	178	Brong	162
Kane	156	Shade	161
Green	155	Dancause	159
Casper	152	Lehon	156
Taylor	143	Gallager	149
Blaisdell	142	Desh	147
Kennedy	135	Miller	146
Cappers	129	Cook	144
Phenix	127	Stackhouse	143
Afferman	70	Dowling	142

Red Cross Finances.

The financial statement of the Red Cross for the month of June follows:

RECEIPTS.		
June 1, On hand		$2,663.86
June 17, From W. L. Shipley, further proceeds of ball game for benefit of Colon fire sufferers	4.00	
June 30, Membership dues during June	2.00	
Total receipts		$2,669.86
DISBURSEMENTS.		
June 15, Relief of destitute Englishman, Colon	25.00	
June 15, Relief of destitute family, Empire	50.00	
June 17, Relief of wife of disabled employe, Culebra	10.00	
June 17, Deportation of Dominican woman, Colon	30.00	
June 26, Postage	2.00	
June 29, Loaned woman at Empire, pending proper signature of husband's pay check	32.95	
June 30, Payments a/c Colon fire	20.00	
Total disbursements		$ 169.95
June 30, Balance on hand, in general fund	$2,292.45	
June 30, Balance on hand, in Colon fire fund	207.46	
Total balance on hand		$2,499.91

John L. Phillips, *Treasurer.*

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Empire, C. Z., on Sunday, July 16, at 5.45 p. m. The program follows:

1 March—*The Conciliator* .... Scouton
2. Selection—*The Girl of My Dreams* .... Hoschna
3. Waltz—*Gaite* .... Waldteufel
4. Intermezzo—*The Dawn of Love* .... Bendix
5. Overture—*Norma* .... Bellini
6. Request Number—*Sextet from Lucia* .... Donizetti
7. Selection—*Robin Hood* .... De Koven
8. Idyl—*Garden of Roses* .... Pratt
9. Popular Number—*On, Wisconsin* .... Purdy

Oliver Kimball, *Acting Musical Director.*

The next concert will be given at Gorgona, C. Z., on Sunday, July 23.

Married.

TANNEHILL–GWYNNE—At Anconcita, in Ancon, on July 10, Jean Susan Gwynne to John Wesley Tannehill, Rev. J. L. Bicknell officiating. Canal Zone residence, Ancon.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

A social organization, known as the "Hot hand society," has been organized at Corozal, with the following officers: Royal mut, J. E. Conn; secretary and treasurer, G. E. LeMire; chief executioner, M. E. Beall; assistant chief executioner, O. E. Bath. One of the objects of the club will be to increase the membership.

Basketball practice is held Monday and Friday nights, and it is expected to develop a strong league team.

CULEBRA.

The high duckpin scores for last week are, as follows: Huttlemaier, 111, 110, 109, 107, 105, 103, 101, 100, 100, 100; Case, 102, 101, 100; Silver, 103, 102, 101; Conlon, 112, 104; Mengel, 115; Cornthwaite, 102.

A basketball game between representative teams of the hotel and Administration Building last Thursday, resulted in a score of 39 to 27 in favor of the office men.

EMPIRE.

An informal "smoker" was given in honor of the return of the secretary of the clubhouse, Saturday evening, July 8. There were short speeches by Messrs. Warr, Clear, Nellis, and Dickson; Messrs. King, Dohrmann, Conner, Newbold, and Ross contributed musical numbers; and Mr. Vetall a buck and wing dance. There were refreshments and cigars, and an orchestra played throughout the evening. M. A. Hall was master of ceremonies.

The following high scores were rolled during the past month: Bigpins—Sawtelle, 202; Parkis, 219, 200, 213; Potter, 210; duckpins—Mason, 110; B. King, 100; Corning, 103.

Gymnasium classes were started again this week. All interested in physical exercise are requested to confer with Mr. Warr for particulars.

GORGONA.

There will be an old-fashioned home social on Thursday night, July 18, consisting of vocal and instrumental solos, recitations, and music by the Camp Elliott orchestra. Pumpkin pie and cocoa will be served. Members and their families will be admitted free, and nonmembers will be charged fifteen cents admission. Every person in town is invited, and a good time is promised for all.

The 200, and over, bowling scores for the month of June are, as follows: Bordt, 210, 205, 205; J. Orr, 247, 245; Stoehr, 202; Weigold, 208; Haldeman, 202.

The 100, and over, duckpin scores for June are, as follows: Sims, 100, 109, 101, 108, 106, 100, 112; Dunlop, 105, 105, 111; Haggerty, 104, 122, 112; Davenport, 105; Davis, 105; J. Orr, 108; Misal, 101; Duensing, 101; Atkins, 101, 108.

GATUN.

In the presence of a large number of the members on Thursday night, July 6, Secretary Smith formally presented to Louis DePoorter a gold medal, bearing the inscription "Champion pool player of the Canal Zone." The medal was given by the Canal Zone Y. M. C. As. in recognition of Mr. DePoorter's having won the recent interassociation pool tournament. It is on exhibition at the clubhouse.

Four hundred people attended the entertainment on Friday night, July 7, given as a benefit performance. The program was, as follows: Chorus, "Rainy day," schoolchildren; contralto solo, Miss Sloan; black face sketch, Mr. Shailer; equilibristic feats, Mr. Chatfield; soprano solo, Mrs. Hughes; Mexican national dance, Miss Cummings; violin solo, Miss Johnson; bass solo, Mr. Case; contralto solo with violin obligato, Miss Sloan and Miss Johnson; recitation, Miss Foster; accompanist, Mrs. M. H. Thatcher.

C. R. Ray, banjo player of Porto Bello, gave a recital at the clubhouse on Saturday night, July 8. About 150 people were present. Cigars and refreshments were served during the evening.

The following members of the literary club participated in the discussion, "Government ownership of railroads," held on Wednesday, July 5: Messrs. Gilkie, Waid, Thorwalson, Fox, and Barte.

Dr. Orenstein's second lecture before the "Life problem" club on Sunday evening, July 9, drew a crowd of men that packed the game room, where the lecture was held.

The "Rosselots" defeated the "McLains" in a game of duckpins played on Wednesday evening, July 5.

Tuesday and Friday nights will be set aside in the future for basketball practice.

CRISTOBAL.

The basketball game on Friday evening, July 7, was won by Luce's team by the score of 17 to 8, as follows:

Kavan's team—Poore, G., 1 foul; Cousineau, G., 1 foul; Guptil, C., 7 fouls; Ford, F., 1 foul goal; Kavan, F., 3 goals, 2 foul goals.

Luce's team—Schwallenberg, G., 6 fouls; Thomas, G., 2 fouls; Jordan, C., 1 foul; Luce, F., 1 foul, 5 goals, 1 foul goal; Simons, F., 2 fouls, 2 goals, 1 foul goal.

High scores for the week ending July 8 were, as follows:

Duckpins—Wood, 108, 101, 100, 103; Barrett, 104, 102; Jacques, 100, 103, 100; Gibson, 111, 108; Louch, 106, 105, 104, 103; Wheeler, 105, 106, 103; Furlong, 104; Orr, E., 105; Hess, 100;.

Tenpins—Furlong, 200, 214, 210, 221; Blackburn, 222; Bullard, 201, 228, 200, 211.

The following is the result of the match between Gatun and Cristobal:

CRISTOBAL.				
Bullard	150	200	211	561
Louch	188	150	139	477
Total				1,038
GATUN.				
Hodges	174	181	150	505
Greene	124	134	101	359
Total				864

Work of Unloaders in June.

The following is a statement of the number of Lidgerwood cars unloaded by the Central Division during the month of June:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	3	1,042	20,840
Miraflores	3	750	15,000
Gamboa	4	1,099	23,079
Total	10	2,891	58,919

OFFICIAL CIRCULARS.

Rate of Pay for European Laborers.

CULEBRA, C. Z., July 5, 1911.

CIRCULAR No. 229-R:

Effective this date, European laborers will be paid twenty cents gold per hour from the date they enter the service. Only able-bodied men, not under twenty-one years of age, will be accepted at this rate.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Commissary Coupon Books.

CULEBRA, C. Z., July 8, 1911.

CIRCULAR No. 256-D:

Effective this date, the provision of Circular No. 256, requiring that commissary coupon books needed during the month shall be obtained, as far as practicable, at one time, is suspended, and, until further notice, requests for commissary coupon books may be made by employes at any time during the month, subject to the restriction as to the issue of such books on the last two and the first four days of each month. In all other respects Circular No. 256 will continue in force.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Signatures on Pay Certificates.

EMPIRE, C. Z., July 1, 1911.

To All Departments:

I regret to inform you that there seems to be a general lack of care in signing pay certificates, for which timekeepers are responsible, especially in the following particulars:

1. On both gold and silver rolls sufficient care is not taken to see that signatures agree with the name written in the body of the receipt.

2. On silver rolls, men designated as clerks present pay receipts signed by mark, which, on the face of it, is contradictory, for, if they are clerks, and are not able to sign their names, they are not competent as such.

It is impossible for the pay force to catch this at time of payment, but certainly timekeepers are aware that these men, with whom they are daily working, are carried as clerks, and their autographic signatures required. This has necessitated the rewriting of many tickets, and their return each month for proper signature after payment. The fact that they continue to be presented is absolute evidence that there is not sufficient care used in the timekeeping offices.

A great many of the timekeepers are especially careless in signing pay certificates by mark, writing the name wrongly, or in such a careless manner as to be practically illegible, and, in place of writing legibly $\left\{\begin{array}{c}\text{His}\\ \text{X}\\ \text{Mark}\end{array}\right\}$ will simply make some lines which cannot be identified as "His mark" at all. These words must be plainly written out in the manner prescribed in the timekeeping instructions for mark signatures, as covered in Section 123.

In order not to delay payment, a great deal of this careless work has been passed on the pay car, which necessitated the making of hundreds of new tickets and their return, after payment, for proper signature. This should not be, and the amount of careless work at the present time shows that our past practice has simply resulted in an increase of carelessness. Attention is invited to the fact that, in future, all such pay certificates presented for payment will be promptly returned to the timekeeper for rewriting of pay certificate and proper signature. Delay to the work, and dissatisfaction incident thereto, will be prevented by the timekeepers using care in seeing that pay receipts are properly signed before presentation.

Kindly see that every one concerned has due notice in your department.

Respectfully,
EDWARD J. WILLIAMS, *Disbursing Officer.*
Approved: GEO. W. GOETHALS, *Chairman.*

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, July 8, 1911. All heights are in feet above mean sea level.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending July 8:

Cristobal, July 1, from New York, with 41,520 barrels cement for Atlantic and Pacific Divisions.

Peru, July 2, from San Francisco, with 675 pieces lumber, for stock.

Turrialba, July 6, from New Orleans, with 143 pieces lumber, 52 packages switch stands, 5 cases clamps, 5 pieces castings, for stock; 24 pieces castings for (Balboa store) Pacific Division; 12 packages springs for Atlantic Division.

Almirante, July 7, from New York, with 60 bales oakum, 250 bundles wire, 10 reels steel cable, 100 drums kerosene, 5 cases steel tubing, for stock.

San Mateo, July 7, from Philadelphia, with 155 drums gasoline, for stock.

Advance, July 7, from New York, with 12 bundles leather, 78 drums oil, 150 bundles wire, 24 crates stove pipe, 150 cases soap, 5 cases fusees, 200 cases sapolio, 218 kegs rivets and bolts, 42 cases lanterns, 40 pieces lumber, for stock; 317 pieces castings for Mechanical Division; and a miscellaneous cargo, the whole consisting of 1,290 packages, weighing 105 tons.

Misdirected Letters.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of addressee:

Baron, F. A.
Barton, R. C.
Brown, Warren E.
Burrow, J. O.
Coleman, Miss Mabel
Cunningham, J. A.
Curtis, Karl P.
Dauphine, E. C.
Donir, C. L.
Droughom, Coar
Duncan, Charles
Fitzgerald, Joseph S.
Flaherty, Michael
Hamilton, A. H.
Healey, S. W.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago de Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on July 12, and August 9; and for Port Limon at 5 p. m., on July 12, July 26, and August 9.

The Leyland line steamer *William Cliff* sails for New Orleans, via Port Limon, on or about July 29.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JULY 19, 1911. No. 47.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of June is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of Canal work in all departments and divisions.

Work North of Gatun Locks.

Work has been begun on a coffer-dam which will be built across the north end of the lower lock at Gatun to prevent water from entering the lock pit during the removal of an earthen dike, containing about 500,000 cubic yards of material, which now serves as the only barrier. The arrangement will also permit of an uninterrupted continuance of operations within the lock while the removal of the dike is in progress. The site of the dam will be at the caisson sill of the lock, and the structure will be built of sheet piling, caulked and battened, supported by concrete piers, 43 feet high and 18 inches thick, spaced 10 feet from center to center It will be of sufficient strength to resist a 40-foot head of water, which is about the depth of the existing artificial basin, north of the lock. When the dam is completed, a suction dredge will be brought up the French canal and through a small channel connecting it with the basin, and set to work on the dike, the material being wasted to one side. When the dredge has finished operations, it will be removed, the open water channel closed, and the pit unwatered and cleaned out, after which, the work of constructing the approach wall can be started. There will be no further use for the coffer-dam after the water has been pumped out of the basin, and it will be taken down, the piers being blasted to pieces.

Hardwood Ties.

About 8,000 hardwood ties have been received by the Panama Railroad Company to date, for use on the permanent line. These ties are purchased in Colombia, and are shipped via the Royal Mail Steam Packet Company's vessels from the ports of Savanilla and Barranquilla. The majority of the ties are hewn from guaiacum, or lignum vitae, but three other classes of hardwood are accepted, namely, polvillo, corteza, and balsamo. On account of the hardness of the wood, the ties have to be bored for the spike. A special tie-boring and gaining machine is used, which adzes two parallel faces to form the seat for the tie plate, and bores a hole to receive the spike. A patent tie plate and screw spike are used. This equipment holds the rails to absolute gage, and guards against a tendency for the rails to spread. A good many of the softwood ties on the permanent track between Panama and Corozal have been replaced with hardwood, and the same equipment has been extended to other sections of the permanent, or relocated line, where 90-pound rails are being laid.

Dredge No. 6 to be Raised.

After raising, an attempt will be made to repair ladder dredge *No. 6*, which sank on June 19, in the Canal channel, near its intersection with the French canal. In going down, the vessel turned over on its side, and now lies in such a position that its tumblers are lower down than the hull, making its raising a difficult matter. The dredge has been in service for the greater part of 26 years, and many of the plates in its hull were in bad condition. It was valued at $35,000.

Widening Stalls in Panama Railroad Corral.

One hundred and forty-four stalls, out of a total of 256, in the Panama Railroad Company's corral on the Mount Hope road, will be widened from four feet to five feet four inches, by removing every fourth post and partition. The change is made to furnish better accommodation for the larger animals, and it will reduce the number of stalls in this part of the corral from 144 to 108, a loss of 36. This is partly offset by an increase in the monthly rental from $2.50 to $3, the net monetary loss, providing all the enlarged stalls are occupied, being $36 monthly. The remaining 4-foot stalls, to the number of 112, are principally rented by East Indian and colored cartmen, whose animals are uniformly undersized, and have plenty of room in their present accommodations.

Visit of the Secretary of War.

The Secretary of War, Henry L. Stimson, accompanied by Mrs. Stimson, his secretary, W. R. Pedigo, and Brigadier General Clarence Edwards, Chief of the Bureau of Insular Affairs, arrived on the Isthmus on the *Santa Marta*, July 13, and is the guest of Col. Goethals at Culebra. On July 13, he walked through the south half of Culebra Cut from Pedro Miguel Locks to Empire, and climbed the 106 steps that lead from the excavation to the hill on which the division office is situated. That afternoon, he made a formal call on President Arosemena in Panama. On July 15, he walked through the north half of Culebra Cut from Empire to Matachin, and that evening attended the benefit for the sufferers from the wreck of the steamship *Taboga* at the National Theatre in Panama. On July 17, he spent the morning at Gatun Locks and Dam, and in the afternoon attended a reception in honor of himself and Mrs. Stimson, tendered by President Arosemena at the Presidencia in Panama. On July 18, he inspected the work at the Atlantic entrance to the Canal, and in and about Colon. On July 19, he will inspect the work of the Pacific Division. It is planned to leave the Isthmus on the battleship *North Carolina*, now at anchor in Limon Bay, on Sunday, July 23, for Porto Rico, whence the Secretary and his party will go to Havana, making a short stop en route at Santo Domingo. Brigadier General E. H. Crowder, Judge Advocate General of the Army, who arrived on the Isthmus on July 18, will accompany Secretary Stimson to Porto Rico and Cuba.

Atlantic Terminal Work.

Two lines of trestle have been started, the work of filling has been begun, and the first of the steel cylinders for the dock foundation is being driven in connection with the construction of the Atlantic terminal at Cristobal. One of the trestles has been extended for a distance of about 1,000 feet into the harbor, following the line of the proposed mole; the other parallels the water front, and extends along the site of the first of the five reinforced concrete docks.

The material for the fill is obtained from one of the small hills, east of the Mount Hope road, where a borrow pit was recently opened. One steam shovel is now at work there, and another will be added as the filling increases. Three trains are employed in transporting the material, and about 1,400 cubic yards are excavated and dumped daily, the greater part of it at present, however, being used in making the fill back of the new sea wall on Colon beach. The material procured from the hill is a mixture of earth and argillaceous sandstone.

The work of sinking the preliminary steel cylinder was begun on Monday, July 10, on the site of the first dock. The method employed is to sink a 25-foot section of the cylinder into the bottom of the harbor, then to bolt on a 5-foot section, driving it down until the top is about two feet above water level, and repeating the operation. The cylinder is forced downward by the blows of a pile driver hammer striking a hardwood buffer placed over the top of it. The steel sections, now used, are put together at Gorgona shops, but the greater part of this material will be purchased in the States, assembled there, and shipped to the Isthmus ready to be bolted on. The present cylinder is being driven through a coral rock formation, and will reach solid bottom at a depth of about

NOTES OF PROGRESS.

(*Continued.*)

46 feet. When sunk, the material from the inside will be removed, and the space filled with concrete.

A track system in connection with the dock construction work has been laid from the Cristobal yards, through a section of the settlement, to the beach, where the track branches off, one line going out on either trestle. A temporary track has also been laid along Roosevelt avenue, thereby closing it to traffic, for the purpose of removing the concrete blocks, which formed a protection wall along the Cristobal water front. Some of these blocks are being put to temporary use in front of the proposed sea wall on Colon beach, to form a barrier against heavy seas while the work is going on. They will be returned, after they have served their purpose, and used with the others in making a facing on the land side of the new docks.

A new 13-lever interlocking plant, which will operate five switches, three locks, and six signals, has been installed at Cristobal, in connection with the track system, and another 8-lever plant will be established near the line leading out from the borrow pit.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 64 per cent completed, 145,542 cubic yards, out of a total of 225,000, having been placed at the close of work on July 15. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
July 10	306	8.15	1
July 11	156	6.00	1
July 12	220	8.00	1
July 13	220	7.10	1
July 14	221	7.30	2
July 15	226	7.30	1
Total	1,349	44.25	1.17
Previously reported	144,193		
Grand total	145,542		

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending July 15, follows:

DATE.	Hours worked.	Cubic Yards.
July 10	7.00	2,613
July 11	7.25	2,735
July 12	8.00	2,878
July 13	7.00	2,116
July 14	5.40	2,379
July 15	6.40	2,434
Total	41.45	15,155

Stowaways Become Canal Laborers.

Sixty-five stowaways, 52 from Trinidad, and 13 from Barbados, were brought into port at Colon on Thursday, July 13, by the *Atrato* of the Royal Mail Steam Packet Company. Under the Panamanian immigration law, adult immigrants, except contract laborers for the Canal work, must have $15, United States currency, or its equivalent, in their possession before being entitled to land. The stowaways could not comply with this requirement, and the agent of the steamship company gave a bond of $100, United States currency, for each of them. In the transfer to shore, seven managed to make their escape unseen, and the bonds in their case, aggregating $700, became forfeited. The remaining 58 men were kept in the railroad warehouse under police surveillance until Friday afternoon, when the Quartermaster's Department of the Canal Commission offered to take them over, provided all charges against them for passage, and other expenses, were removed. The offer was accepted, and the men were assigned to work.

The *Atrato* also brought 50 contract laborers, recruited in the West Indies, for the Canal force. This is the first lot of laborers to arrive on the Isthmus under contract since January, 1910.

CONCRETE WORK IN THE LOCKS.

About 58 per cent of the concrete for all the locks is in place, the amount at the close of work on July 15 being 2,444,131¼ cubic yards, out of a total of approximately 4,284,400. A total of 30,515¾ cubic yards of concrete was laid in the locks during the week ending July 15.

GATUN LOCKS.

Over 70 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of the work on July 15 being 1,461,225¼ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each working day for the week ending July 15, and of the total, follows; and a similar statement for the work in the Spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Previously reported								1,443,415
Grand total								1,461,225¼

*The 342½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: July 10th, 50; July 11th, 50½; July 12th, 66; July 13th, 39½; July 14th, 82; July 15th, 54½.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is about 81 per cent completed, 684,456 cubic yards, out of a total of 837,400, having been placed at the close of work on July 15. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixer.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

MIRAFLORES LOCKS.

About 22 per cent of the concrete for the system of two twin locks at Miraflores was in place on July 15, the total amount on that date being 298,450 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixer.				Total.

SOCIAL LIFE OF THE ZONE.

Church Work.

The quarterly meeting of the Isthmian Sunday School Association, with an election of officers, was held in Gorgona on Sunday afternoon, July 9. There were present the officers of the association and three delegates from each of the federated schools. An address was delivered by the Rev. Harry Compton, and the subject discussed was the relation of the Sunday school superintendent to the school. Messrs. Putnam and Marsh were the leaders. Officers were elected, as follows: President, Rev. A. A. Nellis of Empire; vice-president, A. H. Warner of Culebra; secretary, E. G. Putnam of Cristobal; treasurer, J. H. Marsh of Gorgona.

The Isthmian Ministers' Association held a conference at the Methodist college, Panama, on Monday afternoon, July 10. Mr. Victor Kennedy was the speaker. There were eight members of the association present. The next meeting will be held in the Baptist church, near the railroad, Culebra, on Monday, August 7. The association distributes literature on moral issues.

Thirty-five pupils of the Union Sunday school, Cristobal, have been presented with Bibles as reward for regular attendance since the beginning of the year. The Sunday school has a large membership, and an average attendance of 100.

The Ladies' Aid Society of the Union Church has taken up the study of missionary work in the Orient. The society has 25 members, with Mrs. W. T. Harrison as president.

The meeting of the Ladies' Aid Society of the Methodist Episcopal Church, Panama, will be held at the home of Mrs. E. M. Keyser in Ancon, on Thursday afternoon, July 20, at 2.30 o'clock.

Social Work in Colon.

The municipal authorities of Colon promulgated a decree on July 6, whereby all minors of 18 years old and under, are ordered to be taken to the Colon Hospital for examination of the throat, in connection with the current mild epidemic of diptheria in the city. Special sanitary rules have also been issued to insure against spread of the disease, and the health office at Cristobal has circulated a list of rules giving preventive measures, prohibiting the use of common drinking cups, and promiscuous handling of infected articles by children. In accordance with an order issued by the Colon authorities, the common drinking cup is to be abolished in the schools of the city, and each pupil will be required to furnish an individual cup, as in the Canal Zone schools. At the Fourth of July dance at the Lincoln House, Colon, the committee furnished 2,000 asceptic drinking cups as a preventive and sanitary measure.

The next free lecture for the people of Colon will be held in the schoolroom of Christ church on Thursday evening, July 27. All persons interested in these lectures on practical sanitation and other instructive subjects are invited to attend. Seats are reserved for Americans. The lecture will be delivered by one of the physicians of the Colon Hospital staff.

Vacation School in Gatun.

The first vacation school in the Canal Zone was opened in the schoolroom in Gatun on July 3, with 30 pupils. Sessions are held every morning, with the exception of Saturday, from 8.30 to 11.30 o'clock. On Mondays, Wednesdays, and Fridays, kindergarten classes are held in the afternoon. The school will close on August 8.

Odd Fellows Installation.

The following officers of Pacific Lodge, No. 4, Independent Order of Odd Fellows, were installed by District Deputy Grand Sire B. F. Sisson of Gatun, on Thursday evening, July 13: Noble grand, J. S. George; vice-grand, A. S. Curtis; treasurer, Joseph Turrell; warden, C. C. J. Wirz; conductor, F. T. Hamlin; right supporter to noble grand, Karl P. Curtis; left supporter to noble grand, E. M. Keyser; chaplain, James Wilson; right scene supporter, James O'Malley; left scene supporter, J. H. Williams; right supporter to vice-grand, W. C. Haskins; left supporter to vice-grand, E. G. Mettke; inner guard, A. A Lundescheft. In the course of remarks, the district deputy announced that a petition had been forwarded to the sovereign grand lodge for the transfer of Canal Zone Lodge, No. 3, from Culebra to Empire. There are only a few members of this lodge living at Culebra, and it is believed that the new location will not only be more central, but that the change will result in an increased membership. Mr. Sisson, who has general charge of Odd Fellow affairs on the Isthmus, has just finished his fourth year as district deputy grand sire.

PERSONAL.

Major General Leonard Wood, wife, and two children; Brigadier General William H. Bixby and wife, Brigadier General W. W. Wotherspoon and wife, Brigadier General E. M. Weaver and wife, Brigadier General E. H. Crowder, Major E. E. Winslow, Major E. P. O'Hern, Captain F. R. McCoy, Captain S. D. Embick and wife, and Lieut. H. C. Fiske of the Army, and Captain W. J. Maxwell of the Navy, arrived at Cristobal on the *Ancon* on July 19.

Col. W. C. Gorgas returned from his leave of absence on the *Santa Marta*, which arrived at Colon, from New York, on July 13.

Lieut.-Col. C.de W. Willcox, U.S.A., and wife, arrived on the Isthmus on the *Colon* on July 13.

Lieut.-Col. Guy L. Edie, Medical Corps, U. S. A., is a passenger on the *Allianca* from New York, due to arrive at Cristobal on July 19.

Electricity on a Battleship.

At the next regular meeting of Local Union, No. 677, I. B. E. W., to be held at Gatun on Wednesday, July 26, at 8 p. m., John Lloyd will speak on the subject, "Electrical organization and equipment of a United States battleship," after which refreshments will be served.

Steam Shovel Men.

The next regular meeting of Panama Local, No. 5, A. U. of S. S. M., will be held in Culebra lodge hall on Sunday, July 23, at 2.30 p. m. All members are requested to attend.

EDW. FENSTERMACHER,
Secretary-Treasurer.

CULEBRA, C. Z., July 14, 1911.

FOUND—A lady's pin on the floor of the Lincoln House on the night of the Fourth of July dance. Owner can obtain same by applying by letter or in person at the office of Superintendent, Panama Railroad Company, Colon, R. P., describing property fully.

EXECUTIVE ORDER.

Licenses for Lots in Townships.

By virtue of the authority vested in me, the Chairman and Chief Engineer of the Isthmian Canal Commission is hereby authorized to execute revocable licenses for lots in townsites in the Canal Zone, either directly, or through such agency as he may direct, such licenses to be revocable at the pleasure of the Chairman and Chief Engineer, or such other executive officer as may be in charge in the Canal Zone, licensees to vacate and remove improvements at once without indemnity.

WM. H. TAFT.

THE WHITE HOUSE,
June 28, 1911.

[No. 1380.]

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the two weeks ending July 15, follows:

DATE.	Hours worked.	Cubic Yards.
July 3	4.24	2,016
July 4 (Holiday)	....	....
July 5	3.41	1,732
July 6	3.53	1,640
July 7	3.09	1,546
July 8	2.29	1,179
Total	17.36	8,113

DATE.	Hours worked.	Cubic Yards.
July 10	5.13	1,478
July 11	6.17	1,431
July 12	6.33	1,793
July 13	6.56	1,556
July 14	3.44	1,340
July 15	4.50	1,779
Total	33.33	9,377

Seeks Injunction Against P. R. R.

Application for an injunction against the Panama Railroad Company has been made by Horatio L. Stevenson of Colon in the Circuit Court of the Third Judicial Circuit at Cristobal. The applicant seeks to procure a restraining order to prevent the railroad company from removing spoil from a hill, east of the Mount Hope road, claiming he has property rights there. The material is being used for filling on the site of the new docks at Cristobal, and in front of the Washington Hotel at Colon. The argument on the application will be held before Judge Thomas E. Brown, Jr., on Thursday, July 20.

Obituary.

Mrs. Edwin P. Drake died at her residence in Empire on July 17 after an illness of one week. She was born in North Dakota, and was 30 years of age. Her husband, who is employed in the Disbursing Office, and two children, survive her.

Charles Guertler, who left the Canal service in December last, after having been employed in the power plant and on the unloading cableways at Gatun, died at the Cumberland street hospital in Brooklyn, on April 29, from a fractured skull, sustained either from a fall, or from a blow on the head. He was 38 years of age. His wife, and a sister, survive him.

Killed by a Fall from Train.

Benjamin Reid, a Jamaican, 45 years of age, nonemploye, was run over and killed by freight train No. 658 at about 10 p. m., Friday, July 14, near Mount Hope, where he lived. A coroner's jury returned a verdict that death was caused by a fall from the train while riding on it without authority.

CANAL WORK IN JUNE.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., July 15, 1911.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of June, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	63,997	1,403,448	120,943	1,588,388
Work excavation, wet	Cubic yards	452,098	29,856	576,100	1,058,054
Total work excavation	Cubic yards	516,095	1,433,304	697,043	2,646,442
Plant excavation, dry	Cubic yards	....	....	....	....
Plant excavation, wet	Cubic yards	....	....	....	....
Total plant excavation	Cubic yards	....	....	....	....
Total Canal excavation	Cubic yards	....	....	....	....
Material placed in dams	Cubic yards	660,004	....	82,173	742,177
Concrete placed in locks and dams	Cubic yards	60,135	....	44,779	104,914
Explosives used	Tons (Gross)	82.32	202.03	33.35	317.70
Rock drilled	Feet	58,976	425,306	80,229	564,511
Tracks removed	Miles	....	8.74	....	8.74
New tracks laid	Miles	1.77	15.20	4.19	21.16
Rock crushed	Cubic yards	60,704	....	62,997	123,701
Cement used	Barrels	61,681	320	46,496	108,497
New roads built	Miles	0.76	3.18	....	3.94
Water mains laid	Feet	5,087	1,009	1,942	8,038
Sewers laid	Feet	1,135	938	....	2,073
Open drains and ditches dug	Feet	48,770	100	7,665	56,535
Average daily force	....	6,910	7,553	4,456	18,919
Average rainfall	Inches	15.15	5.70	4.87	7.14

Atlantic Division.

GATUN LOCKS.

Crane excavation in the lower lock, and shovel excavation for obtaining clay for back fill, were continued. A total of 4,725 cubic yards were removed by crane, and 8,067 cubic yards by shovel. On June 30, the total excavation amounted to 5,869,271 cubic yards, of which 5,029,334 cubic yards were removed from the prism. The excavation in the locks was 99.6 per cent completed, and the excavation of the culvert trenches 90 per cent completed.

Back fill—Backfilling behind the walls of the upper and middle locks, and in the center wall of the upper lock, was continued, and back filling behind the walls of the lower lock was commenced. The quantity placed during June aggregated 52,013 cubic yards, increasing the total to 543,576 cubic yards. On June 30, the back filling was 33 45 per cent completed.

Receiving and Issuing Material—The receipts of all material during the month exceeded the consumption, excepc in the case of sand, where the excess of consumption over receipts amounted to 184 cubic yards.

Mixing and Placing Plants—Both plants, and all portable mixers, were kept in satisfactory operation during the month.

Power Plant and Pumps—The operation of the power plant and pumps was satisfactory.

Iron and Steel Work—During the month 508.84 tons of fixed steel, 69.5 tons of reinforcing rails, and 5,705 feet of reinforcing rods were placed.

Concrete Work—There was a decrease of 12,539 cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 26 working days was 2,127 cubic yards, as compared with a daily average during May of 2,609 cubic yards. The total amount of concrete placed during the month was 55.305 cubic yards, including 4,611 cubic yards of large stone. The bucket measurement exceeded the place measurement by 203¾ cubic yards. Of the total concrete, 6,473.5 cubic yards were placed in the upper lock, 6,596 cubic yards in the middle lock, and 42,235.5 cubic yards in the lower lock. The concrete work for the entire lock system was 68.3 per cent completed at the end of June.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS, GATUN LOCKS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	11.42	8.50
Average number of hours per day worked per strand of cableway laying concrete and large stone (actual working time)	4.51	....
Average number of mixers per day	5.50	2.00
Average hourly output per mixer, (actual working time) cu. yds.	56.30	70.97
Average amount of concrete and large stone laid per hour, per strand of cableway, (actual working time) cu. yds.	29.60	....
Large stone laid, cu. yds	2,273¼	2,338
Concrete laid, cableways, cu. yds.	27,598	....
Concrete laid, through chute into dump cars, cu. yds	8,550	....
Concrete laid, derricks, cu. yds	....	1,392
Concrete laid, dump cars, cu.yds.	....	11,966
Concrete laid, portable mixers	....	1,391½
Total amount concrete and large stone laid, cu yds	38,421¼	17,087½

Concrete from the auxiliary plant was placed by three derricks, and with dump cars.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 660,004 cubic yards.

Cross section survey was completed of all the material in place for the purpose of determining the yardage lost by consolidation, and the total yardage still remaining to be placed to complete the Dam. This shows the net yardage in place above the original ground surface to be 14,293,034 cubic yards, a shortage of 441,782 cubic yards from the amount determined by the summation of the monthly cross sections, which only cover the material actually deposited during the month. This shortage has been charged against hydraulic fill in place, as it is probably nearly all due to consolidation of same. The net amount of material required to complete the Dam to elevation plus 115, over and above that now shown in place, is 5,089,156 cubic yards; for the gross amount necessary to complete, about 500,000 cubic yards should be added to this to cover future consolidation.

Hydraulic fill—The dredges increased the hydraulic fill by 432,008 cubic yards. Making a reduction of 441,782 cubic yards chargeable against consolidation, as shown by a complete survey of the Dam, the total hydraulic fill in place June 30 was 7,411,992 cubic yards.

Dry fill—Material received from the Central Division, the Locks, Mindi, and steam shovel No. 134, amounting to 227,996 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 6,881,042 cubic yards.

GATUN SPILLWAY.

Excavation—In preparing foundations of the Spillway dam, 115 cubic yards of rock were removed by hand. On June 30, the total spillway excavation amounted to 1,582,960 cubic yards.

Concrete—The work of placing concrete was continued, the amount placed during the month aggregating 4,830 cubic yards, which increased the total to 143,746 cubic yards. The concrete work for the Spillway was 66.1 per cent completed.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea Level at Mindi—During the month, two steam shovels removed 9,659 cubic yards of earth, and 45,998 cubic yards of rock from the Canal prism. In addition, 3,500 cubic yards of earth were sluiced by pumping plant.

Dredging from the Ocean to Mindi—Five dredges removed 431,655 cubic yards of earth, and 20,443 cubic yards of rock from the Canal prism. In addition, dredge *No. 86* placed 97,149 cubic yards of material in the Colon fill. On June 30th, 40 feet of water could be carried from zero to zero plus 2,200 feet; 35 feet to mile 3 plus 800 feet; 30 feet to mile 3 plus 3,700 feet; 20 feet to mile 5 plus 2,438.9 feet, at the junction with the French canal.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working days—hours From 1st to 30th, inclusive	8.00
Average number of hours worked per day	5.00
Average number of cubic yards per hour of working day	291.80
Average number of cubic yards per working hour	466.80
Maximum day's output, (6 hours 28 minutes) cu. yds	3,241.00
Average day's output (26 days) cu. yds.	2,335.00
Average hourly output, (194 hours 23 minutes) cu. yds.	312.30
Total output for the month, cu. yds.	60,704.00

Sand, Stone, and Cement Service—In connection with this service, plant steamed 7,518 miles, handled 635 barges, and carried 1,545 passengers.

West Breakwater, Colon—Forty-nine thousand, four hundred and thirty-six cubic yards of material were excavated, of which amount 47,308 cubic yards were placed in the breakwater, and 2,128 cubic yards in track fill. The double track trestle was extended 592½ linear feet. On June 30, the trestle extended 5,365 feet from shore. The total amount of rock dredged and dumped on the west breakwater to June 1, 1911, was 598,709 cubic yards. During the month, 20,443 cubic yards were dredged and dumped, increasing the total to

619,152 cubic yards. The amount of dry fill placed to July 1 was 355,868 cubic yards.

NOMBRE DE DIOS.

During the month, 50 barges, containing 23,251 cubic yards of sand, were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended, as required, to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of June, the total amount of material excavated in the Central Division was 1,433,304 cubic yards, of which 140,605 cubic yards were classified as earth, and 1,292,699 cubic yards as rock. Of this quantity, 1,399,458 cubic yards were removed by steam shovels, and 1,558 cubic yards by bucket cranes. Contractors removed 29,856 cubic yards by sluicing, and 2,432 cubic yards by hand. The total—1,433,304 cubic yards—consisted of primary excavation for the Canal prism.

The daily average number of steam shovels at work during the month was 40.92, and the total number of shovel days was 1,064, as compared with 38.62 shovels at work during the month of May, with 1,004 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
June...	1,443,099	1,166,754	276,345	45.15	26	1,229.20
1911:						
June...	1,401,016	1,282,811	118,205	40.92	26	1,316 22

Rainfall at Empire: 1910, 10.17 ins.: 1911, 5.92 ins.

The above table shows the average output per shovel to be 7.08 per cent greater in June, 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in June, 1911—1,401,016 cubic yards—was the highest record in that section for the month of June, the previous high record for the month having been in June, 1910, when 1,305,141 cubic yards were removed.

Due to changes in the stability of the Canal banks in the Culebra section, it has been found necessary to add 2,571,690 cubic yards to the original estimate for the completed Canal making the revised total estimated amount of material to be removed in the Central Division, 99,696,708 cubic yards, and up to July 1, 1911, 77 338,235 cubic yards had been removed, leaving 22,358,473 cubic yards to be removed, in order to complete all excavation in the Central Division. From these figures, it will be seen that 77.57 per cent of all excavation in the Central Division had been completed up to the close of the month of June and 22.43 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed, and that to be completed, at the close of June operations, was, as follows:

CULEBRA SECTION.	Cu. Yds.
Completed	65,514,865
To be completed	21,652,852

CHAGRES SECTION.	
Completed	11,823,370
To be completed	705,621

From the above figures, it will be seen that the Culebra section, locally known as the Culebra Cut, was 75.16 per cent completed, with 24.84 per cent to be completed; the Chagres section was 94.37 per cent completed, with 5.63 per cent to be completed.

During the month, no material was hauled from the Canal prism for the embankment for the roadbed of the relocated Panama railroad, the total amount used for this purpose remaining at 3,830,137 cubic yards. The Central Division delivered at Gatun 223,657 cubic yards of rock and earth, for use in the construction of the Dam, making the total for this purpose at the end of June, 3,789,118 cubic yards.

The daily average number of laborers at work on the whole division during the month was 6,777, and the daily average number of gold employes, 776.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 120,943 cubic yards.

Filling and Embankment—During June, no additional dry filling was added to the prism of the west dam at Pedro Miguel, the total amount of material in place at the close of the month remaining at 260,852 cubic yards, as previously reported. The back fill at Pedro Miguel was increased by 18,871 cubic yards, the total in place at the end of the month amounting to 283,325 cubic yards.

At Miraflores, 28,315 cubic yards were added to the dry fill in the toes, and 53,858 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month 816,499 cubic yards, and 582,732 cubic yards, respectively. The back fill was increased by 16,155 cubic yards, the total aggregating 174,601 cubic yards at the end of the month.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)...	8.00	8.00
Average number of hours per day, worked laying concrete and large stone (actual working time)...	5.26	5.98
Average number of mixers per day...	....	3.81
	Cu. Yds.	Cu. Yds.
Average hourly output per mixer (actual working time)...	....	37.16
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)...	55.65	....
Large stone laid...	23.00	190.00
Concrete laid...	7,583.00	10,447.00
Total concrete laid...	7,606.00	10,637.00

Permanent plant consisted of two chamber cranes, placing.

Auxiliary plant consisted of three 2-cubic yard, and two ½-cubic yard mixers; and a daily average of 2.88 locomotive cranes and derricks, placing.

PEDRO MIGUEL LOCKS.

The back filling of the west wall was continued, and pile trestle was driven preliminary to the beginning of construction work on the west dam. Work on the drainage cut beneath the tracks at the south end of the guide wall for carrying the drainage discharge from the Culebra Cut through the center wall culvert of the Pedro Miguel locks was practically completed. During the month, the amount of iron placed aggregated 195,751 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 18,243 cubic yards, as compared with 19,135 cubic yards during May. The concrete was placed, as follows: 6,554 cubic yards in the east wall; 5,486 cubic yards in the west wall; 3,508 cubic yards in the center wall; 2,056 cubic yards in the floors; and 639 cubic yards in the southwest wing wall.

MIRAFLORES LOCKS.

The McClintic-Marshall Construction Company completed the erection of chamber crane No. 2. The company also erected the cantilever arm of berm crane "G," and installed the south mixer on the latter crane. The erection of chamber crane No. 4 was started in the upper end of the east lock chamber on June 26. Dry excavation in the lower lock was continued, as was also the work of filling in the east and west toes of the west dam. Back filling was continued behind the east lock wall. The fills for, and approach tracks to, the auxiliary mixing plant in the east side wall were about completed, and the bins and trestles for the auxiliary mixing plant were erected. During the month, the amount of iron placed aggregated 566,187 pounds.

Concrete Work—The total amount of concrete and large stone laid was 26,536 cubic yards, as compared with 36,154 cubic yards during May. The concrete was placed, as follows: 7,823 cubic yards in the east wall; 469 cubic yards in the center wall; 18,056 cubic yards in the west wall; and 188 cubic yards in the floors.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (bours)..	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)...	5.61	6.06
Average number of mixers per day...	4.00	3.19
	Cu. Yds.	Cu. Yds
Average hourly output per mixer (actual working time)...	42.52	11.31
Average amount of concrete and large stone laid per hour per berm or chamber crane (actual working time)...	71.68	....
Large stone laid...	....	....
Concrete laid...	20,909.00	5,627.00
Total concrete laid...	20,909.00	5,627.00

Permanent plant consisted of two berm cranes, mixing and placing.

Auxiliary plant consisted of four ½-cubic yard mixers, and a daily average of .92 locomotive cranes and derricks, placing.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges, which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE	Type.	WORK.		PLANT.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 40,300 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended, as required, to facilitate construction work. Work was continued on the municipal improvements in the city of Panama.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day	8 00
Average number of hours per day (actual working time)	6.85
	C. Y.
Average amount crushed per hour of working day	269.22
Average amount crushed per working hour	353.54
Total output for the month	62,997.00

Relocation of Panama Railroad.

During the month, 394,665 cubic yards of material were excavated, increasing the total excavation at the close of the month to 7,496,807 cubic yards, and 450,111 cubic yards of material were placed in embankment, increasing the total for this purpose to 13,196,386 cubic yards.

The average daily number of steam shovels at work was 9.71, and the total number of working days was 26.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			
June...	236,689	83,065	153,623	8.00	26	1,138
1911:						
May....	387,427	242,885	144,542	9.54	26	1,562
June...	370,440	254,910	115,530	9.71	26	1,467

During the month, 1,035 feet of temporary trestle were driven, and work on bridges and culverts was continued. Twelve thousand and seventy-six linear feet of 70-pound track were relaid by 90-pound track, the total of 70-pound and 90-pound track at the end of the month being 136,296 linear feet, and 40,445 linear feet, respectively. The force averaged 2,073 men, in addition to those employed by contractors.

Quartermaster's Department.

LABOR.

The demand for skilled labor still exists, nearly all departments and divisions requiring men. An effort was made to secure one thousand laborers from Barbados, but further recruiting in the island has been prohibited by the Government. About 50 men have been recruited in other islands. It is believed there is an ample supply of colored labor on the Isthmus, but there is a large floating population who live from hand to mouth, and work only when driven by necessity.

BUILDINGS.

During the month, work was continued on the construction of the Salvation Army building at Cristobal, and work was commenced on foundations and walls for the new concrete block fire station at Cristobal, which is to be a permanent building. Most of the traveling gangs were utilized during the month in the removal and reerection of buildings at Culebra.

MATERIAL AND SUPPLIES.

Supplies during the month were delivered by 27 steamers, the total weight of cargo aggregating 32,904 tons, exclusive of 23,616 feet board measure, yellow pine lumber, and 49,233 feet, board measure, white oak lumber. The total value of material received during the month was $644,510.42.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels showed a net profit of $1,941.07. The operation of the Hotel Tivoli showed a net profit of $1,119.15, and there was a net profit on restaurants, penitentiary, tugs, and dredges, of $64.33. The net profit on subsistence operations was $3,124.55.

Department of Civil Administration.

COURTS.

During the month, 7 civil and 25 criminal cases were disposed of in the Circuit Courts, and 71 civil and 480 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for June amounted to $438,038.47, and the fees to $1,956.58. Receipts from stamps and card sales, and newspaper postage, aggregated $6,657.30. The total collection of revenues made by the division was $76,002.37, and the collection on account of court fines, costs, and fees, $2,333.20.

Twenty-two vessels entered at, and 28 vessels cleared, from the port of Ancon; and 20 vessels entered at, and 20 vessels cleared, from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 472, of whom 431 were men and 41 women. Forty-three nationalities were represented. The total number of arrests for the month was an increase of three, as compared with May. Nine convicts were committed to the penitentiary, and 6 were discharged, leaving 148 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,550.92, and the value of their work on Canal Zone roads was $2,312.40.

DIVISION OF FIRE PROTECTION.

Seven fires were reported in the Canal Zone during the month, as compared with 10 in May. The damage to Commission property was $1, and to private property $136.25.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,356,560 gallons, and in Colon 985,659 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The total enrollment in the white schools during the month was 1,138, and the average daily attendance 751, or 66 per cent of the enrollment; and in the colored schools, the total enrollment was 1,493, and the average daily attendance 394.9, or 26 per cent. Forty-three white and 24 colored teachers were employed in the division on June 30. A class of two pupils graduated from the Gatun high school, this being the first class to complete the full four-year course of study. On June 30, the schools were closed for the summer vacation.

Department of Sanitation.

The total number of deaths from all causes among employes was 51. These were divided, as follows: From disease, 38, and from violence, 13, giving the annual average per thousand of 9.40 and 3.21, respectively.

The annual average death rate per thousand among employes for the month of June in previous years since American occupation was, as follows:

1904	5.02
1905	16.44
1906	41.55
1907	27.53
1908	12.35
1909	9.34
1910	10.66

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and non-employes, was 25.33.

The annual average death rate per thousand for the month of June among the same class of population for previous years was, as follows:

1905	50.57
1906	51.89
1907	33.45
1908	29.17
1909	16.42
1910	20.38

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 11.19; blacks, 8.82, giving a general average of 9.40. For the same month during 1909, the annual average death rate per thousand from disease was: Whites, 6.29; blacks, 7.32, giving a general average of 7.07; and for the same month during 1910: Whites, 3.60; blacks, 10.93, giving a general average of 9.04.

Among employes during the month, deaths from the principal diseases were, as follows: Nephritis, acute and chronic, 6; haemoglobinuric fever, 2; malaria fever, 7; organic disease of the heart, 3; pneumonia, lobar, 9; tuberculosis, 3, and typhoid fever, 2, leaving a balance of 6 deaths from all other diseases, and 13 deaths from external violence.

Twenty-nine cases of diptheria were reported during the month, five from the Canal Zone, 23 from Panama, and one from Colon, with no deaths. So far, the type of disease is mild and yields readily to treatment.

No cases of yellow fever, smallpox, or plague were brought to, or originated on the Isthmus, during the month.

Respectfully,
GEO. W. GOETHALS, *Chairman.*

Panama Railroad Officers.

At the annual meeting of the stockholders of the Panama Railroad Company, held in New York on April 3, sixty-nine thousand nine hundred and ninety-three shares of the capital stock being represented in person, and the remaining seven by proxy, the board of directors for the ensuing year was elected, and, at a meeting of the directors, held immediately after, the following officers were chosen: President, Geo. W. Goethals; vice-president, E. A. Drake; second vice-president, H. F. Hodges; secretary, T. H. Rossbottom; treasurer, Sylvester Deming. Richard Reid Rogers was reappointed general counsel. The officers named, and E. C. Boggs, C. A. Devol, M. T. Endicott, O. H. Ernst, C. R. Edwards, D. DuB. Gaillard, H. H. Rousseau, W. L. Sibert, and E. T. Wilson, form the board of directors.

All the stock is held by the Government, except the directors' qualification shares, which are held, one by each director, at the disposition of the Government.

OFFICIAL CIRCULARS.

European Firemen

CULEBRA, C. Z., July 13, 1911.

CIRCULAR No. 229-S:

The maximum entrance rate of pay of $45 a month for Europeans used as firemen on standard gage locomotives is hereby authorized.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Assistant Foremen.

CULEBRA, C. Z., July 12, 1911.

CIRCULAR No. 299-M:

The designation of assistant foreman at the rates of pay of $140, $145, $150, $160, $165, and $175 a month is hereby authorized in addition to those published in circular No. 299. The designation of assistant foreman at the above rates of pay is applicable only to men employed in shops in a supervisory capacity.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Sales of Canal Property.

CULEBRA, C. Z., July 17, 1911.

CIRCULAR No. 399:

No sale of Isthmian Canal Commission property or material will hereafter be made, unless same is approved by the Chairman.

GEO. W. GOETHALS, *Chairman.*

Leasing of Government Building.

ANCON, C. Z., July 13, 1911.

Bids will be received by the Collector of Revenues up to and including August 10, 1911, for the leasing to the highest bidder, from August 16, 1911, for a period of not more than three years, of building No. 17 at Empire, owned by the Canal Zone Government. Rent to be payable monthly. The building is of French construction, two stories, and contains, in all, fifteen rooms, with a small outhouse. Bids should be in an envelope marked, "Bids for a lease to building No. 17 at Empire."

TOM M. COOKE, *Collector of Revenues.*

Sale of House at Public Auction.

CULEBRA, C. Z., July 13, 1911.

There will be sold at public auction, by the district quartermaster at Empire, C. Z., on the premises, at 3 p. m., Monday, July 24, to the highest bidder for cash, the following Isthmian Canal Commission property: Old French house No. 25 at Empire.

The building to be removed from the premises by the successful bidder, within fifteen (15) days from date of sale.

The Government reserves the right to accept or reject any or all bids.

For further information apply to the district quartermaster, Empire, C. Z.

C. A. DEVOL, *Chief Quartermaster.*

Bids for Baggage and Advertising Privileges.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., July 13, 1911.

Bids will be received up to and including July 25, by the undersigned, covering the privilege of soliciting and checking baggage for transfer on trains and docks of the Panama railroad, and the use of office space in baggage room at Colon and Panama passenger stations, for a period of five years.

The successful bidder will be required to furnish a bond of two thousand dollars to ensure faithful performance on contract, copy of which can be seen on application to this office.

Bids will also be received covering the privilege of advertising at stations of the Panama railroad in conformity with contract, which can be seen at this office.

Privilege to accept or reject any or all bids is reserved.

All bids to be plainly marked "Baggage and advertising," and addressed to

J. A. SMITH, *General Superintendent.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending July 15:

Nordkap, July 9, from New York, with 27,655 barrels cement for Atlantic and Pacific Divisions.

Prinz August Wilhelm, July 10, from New York, with 50 cases paint, for stock.

Santa Marta, July 13, from New York, with 100 drums carbide, 50 bundles wire, 500 packages garbage cans, for stock.

Abangarez, July 13, from New Orleans, with 74 pieces oak lumber, 7,422 pieces pine lumber, for stock; 10 pieces castings for Atlantic Division.

Hanseat, July 13, from Brunswick, Ga., with 44,000 cross-ties for stock.

Colon, July 13, from New York, with 43 cases incandescent lamps, 100 pieces car wheels, 7 barrels coupler parts for Mechanical Division; 7 cases castings, 400 bundles castings, 40 cases lye, 50 kegs wire nails, 31 cases life preservers, 8 bales twine, for stock; 16 pieces steel bars, 4 pieces dredge buckets, for Pacific Division; 19 pieces castings, 27 pieces iron castings, for Atlantic Division; 12 pieces car springs for Panama Railroad Company; and a miscellaneous cargo, the whole consisting of 813 packages, weighing 162 tons.

Kansas City, July 15, from San Francisco, with 761 pieces pine lumber for stock.

Family Quarters.

Applications for married quarters on file July 1 were, as follows:

Commissary Price List Unchanged.

There are no changes in the prices of the cold storage supplies, as printed in THE CANAL RECORD of July 12, 1911.

The following vessels arrived at or departed from the port of Balboa during the week ending July 15:

Arrivals—July 10, *Quilpue*, from Valparaiso; July 12, *Peru*, from Guayaquil; July 13, *San José*, from San Francisco; *Kansas City*, from San Francisco.

Departures—July 9, *Manavi*, to Buenaventura; July 10, *Ucayali*, to Callao; *Chile*, to Guayaquil; July 11, *Barracouta*, to San Francisco; July 12, *Ecuador*, to Guayaquil; July 13, *Mackinaw*, to San Francisco; *Peru*, to San Francisco; July 14, *Newport*, to San Francisco; July 15, *Aysen*, to Valparaiso.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending July 26, 1911, (75th meridian time):

DATE.	High.	Low.	High.	Low.	High.
	A.M.	A.M.	A.M.	P.M.	P.M.

8. Selection—*Nautical Fantasia* .... Tobani
9. Popular Number—*On, Wisconsin* .... Purdy

OLIVER KIMBALL, *Acting Musical Director.*

The next concert will be given at Gatun on Sunday, July 30.

LOST—A pearl stickpin in Cristobal or Colon on Monday, the 17th inst., Finder please communicate with D. W. M., care of cold storage office, Cristobal.

Tug Service to Porto Bello, Nombre de Dios, and Toro Point.

Effective June 26, the following schedule will be maintained between Dock 13, Cristobal, Nombre de Dios, Porto Bello, and Toro Point:

Tug *Reliance* will leave Dock 13 daily, except Sundays, at 7 a. m., with two barges for Nombre de Dios, returning at once with two barges to Gatun.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 9 a. m., with three barges for Porto Bello, returning to Gatun as soon as barges are loaded.

Tug *Porto Bello* will leave Dock 13 Saturdays at 9 a. m., light, for Porto Bello. This tug will leave Porto Bello, light, at 2 p. m., arriving at Dock 4, Colon, in time for passengers to catch train No. 7, leaving Colon at 4.35

Tug *Porto Bello* will leave Dock 13 Sundays at 7 p. m., for Porto Bello, returning at once.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 6.30 a. m., for Toro Point, returning at once.

Tug *Mariner* will leave Dock 13 Sundays at 9.30 a. m., for Toro Point, returning at once.

A tug will leave Dock 13 on Wednesdays, Saturdays, and Sundays, at 4.30 p. m., for Toro Point, returning at 5.30 p. m.

A tug will leave Dock 13 on the 20th of each month at 6 a. m., for Porto Bello and Nombre de Dios, returning to arrive at Dock 4, Colon, about 4 30 p. m.

CLASSIFIED EXPENDITURES.

A statement of classified expenditures of the Isthmian Canal Commission to May 31, 1911, follows:

	Department of Civil Administration.	Department of Sanitation.	Department of Construction and Engineering	General Items.	Total.
Total to June 30, 1909	3,427,090.29	9,673,539.28	69,622,561.42	78,022,606.10	160,745,797.09
Total, Fiscal Year, 1910	709,351.37	1,803,040.95	26,300,167.05	2,863,088.83	31,675,648.20
July, 1910	58,474.88	156,006.64	2,216,849.78	280,015.85	2,711,347.15
August, 1910	63,887.05	164,220.65	2,348,777.07	336,961.35	2,913,846.12
September, 1910	60,586.46	153,433.27	2,516,814 41	236,170.76	2,967,004.90
October, 1910	37,250.26	146,587.47	2,565,042.28	295,537.33	3,044,417.34
November, 1910	71,981.80	137,912.89	2,356,292.01	233,587.25	2,799,773.95
December, 1910	69,424.73	144,754.71	2,480,221.44	179,047.95	2,873,448.83
January, 1911	71,426.87	137,665.14	2,202,370.20	235,678.30	2,647,140.51
February, 1911	69,886.61	127,198.56	2,172,805.21	173,109.54	2,542,999.92
March, 1911	74,670.20	130,694.38	2,641,274.42	460 607.91	3,307,246.91
April, 1911	74,198.25	126,588.34	2,129,806.54	115,705.55	2,446,298.68
May, 1911	71,266.08	134,786.71	1,875,080.72	200,748.85	2,281,882.36
Total	4,859,494.85	13,036,428.99	121,428,062.55	83,632,865.57	222,956,851.96

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CORRESPONDENCE CHESS TOURNAMENT.

Provided enough players are willing to enter, a chess tournament by correspondence will be started, open to all players on the Isthmus.

Each player will play two games for the first round; half of the players being eliminated after each round, until the last two players play for the championship of the Isthmus.

Three or four moves each week can easily be played with an expense of a few cents for post cards. There will be no entrance fee.

Entries close July 22, 1911, after which the players will be paired by lot for the first round. To avoid having games finished hastily over the board, players living in different places will, as far as possible, be paired together, and the lots will be redrawn, if necessary, to attain this arrangement. All players will then be advised of their opponents, and the tournament started.

The officers who will take charge of conducting the tournament will consist of a president, secretary, and a referee, and will be elected by letter ballot from among the players entering the tournament.

All chess players are cordially invited to enter this Isthmian tournament. Those desiring to do so will please hand their names to the secretary of the local Y. M. C. A., who will forward them to the Culebra Y. M. C. A., where this proposal originated.

MOTION PICTURE SCHEDULE.

Following is the schedule of motion picture entertainments at the various clubhouses for the week beginning July 24: Monday, Gatun; Tuesday, Gorgona; Wednesday, Empire; Thursday, Culebra; Friday, Cristobal; Saturday, Corozal.

COROZAL.

The basketball team is practicing for a game with Culebra on July 29.

A number of the men have planned the organization of a discussion club, which is to be formally organized Thursday evening, July 20.

CULEBRA.

The duckpin high scores for last week are, as follows: Huttlemaier, 100, 105, 102, 119, 108; Case, 102, 100, 101, 108; Silver, 102; Mengel, 104; Seylander, 100, 100; Driscoll, 113; Fox, 112.

The Culebra hotel and Administration building basketball teams played their second game last week, the hotel winning by a score of 68 to 26. Each team has won a game, and the deciding contest will be played this week.

On Saturday night, July 22, at 8.15, the Culebra and Empire basketball teams will play their initial game on the Culebra floor. Men desiring a "tryout" on the Culebra team should make their wants known at once.

Between the last two films of the motion picture show last week, Mr. Warner and Mr. Hostetter, in view of Mr. Putnam's leave taking, spoke to the Culebra members of his satisfactory services while at Culebra, and of the keen appreciation on the part of the members. Mr. Putnam, in a few words, thanked the people for their hearty cooperation and loyalty, and commended their spirit of good fellowship.

EMPIRE.

Fifty-one men entered in the tenpin handicap tournament that began Saturday evening, July 15. There will be prizes for the highest number of games won, for highest average, and highest individual score. The standing of the contestants up to Monday was, as follows:

	Won.	Lost.	P.C.
Gustavson	2	0	1000
Walling	1	1	500
Parkis	1	2	333
Hobbs	0	1	000

A new moving picture machine was used for the first time on July 12, and proved satisfactory. Piano selections were given during the evening, and W. G. Ross sang a selection from the "Pink Lady."

Miss Sloan of Cincinnati entertained some of the members and their friends with a recital of soprano songs on Saturday evening, July 15.

Twenty boys are entered in the boys' handicap duckpin tournament. At the present time, Witt, Vivian, and Benninger have not lost a game.

The following high scores were rolled during the week: Tenpins—Hobbs, 208, 200; Potter, 231; Sawtelle, 200; duckpins—Pinney, 102, 109; Grund, 109; Dakin, 116, 100; Pearce, 118; Johnson, 105; Danielson, 102; Garrett, 104; Pulsifer, 112, 104; Rodeghiero, 103, 115.

GORGONA.

The song service on Sunday night was led by S. C. Murray, with E. M. Reinholt playing the piano.

Gymnasium work will start July 27, and from present prospects, the class will be well attended. As a preliminary to the gymnasium class, volley ball was played in the gymnasium on Monday evening, July 17.

Wednesday night of each week has been set aside for basketball practice. However, no teams will be formed for some time to come. All men interested in the game are invited to come up for practice.

The local pool tournament was started on July 17. A medal will be given to the winner of the regular tournament, and a pool cue in the beginners' tournament.

GATUN.

The tentative line-up of the Gatun debaters for the Cristobal-Gatun debate on "Government ownership of railroads" are: Affirmative—Barte, Fox, and Windes; negative—Wood, Purdy, and Shailer.

Basketball practice was held on Tuesday and Friday nights.

A class in wrestling was started on Monday night.

The Gatun Chess and Checker Club has been organized, with the following officers: President, R. E. Chatfield; vice-president, F. D. Gartrell; secretary, W. H. Brown. Among those who have signed up are: McLean, Grier, Feige, Severy, Frederickson, MacQueen, Guarino, Brown, Horle, Dickson, Chatfield, Gartrell, Johnson, Lincoln, Barte, Kuehnle, Harrold, MacCombs, Clark, and Carter.

PORTO BELLO.

The handicap tournament recently held by the chess club resulted, as follows:

Name.	Played.	Won.	Lost	P.C.
Capt. Stickle	4	4	0	1.000
Morgan, C. D.	9	7½	1½	.833
Corrigan	13	9	4	.692
Hanbury	11	7	4	.636
Colberg	5	3	2	.600
Tuttle	5	3	2	.600
Mackintosh	12	7	5	.583
Cornelison	12	6	6	.500
McDevitt	12	5½	6½	.458
Goodfellow	10	4½	5½	.450
Wright	9	3½	5½	.389
Nemic	10	3	7	.300
Hill	5	1	4	.200
Rogers	11	2	9	.182
Arden	3	0	3	.000

Handicaps were based on the result of the May tournament, and ranged from one move to queen and one pawn. It was required that fifty per cent of the games be played for a player to be eligible for a prize. The winners were, as follows: First prize, C. D. Morgan second prize, P. F. Corrigan

CRISTOBAL.

The high bowling scores were, as follows: Duckpins—Hess, 102, 101, 101, 128, 101; Wheeler, 105, 100; Wood, 101; Barrett, 118, 108; Smith, 113, 120; Furlong, 101, Ashton, S., 108; Gibson, 100. Tenpins—Gibson, 211; Furlong, 201; Grover, 202; Bullard, 223; Blackburn, 220; Wallace, 201; O'Shea, 213.

On Saturday night, July 22, there will be an elimination tenpin bowling contest. This is open to every one, and no entrance fee will be charged. The winner will be given free bowling for the following week.

Misdirected Letters

ANCON, C. Z., July 19, 1911.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of addressee:

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago de Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro at 5 p. m. on August 9; and for Port Limon at 5 m., on July 26, and August 9.

The Leyland line steamer *William Cliff* sails for New Orleans, via Port Limon, on or about July 29.

Royal Mail steamers leave for New York on alternate Tuesdays, at 12 noon; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, JULY 26, 1911. No. 48.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

NOTES OF PROGRESS.

Revised Estimate of Excavation.

Elsewhere in this issue, there is published an article on the slides in Culebra Cut, giving the figures of the new estimate, as of July 1, for excavation in the Central Division, made necessary because of these slides. By error, the amount of additional excavation on this account, as published in the report for June of the Chairman and Chief Engineer, in the issue of THE CANAL RECORD of July 19, was given as 2,571,690 cubic yards, instead of 4,676,278 cubic yards. That section of the report should have read:

"On account of the changes in the stability of the Canal banks in the Culebra section it was found necessary to add 4,676,278 cubic yards to the original estimate for completed Canal, making the revised total estimated amount of material to be removed in the Central Division 101.801,296 cubic yards, and up to July 1, 1911, 77,338,235 cubic yards had been removed, leaving 24,463,061 cubic yards yet to be removed, in order to complete all excavation in the Central Division. From these figures it will be seen that 75.97 per cent of all excavation in the Central Division has been completed up to the close of the month of June, and 24.03 per cent yet remained uncompleted.

"Considering the two sections which compose the Central Division. the excavation completed, and that yet to be completed, at the close of June operations were, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	65,514,865
To be completed	23,929,140
CHAGRES SECTION.	*Cu. Yds.*
Completed	11,823,370
To be completed	533,921

"From the above figures it will be seen that the Culebra section, locally known as Culebra Cut, is 73.25 per cent completed, and 26.75 per cent yet to be completed. The Chagres section is 95.68 per cent completed, and 4.32 per cent yet to be completed."

Concrete Revetting in Culebra Cut.

Four tests are being made at Contractor's Hill, in Culebra Cut, to determine the most economical and effective method of concrete revetment. The first method is to place rail against the side of the soft rock on 3-foot centers, covering a space about 20 feet broad, and then cover the rail with concrete. The second method is to place one inch square rods, 2 feet 6 inches long, in the soft rock on 3-foot centers, and to anchor the revetment of concrete to the rock by these rods. The third, is to place the concrete against the rock in forms, but without puddling it to make a smooth surface, and then to finish the surface with the cement gun, this method to use neither reinforcement nor anchorages. The fourth method is to continue with the work of coating the soft rock by means of the cement gun.

The purpose is to determine the kind of protection to use in covering the decomposing rock below the 95-foot level in Contractor's Hill, and at other points along the Canal. Chagres River gravel, which is mixed with sand in proper proportion, and one barrel of cement to the cubic yard of material, are used in making the concrete.

Coal Contract.

The annual contract for furnishing up to 550,000 tons of semibituminous coal for use by the Commission and railroad on the Isthmus has been let to the Pocahontas Fuel Company at $2.51 per gross ton, f. o. b. steamer; and the contract for carrying this coal to the Isthmus has been let to the Earn Line Steamship Company at $1.29½ per ton.

Canal Work in the Mindi Section.

The construction of the dike, east of the Panama railroad right-of-way, between New Gatun and Mindi station, for the retention of material to be excavated hydraulically from the Canal prism, north of Gatun Locks, will be completed within the next few days. It consists of a trestle fill, which parallels the Panama railroad for a distance of about 4,000 feet, with a line extending at nearly right angles from each end to higher ground. The dike forms an enclosure of the low ground in this vicinity, with an inside area of several hundred acres, and will be capable of retaining a fill about 20 feet in depth, the water from it draining off into the Mindi River. The spoil is obtained from the dry excavation below sea level at Mindi.

It is expected that the hydraulic fill of the city of Colon will be completed this week, and dredge *No. 86* which has been employed in this work, will be returned, after a thorough overhauling at the Cristobal drydock, to its former position in the borrow pit, north of the Gatun Dam, where it will resume operations on the hydraulic fill of the Dam, displacing the *Sandpiper*. The latter will be set at work north of Gatun Locks to begin the excavation toward Mindi, and also the removal of the earth dike, which forms a barrier between the upper lock and the anchorage basin. About the first of November, the *Sandpiper* will be joined by dredge *No. 4*, now engaged in dredging sand at Nombre de Dios.

Two steam shovels are at work at present in the pit at Mindi, and the excavation is down to grade in several places. The work there will probably be completed before the end of the year.

Vessels to Carry Cement.

The contract for furnishing ships to carry cement, in addition to that carried by the *Ancon* and *Cristobal*, has been let to the Munson Steamship Company for $1.84 per gross ton, as compared with $1.70 per gross ton under the former contract. Three bids were received, the other two being $1.87 and $2, respectively. The new agreement became effective July 1, and is for three or six months, at the option of the Commission.

Lubricating Oils and Greases.

The contract for lubricating oils for the fiscal year 1912 has been let to the Texas Oil Company, the amounts estimated and prices bid, less the rebate allowed for return of containers being, as follows:

CLASS OF OIL.	Quantity	Price.
	Gallons.	*Cents.*
Locomotive engine	60,000	11.00
Valve	65,000	19.50
Car	70,000	10.00
Stationary engine (dynamo)	25,000	13.00
Marine engine	30,000	27.50
Turbine engine	6,000	13.00
	Pounds.	
Nonliquid	22,000	5.00
Crank pin grease	450	5.25
Cable grease	12,000	2.75
Yellow cup grease	60,000	6.00
Black gear grease	60,000	2.75

The total estimate is 256,000 gallons of oil, and 154,450 pounds of grease, and the total contract price $45.258.63.

Work on New Balboa Docks to be Hastened.

Work on the new Panama railroad dock at Balboa is now going forward with day and night shifts, in order that its construction may be hastened The new schedule went into effect on Monday July 17, the day shift working from 7 a. m. to 5 p. m., and the night shift from 6 p. m. to 3 a. m. Owing to a lack of lighting facilities, the night work so far has been principally confined to freeing the caisson pits of water, and removing the excavated material. A lighting circuit is being strung, and within a few days, the night force will be considerably augmented, and operations extended to all phases of the work.

On July 24, twenty-seven out of the 53 caissons required for the foundation of the dock were under way. Of this number, nine had been sunk to bed rock, and six of them had been filled with concrete. Several more had been excavated to nearly the required depth, and the work is now in progress at various points for the entire length of the dock. In sinking the caissons at the north

NOTES OF PROGRESS.

(Continued.)

end, some difficulty was experienced from the unusual amount of water and the peculiar formation of the ground encountered, the latter consisting of soft mud underlying a clay of much harder quality, causing some interference with the setting of the caisson structures.

Part of the excavation for the caisson pits is done with bucket and shovel, and part by a crane operating a clam shell bucket. All of the concrete sections of the caissons, with the exception of the base portions, are built on the bank nearby, and transported into place by crane. Three mixers, two ½-yard, and one 1-3 yard, supply the concrete. In addition, two locomotive cranes, and 14 drilling machines, are in service, the latter furnishing the motive power for hauling the buckets of mud out of the pits.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 65 per cent completed, 146,822 cubic yards, out of a total of 225,000, having been placed at the close of work on July 22. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
July 17	236	8.00	1

Canal Legislation.

A bill has been introduced in the House of Representatives by Representative W. D. Stephens of California, providing for the purchase, charter, or construction of not less than six steamships to be run by the Panama Railroad Company in the Pacific coast trade between Seattle and Panama, this service to be extended upon the opening of the Canal to include ports between Seattle and Boston. The bill has been referred to the Committee on Appropriations.

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending July 22, follows:

Date.	Hours worked.	Cubic Yards.
July 17	5.21	1,848
July 18	6.13	2,437
July 19	4.24	1,737
July 20	4.50	1,863
July 21	3.40	1,565
July 22	4.58	2,070
Total	29.26	11,520

Sunday Trips to Toro Point.

Beginning last week, the limit of passes issued to employes and their families who desire to spend a Sunday at Toro Point was raised from 40 to 100. Until recently, a clapet was used to carry the excursionists, and its accommodations provided for about 40 people. Under the new arrangement, the trip is made by tug, and increased passenger room is available. The demand for passes was always greater than the supply, which usually became exhausted early each week, and even the increased allowance of transportation has been followed by an increased demand, so that practically the entire allotted number of passes were issued for Sunday, July 23. Since the life protection measures were instituted, the bathing beach has proved a greater attraction.

Pilots, Masters, Mates, and Engineers.

The Board of Local Inspectors will examine applicants for licenses as pilots, masters, mates, and engineers, on Wednesday, August 2, at 9 a. m., at the Administration building, Ancon.

CONCRETE WORK IN THE LOCKS.

Over 58 per cent of the concrete for all the locks is in place, the amount at the close of the work on July 22 being 2,476,271 cubic yards, out of a total of approximately 4,284,400. A total of 32,140 cubic yards of concrete was laid in the locks during the week ending July 22.

GATUN LOCKS.

Over 70 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of the work on July 22 being 1,479,273 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each working day for the week ending July 22, and of the total, follows; and a similar statement for the work in the Spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 82 per cent completed, 688,843 cubic yards, out of a total of 837,400, having been placed at the close of work on July 22. The record for each of the six 8-hour working days of last week, follows:

Date.	Auxiliary Plant. 2-cubic yard mixers.			Auxiliary Plant. ½-cubic yard mixer.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

CURUNDU RIVER DIVERSION.

Manner in Which the Swampy Area Contiguous to Panama is Being Drained.

Work on the Curundú River diversion, which is designed to drain the swamp lands bounded on the north by Diablo Hill, on the east by the rising ground of the Sabanas, on the south by the track to Balboa, and on the west by the toes of the old Sosa-Corozal dam, is in progress. When the fill for the toes of the dam was first started, about four years ago, the natural outlet of the Curundú was blocked, and since then, the only place of escape for the surplus water in the swamp has been over a dike about four feet above sea level at mean tide, into the diversion ditch which crosses the old Balboa wagon road, near the East Balboa hotel. This would allow the water to run off only at overflow periods, and would keep the tidal streams and low places filled at other times. In the past, the swamp has acted as a receptacle for the streams flowing across the Panama railroad right-of-way, south of Diablo Hill, which have a watershed extending back into the Sabanas. This formed a vast breeding place for mosquitoes, and the present work is, therefore, a sanitary measure.

The west toe of the old dam has been cut through, thus allowing the water from the Curundú to flow into the Rio Grande, near the site of the half-submerged old French dredges. The excavation is being accomplished by means of an orange peel dredge, which is pushed along on skids, and by hand work. The dredge is now engaged in making a cut through the east toe of the dam, and from this point, channels will be extended in two directions, one to connect with the Rio Hondo, a small tidal stream, and the other to carry off the water from a tidal estuary, which winds tortuously about the flats, and constitutes one of the largest of the swamp waterways. About 1,500 feet of channel, in all, will have to be excavated to an average depth of four feet below mean tide. The bottom width varies from 10 to 15 feet, depending on the amount of water to be carried off. As the material for the most part is very soft, and slides easily, the banks of the channels are made to slope back. so that at the top, their width is 25 feet, or more, and, in time, the currents will probably cause a further widening.

When the system has been completed, the entire swamp will be drained of water at low tide, the work so far accomplished having lowered the old level considerably, tracts of land, formerly under water at low tide, being high and dry under the changed conditions. The work it is believed, will improve sanitary conditions in the district of Guachapali, in Panama, and will result in a sanitary saving. One instance of this, is the section of swamp occupying the triangle between the Panama railroad main line, the Balboa track, and the Balboa wye, which will be drained sufficiently to permit of cutting grass with a mowing machine, instead of scythes.

The Central Division is making a fill of the low lands near the East Balboa commissary, which will reclaim 66 acres of ground. The diversion ditch, which extends through this swamp, will also be filled, as, under the new drainage system outlined above, there will be no further use for it.

Air Compressor for Miraflores Locks.

Owing to insufficient pressure in the air line at Miraflores for the efficient operation of the drills, an air compressor, having a capacity of 1,100 cubic feet of free air per minute, has been transferred to the Pacific Division from the Panama Railroad company's shop at Cristobal, and will be installed on the west bank of the lower lock. Steam for the same will be supplied from two old French engines.

Dynamite Explosion at Ancon Quarry.

A premature explosion of dynamite occurred at Ancon quarry about 2 p. m., on Wednesday, July 19, killing four men and seriously injuring two others. The dead are: Charles Jolly, Jamaican, check No. 105255; Ernesto Roman, Panamanian, check No. 119814; Felipe Torres, Salvadorean, check No. 119822; and Felipe Martinez, Panamanian, nonemploye. The injured were: Leopold Maxwell, Jamaican, check No. 74707, and Manuel Lopez, a Spanish contract laborer, check No. 3867.

Just before the explosion, Jolly, Torres, and a third man were each carrying a 50-pound box of dynamite from the magazine to a place where a blast was to be set off. When about 300 feet distant from steam shovel No. 255, situated on one of the quarry levels, the man in advance placed his box on a pile of old ties for a moment's rest. The man second in line did likewise as he came up, and, as far as can be learned, the explosion occurred at this instant. The third man, who was 30 or 40 feet away from the place, saw the flash, threw his box of dynamite on the ground, and fled up the track. The box was broken in its fall, and its contents, although scattered about, failed to explode. Roman, employed as a water boy, was standing near by in company with Martinez, and both were killed. Maxwell and Lopez, the injured men, will probably recover. The cause of the explosion is not known.

The steamer *Cristobal* will sail from New York on July 27.

LABOR FORCE AND QUARTERS IN JUNE.

The lack of common laborers for the Canal and railroad work, noted in THE CANAL RECORD of June 14, continued throughout June. In the opinion of the Chief Quartermaster, this want is not due to an actual decrease in the number of laborers in the Canal Zone, and the contiguous parts of Panama, but to the idleness of many of the laboring class. There is also a steady increase in the number of negroes cultivating small patches of land in the Canal Zone, and giving up work on the Canal and railroad for farming in the bush.

The total force at work on the Canal and railroad on June 28 was 32,690, as compared with 34,233 on May 31. and with 35,578 in June, 1910. Canal employes numbered 26,087, and Panama railroad, 6,603. The number of "gold," or white American employes in June, 1911, was 4,292, as compared with 4,367 in June, 1910. The force report follows:

QUARTERS.

On July 1, there were 23,438 occupants of Commission quarters. Of this number, there were 9,406 white Americans, including 5,364 men, 2,070 women, and 1,972 children. There were 5,573 Europeans, of whom 4,997 were men, 239 were women, and 337 were children. There were 8,459 negroes, of whom 5,996 were men, 1,082 were women, and 1,381 were children.

The above figures include 40 Asiatics at Balboa, and two at Porto Bello.

CRANES FOR BALBOA WHARF.

Eight Machines to be Purchased to Increase Handling Facilities at Pacific Terminus.

Award has been authorized for eight 4-ton electric cargo handling cranes for the pier at Balboa, the Pacific entrance to the Canal, to the Maine Electric Company, at $10,465.75 per crane, plus $372 per crane for special installation, plus $627.32 per crane for magnetic control; total per crane, $11,465.07; total for eight cranes, $91,720.56.

Bids were originally opened on February 1, nine being received, and award was authorized to the Cleveland Crane and Engineering Company. On account of changes made in the plans, it was urged by other bidders that new bids should be requested and this was done. The new bids were opened on June 22, and were sent to the Isthmus for canvass. There were seven, and the lowest was accepted.

The difference between high and low tide at Balboa is about 20 feet. The cranes must move along the face of the dock, and handle cargo from ships through the legs of the cranes into the covered portion of the pier, and were designed to meet these conditions. They consist of a structural steel framework and a hinged vertical swinging steel boom. They must be able to hoist a load of four tons, at a distance of 40 feet from center of crane to center of ship, through a maximum height of 90 feet, at a speed of 300 feet per minute, trolley it along the boom at a speed of 600 feet per minute, and deliver it upon the wharf within one minute from the beginning of the operation. The tower must be able to move along the dock at the rate of 100 feet per minute against a wind pressure of 30 miles an hour.

These cranes will be delivered within eight months of the time of signing the contract, and will be erected one by one, in order that the cranes which they replace may be used as much as possible during the erection. This installation is part of the effort to increase temporarily, the handling facilities at the Pacific terminus of the Panama railroad.

Fatally Burned by Alcohol Explosion.

Elizabeth Bailey, aged 25 years, a Jamaican servant in the family of Mr. L. G. Thom at Gatun, tried to light the kitchen fire with alcohol on the morning of July 22. The alcohol exploded, burning her so badly about the upper part of the body that she died at Colon Hospital a few hours later. Mr. Thom suffered burns on both hands in trying to smother the fire that was consuming the servant's clothing.

Church School and Orphanage in Colon.

A two-story concrete building for educational and charitable purposes is under construction on Panama railroad land in Colon, adjacent to the Church of the Immaculate Conception, of which the Rev. José P. Volk is the resident priest. The building is 133 feet long, 45 feet wide, and the walls, which have recently been completed to the second story, are 24 inches wide, with a base 30 inches wide, and a foundation below the surface of the ground five feet in width. The walls are made of coral rock concrete, the rock having been obtained from the excavation for the D street storm sewer. The lower floor is provided with numerous windows and doors, including a wide arched entrance on each of the two street sides. Both floors will be made of cement, and the upper one will rest on iron girders. Work on the building was begun in 1907, and has been prosecuted in gradual stages, the funds having been furnished from the Rev. Father Volk's personal resources, and, in addition, he has worked on it with his own hands. It is designed to use the building as a place for holding public meetings, as well as for a schoolroom and orphanage.

Postal Business and Canal Zone Revenues.

The report of the Director of Posts for the month of June shows that 18,228 money orders were issued, amounting to $438,054.55. Of this amount, $323,144.91 was issued payable in the United States, $114,293.14 in the Canal Zone, $388 in Martinique, and $228.50 in Costa Rica. The fees collected amounted to $1,956.70, and the amount of orders paid and repaid was $135,934.63.

Postal sales during the month amounted to $6,672.65, and newspaper postage to 65 cents.

The revenue collections for the month were, as follows:

Distillation licenses	$ 306.74
Motor vehicle licenses	52.00
Retail liquor licenses	29,000.00
Bills collected for treasurer	67.74
Total	$29,426.48

Profit From Marine Minstrel Show.

The minstrel show by the men of the U. S. M. C. at Camp Elliott, at the National Theatre in Panama, on the night of July 3, made a gross earning of $956.10, and net of $204.76. One-half of the net earnings go to the post exchange at Camp Elliott, and the other half to the Fourth of July committee.

Veterans of Foreign Service.

Canal Zone Post, No. 40, American Veterans of Foreign Service, will hold a meeting, in the District Court room, building No. 1, Cristobal, on Saturday, July 29, at 8 p. m., for the purpose of electing officers. All charter members are requested to be present.

W. D. ROGERS, *Adjutant.*

GATUN, C. Z., July 23, 1911.

Injunction Case.

The argument in the application for an injunction against the Panama Railroad Company, made by Horatio L. Stevenson, for the purpose of restraining the company from excavating in a hill east of the Mount Hope road, was heard in the Circuit Court of the Third Judicial Circuit, at Cristobal, on Monday, July 24, having been postponed from July 20. The matter was taken under advisement by Justice Brown.

Census of the Canal Zone.

The Department of Civil Administration has been directed to prepare for a thorough census of the Canal Zone. A census was taken in 1908, the period covering March 3 to June 23.

Knights of Pythias.

Paradise Company, No. 4, Uniformed Rank, Knights of Pythias, a new company, will be mustered in at Paraiso lodge hall on Saturday evening, July 29 The following officers will be installed: Captain, George D. Morton; first lieutenant, John D. Harper; second lieutenant, Harry L. Bridges; recorder sergeant, L. L. Hyer. Captain Frank L. Cornish of Gatun will be the mustering officer. All members of the Uniformed Rank are invited to attend. Other companies in the Canal Zone are, as follows: Panama Company, No. 1, at Gatun; Empire Company, No. 2, at Empire; Cascade Company, No. 3, at Las Cascadas. There are about 200 members in all. The new company has 25 members.

Employes Rates to South America.

The Pacific Steam Navigation Company, and the South American Steamship Company, have made a rate of 10 per cent off from regular fare for employes of the Commission traveling south of Panama, first-class, in parties of from six to ten persons, and a rate of 20 per cent off for parties of more than ten persons. The ships of these companies call at points in Ecuador, Peru, and Chile.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending July 22, follows:

DATE.	Hours worked.	Cubic Yards.
July 17	7.30	2,565
July 18	4.50	2,148
July 19	7.00	2,568
July 20	5.35	2,227
July 21	7.10	2,419
July 22	6.30	2,522
Total	38.35	14,449

Missing Men.

Any one having information regarding the present whereabouts of Edward C. Morgan, who is supposed to have come to the Isthmus, is requested to communicate with THE CANAL RECORD, Ancon, C. Z.

Information is requested regarding the present whereabouts of Richard O'Brien of Concord, N. H., who was employed on the Canal from April 29, 1905, to September 18, 1909.

Information is desired regarding the present whereabouts of Albert M. Henry of Keystone, W. Va., who was employed on the Canal from April 5 to July 1, 1909.

Information is requested by the American Consulate in Panama regarding the whereabouts of Frederick William Schreiber, a photographer, who is supposed to have come to the Isthmus in April, 1911.

The Washington office has issued a circular under date of June 24, containing information for inspectors on duty in the United States, under the direction of the Isthmian Canal Commission.

Tug Service to Porto Bello, Nombre de Dios, and Toro Point.

Effective June 26, the following schedule will be maintained between Dock 13, Cristobal, Nombre de Dios, Porto Bello, and Toro Point:

Tug *Reliance* will leave Dock 13 daily, except Sundays, at 7 a. m., with two barges for Nombre de Dios, returning at once with two barges to Gatun.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 9 a. m., with three barges for Porto Bello, returning to Gatun as soon as barges are loaded.

Tug *Porto Bello* will leave Dock 13 Saturdays at 9 a. m., light, for Porto Bello. This tug will leave Porto Bello, light, at 2 p. m., arriving at Dock 4, Colon, in time for passengers to catch train No. 7, leaving Colon at 4.35

Tug *Porto Bello* will leave Dock 13 Sundays at 7 p. m., for Porto Bello, returning at once.

Tug *Mariner* will leave Dock 13 daily, except Sundays, at 6.30 a. m., for Toro Point, returning at once.

Tug *Mariner* will leave Dock 13 Sundays at 9.30 a. m., for Toro Point, returning at once

A tug will leave Dock 13 on Wednesdays, Saturdays, and Sundays, at 4.30 p. m., for Toro Point, returning at 5.30 p. m.

A tug will leave Dock 13 on the 20th of each month at 6 a. m., for Porto Bello and Nombre de Dios, returning to arrive at Dock 4, Colon, about 4.30 p. m.

CULEBRA CUT SLIDES.

New Estimate to Cover Material in Motion.

Additional breaks in the banks of Culebra Cut have caused the Central Division to revise its estimate of excavation yet to be done in that section of the Canal by adding 5,257,281 cubic yards. From the first of the fiscal year, therefore, the amount of excavation estimated for the Cut is, as follows:

	Cubic Yards.
Excavated to July 1, 1911	65,514,865
To be excavated	23,929,140
Total	89,444,005

The estimate of December, 1908, for excavation in Culebra Cut was 78,042,295 cubic yards, and, on July 1, 1910, there were added 5,467,150 cubic yards to allow for slides, and 1,005,938 cubic yards to cover breaking beyond the slope line, below the berm at 95 feet above sea level.

The addition of 5,257,281 cubic yards for slides, on account of developments during the past year, will not affect the total cost as estimated in December, 1908, nor the estimated time of completion. The cost per cubic yard was estimated in December, 1908, as 98 cents, and the most recent cost statement, that for the quarter ending March 31, shows a cost per cubic yard for that quarter of 56.92 cents, and a cost per cubic yard for the whole period—May, 1904, to March 31, 1911—of 88.01 cents. It was believed, when the estimate of 1908 was made, that the excavation in Culebra Cut could not continue for more than a year at the rate then established. This rate has not only been maintained, but it has been increased, owing to increased efficiency in the working force.

The statement published below gives, in tabular form, the history of the slides in Culebra Cut to July 1, 1911. It will be noticed that there remained on that date to be excavated from slides 5,868,120 cubic yards, and that 10,757,658 cubic yards had been excavated. Of the excavation still remaining, that from slides represents, therefore, 25 per cent. In the fiscal year, the excavation from this source amounted to 4,879,378 cubic yards.

The largest of the slides are those at Culebra, on both east and west banks, and the well-known Cucaracha slide, on the east bank immediately south of Gold Hill. This last appears to be nearly exhausted. For two months, the berm at 95 feet above sea level has been established in front of it, and the only movement noticeable is a small amount of mud carried down by the rains. There is none of the movement that for so long carried a whole section of the bank irresistibly towards the prism, sweeping away construction tracks, and pushing 100-ton steam shovels before it.

At Culebra, the plan of excavating the moving banks from the top of the slope has been in execution since January, the result being to remove the material before it slides into the Cut and interferes with drainage ditches and construction tracks, and also to lighten the mass, so that it will be less likely to slide. On the west bank, the slide includes the location of part of the village of Culebra, and, during the fiscal year, there were demolished at this place 19 old French buildings, while 37 American buildings were moved to other sites.

The total amount of material remaining in the slides in Culebra Cut represents about three and one-half times the excavation from that section during the month of June.

The statement referred to above, follows:

LOCATION OF SLIDES BY STATION TO STATION.	Area of slide in acres.	Cu. Yds. of material remaining.	Cu. Yds. material exc'd to date.	Cu. Yds. exc'd year end'g July 1, 1911.	Date when slide first developed.	Remarks.

PERSONAL.

The Secretary of War, Henry L. Stimson, and his party left the Isthmus for Porto Rico on July 23, on board the U. S. S. *North Carolina*.

Major General Leonard Wood, and other members of the Panama Fortification Board, with members of their families, returned to the States on the *Ancon*, which sailed from Cristobal on July 26. Brigadier General W. W. Wotherspoon, and Mrs. Wotherspoon, returned to the States on the *Allianca*, which sailed on July 25.

Justice Thomas E. Brown, Jr., returned on the *Allianca*, on Wednesday, July 19, from his annual leave of absence in the States.

Licenses for Chauffeurs.

The Board of Local Inspectors will hold an examination for chauffeurs' licenses at the Administration building, Ancon, on Wednesday, August 2, at 2 p. m. All applicants are required to have their application blanks properly filled out and endorsed before entering the examination. For information, address Board of Local Inspectors, Ancon, C. Z.

Storm in Pacific Division.

A local rain and wind storm occurred in the Pacific Division between 6 and 7 o'clock on the night of July 23. The wind at Pedro Miguel and Ancon, blowing from the east reached a maximum velocity of 25 miles an hour, and it is believed the velocity was greater over Panama Bay, near the Balboa tide station.

The tidal currents in the Pacific entrance to the Canal, at Balboa and Corozal, were temporarily reversed, the water level being forced up at a time when the tide should have been steadily receding. The tidal elevation increased 0.7 of a foot at Balboa, while, under normal conditions, it should have lowered 0.3 of a foot. At Corozal, the increase in elevation was 1.5 feet during a period in which the tide should have receded 0.4 of a foot.

French Machinery for Canal Exposition.

The Depot Quartermaster at Mount Hope has been directed to set aside pieces of machinery and equipment, included in the following list, for shipment to San Francisco, at such time as the exposition administration may desire. The list includes only selected articles of the equipment used by the French in their canal work. It follows:

Track material—Frogs, rails, switches; track with steel rails; Decauville track and turnout; Decauville turntable.

Excavating machinery—Excavators and parts at Empire, Cucaracha, and Tabernilla; crane and crane buckets; drill outfit, including drilling frame on 5-foot gage track.

Rolling stock—Two Decauville locomotives; Decauville cars, "V" and pan types; French locomotives, both types; French cars, six-meter; section of track with switch stand, and guayacan ties.

Machinery—Lathe, combination shear and punch, shaper, shear, and drill press, heavy hand shears, steam pumps, centrifugal pumps, blower, steam winches.

Hand tools—Picks, saws, axes, wrenches, drills, hammers, augurs, and other tools.

Engine—Boiler with engine, fly wheel, and pulley on top.

Miscellaneous—Letter press, fireproof safe, diving suits, mast head and side lights for ship, ship compasses, bells, binnacles, and canvas water buckets.

French Scrap.

A quantity of old French scrap collected along the Canal has been dumped on the low ground east of docks Nos. 13 and 14, where it will be held until the vessels are ready to take it. The former method was to hold the scrap on cars in the Cristobal yards pending delivery to the steamships, but too many cars were kept out of service in this way. The new plan permits handling direct to ship's side by the cantilever crane, or reloading on cars, when necessary. The storage pile affords opportunity to classify the scrap into various grades. No more scrap will be collected until bids are opened for it in the United States on September 5.

Locomotive Engineer Killed.

John Fremont Brown, a locomotive engineer employed in the Pacific Division, was run over by a Central Division engine in the Pedro Miguel yards, about 11.30 a. m., Friday, July 21, and instantly killed. He was crossing a track on his way home to his noonday meal when the accident occurred. He was a native of Zanesville, Ohio, 55 years of age, and had been on the Isthmus since August 12, 1907, coming here from Los Angeles, Cal., his place of residence in the States. His wife, now on the Isthmus, survives him.

Obituary.

H. H. Penny, a native of Pennsylvania, died at Ancon Hospital on July 16, aged 65 years. He was employed by the Central Division, with quarters at Empire, and had been on the Isthmus six years.

SOCIAL LIFE OF THE ZONE.

Women's Clubs Library at Gorgona.

A portion of the traveling library of the Canal Zone Federation of Women's Clubs has been lent to Gorgona for the benefit of the schoolchildren of that village. A room over the offices of the district quartermaster has been assigned to the federation for use as a library. Distribution of books will begin on Thursday, July 27, and thereafter, the library will be open every Thursday afternoon from 3 to 5 o'clock. The library is free to all children residing in Gorgona, but a deposit of seventy-five cents on each book is required to cover its cost. A fine of five cents a week, or less, will be imposed for keeping books out longer than two weeks. The library is in charge of the librarian of the Canal Zone Federation, and all communications regarding it may be addressed to her at Gorgona.

Public Playgrounds.

The playground equipment, consisting of swings, bars, and ladders, which was placed on Cristobal Point by the philanthropy department of the Cristobal Woman's Club, has been purchased by the Gatun Playground Association, and will be removed to the Gatun playground before the opening of the school year.

The municipality of Colon has granted the use of the public playground to the schools of the city, each school having been provided with a key to the ground. Special hours have been designated to each group for hours of directed play.

Church Notes.

St. Luke's Sunday school, Ancon, will hold its annual picnic the first week in August. Details, which will be arranged by the woman's guild, will be announced later.

The Rev. Father McCarty, a priest of the St. Vincentian Fathers, has arrived on the Isthmus to take up work as assistant in the parish of St. Ferdinand's Roman Catholic church at Empire. The work on the parish house is nearly completed, and the priests will take up residence there within a short time.

Four missionaries of the Methodist Episcopal church were in Panama during the week of July 10 to 17, in transit to their several posts in Peru, Bolivia, and Chile. One of their number, the Rev. W. W. Brownlee, preached at the sea wall church on Sunday, July 16.

The Woman's Foreign Missionary Society of the Methodist church will meet at the home of Mrs. Stroupe, Corozal, on Thursday, August 4.

Red Cross Dance.

A subscription dance for the benefit of the endowment fund of the American National Red Cross Association, will be held at the Commission clubhouse in Gatun, under the auspices of the Gatun chapter, Saturday evening, August 5. Tickets are $1, United States currency, and may be procured at the various clubhouses in the Canal Zone, or from any of the following committee: R. M. Sands, Reed E. Hopkins, W. E. Stoney, Frank E. Shuck, D. T. Chamberlain, Dan St. Clair, and O. J. Ruch. Train service after dance.

I. O. O F.

At a regular meeting of the Isthmian Canal Lodge, No. 1, I. O. O. F., held in the Commission lodge hall at Gorgona, on July 18, the following officers were installed by District Deputy Grand Sire B. F. Sisson of Gatun: Noble grand, H. L. Greeley; vice-grand, E. W. Stevens; secretary, R. A. Schofield; treasurer, C. E. Whipple; warden, L. A. Taber; conductor, D. H. Schultz; right supporter, noble grand, C. H. Beetham; left supporter, noble grand, Robt. Varenkamp; right supporter, vice-grand, B. F. Henkle; left supporter, vice-grand S. E. Calvit; chaplain, W. T. Clements; right scene supporter, Henry R. Naecker; left scene supporter, Samuel F. Naecker; inner guard, C. J. Jansen; outer guard, R. R. Robinson.

The Canal Zone Humane Society.

The annual meeting of the Canal Zone Humane Society, with election of officers, will be held at the Hotel Tivoli on Sunday, August 13. The society wishes to state that any cases of ill treatment of animals, or children, in the Canal Zone may be reported to the local police, or a statement of the same be made in writing to the secretary of the Canal Zone Humane Society, Ancon, C. Z.

Spanish War Veterans.

There will be a recruiting meeting of the United Spanish War Veterans in building No. 1, Cristobal, on Sunday afternoon, July 30, 1911, at 1.30 p. m. All eligibles are invited to attend.

Special recruiting meetings of Camp Chagres, No. 2, U. S. W. V., will be held in the I. C. C. lodge hall at Ancon, at 7 p. m. on July 29, and at 9 a. m. on August 6, in the Kangaroo Hall at Empire.

New P. R. R. Time Table.

Time table No. 10 of the Panama Railroad Company went into effect on Monday, July 24, at 12.01 a. m. The new schedule does away with the shuttle train service formerly operated between Colon and Gatun, the regular trains making stops, as indicated in the time table, at the intermediate stations. Train No. 72, which formerly left Panama on Saturday nights only at 7.30 o'clock, has been taken off. No. 73, leaving Colon at 12.30 a. m. on Sundays only, will be a mixed train, carrying one or two passenger coaches. There have been no radical changes as regards the arrival and departure of the other trains, but the running time of all trains has been lengthened, making the schedule 10 to 15 minutes longer.

PANAMA RAILROAD COMPANY.

PASSENGER TRAIN TIME TABLE No. 10—IN EFFECT JULY 24, 1911.

* No. 73 is a mixed train, carrying one or two first class coaches.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

An informal social was held in the gymnasium on Wednesday evening, July 19, and the following program was rendered: Magazine contest; cracker whistling contest, by six boys; vocal solo, J. E. Conn; short stories, J. E. Cunningham; piano solo, Mr. Potwin; refreshments. Plans were made for a reception to Mr. Kramer, the returning secretary, to be held in the gymnasium on Wednesday evening July 26.

CULEBRA.

The chess game by wireless, between Culebra and Porto Bello, was won by Culebra in 31 moves. In the 16th move, Porto Bello sacrificed a piece, but obtained only temporary advantage in position, and, at the 25th move, was playing on the defensive, Culebra having clear advantage of one piece.

The high duckpin scores for last week are, as follows: Huttlemaier, 106, 104, 100, 110, 104, 105, 100, 100; Cornthwaite, 102; Fox, 111, 102, 101; Palmer, 111; Brown, 101; Wheeler, 104, 107; Case, 105, 116; Stearns, 101.

In a match game on July 19, the following record was made in duckpins: Huttlemaier, 100; Fox, 102; Palmer, 111; Brown, 101.

The hotel defeated the Administration building basketball team on Thursday, July 20, by a score of 68 to 26, thus winning two out of three games.

The Culebra basketball team played the first game of the season on Saturday July 22, with Gatun, defeating the visitors by a score of 32 to 25.

A handball tournament was begun last week with 16 men competing for gold, silver, and bronze medals. Another handicap tournament, and a two-man tournament, will be started in the near future.

On Saturday, July 29, the Culebra basketball team will play the Corozal team at Culebra.

In addition to the regular afternoon gymnasium class, an evening class for advanced gymnasium work will begin next week, meeting on Tuesday and Friday evenings at 8 o'clock. Regular basketball practice will be held immediately after the gymnasium class.

EMPIRE.

The literary and debating society has elected the following officers for the next six months: President, J. C. Foreman; vice-president, H. W. Sawtelle; secretary-treasurer, H. W. Dohrmann; executive committee, Messrs. Foreman, Harlan, Dickson, program committee, Messrs. Sawtelle, Hall, Conner; membership committee, Messrs. Dohrmann, Ross, King. The subject of the debate on July 28 will be "Resolved, that the standing armies are detrimental to human progress." Affirmative, Carl Anderson; negative, Robert Browning.

The first Saturday night "Open house" was held on the 22d, and was well attended. The program consisted of orchestra, music, bowling, pool, and basketball tournament games. Refreshments were served in the lobby.

The leaders in the boys' duckpin tournament are, as follows:

	Won.	Lost.	P.C.
Farrell	2	0	1,000
Zinn	2	0	1,000
Witt	5	2	714
Benninger	5	2	714
Kimball	2	1	666

After a vacation of three months, the musical and dramatic society resumed its rehearsals on the 25th. The musical section will give a sacred concert on Sunday evening, August 6, at 8.30 o'clock.

The result of the July handicap tournament is, as follows: First place, Pearson; second place, Barnes, third place, Earle.

The following high scores were made on the bowling alleys during the week: Gorham, 220, 206, Parkis, 212; Potter, 211; Anderson, 213.

GORGONA.

Friday evening, July 21, a "Promenade social" was held in the gymnasium. Refreshments, consisting of pumpkin pie and cocoa, were served. The following program was rendered: Whistling solo, Miss Stein Cross; piano solo, Mrs. Swain; vocal solo, George A. Ringger; vocal solo, Mr. Donaldson; vocal solo, Miss Otis. In addition to the above, a program was rendered by the Panama orchestra.

The monthly song service was held last Sunday night. The Rev. C. H. Elliott of Colon delivered a very interesting and instructive talk on Robert E. Lee, and patriotic songs were sung by the audience and male chorus. T. S. Booz led the singing, and Mrs. Booz played the piano.

At a recent meeting of the physical department committee, it was decided to start gymnasium work on Monday, July 31, the class to meet thereafter for ten weeks on every Monday and Thursday evening at 8 p. m. On every Monday night, for a half-hour before gymnasium class, there will be a talk on health. It was also decided to devote a night every two weeks, after the gymnasium work, to an informal social gathering.

GATUN.

On Wednesday evening, July 26, the literary club discussed the present political situation in the United States. President Wantland who recently returned from his vacation, occupied the chair. On account of the illness of three of the Cristobal debaters, the joint debate between Cristobal and Gatun has been indefinitely postponed.

The chess and checker club has decided to hold a preliminary tournament, beginning Monday, July 24, and continuing until Saturday, August 12, for the purpose of classifying the players. To obtain a rating, each player must play at least three-fourths of all those who enter, each playing two games with every other player. Any player who fails to meet enough men to earn a rating will be put in the first, or highest, class in the subsequent handicap tournament.

The wrestling class met on Wednesday, July 26, under the direction of Mr. Huber.

The clubhouse has been presented with a snake skin, ten feet long, of the boa constrictor species; also, a stuffed armadillo.

Thirty-five books of fiction, and twenty-five phonograph records, were purchased during the past week.

CRISTOBAL.

The wrestling class is meeting regularly every Monday night at 7.30. The catch-as-catch-can form is being taught. All members are eligible.

On Tuesday and Thursday nights at 8 o'clock, the regular gymnasium class meets. Calisthenics, cross and long horse, parallel bars, marching, and tumbling, are taught. This class is open to all members.

At a meeting of the literary and debating club, on the night of July 12, the principal speaker was Mr. Tracy Robinson, whose subject, "A great adventure and its results in tropical America," was a résumé of the history of the Isthmus since the beginning of the Panama railroad, together with personal experiences of 30 years in Panama.

The club held a debate on July 19, subject, "Resolved, that the Panamanian lottery should be abolished for the benefit of the community." The vote of the judges was two for the affirmative, and one for the negative.

On Saturday night, the moving picture show by men from the United States armored cruiser, *North Carolina*, was attended by the largest audience in several months.

In the elimination tenpin tournament last Saturday night, Grover was defeated in the finals by Wallace. On next Saturday night, at 7.30 o'clock, similar matches will be held in both duckpins and tenpins. These are open to all members, and no admission fee is charged.

The following high scores were made during the week ending July 22:

Duckpins—Smith, 104, 105, 100, 116; Weston, 101; Jacques, 102; Wood, 100, 102; Wheeler, 100.

Tenpins—Ballard, 229, 211, 205, 202; Barrett, 202, Furlong, 218; Wheeler, 215, Collins, 201; Gibson, 208; Blackburn, 200.

On August 7, a handicap tenpin tournament will be started, and all bowlers are urged to participate. Entries will be received at any time before that date.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gatun, C. Z., on Sunday, July 30, at 5 p. m. The program follows:

1 March—*Love of Liberty*	Scouton
2 Selection—*The Girl of My Dreams*	Hoschna
3 Waltz—*Gaite*	Waldteufel
4 Nautical Fantasia	Tobani
5 Idyl—*Garden of Roses*	Pratt
6 Medley Overture—*Head Lights*	Schulz
7 Characteristic—*Muttering Fritz*	Losey
8 Selection—*Robin Hood*	De Koven
9 Popular Number—*On, Wisconsin*	Purdy

OLIVER KIMBALL, *Acting Musical Director.*

The next concert will be given at Cristobal, C. Z., on Sunday, August 6.

Supplies for Canal Work.

The following steamers with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, and Colon, during the week ending July 22:

Prinz Sigismund, July 15, from New York, with 86 bales of waste for stock.

Clyde July 16, from New York with 20 bundles turnbuckles for stock, and 10 pieces castings for Atlantic Division.

Allianca, July 19, from New York, with 6 cases lamp chimneys, 25 cases paper napkins, 8 cases acid, 162 pieces steel beams, 58 pieces steel bars, 1,500 kegs track spikes, 10 barrels brass valves, for stock, 53 cases drugs for Sanitary Department; 5 cases steel cabinets for Central Division; 400 pieces castings, 400 bundles brake shoes, 4 cases car parts, for Mechanical Division, and a miscellaneous cargo, the whole consisting of 2,774 pieces, weighing 251 tons.

Ancon, July 19, from New York, with 53,475 barrels cement for Atlantic and Pacific Divisions.

Dania, July 19, from Baltimore with 2,626 pieces steel plates, 36 pieces steel channels, 55 pieces steel bars, 150 pieces steel angles, 2,565 pieces steel beams, 400 cases turpentine, 268 pieces sewer pipe, 335 tons coal, for stock; 16 pieces steel channels, 1,300 pieces steel angles, 17 cases lock material, 68 bundles lock material, 13 pieces lock material for Atlantic Division, 9 pieces lock material, 45 bundles lock material, 10 cases lock material, for Pacific Division, 7 cases jacks, 700 car wheels, for Mechanical Division.

Atenas, July 20, from New Orleans, with 1,089 bales hay, 562 bales straw, 182 pieces lumber, for stock; 419 pieces lumber for Mechanical Division.

Metapan, July 21, from New York, with 9 cases stationery, 6 cases scales, for stock; 8 cases fire hose for Fire Department.

OFFICIAL CIRCULAR.

GATUN, C. Z., July 20, 1911.

Effective August 1, 1911, and during the leave period of R. M. Sands, Chief Clerk, Ben Jenkins, Assistant Chief Clerk, will act as Chief Clerk of the Atlantic Division.

WM. L. SIBERT, *Division Engineer.*

Auction Sale of Dairy Cows and Bull Calf.

ANCON, C. Z., July 18, 1911.

On Saturday, August 19, at 10 a. m., there will be sold at public sale to the highest bidder at the Ancon Hospital dairy, two dairy cows, ranging in age from seven to ten years, and one bull (calf) aged two and one-half years. The dairy is located near the insane asylum buildings in the rear of the hospital grounds. The terms of the sale will be cash.

CHAS. F. MASON, *Superintendent.*

Leasing of Government Building.

ANCON, C. Z., July 13, 1911.

Bids will be received by the Collector of Revenues up to and including August 10, 1911, for the leasing to the highest bidder, from August 16, 1911, for a period of not more than three years, of building No. 17 at Empire, owned by the Canal Zone Government. Rent to be payable monthly. The building is of French construction, two stories, and contains, in all, fifteen rooms, with a small outhouse. Bids should be in an envelope marked, "Bids for a lease to building No. 17 at Empire."

TOM M. COOKE, *Collector of Revenues.*

The following vessels arrived at, or departed from, the port of Balboa during the week ending July 22:

Arrivals—July 17, *[illegible]* from Buenaventura; *Mantaro* from Callao; July 19, *Quito*, from Guayaquil; *Limari* from Valparaiso.

Departures—July 17, *[illegible]* to Valparaiso; July 20, *Peru*, to Guayaquil; July 21, *Pleiades*, to San Francisco, *San Jose*, to San Francisco; July 22, *Mantaro*, to Callao.

LOST—Sunday evening, July 23, in Ancon, or Hotel Tivoli, a gold hat pin, pansy top, with small diamonds. Reward if returned to Mrs. A. B. Hendricks, Hotel Tivoli.

COMMISSARY DEPARTMENT.

New Hours at Culebra Commissary.

Effective July 24, the open hours at Culebra commissary will be from 8 a. m. to 1 p. m., and from 3 p. m. to 7 p. m.

All other commissaries are open from 8 a. m. to 1 p. m., and 3 p m. to 7 p. m. with the exception of the Cristobal commissary, which is open from 8 a. m. to 12.30 p. m., and from 2 p. m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning July 22.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

NOTES OF PROGRESS.

Rails for Lock Towing Machines.

A contract for about one-half of the total amount of steel rail required for the track of the towing machines along the walls of the locks has been let to the Bethlehem Steel Company, the lowest bidder, which offered open hearth rail at $31.35 a ton. The amount of the contract is 1,250 gross tons of 90-pound steel rail, 85 per cent in 30-foot, and 15 per cent in 33-foot lengths. The original bids were opened on May 10, but on account of high prices new bids were asked for, and foreign competition was invited. The second bids were opened on July 18, and the lowest prices offered were 50 cents per ton less for open hearth, and 35 cents per ton less for Bessemer rail. No bids were submitted by foreign manufacturers.

Cranes and Skips for Breakwater Quarry at Porto Bello.

A contract for three locomotive cranes, to be used in loading rock from the quarry at Porto Bello upon barges for transport to the breakwater at the Atlantic entrance to the Canal, has been let to the Industrial Works at Bay City, Mich., for $28,800. These cranes are to have a maximum radius of 30 feet, and a minimum of not more than 12 feet, a capacity with outriggers at 20-foot radius of at least 80,000 pounds, and at 25-foot radius of 60,000 pounds; and without outriggers at 15-foot radius of at least 40,000 pounds, and at 30-foot, at least 16,000 pounds.

They must be mounted on a steel car, carried on two four-wheel trucks, so constructed as to be handled easily on a 30-degree curve, and to propel itself on a 3 per cent grade. The cranes are to be used at Porto Bello in quarrying large rock for the armoring of the breakwater in Colon Harbor. Their work will be to lift loaded skips, weighing approximately 15 tons, from the ground to flat cars, empty skips from cars to ground, and to load stones of over one cubic yard into the skips by means of hooks. For this latter purpose, a single line rapid running auxiliary hoist is provided, the rope to run over the sheave at the extreme end of the boom, and the arrangement such that the hoist may be operated alone, or at the same time as the main block. The hoist must have a capacity of at least five tons.

A contract for 32 skips, to be used in the work of quarrying above described, has been let to the Kittoe Boiler and Tank Company of Canton, O., at $246 each. These skips are to be of steel plate, angles and rail, outside dimensions 10 by $8\frac{1}{2}$ feet by $29\frac{1}{4}$ inches. The plate is to be 5-8 inch steel, bottom and side rails of 70-pound standard steel rail, continuous in length over bottom and sides; top edge of plate to be reinforced with 6 by 6 by $\frac{3}{4}$-inch steel angles; back and front slinging chains hung on a single link.

Materials for Relocation of Panama Railroad.

A requisition has been made for the following materials for use on the relocation of the Panama railroad: Two thousand gross tons of 90-pound open hearth steel rail; 8,000 pairs of 4-hole slice bars; 1,000 extra special track bolts; 160,000 "Economy" No. 9 rolled steel, 4-hole tie plates; 400,000 screw spikes, five inches long under flange and 7-8 inch diameter; 8,000 special joint tie plates; 17,000 special joint screw spikes, 5 15-16 inches long.

Colon Breakwater.

At the close of work on July 31, the double track trestle for the Colon breakwater had been extended for a distance of 5,972 feet, or over one-half of its ultimate length, and 406,069 cubic yards of material had been dumped for the embankment fill, most of which has so far been used in making the fill under water, so that a comparatively small portion appears above the surface. The record of operations at the quarries on Toro Point shows that a total of 453,791 cubic yards of material had been excavated up to the above date. It is planned to begin the work of armoring the outer sides of the breakwater with rock from the Porto Bello quarry about September 1.

Intake Bridges and Decking Material.

Bids will be opened at the Washington office on August 7 for material for four intake bridges, and the structural material for decking over the operating machinery chambers in the locks. The bridges are for the locks at Pedro Miguel and Miraflores. They are to be built of steel plate girders, three in each bridge, and are designed to carry 500 pounds live load per square foot, or a 15-ton locomotive crane. They will connect the side walls of the locks with the wing walls, and their purpose is to carry the electric towing locomotives. Each bridge will have a clear span of 50 feet, will be $27\frac{1}{2}$ feet wide, and the girders will be six feet deep. The steel will be encased in concrete, to protect the metal and to make the bridges harmonize with the other concrete work of the locks. Each bridge will weigh about fifty tons. The decking referred to consists of steel I-beams, which will be riveted together to form the support for the concrete decking over the chambers in which the machinery will be installed.

Canal Legislation.

A bill was introduced in the House of Representatives on July 12 by the Hon. Robert C. Wickliffe of Louisiana, providing for the disposal of Canal equipment after it is no longer needed in Panama.

Addition to Hotel Tivoli.

Plans are being prepared in the office of the Constructing Quartermaster for a new wing to be built immediately in the rear of the brick, or fireproof, section of the Hotel Tivoli. It will be 102 feet long, and 38 feet 2 inches wide, of the same type of construction as the other two wings, surrounded with 10-foot verandas on the first, second, and third floors. The side of the hill, on which the foundation piers for the addition will stand, slopes at the rate of about one foot in five, and advantage will be taken of this slope by building a basement, which will occupy about 80 feet of the outer end of the wing. The billiard room and barber shop, now on the first floor in the old part, will be moved to this basement, which will also furnish room for the storage of baggage and other effects.

The completion of the extension will considerably alter the present first floor arrangements. The sun parlor will be taken out, and the greater part of the space in the new wing on this floor will be a new ballroom and may in times of congestion be devoted to additional dining room accommodations. The present stairway will remain, but the men's toilet in the rear of it will be removed, and, in its place, there will be a basement staircase. This stairway will descend into a passage, formed by tunneling from its foot to where the basement wall begins. On the other side of the basement staircase, or about where the west wall of the office floor is now, will be the elevator shaft extending from the third floor to the basement. Midway between the basement and first floors, there will be a landing where people in the billiard room or barber shop can take the elevator by ascending a short flight of steps.

The space on the first floor, formerly occupied by the barber shop and billiard room, together with the present ballroom, will be partitioned off, and fitted up as rooms for guests, giving about 18 rooms for the purpose on that floor. The second and third floors in the new part, will be entirely converted into first-class rooms for guests, 10 on a floor, each provided with a private bath. A private bath, 4 by 8 feet, has recently been added to each of the rear rooms on the second and third floors in the old part of the hotel. The heights between floors in the new wing, which correspond with those in the other parts

NOTES OF PROGRESS.

(Continued.)

of the building, with the exception of the proposed basement, will be, as follows: Basement, 14 feet; first floor, 15 feet; second and third floors, 12½ feet each.

Upon completion of the addition, the Tivoli will have added about 16,000 square feet of floor space; a total seating capacity in dining rooms of between 700 and 750, as compared with 400 at present, and a total of 218 rooms for guests, as compared with 180 at present. The estimated cost of the new improvements is $60,000.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is about 66 per cent completed, 148,236 cubic yards, out of a total of 225,000, having been placed at the close of work on July 29. A statement of the amount laid each work day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
July 24	234	8.00	2
July 25	256	8.30	1
July 26	260	8.00	1
July 27	236	8.00	1
July 28	208	8.00	1
July 29	220	8.00	1
Total	1,414	48.30	1.17
Previously reported	146,822		
Grand total	148,236		

Advices from Washington indicate that the House Committee on Appropriations will visit the Canal Zone prior to the reassembling of Congress in December, in connection with the estimates of appropriations for the fiscal year 1913.

Cristobal Laundry.

The laundry plant of the commissary department, Panama Railroad Company, was opened on April 18, 1907, with a force consisting of one superintendent and 37 West Indian employes. The first month's business amounted to $846.84. Since that time, the business has greatly increased. Employes of the Panama Railroad Company and the Isthmian Canal Commission all over the Isthmus, including those at such isolated points as Monte Lirio, Porto Bello, Nombre de Dios, etc., have their work done at the Commissary laundry.

The force has grown to consist of one superintendent and five skilled American laundrymen, together with a West Indian force of 139 employes, divided, as follows: Twenty-two manglers, 5 starchers, 3 collar machine operators, 1 hand washer, 10 assorters, 6 checkers, 6 clerks, 2 messengers, 2 watchmen, 6 washers, 4 dryers, 3 shirt machine operators, 2 markers, 67 ironers.

In March, 1911, 363,063 pieces were laundered, and the total receipts were $9,245.79. Prices charged in the commissary laundry are lower than prices for similar work in the States. In spite of the fact that prices have been lowered several times, the laundry has been operated at a fair profit for two years, after it has been charged with every item of expense involved in operation.

The plant covers an area of 14,320 square feet, and is housed in a corrugated iron building, with a roof of the same material, the floor being of concrete. It is thoroughly equipped with improved laundering machinery, including washers, wringers, steam drying rooms, mangles, starchers, collar ironers, and electric hand irons. This machinery is operated from the central power plant of the commissary department.

Laundry received at the plant on Monday or Tuesday is generally returned on Thursday, and, in cases of emergency, is ready for delivery the day after its receipt. Packages are collected from the houses of customers all over the Isthmus by wagons, and are delivered in the same manner without additional charge.

In addition to the regular work, quantities of flat work are handled for hotels and steamship lines, and rough dry work is done for families desiring it. A cleaning and pressing plant is successfully operated.

CONCRETE WORK IN THE LOCKS.

About 59 per cent of the concrete for all the locks is in place, the amount at the close of the work on July 29 being 2,510,394 cubic yards, out of a total of approximately 4,284,400. A total of 34,123½ cubic yards of concrete was laid in the locks during the week ending July 29.

GATUN LOCKS.

Over 71 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of the work on July 29 being 1,496,086½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each working day for the week ending July 29, and of the total, follows; and a similar statement for the work in the Spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours

*The 369½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: July 24th, 65½; July 25th, 77; July 26th, 74½; July 27th, 80; July 28th, 59½; July 29th, 13.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 82 per cent completed, 693,804 cubic yards, out of a total of 837,400, having been placed at the close of work on July 29. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixer.

SOCIAL LIFE OF THE ZONE.

Women's Organizations, Clubs, Auxiliaries, and Church Societies.

Organizations, composed of women in the Canal Zone, date from the arrival, in larger numbers, of the wives and families of men employed in the construction of the Canal, that is, from 1906. For the two years of American occupation preceding that time, health conditions had been unsatisfactory, commissaries were not running smoothly, and school facilities were not good, influences which made it undesirable for men to bring their families to the Isthmus. With the construction of family quarters, however, and the improvement in living conditions, the number of families increased rapidly.

On October 4, 1905, the Isthmian Canal Commission authorized the appointment of ministers to be attached to the line sick camps, and to the general hospitals at Colon and Ancon. This did not imply organized church work, but as the family life became established, it was found desirable to form organizations for the purpose of providing regular church services. The Commission authorized the construction or remodeling of suitable buildings for purposes of public worship, Sunday schools were started, young people's leagues were organized, and the need of church work was at once evident. Outside of this work, however, there were no formal organizations among women until March, 1906, when Alfaretta Council, No. 1, Degree of Pocahontas, was established at Culebra.

A general club movement among the women was started in October, 1907, for the purpose of uniting women in social, philanthropic, and educational effort, and to bring them into touch with club movements in the States by affiliation with the General Federation of Women's Clubs. This was done through a central organization, under the title of the Canal Zone Federation of Women's Clubs. For the first year the federation, as well as the separate club of which it was composed, followed closely in organization and effort, the lines of the General Federation, by its division into departments corresponding in nature to those of the parent organization. Matters of civic, educational, and philanthropic interest were dealt with; household economics were studied, art lectures were given, and regular lines of work were taken up by the departments. Reaching now, the period when the end of the Canal work is in sight, it has been found desirable to alter somewhat the character of the organization, to hold the meetings less frequently, and to merge the department work into a common effort, the general direction of which is toward home and educational interests. One object of the federation has been to develop its members for organized club work wherever they may be, and to fit them to take their places in any of the movements by women in the United States.

While the influence of the federation extends throughout the Canal Zone, meetings being held in the different villages, each of the separate clubs forms a center of local interest.

Among the secular clubs, there is a branch of the International Sunshine Society at Gatun. The interests of this society, which has been organized three years, center around work for blind babies in New York. Nearly six hundred dollars have been forwarded to international headquarters for the furnishing of a dormitory, known as the Gatun dormitory, in the Arthur Home at Summit, New Jersey. Donations of clothing for special cases have also been made by the society. The funds are maintained by means of "Sunshine teas," by sales of fancy articles, and by entertainments.

In connection with secret orders and friendly societies, women's auxiliaries have been organized, beginning in 1906 with Alfaretta Council, No. 1, Degree of Pocahontas (Improved Order of Red Men,) at Culebra, followed in 1908, by Osceola Council, No. 2, at Cristobal. Other auxiliaries are the Daughters of Rebekah, No. 1 (Independent Order of Odd Fellows,) at Gorgona; the Pythian Sisters, and the Grand International Auxiliary to the Brotherhood of Locomotive Engineers, both with headquarters at Las Cascadas. These societies are composed of women from various points in the Canal Zone. They are organized under charters granted by the superior lodges in the United States, and all the work pertaining to such societies is carried on. The auxiliaries, as Canal Zone organizations, will probably cease to exist with the return of the majority of their members to their homes in the States.

Of more recent date are organizations which have developed in connection with church work. There is a branch of the Women's Foreign Missionary Society of the Methodist Episcopal Church, with headquarters at Panama, and members from Culebra, Paraiso, Pedro Miguel, Corozal, Balboa, and Ancon. The semimonthly meetings are devoted to the study of missionary text books. For the purpose of maintaining the treasury, "teas," and other entertainments are held from time to time. The society maintains two scholarships in the Methodist college in Panama. The greater portion of the missionary funds are applied to work on the Isthmus. A ladies' aid society is also active in connection with this church.

There are women's guilds and altar societies in connection with the Protestant Episcopal church in Ancon, Culebra, Empire, and Colon, and with the Roman Catholic churches in Culebra, Empire, Gorgona, Las Cascadas, Gatun, and Colon. As their name implies, these are strictly church organizations, the members having charge of the things pertaining to the altar, and the vestments of clergy and choir. Occasional church receptions are given under the guilds, and matters pertaining to the Sunday schools are referred to the members who, in general, are teachers in the schools.

In connection with the growth of undenominational work in the Canal Zone, an organization was formed at Culebra in 1908 under the title of "The Union Christian League of Culebra." Its object was to provide for religious services that would be agreeable to all people, irrespective of sect. Under this organization, a minister was called to the local pastorate, being at the same time, appointed Commission chaplain to the Culebra hospital. In addition to his pay as Commission chaplain, the minister received a stipend from the Christian League for maintaining regular services at the chapel. The league has an executive council composed of fifteen members, men and women. Women are on the committees, and share the work of the organization equally with the men. Similar leagues have been formed at Empire, Gatun, and Cristobal. These organizations are conducted on the lines of the Union League, but are independent, each working within the limit of its own village. They are prominent in social, as well as the church life of the villages, provide the undenominational services conducted at the chapels, and women, as well as men, are active in the executive council of each. In Empire, Gatun, and Cristobal, there are ladies' auxiliaries in connection with the Christian leagues. These societies study missionary work, hold entertainments for the purpose of raising money for chapel furnishings and improvements, are active in all social life connected with the churches, and have oversight of such charity work as comes within the scope of the organizations.

Besides these organizations, there are, among the women, a number of private card clubs, and one "Current events" club at Cristobal, with six members, who meet weekly.

It is estimated that in the larger villages, Ancon, Pedro Miguel, Paraiso, Empire, Las Cascadas, Gorgona, Gatun, and Cristobal, there is an average of two meetings of women's organizations weekly. Nearly one-half of the entire number of women in the Canal Zone are affiliated with some organization, the majority being engaged in church or religious work.

Sunshine Society Meeting.

At its meeting on Wednesday July 26, the Gatun Sunshine Society held a "bag competition," a large number of bags, made by the members, being placed on exhibit. Prizes were awarded to the makers of the most original, the most attractive, and the most useful bags. A sale of the "Sunshine bags" will be held shortly. At the meeting on the last Wednesday in August, there will be an exhibit of aprons.

Sunday School Picnic.

The annual picnic of St. Luke's Sunday school will be held on Friday, August 11, at Taboguilla Island. The school will assemble at the chapel in the hospital grounds at 8 a. m., whence brakes will take them to the wharf at Balboa. The steamer *Sanidad* will be at their disposal for the day. Those attending are asked to bring basket lunches. All members of the congregation, who desire to do so, are cordially invited to attend.

The July number of *The American Red Cross Bulletin* contains a report by the chairman of the Canal Zone chapter, Lieutenant-Colonel C. A. Devol, on the Colon fire relief work. It is accompanied by three half-tone engravings of pictures taken soon after the fire.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Cristobal, C. Z., on Sunday, August 6, at 4.30 p. m. The program follows:

1.	March—*Love of Liberty*	Scouton
2.	Selection—*The Girl of My Dreams*	Hoschna
3.	Cornet Solo—*Columbia* Mr. Bernell.	Rollinson
4.	Waltz—*Gaite*	Waldteufel
5.	Medley Overture—*Headlights*	Schulz
6.	Sextet from Lucia	Donizett
7.	Request Number—*Madame Sherry*	Hoschna
8.	Characteristic—*Muttering Fritz*	Losey
9.	Nautical Fantasia	Tobani
10.	Popular Number—*On, Wisconsin*	Purdy

OLIVER KIMBALL, *Acting Musical Director.*

The next concert will be given at the Hotel Tivoli, on Sunday, August 13.

ISLANDS IN PANAMA BAY.

Pacific Mail S. S Co. Transfers its Interest in Naos, Perico, Flamenco, and Culebra.

The Pacific Mail Steamship Company has formally accepted the awards made by the joint commission in 1907, for all of its rights in, and improvements on, the islands of Naos, Flamenco, Perico, and Culebra, in Panama Bay, and they were taken over by the Isthmian Canal Commission, as of July 1, 1911.

Two awards were made by the joint commission, one on May 9, 1907, which allowed the steamship company the sum of $20,000 for all of the improvements on Naos Island, as of that date, and another on May 11, 1907, which granted the company the sum of $24,000 for its half-interest in the four islands, the remaining half being in possession of the Panama Railroad Company.

The awards have been pending until recently, when they were accepted by the steamship company. In addition to the sums mentioned, interest on them at the rate of six per cent per annum was granted the company to cover the periods from the dates of the awards to July 1, 1911. The steamship company has been given 90 days from July 1, in which to remove all its personal effects from the islands.

The only other improvements on Naos Island consist of a house belonging to the Panama Railroad Company, leased by it on June 1, 1908 to the Canal Commission for a period of 15 years, for use of the quarantine station; and a maregraph station erected by the Pacific Division. There is no personal property on Perico or Flamenco Islands, except the shacks of two or three squatters. Culebra Island, the fourth of the group, has been occupied for quarantine purposes since 1908. The records of the Panama Railroad Company show that it has no interest in the improvements on the islands, outside of that above mentioned.

On November 18, 1852, after various correspondence between William C. Young, then president of the Panama Railroad Company, and William H. Aspinwall, then president of the Pacific Mail Steamship Company, Mr. Aspinwall was authorized to purchase one or more islands in the Bay of Panama for the joint account of the railroad company and the steamship company. It was during the fall and up to the spring of 1853, that these four island were purchased by Mr. Flint, and Mr. Forbes, his successor, agents for the steamship company. The total cost of the islands was $30,000, of which one-half was paid by the Panama Railroad Company in August, 1854. The records show that the various improvements made on the islands up to the year 1861 were paid for by the Pacific Mail Steamship Company, and on August 9, 1861, the steamship company executed a deed in favor of the railroad company for one equal undivided half part of the four islands, as per document registered under folio No. 111 of the record book of the General Administration of the Treasury, Panama, dated October 24, 1861.

According to Article 4 of contract dated July 5, 1867, made between the United States of Colombia, and the Panama Railroad Company, the railroad company bound itself to extend the railroad on the Pacific side of the Isthmus to one of the four islands, or some other place where a permanent depth of water might exist. In 1880, a new contract was formed by which the railroad company agreed to pay the United States of Colombia the sum of $10,000 a year for a period of 30 years as a penalty for not extending the road to the islands. In other words, the railroad company agreed to pay $300,000 for the abrogation of this contract during 30 years, at the expiration of which period, the original contract was to be again in force. The penalty of $10,000 a year was paid for 20 years, or until 1900. In that year, Señor José Agustin Arango, acting as special representative of the railroad company, effected a new settlement with the Colombian Government, in accordance with which, the original contract was abrogated for all time in consideration of the payment by the railroad company of an additional sum of $200,000, making the total amount which the company has paid for the noncompletion of the railroad to the islands $400,000. A copy of this exemption granted by the Government to the railroad company, and also acknowledging the payment of the $200,000 gold, is registered in Panama under document No. 246, dated November 6, 1892.

Funeral Service.

A short funeral service was held at the mortuary, Ancon, on Sunday morning, by the members of garrison No. 106 of the Army and Navy Union, over the remains of the late H. H. Penny. The services were conducted by the Rev. A. A. Nellis, pastor of the Empire chapel, at which church Mr. Penny was a regular attendant. He was a member of the G. A. R. and the A. and N. U. The body was shipped on the *Panama*, on July 31, for interment in Brooklyn, N. Y.

Preliminary Injunction Denied.

The application for a preliminary injunction, restraining the Panama Railroad Company from excavating earth and rock from a hill near Mount Hope, made by Horatio L. Stevenson, was denied by Justice Brown, Jr., in the Circuit Court of the Third Judicial Circuit at Cristobal. Two weeks were given plaintiff's attorney in which to file a reply to defendant's answer.

Error in Time Table.

The Panama railroad time table published in the issue of THE CANAL RECORD of July 26 was in error in that it showed train No. 74, which leaves Panama on Saturday night, and makes all but three miles of its journey on Sunday morning, as running on "Sunday only." The corrected time table is published below.

† Saturday night.

CANAL ZONE LANDS.

Status of Public and Panama Railroad Lands.

The policy of the Government with regard to the leasing of public lands in the Canal Zone, has not yet been determined, except so far as it is indicated by the law of February 29, 1909, quoted below. The determination depends on collateral questions, such as a permanent form of government for the Canal Zone, and whether the whole of the lands in the Zone shall be purchased and held as a Government reservation. A bill to this effect is now pending in the Congress. Meanwhile, a cadastral survey of Government and Panama railroad lands is nearing completion, a land office for both classes of lands has been established in the Law Department, with headquarters at Ancon, and it will soon be possible to carry out the provisions of the land law above mentioned, which reads, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is hereby authorized to grant leases of the public lands in the Canal Zone, Isthmus of Panama, for such period, not exceeding twenty-five years, and upon such terms and conditions as he may deem advisable. No lease, however, shall be granted for a tract of land in excess of fifty hectares, nor to any person who shall not have first established by affidavit, and by such other proof as may be required that such person is the head of a family or over the age of twenty-one years, and that the application for a lease is made in a good faith for the purposes of actual settlement and cultivation, and not for the benefit of any other person whatsoever, and that such person will faithfully comply with all the requirements of law as to settlement, residence, and cultivation. In granting such leases, preference shall be accorded to actual occupants of lands in good faith.

SEC. 2. That no portion of the lands of the United States within the Canal Zone shall be leased hereunder unless it shall first be made to appear, by a statement or plat filed by the Isthmian Canal Commission with the Collector of Revenues for the Canal Zone, that it is not contemplated to use such lands in the work of Canal construction, or to set the same aside as a town site; and all leases shall be made subject to the provision, that if, at any time, it shall become necessary, notwithstanding, for the United States to occupy or use any portion of the leased lands, it shall have the right to do so without further compensation to the lessee, than for the reasonable value of the necessary improvements made upon said tracts by the lessee, the same to be determined by the courts of the Canal Zone.

SEC. 5. That all leases of lands hereunder shall reserve to the United States all mineral, oil, and gas rights in the lands leased.

SEC. 4. That the President may, in his discretion, require a land survey to be made of the Canal Zone.

SEC. 5. That the powers conferred upon the President under this Act may be exercised by him through the Isthmian Canal Commission, or in such other manner as he may designate.

Title to over 80 per cent of the lands in the Canal Zone is in the United States Government, either directly, or by the Panama railroad, the division being, as follows:

	Hectares*	Sq. Miles.
U. S. Government—		
Isthmian Canal Commission—		
From French Canal Company	13,518	102
By purchase since 1904......	12,865	
Vacant public lands...........	46,218	178
Panama Railroad Company....	21,440	83
Total Government............	94,041	363
Private..........................	18,838	73
Grand total....................	112,879	436

From this statement it will be seen that three classes of lands are recognized—(1) public, (2) Panama railroad, (3) private.

THE PUBLIC LANDS.

The socalled public lands were acquired by the United States by purchase. The lease of the Canal Zone from Panama brought with it a title to the common lands, within the Zone, granted to the city of Panama by Charles V in 1521, amounting to about 46,218 hectares. Originally, they included all the lands within the confines of the Canal Zone, but various titles by Government grant and prescription, have been recognized. The purchase of the property and rights of the New Panama Canal Company of France brought with it 13,518 hectares. By the concession of March 20, 1878, the French company acquired the title to a 200-meter wide belt of land on either side of the Canal, land for the Canal, ports, and accessory works, ceded in the case of public lands, and acquired by condemnation in the case of privately owned lands. Since the American occupation in 1904, there have been purchased, by agreement or expropriation, from private holders, 12,865 hectares.

At present, the status of the public lands is, that about 103 square miles will be covered by the water of the Canal, and Gatun and Miraflores lakes, while other portions are reserved for Canal construction and military purposes, and as townsites. Land is actually being leased for farming, on revocable licenses only, because it is not known at present exactly what tracts will be needed for the Canal and associated work, and for new townsites. Maps have recently been made, however, by the various divisions and departments, showing what lands will be required, and when the data on these are compiled, and the land survey mentioned above completed, the Commission will be in position to put into effect the provisions of the law of February 27, 1909.

It has been the custom in Panama for any one who wished to cultivate land, to clear it and begin farming, without regard to the ownership of the land so occupied. This cultivation is of a very primitive kind, consisting chiefly of scratching the ground with a machete, or stick, and planting corn, yams, cassava, plantains, bananas, or other fruits and vegetables. Recently, it has increased to an appreciable extent, and not a few of the Canal laborers, largely negroes, have left the works for this easy life in the bush. Both from the standpoint of the labor force, and the future leasing of the lands in legal and orderly manner, this squatting is undesirable. In order, therefore, that the squatters may be given due notice that this custom will not be tolerated in the future, the following notice has been posted in parts of the Canal Zone where they are most likely to see it:

NOTICE.

Every person who wilfully commits any trespass by cutting down, destroying, or injuring any kind of wood or timber standing or growing upon the lands of another, or upon public lands, is guilty of a misdemeanor, and will be prosecuted accordingly.

Permission to occupy public lands, or lands of the Panama Railroad Company, must be obtained from the Land Agent, Ancon, Canal Zone.

The prohibition against cutting down wood or timber is to prevent the clearing necessary before the lands can be cultivated.

An article was published in THE CANAL RECORD of February 5, 1908, giving the status of the public lands up to that time. When the United States Government took possession of the Canal Zone in May, 1904, there were leases in effect from the former régime. The Secretary of War, to whom the President had confided the direction of Canal affairs, directed that leases be made, both of the old common lands, and of lands acquired by the French, under the provisions of the law of July 28, 1892, authorizing the Secretary of War to make revocable leases of such property under his control as may not, for the time, be required for public use, for a term of not more than five years, providing no other provision exists for their lease. On January 1, 1905, the issue of such leases was turned over to the Collector of Revenues, in whom that power remained until the establishment of a land office by the Executive Order of January 19, 1911.

On January 1, 1906, the rent for agricultural lands was fixed at $3 a year per hectare; the rate charged for building lots in towns varies from 5 to 30 cents per square meter, according to the situation. On June 30, 1906, there were in effect 121 leases for farm lands, and, since that time, the record at the close of each fiscal year has been, as follows:

YEAR.	LEASES.				Revenue. Dollars.
	Farming.		Building lots	B'ld ings	
	Number.	Hectares.	Number.	Number	
1907..........	83	344	479	....	7,974.78
1908..........	194	590	878	9	17,436.76
1909..........	482	1,020¾	1,615	6	26,969.88
1910..........	884	1,545	1,892	7	27,282.29
1911..........	1,261	1,430	984	8	23,469.22

Leases of land in the Gatun Lake and Miraflores Lake beds have been cancelled, as also leases of land at Balboa. Leases of lands in townsites are now made under authority of the Executive Order of June 28, 1911, and are in the form of revocable licenses. Leases for agricultural lands are made partly in accordance with the custom established in 1905, when it was erroneously thought that the law of July 28, 1892, applied to the Canal Zone, and partly under the provisions of the Executive Order of March 13, 1907, authorizing the execution of leases under the direction of the Collector of Revenues.

PANAMA RAILROAD LANDS.

Panama railroad lands have been acquired by grant from the Colombian Government, and by purchase, at various times, since 1851. Most of the 21,440 hectares is in agricultural land, which, at present, is not under lease, because it has not been known what tracts will be required for townsites and Canal purposes. The most valuable holdings are those in the cities of Colon and Panama, while those in townsites along the railroad also have a considerable value at the present time. Only two "cultivation leases," as they are called, are now held, and they are not for agricultural purposes, one being the right to collect rubber from the trees at Toro Point, and the other to use Mindi Island, opposite Mount Hope, for hog raising.

Colon was reclaimed from swamp by the Panama Railroad Company, and the additions made by filling since 1904 are largely paid for by the railroad, because it is the principal beneficiary. All the water front is owned by the railroad, except one lot, and a dock by the Royal Mail Steamship Company, and one dock by the Pacific Mail Steamship Company. In the remainder of the city, the railroad owns all but 104 lots, and title for these is in the Panama Government. In the old city, 510 lots, and in the newly improved section, 346 lots, are owned by the company, which has 491 leases in the old section and 215 in the new section, the latter having been made to people holding options and to a few bidders. Bids for the balance will be opened this week. Leases for lots in towns are made for 15 years for wooden buildings, and 25 years for masonry buildings, and these leases can be revoked only upon payment for the improvements.

In the city of Panama, the railroad has issued 338 leases, 18 of which are in the railroad yards in that city, and on the water front, leases for two docks and one bulkhead. At Balboa, two buildings are leased to steamship companies, and the railroad company's half interest in Naos Island, the completed purchase of which is mentioned elsewhere in this issue, has been leased to the Isthmian Canal Commission. Between Colon and Panama, the following number of leases for buildings are in effect: Folks River, 64; New Gatun, 156; New Frijoles, 19; Empire district, 355; Culebra district, 286; Corozal, 2.

PERSONAL.

Lieut-Col. D. D. Gaillard is a passenger on the *Colon*, due to arrive August 6.

Mr. Joseph Bucklin Bishop, with his wife and daughter, is a passenger on the *Cristobal*, due to arrive on the Isthmus on August 3.

Major Robert E. Noble, accompanied by Mrs. Noble, will leave on August 3 for Porto Rico, where he has been detailed for a period of six months to start mosquito destruction work. He will be assisted by Mr. E. W. Mitchell, one of the Commission's sanitary inspectors.

Ban on Deck Passengers and Stowaways from Trinidad.

The local quarantine authorities have served notice on the steamship companies, whose vessels stop at Trinidad, that no more deck passengers from that island will be allowed to land at Colon, without first having completed the full six days at sea, as required by the regulations in all cases where stops are made at infected ports. There are three steamship lines that make both Port of Spain, Trinidad, and Colon, ports of call, but only one of them brings many deck passengers from there to the Isthmus. As the enforcement of the regulations would cause a delay of at least two days in the steamers' leaving time at Colon, deck passengers from that island are now refused passage.

Owing to the recent trouble with stowaways, the steamship officials are exercising the utmost vigilance in getting rid of them before reaching Colon. The officers of the Royal Mail Steam Packet Company's vessel, the *Thames* which arrived at Colon on July 23, made a thorough search of the vessel before leaving Trinidad, and discovered 65 stowaways hidden away, the same number that was brought to Colon on a previous steamer. They were promptly put on shore. Another search was made at Savanilla, resulting in the discovery of two more and still another hunt was made at Cartagena, where one was found. All were landed, and when the boat entered Colon Harbor, it was entirely free of them. As a warning to others, the members of the crew took some of the stowaways and painted their heads and faces with red lead before landing them.

The *Thames*, on its last trip, brought 145 contract laborers for the Canal work, recruited principally at Barbados.

The tug *Reliance* is in the Cristobal dry dock undergoing an overhauling.

CUSTOMS INFORMATION.

Summary of Regulations Affecting Americans Returning Home with Personal Property.

Persons who have been keeping house on the Isthmus and wish to return to the United States for good, can fill out a form before the Collector of Customs, Administration building, Ancon, or before the Deputy Collector of Customs, building No. 1, Cristobal, setting forth the character of the goods, the fact that they are of American manufacture, and have not been changed in value or altered in condition, and these goods will be admitted to the United States free of duty.

A similar form may be made out for goods purchased abroad of foreign manufacture, such as household goods, books, etc., if they have actually been used in housekeeping for a period in excess of one year, and such goods will then be admitted free of duty.

A summary of the principal customs regulations applying to Americans returning to the United States, is appended, herewith.

TOM M. COOKE,
Collector of Revenues.

ANCON, C. Z., August 1, 1911.

Paragraph 709, appearing in the free list of the present tariff act, governing passengers' baggage, reads, as follows:

Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany, and are in the use of, and as are necessary and appropriate for the wear and use of such persons, for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale: *Provided*, That in case of residents of the United States returning from abroad, all wearing apparel and other personal effects taken by them out of the United States to foreign countries, shall be admitted free of duty, without regard to their value, upon their identity being established, under appropriate rules and regulations to be prescribed by the Secretary of the Treasury, but not more than one hundred dollars in value of articles purchased abroad by such residents of the United States shall be admitted free of duty upon their return.

Residents of the United States must declare all articles which have been obtained abroad by purchase or otherwise, whether used or unused, and whether on their persons, in their clothing, or in their baggage. The foreign value of each article, stated in United States money, must also be declared.

Articles taken from the United States and remodeled, repaired, or improved abroad must be declared, and the cost of such remodeling, repairing, or improving, must be separately stated.

The following articles are dutiable: Household effects, including books, pictures, furniture, tableware, table linen, bed linen, and other similar articles, unless used abroad by the owner for a period of a year or more. Goods in the piece. Articles of any nature intended for sale, or for other persons.

The following articles are free if under $100 in value, and if necessary for comfort and convenience for the purposes of the journey, and not for sale nor for other persons: Clothing; toilet articles, such as combs, brushes, soaps, cosmetics, shaving and manicure sets, etc.; personal adornments, jewelry, etc.; similar personal effects, which may include cameras, canes, fishing tackle, glasses (field, opera, marine), golf sticks, guns, musical instruments, parasols, photographs, smokers' articles, steamer rugs and shawls, toys, trunks, valises, etc.; clothing and other personal effects taken out of the United States by the passenger *if not increased in value or improved in condition while abroad*. If increased in value or improved in condition, they are dutiable on the cost of the repairs.

The above lists of articles, which are dutiable and nondutiable, are stated for the assistance of passengers, and are not exhaustive. *All articles are dutiable unless specifically exempted by law.*

Pack in one trunk, if practicable, all dutiable articles.

Receipted bills for foreign purchases should be presented whenever possible.

Use does not exempt from duty wearing apparel or other articles obtained abroad, but such articles will be appraised at their value in the condition as imported, due allowance being made for depreciation through wear and use.

Nonresidents of the United States are entitled to bring in free of duty without regard to the one hundred-dollar exemption, such articles as are in the nature of wearing apparel, articles of personal adornment, toilet articles, and similar personal effects, necessary and appropriate for their wear and use for the purposes of the journey and present comfort and convenience, and which are not intended for other persons or for sale.

Citizens of the United States, or persons who have at any time resided in this country, shall be deemed to be residents of the United States, unless they shall have abandoned their residence in this country and acquired an actual *bona fide* residence in a foreign country.

Such citizens or former residents who desire the privileges granted by law to nonresidents must show to the satisfactoin of the collector's representative on the pier, subject to the collector's approval, that they have given up their residence in the United States and that they have become *bona fide* residents of a foreign country.

The residence of a wife follows that of the husband; and the residence of a minor child follows that of its parents.

Household effects of persons or families from foreign countries will be admitted free of duty only if actually used abroad by them not less than one year, and if not intended for any other person, nor for sale. Such effects should be declared whether the passenger be a resident or a nonresident of the United States.

Articles intended for use in business, or for other persons, theatrical apparel, properties, and sceneries, must be declared by passengers, whether residents or nonresidents.

All cigars and cigarettes must be declared. Each passenger over eighteen years of age may bring in free of duty 50 cigars or 300 cigarettes if for the *bona fide* use of such passenger. Such cigars and cigarettes will be in addition to the articles included within the $100 exemption.

The law provides that every person entering the United States shall make a declaration and entry of his or her personal baggage. The law further requires that the values of articles shall be determined by customs officers, irrespective of the statements of passengers relative thereto.

It will thus be seen that there is no discourtesy in the requirement that both a declaration and an independent appraisal shall be made. Taken together, these requirements place the passenger in the same position as any other importer of merchandise.

Passengers should observe that on the sheet given them there are two forms of declarations; the one printed in black is for residents of the United States; the one in red, for nonresidents.

The exact number of pieces of baggage, including all trunks, valises, boxes, packages, and hand bags of any description accompanying the passenger, must be stated in the declaration.

The senior member of a family present as a passenger, may make declaration for the entire family.

Ladies traveling alone should state that fact in their declarations, in order that an expeditious examination of their baggage may be made.

When the declaration is prepared and signed, the coupon at the bottom of the form must be detached and retained by the passenger, and the form given to the officer of the ship designated to receive the same. A declaration spoiled in its preparation must not be destroyed, but turned over to the purser, who will furnish a new blank to the passenger.

After all the baggage and effects of the passenger have been landed upon the pier, the coupon which has been retained by the passenger must be presented at the inspector's desk, whereupon an inspector will be detailed to examine the baggage. Passengers must acknowledge in person, on the pier, their signature to their declarations.

Examination of any baggage may be postponed if the passenger requests the officer taking his declaration to have it sent to the appraiser's store.

Passengers must not deduct the $100 exemption in making out their declarations. Such deductions will be made by customs officers on the pier.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a reexamination, but application therefor should be immediately made to the officers there in charge. If for any reason this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisement made to the collector of customs, in writing, within ten days after the original appraisement. *No request for reappraisement can be entertained after the articles have been removed from customs custody.*

PENALTY FOR NOT DECLARING ARTICLES OBTAINED ABROAD.

Under Sections 2802 and 3082 of the Revised Statutes of the United States, articles obtained abroad and not declared are subject to seizure, and the passenger is liable to criminal prosecution.

COROZAL.

A reception was given on Wednesday evening, July 26, to Mr. and Mrs. Geo. R. D. Kramer, Jr., at which a program of songs, readings, piano solos, a comedy sketch, and addresses was carried out.

CULEBRA.

The high duckpin scores for last week are, as follows: Palmer, 104, 112, 101; Fox, 100.

EMPIRE.

The following high scores were rolled during the week: Pinney, 202; Gustavson, 222; Kosier, 219; Spinks, 200, 203, 202; Goolsby, 201; Coombs, 206; Parkis, 231, 221, 200; Peterson, 203, 220; Pearson, 203; Huson, 226. Duckpins—Payne, 106; Grund, 106, 110; Davis, 103; Graves, 100; Dakin, 109.

The subject for discussion at the meeting of the literary and debating society on Friday evening will be, "Government ownership of railroads." The leader will be Dr. Valelly.

There was a large attendance at the second "open house" held on Saturday evening, July 29. Music was furnished by Reinhold's orchestra of Gorgona. A basketball game was played between two local teams, and there was a local bowling tournament. Refreshments were served in the lobby. The next in this series of entertainments will be on August 12.

There will be a sacred concert under the auspices of the musical and dramatic society on Sunday evening, August 6. There will be solo numbers, choruses from oratorios, and other vocal and instrumental selections.

In the local bowling tournament, those who average 500, or better, are:

	Won.	Lost	P.C.
Johnson	8	1	.888
Gorham	17	3	.878
Anderson	10	3	769
Sullivan	9	4	.692
Spinks	9	5	.643
Kosier	10	6	.625
Davis	3	2	.600
Scull	4	3	.571
Peterson	12	9	.571
Whaler	8	7	533
Finch	7	7	500
Walling	3	3	500

High average—Anderson, 16 games, 188.5; high average, Spinks, 26 games, 187.5; high score (handicap 30 pins)—Kosier, 249; high score, flat—Gustavson, 222.

GORGONA.

A farewell reception was held in honor of Mr. and Mrs. F. C. Freeman at the Gorgona Y. M. C. A. on Thursday night, July 27. Several short addresses were given, and a program, consisting of vocal solos, recitations, and an exhibition wrestling match, was rendered. Music was furnished by the Gorgona orchestra, and refreshments were served.

Members of the health league met Friday night, July 28, and organized a local league, electing the following officers: President, Jess T. Hopkins; vice-president, F. G. Swanson; secretary and treasurer, Geo. H. Auer.

Basketball practice was started on Wednesday night, July 26. About a dozen men were out. The work consisted only in throwing baskets and passing, and will be confined to such for the present.

GATUN.

Two hundred and fifty men attended the "Pumpkin pie smoker," held at the clubhouse on Saturday night, July 29. The program included selections by the Camp Elliott orchestra, vocal solos, bag punching, wrestling, a comedy sketch, impersonations, and a pie eating contest.

Mr. Fox of Gorgona, and Mr. Barte of Gatun, were the two principal speakers at the meeting of the literary club on Wednesday evening, July 26. The subject for discussion was "The present political situation at Washington."

At the moving picture entertainment on Tuesday evening, July 25, the orchestra from the *Prinz Joachim* played.

CRISTOBAL.

The debating club, at its regular session on Wednesday evening, July 26, discussed the proposition that "The present day church has a destructive influence on the spiritual and intellectual life of its members." The affirmative won. The subject for the meeting on August 9 will be "Vivisection." This club is open to all who may desire to join, and every one is invited to attend the meetings.

High bowling scores for the week ending July 29 were, as follows:

Duckpins—Claherty, 122; Gibson, 118; Jacques, 113, 104; Smith, 110, 105; Hess, 107; Weston, 107; Barrett, 105, 103, 100.

Tenpins—Furlong, 219; Groves, 216; Gibson, 215, 207, 206, 201; Collins, 215, 206; Wheeler, 215; Bullard, 214, 207; T. Burns, 214; Rigney, 204.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending July 29:

Prinz Joachim., July 24, from New York, with 7 pieces steel beams for stock.

William Cliff, July 27, from Liverpool, with 61 pieces dipper lips for Central Division.

Panama, July 25, from New York, with 70 pieces steel beams, 123 bundles steel bars, 90 cases bolts and rivets, 135 kegs bolts and rivets, 9 cases files, 2,545 bundles pipe, 16 cases rubber packing, 20 cases lubricating oil, 30 barrels rosin, 12 cases soap, for stock; 380 coils copper wire for Panama Railroad Company; 72 coils copper wire, 25 pieces car couplers, for Mechanical Division; 30 cases mechanical fog horns for Atlantic Division; and a miscellaneous cargo, the whole consisting of 3,618 packages, weighing 197 tons.

Zacapa, July 27, from New York, with 52 pieces steel bars and channels, 11 bundles steel bars, for stock; 73 pieces steel angles for Atlantic Division.

Turrialba, July 27, from New Orleans, with 9 crates paste, 252 barrels fire clay, 2,724 pieces yellow pine lumber, 126 pieces white oak lumber, for stock; 34 pieces white oak lumber, 4,165 bundles yellow pine lumber, for Mechanical Division; 5 lengths steam shovel chains for Central Division.

Cuzco, July 28, from Seattle, with 1,108 pieces lumber (flooring), 11,051 pieces lumber, Douglas fir, for stock

Prinz Eitel Friedrich, July 29, from New York, with 200 barrels carbolic acid, 224 cases blasting caps, for stock; 12 barrels hardware for Mechanical Division; 18 packages electrical material for Panama Railroad Company.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending August 9, 1911, (75th meridian time):

DATE.	Low.	High.	Low.	High.	Low.
	A.M.	A.M.	P.M.	P.M.	P.M.
August 3	4.05	10.05	4.41	10.51	......
August 4	5.08	11.07	5 45	....	
			A.M.		
August 5		12.07	6.13	12.15	6.48
August 6		1 20	7 18	1 20	7.45
August 7		2 15	8 10	2.12	8.33
August 8		2 57	8 58	2.57	9.14
August 9		3 32	9 38	3 35	9 53

The following vessels arrived at, or departed from, the port of Balboa during the week ending July 29:

Arrivals—July 23, *Leelanaw*, from San Francisco; July 24, *Urubamba*, from Callao; *City of Sydney*, from San Francisco; *Chile*, from Guayaquil; *Guatemala*, from Valparaiso; July 26, *Riverside*, from San Francisco; July 27, *Cuzco*, from San Francisco; July 28, *City of Para*, from San Francisco.

Departures—July 25, *Manavi*, to Buenaventura; *Quito*, to Guayaquil; *Kansas City*, to San Francisco; July 26, *Limari*, to Valparaiso; July 29, *Urubamba*, to Callao.

OFFICIAL CIRCULARS.

Drinking Water for Men at Work.

CULEBRA, C. Z., July 26, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

I am in receipt of the following letter from the Chief Sanitary Officer:

"I have the honor to recommend that instructions be issued, so that foremen, and others, in charge of gangs on the Canal Zone, will see that water boys get their drinking water supply only from the authorized supplies, whenever available, and that the use of water from springs or streams be forbidden.

"Sanitary inspectors report some little carelessness in this regard, and I believe that such instructions issued from time to time will refresh the memories of the old, and call the attention of the new, foremen, to the necessity, as far as possible, of drinking water only from the regular reservoirs."

Please issue the necessary instructions to insure compliance with the foregoing recommendation.

GEO. W. GOETHALS, *Chairman*.

Transfer of Employes.

CULEBRA, C. Z., July 25, 1911.

HEADS OF DEPARTMENTS AND DIVISIONS:

In requesting the transfer of an employe from one division or department to another, the party making the request for transfer should state definitely the vacancy to be filled.

In order that this office may be able to properly identify the vacancy, the name of the last incumbent, the number of the position, when numbered, and authorization for same, should be stated.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Rate for Use of French Locomotive.

CULEBRA, C. Z., July 31, 1911.

CIRCULAR NO. 169-I:

Circular No. 169-F prescribes a rate of $6 an hour for the use of a French locomotive, including crew, as between departments and divisions of the Commission and Panama Railroad Company. This rate was based on the operation of the engine by a "gold" engineer.

A rate of $2.50 an hour for switch engine service, when the engine is operated by hourly silver employes, is hereby established.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Misdirected Letters.

ANCON, C. Z., August 2, 1911.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressee:

Blake, A. O.
Bockins, W. H.
Bray, Mrs. Walter
Clark, E. E.
Connor, John (pkg.)
Croft, Mrs. Florence
Demeis, Tomasso
Erwin, James
Gilmour, Joseph H.
Keough, John W.
McGonagle, Miss Rose M.
McPeek, W. J.
Moyer, Mrs. R. E.
Papadogna, B.
Prior, B. T.
Russ, Michael
Schull, Lewis
Smith, Carl F.
Souders, H. L.
Wilkinson, Hugh R.
Wise, George
Worrell, Oreleah

Married.

BEYER-McNULTY—At the parish house in Ancon, on July 25, 1911, Nellie Anna McNulty of Marquette, Mich., to Walter F. Beyer of Detroit, Mich., the Rev. Father Collins officiating. Canal Zone residence, Culebra.

On Tuesday, August 2, 1911, at 2 p. m., in the Commission chapel, Cristobal, Dr. Charles Martin Strotz of Philadelphia, Pa., and Estella Erwin of McVeytown, Pa., Rev. Carl H. Elliott officiating. Canal Zone residence, Colon Hospital.

Auction Sale of Dairy Cows and Bull Calf.

ANCON, C. Z., July 18, 1911.

On Saturday, August 19, at 10 a. m., there will be sold at public sale to the highest bidder at the Ancon Hospital dairy, two dairy cows, ranging in age from seven to ten years, and one bull (calf) aged two and one-half years. The dairy is located near the insane asylum buildings in the rear of the hospital grounds. The terms of the sale will be cash.

CHAS. F. MASON, *Superintendent*.

Leasing of Government Building.

ANCON, C. Z., July 13, 1911.

Bids will be received by the Collector of Revenues up to and including August 10, 1911, for the leasing to the highest bidder, from August 16, 1911, for a period of not more than three years, of building No. 17 at Empire, owned by the Canal Zone Government. Rent to be payable monthly. The building is of French construction, two stories, and contains, in all, fifteen rooms, with a small outhouse. Bids should be in an envelope marked, "Bids for a lease to building No. 17 at Empire."

TOM M. COOKE, *Collector of Revenues*.

COMMISSARY DEPARTMENT.

"Keep Kool" Clothing.

The Commissary department has received a supply of "Keep Kool" clothing for men. These suits are made of feather-weight fabrics for tropical wear. Owing to limited stock, which is in the nature of a trial order, it is not possible to place them on sale in line stores. They will be sold in the gents' furnishing department of the retail store at Cristobal only.

The open hours at Culebra commissary are from 8 a. m. to 1 p. m., and from p. m. 3 to 7 p. m. All other commissaries are open from 8 a. m. to 1 p. m., and 3 p m. to 7 p. m. with the exception of the Cristobal commissary, which is open from 8 a. m. to 12.30 p. m., and from 2 p. m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning August 1.

Notice to Mariners.

The master of the steamship *Trinculo* reports that on June 11 his ship struck on a submerged rock, or other obstruction. The bearings taken at the time were: East end Tabogilla Island S. ½ E. San José Rock, N. W. x W. ¾ W.

Masters of all vessels should exercise great care in passing this vicinity.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line; the Panama Railroad Company's dates being subject to changes.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago de Cuba, on both outward and homeward voyages. A ship will leave Colon for Bocas del Toro, also for Port Limon at 5 p. m. on August 9.

The Leyland line steamer *Antillian* sails for New Orleans, direct, on, or about August 5.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursday at 11 a. m.; for Bocas del Toro on Monday at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, AUGUST 9, 1911. No. 50.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Steam Shovel Excavation in Culebra Cut.

On Saturday, July 29, there were excavated from Culebra Cut, 61,896 cubic yards, car measurement, which is the highest daily record for any wet season month, and was only 2,838 cubic yards less than the highest record ever made in one day for any dry season month in Culebra Cut. Ten shovels, working in the Culebra district, averaged 2,160.2 cubic yards.

Contract for Spillway Gates, Bridges, and Caissons.

Award has been authorized to the McClintic-Marshall Construction Company for 22 regulating gates for the spillways at Gatun and Miraflores, two steel caissons to ensure a means of repairing the gates, and 22 bridges to connect the piers in which the gates will be erected, thus forming a bridge across the crest of each spillway. An article, describing the use of the gates, caissons, and bridges, was published in THE CANAL RECORD of July 12. Only two bids were received, and award was authorized to the lower bidder, the price, $102,930 being 3½ per cent less than the estimated cost.

The gates will be of the Stoney type, consisting of a system of horizontal girders, vertical end posts, cross frames, and intercostals, forming a skeleton, upon which will be placed steel plate sheathing, extending from top to bottom on the upstream side of the gate. Each will be 46 feet 3½ inches long, 19 feet high, and will weigh 42½ tons. It will have a motion of 22 feet 6 inches, and must stand a head of 18 feet. The office of the gates is to control the water level in Gatun and Miraflores lakes.

The caissons will be 49 feet long and 24 feet 4 inches high. Their use will be to form a dam across any of the apertures in the gate piers, thus making it possible to repair the gates and gate tracks.

Each bridge will be 45 feet long and 3 feet wide; and will consist of two plate steel girders, surmounted by a floor of checkered steel. The total weight of the 22 bridges will be about 215 tons.

The contract for railings for the spillway bridges has been awarded to the Vulcan Rail and Construction Company, the lowest of four bidders.

Colon Quarantine Station.

A type-17 house at San Pablo will be moved to Colon, and reerected at the quarantine station for use as an office and living rooms for the custodian, who is at present occupying quarters in the main building. At times, recently, the accommodations for persons held in detention, have been insufficient, and it is expected that the additional room provided by the change will temporarily relieve the situation.

High Daily Steam Shovel Records.

A high record for excavation was made by steam shovel No. 253 in the Empire district of the Central Division in Tuesday, August 1, which loaded 190 Lidgerwood side flat cars of 19 cubic yards each, or 3,610 cubic yards.

This is the highest record for a shovel of this class in the Central Division, exceeding by 125 cubic yards the previous highest record of 3,485 cubic yards, made by shovel No. 265 on January 21, 1909.

The highest two daily records for the Central Division for steam shovels of any class are, as follows:

4,823 cubic yards by steam shovel No. 213 on March 22, 1910.

4,009 cubic yards by steam shovel No. 213 on March 5, 1910.

Roller Trains, Seals, Bearings, and Rollers for Valves in Locks and Spillway Gates.

Award has been authorized to the Westinghouse Machine Company, the lowest of three bidders, for the roller trains and sealing devices for the rising stem gate valves for the locks, 116 trains and sealing devices for Gatun, 60 for Pedro Miguel, and 84 for Miraflores; the roller trains and sealing devices, rocker bearings, and gate rollers for Stoney gates at spillways, 44 roller trains, 44 sealing devices, 44 rocker bearings, and 176 gate rollers for the 14 gates at Gatun spillway, and the 8 gates at the Miraflores spillway.

The material required for the 260 roller trains for valves consists of 254.800 pounds of structural steel (to be finished by the Commission, but fabricated and delivered by the contractor), 50,700 pounds of cast steel, 360,360 pounds of tool steel, 15,860 pounds of steel bolts, 1,300 pounds of steel pins. The 260 sealing devices will require 67,210 pounds of cast bronze, 24,700 pounds of bronze bolts, and 2,470 pounds of bronze washers.

The material for the 44 roller trains will consist of 5,100 pounds of cast steel, 45,500 pounds of tool steel, 1,700 pounds of steel bolts, 33,100 pounds of structural steel, this last to be furnished by the Commission, but fabricated and delivered by the contractor. The 44 rocker bearings and tracks will require 288,000 pounds of structural steel, and 6,700 pounds of steel bolts. The 44 sealing devices will require 65,200 pounds of structural steel, 37,300 pounds of cast steel, 14,600 pounds of cast bronze, 3,900 pounds of rolled bronze, 850 pounds of bronze bolts, 5,000 pounds of steel bolts. The 176 gate rollers will require 1,400 pounds of steel pins, 12,000 pounds of cast iron, 2,600 pounds of steel bolts, and six pounds of brass.

Sanitary Drinking Cups.

A supply of sanitary paper drinking cups has been ordered for the Isthmus, and these will be placed in the coaches of the Panama railroad, substituting the public glass now in use, as soon as they are received. Arrangements have also been made for individual drinking cups for the hospital cars.

1,000,000 Yards of Crushed Rock.

On June 26, 1911, the record of 1,000,000 cubic yards of crushed rock at the Ancon quarry plant was passed. The plant was first placed in operation on February 8, 1910, but there were several interruptions during the first six months, so that if the actual working time between February 8, 1910, and June 26, 1911, were computed, it would probably indicate that the 1,000,000 cubic yards of crushed rock could have been produced within one year's time, providing the crushers were operated for a full 8-hour day every day in the year, except Sundays and holidays. Since June 26, there has been produced at the crusher plant a total of about 90,000 cubic yards, leaving about 900,000 cubic yards still to be crushed to complete the estimated requirements for the Pacific locks.

The best day's output was on December 20, 1910, when 4,290 cubic yards of rock were crushed in 11.20 hours actual working time, an average of over 383 cubic yards an hour. The best month's production was in December, 1910, when 79,699 cubic yards were produced during the 26 working days of the month, an average of over 3,318 cubic yards each working day.

The principal delays in the operation of the plant have been caused by substituting parts of the machinery for those which experience proved better fitted for the work, and in making minor repairs. The time so lost was partly made up by the operation of the plant for one period on a 12-hour schedule. At the present time, an 8-hour day is in effect, as there is plenty of crushed rock in storage, especially at Miraflores Locks, where the consumption is now the greatest.

The operation of the plant has been attended with comparatively few minor accidents to the machinery, one of the most peculiar of them being to the heavy iron cap over the main crusher, which serves as a buffer for the working parts of the machine when the

NOTES OF PROGRESS.

(*Continued.*)

large rock is dumped into it. In some manner, a long, thin piece of rock became wedged in between the crusher shaft and its covering; from there it worked its way upwards, finally forcing the cap off into the hopper, where the jaws of the machine immediately began work upon it. Before the power could be shut off, it was cracked in several places.

The record of operations at the crusher plant for the two weeks ending August 5 is, as follows:

DATE.	Hours worked.	Cubic Yards.
July 24	7.30	2,744
July 25	7.00	2,414
July 26	7.35	2,595
July 27	6.05	2,339
July 28	7.20	2,664
July 29	7.00	2,933
Total	42.30	15,689

DATE.	Hours worked.	Cubic Yards.
July 31	4.15	2,082
August 1	7.50	2,945
August 2	6.55	2,371

Finances of Fourth of July Celebration.

A statement of amounts contributed to the Fourth of July celebration held at Cristobal, C. Z., follows:

CONTRIBUTED BY	Amount.	No. of employes on June roll.	Per capita
Office of Chairman and Chief Engineer	$237.00	171	$1 40
Quartermaster's Dept.	274.00	199	1 38
Atlantic Division	1,027.67	884	1 17
Commissary and Subsistence	291.60	290	1.00
Civil Administration	288.00	299	.96
Panama Railroad Company	519.50	582	.89
Mechanical Division	491.80	769	.64
Disbursing office	15.00	25	.60
Pacific Division	360.50	609	.59
Sanitary Department	191.15	386	.49
Central Division	327.50	785	.42
Examiner of Accounts	38.25	99	.39
Total—Employes	$4,061.97	5,098	$0.79
Received from Marine Corps as Fourth of July Celebration committee's part of proceeds of minstrel show given at the National Theatre, Panama, on July 3	102.38		
Received from others than the above	1,432.85		
Total—All sources	$5,597.20		

Those having outstanding amounts on their lists are requested to hasten collections, and send the money to the chairman of the finance committee, Empire, C. Z. The expenditures to date aggregate over $3,500.

Bills incurred by the entertainment and amusement committee for the Fourth of July celebration, 1911, should be forwarded to the chairman of the subcommittee which ordered the expenditure, who will approve the same and forward to Mr. Muenchow, Secretary, Entertainment and Amusement committee, Gatun, C. Z. The chairmen of the subcommittees are, as follows:

Subcommittee on aquatics, C. J. Anderson, Cristobal; subcommittee on decorations and amusements, Wm. F. Shipley, Cristobal; subcommittee on refreshments and comforts, John Burke, Cristobal; committee on fire department contests and exhibitions, C. E. Weidman, Cristobal; committee on Marines, Lieutenant Wirgman, Bas Obispo; subcommittee on police department and stands, Lieutenant A. S. Belknap, Ancon; subcommittee on property, J. H. Humphreys, Cristobal; subcommittee on exercises, F. A. Gause, Ancon; subcommittee on printing and programs, Captain C. Nixon, Cristobal; subcommittee on prizes, G. M. Fechtig, Cristobal; subcommittee on athletics, L. G. Thom, Gatun.

Sailing of the "Cristobal."

The sailing of the *Cristobal* has been set for Saturday, August 12, at 5 p. m.

CONCRETE WORK IN THE LOCKS.

Over 59 per cent of the concrete for all the locks is in place, the amount at the close of the work on August 5, being 2,542,308 cubic yards, out of a total of approximately 4,284,400. A total of 31,913½ cubic yards of concrete was laid in the locks during the week ending August 5.

GATUN LOCKS.

Over 72 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of the work on August 5, being 1,512,655 cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each working day for the week ending August 5, and of the total, follows, and a similar statement for the work in the Spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

Previously reported								1,496,086½
Grand total								1,512,655

*The 428½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: July 31st, 87½; August 1st, 58½; August 2d, 56½; August 3d, 75; August 4th, 76; August 5th, 75.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 83 per cent completed, 698,220 cubic yards, out of a total of 837,400, having been placed at the close of work on August 5. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixer.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

LOCK CULVERT VALVES.

Conditional Award Made—Description of the Appliances and their Use.

Award has been authorized to the McClintic-Marshall Construction Company, providing certain modifications are agreed upon, for the rising stem gate valves, guard gate valves, lateral culvert valves, bulkhead gates, and screens for the locks, according to the following schedule. There were two bidders, and the award is to the lower, the price being 3.2 per cent below that estimated by the Commission.

Description.	Number of Valves, Gates, etc.				
	Total.	Gatun.	Pedro Miguel.	Miraflores.	Total Weight.
					Pounds.
Rising stem gate valves	130	58	30	42	2,807,610
Lower guard gate valves	12	4	4	4	*a*188,712
Lateral culvert valves	6	2	2	2	*b* 51,642
Bulkhead gates to middle wall culvert	12	6	2	4	*c* 49,920
Bulkhead gates for side wall intakes	9	3	3	3	*d*248,400
Bulkhead gates for middle wall intakes and outlets	18	6	6	6	*e*424,800
Screens for side wall intakes	18	6	6	6	176,040
Screens for middle wall intakes	18	6	6	6	161,640
Total weight of metal					4,108,764

a—Plus 5,280 board feet of timber.
b—Plus 840 board feet of timber.
c—Plus 660 board feet of timber.
d—Plus 855 board feet of timber, and 2,790 square feet canvas.
e—Plus 1,710 board feet of timber, and 5,040 square feet canvas.

Rising Stem Gate Valves—These valves will be 10 feet 8 inches wide and 18 feet 10 inches high, and their office is to control the flow of water through the large culverts in the walls of the locks in the filling and unwatering of the lock chambers. Each one will weigh 21,597 pounds, of which 16,000 pounds will be nickel steel, 2,340 pounds structural steel for roller tracks, 3,160 pounds cast steel, and the balance, bolts, pins, and rubber. The valves are arranged in pairs, separated by a pier 4 feet 3 inches wide in the middle of the culvert, dividing it into two rectangular culverts 8 feet wide by 18 feet high. Each valve is designed to operate in a well, and to travel on two live roller trains having a span of 10 feet, from center to center of bearings. The trains travel on two tracks, which are fastened to the downstream face of the wall castings, which are set in the masonry. In operation, the valve will have an average range of motion of 18 feet in a vertical plane, but will be so constructed as to permit its being raised to the bottom of the machinery pit, and removed entirely from the well for repairs. It will have a play of only ¼-inch upstream, and a lateral play of only ⅛ inch either way, making a total lateral play of ¼-inch. Each valve will be connected near the center to a stem operated by a motor situated near the top of the lock wall. During ordinary operation, the valves will be under a head of about 60 feet, but in certain cases, they may be required to operate under a 76-foot head, making the 18-foot travel in about one minute.

Lower guard gate valves—These valves will be 10 feet 7 inches wide and 19 feet 3½ inches high, and their use will be to control the flow of water in the culverts in the side walls of the locks, when it becomes necessary to unwater the culverts. Each will operate in a rectangular concrete chamber, 32 inches deep by 11 feet 3 inches wide, and will close an opening 8 feet wide and 18 feet high. In general construction, these valves will conform to that of the rising stem gate valves. Each will weigh 15,726 pounds, 15,200 pounds of which will be of nickel steel. The seats and seals on the sides and top of the valves will be of wood.

Lateral culvert valves—These valves will be 10 feet 7 inches wide and 10 feet 9½ inches high, and will follow in construction the rising stem gate valves. Their use will be to regulate the flow of water between the safety and lower gates, at the lower end of the upper lock in each flight of locks. Each valve is designed to operate in a rectangular concrete chamber, 32 inches deep and 11 feet 3 inches wide, and to close an opening 8 feet wide by 8.5 feet high. The seat and seal on both sides and top of both upstream and downstream faces of the valve will be formed by wooden strips fastened on the valve seating against the masonry. The bottom seat and seal will be formed by a wooden strip, fastened to the bottom beam of valve, seating against the masonry floor of the culvert. This valve is designed to take a pressure head in either direction, but will never have to be operated while under a head. Each will weigh 8,607 pounds, of which 8,300 will be nickel steel.

Bulkhead gates to middle wall culverts—These gates are to close an opening 12 feet high and 5 feet wide in the tunnel opening from the lock chamber to the middle wall culvert, two in each lock chamber. The purpose of this tunnel is to provide a means of access to the middle wall culvert to facilitate the installation and repair of cylindrical valves in the middle wall, by giving free access to the culvert from the lock chamber. The gates are to be placed in cast iron frames set in the masonry, and are to be held in place by cast iron brackets bolted to the sides, top, and bottom of the frames. The wooden strips on the back of the gates are to form the seats and seals of the gate. Each will weigh 4,160 pounds, and will be of structural steel.

Bulkhead gates for side and middle wall intakes and middle wall outlets—These gates are to form bulkheads at the entrances to the side and middle wall culverts at the upper ends, and also the middle wall outlets at the lower ends of all the locks on the Canal. They are to be used only when it is desired to unwater the side and middle wall culverts between the upper operating valves and the intakes, and the middle wall culverts from the outlets to the lower operating valve. They close an opening 8 feet wide by 18 feet high in the side walls and 8 feet wide by 15 feet high in the middle wall; are arranged in triplets with piers between the openings, and seat directly against the masonry in grooves provided for that purpose. They are never operated under a head, but provision is made for removing them when not in use. The gates consist of a number of I-beams placed one on top of the other, being fastened together by means of long rods running the full length of each section of the gate. There will be two sizes of these gates, 13 feet 10¼ inches by 26 feet 8 21-32 inches for side walls, and 13 feet 10¼ inches by 23 feet 8 21-32 inches for middle walls.

Screens for side and middle wall intakes.—These screens are to guard the inlets in both side walls and middle walls at the upper end of all the locks on the Canal. They guard an opening 8 feet wide by 18 feet high in the side wall, and 8 feet wide by 15 feet high in the middle wall; are arranged in triplets with piers between the openings, and seat directly against the masonry in grooves provided for that purpose. The screens consist of a skeleton frame, composed of I-beam verticals and channel cross frames, inclosing bays of round-edge flats, properly spaced to form the required opening for the waterway. There will be two sizes of screens—13 feet by 24 feet 11 inches for side walls, and 13 feet by 22 feet 1 inch for middle walls.

The Six-Year Men.

A meeting of employes interested in the formation of an association of employes and exemployes of the Isthmian Canal Commission and Panama Railroad Company, who have completed six years' continuous service on the Isthmus, will be held at the University Club, in Panama, on Saturday evening, August 12, at 8 o'clock. About 400 persons are now eligible for membership in the prospective association, or will become eligible prior to November 1, 1911. It is impracticable to assemble all of these but it is proposed that about 80 shall meet and perfect an organization. It has been suggested that the association adopt as its device a button to be worn in the lapel of the coat. This button would represent the Canal medal with the two bars, which is too large and heavy, as well as too valuable, to be worn on ordinary occasions. Beyond this, the objects of the association have not been outlined, but it is intended to make it serve useful purposes.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 66 per cent completed, 149,696 cubic yards, out of a total of 225,000, having been placed at the close of work on August 5. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
July 31	244	8.00	2
August 1	228	14.00	2
August 2	264	14.00	2
August 3	218	14.00	2
August 4	296	16.00	2
August 5	210	14.00	2
Total	1,460	80.00	2
Previously reported	148,236		
Grand total	149,696		

Electrical Workers.

At the meeting of Local Union, No. 677, I. B. E. W. of Gatun, on August 13, at 2 p. m., Baxter R. Grier will lecture on "Wiring diagrams and formulas."

LOST—On Sunday morning, July 30, between Paraiso railroad station and the Church of the Holy Redeemer, Culebra, a bracelet of Costa Rica gold coins. A reward will be given for its return to Mr. E. B. Healey, Paraiso, C. Z.

NEW WASHINGTON HOTEL.

Plans for Concrete and Hollow Tile Building—Grounds and Sea Wall.

Plans have been approved for a new hotel building of the Spanish colonial style, modified to fit local conditions, to be situated on Colon Beach, and to cost not over five hundred thousand dollars. It will be built by the Panama Railroad Company. The plan of the ground floor, published herewith, shows also the location. It is in front of the present hotel, which will be used during construction, and will look out across Limon Bay. About a year will be required in the construction, and work on the foundation was begun this week. The plans are by Cram, Goodhue, and Ferguson, architects, of New York, and the work will be done under their direction. Incidental to the construction, the beach in front of the present hotel is in process of improvement, and the plan contemplates an extension of the present plaza in Colon up to the entrance of the new hotel. With this idea in view, the axis of the hotel is on that of the plaza, so that there will be a broad open space of park, about one-fourth of a mile in extent, between the entrance to the hotel and the buildings of the town.

Work on the beach improvement includes the constructing of a sea wall in front of the hotel site and the filling of the rock shelf, which now shows above water at low tide. In this way, the sea will be kept from further washing of the shore, and a strip of land about 900 feet long, and from 140 to 170 feet wide, will be added to the grounds. The wall is nearing completion. It has a base 5½ feet, top, one foot, which rises to 6 feet above mean sea level, and is anchored to the coral rock by a double row of iron rail. Along the top of the wall will be built a concrete balustrade two and one half feet high, with concrete posts 3 feet 3 inches high, spaced 10 feet from center to center. At its east end, the wall will be blocked out to provide a swim-

ming pool 125 by 100 feet, and from 3 to 9 feet deep, which will be open on the sea side, with a baffle wall in front to protect it from rough water. At present, there is no good bathing place on Colon Beach, because a ledge of coral rock extends along the water front, and is just awash at low tide. So far as possible, the cocoanut palms, which adorn the grounds in front of the present hotel, will be preserved, and, where their removal is necessary, an effort will be made to transplant them. The monument to the Panama railroad pioneers, Aspinwall, Chauncy, and Stephens, will be moved from its present site, part of which is included in the northeast corner of the new hotel, to the semicircular flower bed at the city entrance to the new hotel. It is the intention to lay out the grounds around the hotel with plants and trees.

The building will be 300 feet long, will have foundations of gravel concrete; walls of reinforced columns and beams, with hollow tile curtain walls, white cement stucco finish outside, and rooms plastered within; floors of concrete beams, floor slabs of solid concrete, concrete and tile, or of tile, according as cost may warrant; roof of tile. The floors in the kitchen will be of concrete, and in the ballroom, of maple or other hard wood. The woodwork will be reduced to a minimum. The building will be screened against mosquitoes on the leeward side, but, as there are seldom mosquitoes on the seaward side, no screening will be necessary there.

First floor.—The plan of the first floor shows that it is laid out in three sections—dining, reception, and ballroom. The *a la carte* dining room is 37 by 53 feet, the private dining room 12 by 12 feet, and the *table d' hote* 65 by 40 feet, and the commons 11 by 20 feet. Back of these rooms is the kitchen and service plant. It is so laid out that the waiters, on leaving the dining rooms, pass alongside a hamper, where they drop soiled linen, next to a table in front of the dish washer, where they leave soiled dishes, thence to a table on which clean dishes are placed. They pass with the clean dishes, to the steamers, carving table, steam table, and coffee service in succession, thence to the door of the dining room, where they take clean linen, and are checked by the checker, who sits there and keeps track of the food served and of the linen. The coffee, tea, cocoa, ice cream, and other foods that must be served either hot or very cold, are issued at one counter, and that, the nearest to the dining room, so that as little time as possible may be lost in serving them.

The reception section consists of the main entrance with offices, parlors, and writing rooms. The ladies' parlor is 28 by 15½ feet; men's room, 14 by 15½ feet; writing room, 14 by 15 feet; men's lounge or general writing room, 41 by 43 feet; billiard room, 25 by 40 feet. All partitions that can be so constructed, without interfering with privacy extend from the floor about halfway to the ceiling, so that above the height of one's head, the whole ground floor is practically open. This insures good circulation of air, and will add to the coolness of the public rooms. The ballroom is 53 by 37 feet, and is entered from the street by a side door, which gives access to the ballroom, without bringing the dancers into contact with the hotel's guests. The isolated situation of the ballroom minimizes the annoyance of late music to guests.

Second and third floors.—On the second and third floors are 88 bedrooms, ample in size for two beds. All of them are provided with clothes closets fitted with electric lights, both for illumination and to keep the closets dry. The dimensions of type rooms are shown on the plan of the second and third floors. Seventy-six of the rooms let out upon loggias, which serve not more than three rooms. The loggias in the north ends of the wings, toward the sea, are also entered from the public corridors. Practically all the rooms are connected, making it possible to arrange suites of from two to fifteen rooms. In all but four instances, access from connected rooms is by way of passages, not the public corridors, and not through bath rooms. Private baths are generally entered from the private passages, and not from bedrooms. Shower baths are entered generally directly from the bedrooms, and rooms having showers are also provided with lavatories, piped for hot and cold water. Every bedroom will have either a private bath, or a shower bath. In area, the bed rooms average 244 square feet, as compared with 200 square feet, at the Hotel Tivoli.

A comparison of the area of the principal rooms with those of the Hotel Tivoli, follows:

ROOMS.	HOTEL.	
	Tivoli.	Washington
	Sq. Ft.	*Sq. Ft.*

SECOND FLOOR PLAN.

PERSONAL.

Colonel S. E. Tillman of the Military Academy at West Point, and Major E. R. Stuart, Corps of Engineers, are on the Isthmus inspecting the Canal work.

Mr. Edward Schildhauer, accompanied by Mrs. Schildhauer, will sail on the *Cristobal* on August 12, on his annual leave of absence.

Transfer of Odd Fellows Lodge.

Canal Zone Lodge, No. 3, I. O. O. F., has received authorization from the sovereign grand lodge, through the district deputy grand sire, B. F. Sisson of Gatun, to transfer the seat of its jurisdiction from Culebra to Empire. The move, which is actuated by the fact that many of the lodge members reside at Empire, and that the location will be more central for the members in general, will take place the latter part of August.

The following officers of Canal Zone Lodge were recently installed: Noble grand, Eugene W. Palmer; vice-grand, Edward A. Putnam; secretary, Arthur D. Moore; treasurer, Arthur E. Erickson.

STEAM SHOVEL RECORDS.

Work of Central Division and P. R. R. Relocation Shovels in July.

During the month of July, the total amount of material excavated in the Central Division was 1,360,117 cubic yards, of which 158,901 cubic yards were classified as earth, and 1,201,216 cubic yards as rock. Of this quantity, 1,337,833 cubic yards were removed by steam shovels, and contractors removed 16,928 cubic yards by sluicing, and 5,356 cubic yards by hand.

The high record for the month was made by shovel No. 208, working 25 days in the Culebra district, which excavated 54,866 cubic yards of rock and earth. The second best record for the month was made by shovel No. 207, working 25 days in the Culebra district, which excavated 54,356 cubic yards of rock.

The best record for a shovel of the seventy-ton class was made by shovel No. 109, working 25 days in the Culebra district, which excavated 30,631 cubic yards of rock.

Shovel No. 260, working in the Culebra district, made a high record for one day by excavating 3,040 cubic yards of earth on July 26.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month, and for one day, are shown below:

BEST RECORDS FOR THE MONTH.

EMPIRE DISTRICT.

Shovel No.	Cubic Yards.			
	Earth.	Rock.	Total.	No. of days at work.
253		38,704	38,704	25
220		36,008	36,008	25

231	Pedro Miguel	July 22	Rock	1,900
231	Pedro Miguel	July 18	Rock	1,672
231	Pedro Miguel	July 17	Rock	1,634
231	Pedro Miguel	July 21	Rock	1,520

Steam Shovels on Relocated Line.

The total excavation on the relocated line of the Panama railroad amounted to 357,135 cubic yards. Of this amount, 212,510 cubic yards were classified as borrow (75 per cent solid rock,) 64,395 cubic yards as earth, 32,765 cubic yards as loose rock, and 47,465 cubic yards as solid rock.

Company forces removed 350,595 cubic yards, and 6,540 cubic yards were removed by the contractor.

Steam shovels excavated 338,760 cubic yards. Pan car task gangs took out 10,055 cubic yards, and 1,780 cubic yards were excavated for culvert foundations.

The best steam shovel record was made by steam shovel No. 262, working in the Monte Lirio section, which excavated 10,000 cubic yards of earth, and 50,790 cubic yards of solid rock, a total of 60,790 cubic yards.

In the 70-ton class, the best record was made by steam shovel No. 105, working in the Gatun section, which excavated 16,550 cubic yards of earth, and 24,200 cubic yards of solid rock, a total of 40,750 cubic yards.

The best day's record for shovels with 5-yard dippers was made by steam shovel No. 257, working near Gatun, which excavated 3,310 cubic yards of rock on July 31.

The best day's record for 70-ton shovels was made by steam shovel No. 123, working near Empire, which excavated 2,210 cubic yards of earth and rock on July 21.

Month's records are place measurements, and day's records are car measurement. All material was loaded in 10-yard Western dump cars.

BEST RECORDS FOR THE MONTH.

Shovel No.	Location.	Cubic Yards by Cross Section.			
		Days worked.	Earth	Rock.	Total.
262	M. Lirio	25	10,000	50,790	60,790
257	Gatun	25		57,270	57,270
105	M. Lirio	25	16,550	24,200	40,750
123	Empire	24		37,000	37,000

BEST RECORDS FOR ONE DAY.

Shovel.	Location.	Date.	Character of material excavated.	Cubic yards.
257	Gatun	July 31	Solid rock	3,310
262	Monte Lirio	July 6	Solid rock	3,070
123	Gold Hill L... (Empire)	July 21	Earth and rock	2,210
105	Near Monte Lirio.	July 10	Earth	1,970
128	Near Gatun	July 26	Solid rock	1,920

Total steam shovel output during the month of July, 338,760 cubic yards.

Total number of steam shovel working days, 218.

Average output per working day, 1,554 cubic yards.

Civil Service Examinations.

Examinations will be held, probably on September 17, for the following positions: Topographic draftsman, departmental service; copyist topographic draftsman, departmental service; junior engineer draftsman, engineer department at large; physician, Isthmian Canal, and other services.

The first two examinations will each require two consecutive days.

Applications will not be received after August 22 for the above examinations. The kind of examination desired should be stated in requesting information in regard to any of the above.

In answer to the question in application forms as to *bona fide* residence, applicants are required to show such residence *up to the date of application*. It is to be noted that *bona fide* residence does not require continuous bodily presence, but refers to the place at which an applicant, if a voter, is legally entitled to vote.

N. B.—Examination for the position of clerk in the Isthmian Canal Service has not been scheduled to be held during the fall of 1911, and it will probably not be held before the spring of 1912.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.

CULEBRA, C. Z., August 4, 1911.

SOCIAL LIFE OF THE ZONE.

Church Work.

The dedication of the newly completed Baptist church building at Empire will take place on Sunday, August 13. At 11 a. m., the doors of the building will be formally opened by the Hon. W. W. Andrews, United States charge d'affaires at Panama; the preacher at the service will be the Rev R. Graham of Baberton, Ohio. At 3 p. m., an address will be made by W. W. Carrington, and at 7 p. m., the Rev. R. H. Thorbourne, superintendent of the National Baptist Convention, and pastor of the First Baptist Church at Panama, will preach. There will be an entertainment in the church on Sunday, August 20, at 3 p. m., when there will be a program, consisting of a lecture, and music by the choir of the Panama church. A small admission fee will be charged, and the proceeds will go toward the fund for the purchase of an organ for the Empire church.

The Woman's Foreign Missionary Society of the Methodist Episcopal church will hold a meeting, with election of officers, at the home of Mrs. E. M. Keyser, Ancon, on Thursday, September 7. At this meeting, it is expected that the society will welcome Mrs. Harry Compton, wife of the pastor of the church, who will arrive on the Isthmus with her daughter the first week in September. The missionary society was organized on January 7, 1909, and has completed two and one-half years of work with few changes in organization and in its official staff. The first president was Mrs. J. Leon Webster, the official organizer in the Canal Zone. There are 31 members, and 10 honorary members. Two life memberships, valued at $25 each, have been paid to the society. The last election of officers was held in October, 1910. Since that time, there have been public meetings in Balboa, Ancon, Panama, and Corozal. One meeting was held in Culebra, at the request of the women of the Union church, and, in January, a public meeting was held in the parish house in the church on the sea wall, which was attended by men and women of the congregation. Two scholarships are maintained by the society, one in China, and one in the Methodist College in Panama.

Meetings are devoted to the study of missionary literature and the discussion of church work in the different mission fields. Church activities are promoted by the members, sales and social entertainments are given, and the women of the society provide for the special exercises for the children held at Christmas and Easter. On January 5, 1911, a Spanish section of the woman's work was organized, under the title of the Ladies' Aid and Home Missionary Society, with the wife of the pastor of the Spanish department as superintendent. Its members are native Panamanian women, and its object is to propagate the spirit of missionary work among them. Meetings are held monthly in the homes of the members. The treasury of the section is maintained by the sale of aprons and fancy articles, made by the members to order. Since the organization, the membership of the branch has been doubled.

The Ladies' Aid Society at Gatun will hold a public supper at the chapel on Thursday evening, August 17. Since the organization of the society, two suppers have been held, and more than $200 has been raised. The money is devoted to chapel improvements;

the final payment on the piano has been made; the chapel has been carpeted and painted, and a new communion set has been purchased.

The monthly business meeting of the Gatun Christian League was held at the Commission chapel on Thursday evening, August 3. An informal reception followed the business meeting, refreshments being served by the Ladies' Aid Society.

Installation of Officers.

There was an installation of officers in Isthmian Canal Rebekah Lodge, No. 1, Gorgona, on Friday evening, July 28, the district deputy grand sire and suite officiating. The elective officers installed were: Noble grand, Miriam Beetham; vice-grand, Janet Martin; recording secretary, Charles H. Beetham; financial secretary, Henry Lotz; treasurer, Annie Calvit. The appointive officers are: Stephen Calvit, Marie Gaerste, Emma Varenkamp, Florence Evans, Samuel Boyd, Marie Jansen, Richard Stoddard, Robert Varenkamp, and Eleanor Babbitt. These officers will serve until December 31. Meetings are held in the lodge hall at Gorgona on the second and fourth Friday evenings in each month.

Humane Society Meeting.

Members, and those who wish to become members of the Canal Zone Humane Society, are invited to attend the annual meeting at the Hotel Tivoli on Sunday afternoon, August 13, at 3 o'clock. Officers for the ensuing year will be elected. The annual dues of $1 are payable at this meeting.

Married.

BOYER–ORTON—At New Orleans, on July 26, Lotta B., daughter of Mr. and Mrs. Chauncey Orton, to Charles S. Boyer. Canal Zone residence, Gorgona.

OFFICIAL CIRCULARS.

Junior Traveling Engineer.

CULEBRA, C. Z., August 1, 1911.

CIRCULAR No. 266-G:

Effective to-day, Mr. Don E. Irwin is appointed junior traveling engineer, vice Mr. Arthur C. Stone, resigned.

He will perform his duties in accordance with the provisions of Circular No. 266-B.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Profane Language.

CULEBRA, C. Z., August 4, 1911.

CIRCULAR No. 400:

The use of profane or abusive language by foremen or others in authority, when addressing subordinates, will not be tolerated.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at the Hotel Tivoli, on Sunday, August 13, at 7.30 p. m. The program follows:

1. March—*The Arbitrator*	Bagley
2. Nautical Fantasia	Tobani
3. Waltz—*Gaite*	Waldteufel
4 Characteristic—*Muttering Fritz*	Losey
5. Overture	Selected
6. Request Number—*La Paloma*	Yradier
7. Sextet from Lucia	Donizetti
8. Medley—*Headlights*	Schulz
9. Popular Number—*Kiss Me, My Honey, Kiss Me*	Snyder

CHARLES E. JENNINGS, *Musical Director.*

The next concert will be given at Culebra, C. Z., on Sunday, August 20.

The following vessels arrived at, or departed from, the port of Balboa during the week ending August 5:

Arrivals—July 31, *Ucayali*, from Callao; *Navajo*, from San Francisco; *Ecuador*, from Guayaquil; August 2, *Peru*, from Guayaquil; *Huasco*, from Valparaiso; *Acapulco*, from San Francisco; August 3, *Manavi*, from Buenaventura.

Departures—July 29, *Cuzco*, to the south; July 31, *Guatemala*, to Valparaiso; *Chile*, to Guayaquil; August 5, *City of Para*, to San Francisco; *Ucayali*, to Callao.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending August 5:

City of Para, July 31, from San Francisco, with 379 pieces white pine lumber for stock.

Atrato, July 31, from New York, with 125 packages switches for stock.

Navajo, August 1, from Hoquiam, Washington, with 9,225 pieces Douglas fir lumber, 13 cases blasting caps, for stock.

Advance, August 1, from New York, with 188 crates sledge handles, 100 bundles steel bars, 8 cases kitchenware, 13 cases stationery, for stock; 15 cases copper wire and 22 cases carbons for Mechanical Division; 75 bundles steel bars for Pacific Division; 23 cases drugs for Sanitary Department; and a miscellaneous cargo, the whole consisting of 484 packages, weighing 76 tons.

Lewis Luckenbach, August 1, from Philadelphia, with 45 drums gasoline for stock; 46 packages filter plant material for Atlantic Division.

Abangarez, August 3, from New Orleans, with 171 bundles washers for Atlantic and Pacific Divisions; 1,167 pieces white oak lumber and 14 packages chaplets for Mechanical Division; 412 pieces white oak lumber and 1,249 bales hay for stock.

Almirante, August 3, from New York, with 74 pieces steel beams for stock.

Cristobal, August 4, from New York, with 170 cases book paper, 894 drums oil, 39 barrels oil and greases, 800 pails black grease, for stock; 50,000 barrels cement for Atlantic and Pacific Divisions.

Antillian, August 4, from Liverpool, with 16 pieces chain for Pacific Division.

Nancy Lee, August 5, from Baltimore, with 1,050 kegs wire nails, 312 tons coke, 17 barrels paint, for stock; 273 pieces couplers, 100 car wheels, 7 cases electrical material, for Mechanical Division; 24 packages lock material for Atlantic Division; 80 bundles valve material, 8 cases valve material, 17 pieces valve material, 14 packages lock material, for Pacific Division.

Misdirected Letters.

ANCON, C. Z., August 9, 1911.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressee:

Auction Sale of Dairy Cows and Bull Calf.

ANCON, C. Z., July 18, 1911.

On Saturday, August 19, at 10 a. m., there will be sold at public sale to the highest bidder at the Ancon Hospital dairy, two dairy cows, ranging in age from seven to ten years, and one bull (calf) aged two and one-half years. The dairy is located near the insane asylum buildings in the rear of the hospital grounds. The terms of the sale will be cash.

CHAS. F. MASON, *Superintendent.*

Leasing of Government Building.

ANCON, C. Z., July 13, 1911.

Bids will be received by the Collector of Revenues up to and including August 10, 1911, for the leasing to the highest bidder, from August 16, 1911, for a period of not more than three years, of building No. 17 at Empire, owned by the Canal Zone Government. Rent to be payable monthly. The building is of French construction, two stories, and contains, in all, fifteen rooms, with a small outhouse. Bids should be in an envelope marked, "Bids for a lease to building No. 17 at Empire."

TOM M. COOKE, *Collector of Revenues.*

WEATHER CONDITIONS, CANAL ZONE, JULY, 1911.

Except for the first 10 days of the month, during which heavy rains occurred, July weather on the Isthmus was very similar to ordinary dry season weather. The rainfall shows a marked deficiency in all sections of the Canal Zone, but was not the lowest of record for the month. The accumulated fall since January 1 also has been below normal. Temperatures and wind movement were the highest of record for the month of July, while the atmospheric pressure and relative humidity were well below normal. There was also a general deficiency in cloudiness. A tabular statement of weather conditions for July, follows:

STATIONS.	Press're (reduc'd to mean of 24 hours.)	Temperature.					Mean relative humidity.	Precipitation.			Wind.				
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Max. velocity (in miles.)	Direction.	Date.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

Mr. F. C. Freeman, superintendent of clubhouses since December, 1909, and connected with the clubhouse and Y. M. C. A. work on the Isthmus since September, 1907, leaves on August 12, for the States, and his resignation will become effective upon the expiration of six weeks' leave. He will be succeeded as superintendent by Mr. A. B. Dickson, at present secretary of the Empire clubhouse.

EMPIRE.

The following high scores were rolled during the week: Bigpins—Parkis, 200; Pearson, 202; Pearce, 203; Luttrell, 201; Gorham, 211; Gustavson, 202. Duckpins—Rodeghiero, 113; Scull, 105, 107; Pinney, 101.

There will be an informal song service on Sunday evening, August 13, at 9 o'clock. The public is invited to attend. Familiar songs, both sacred and secular, will be sung.

The ladies' club will hold a musicale in the hall of the clubhouse on Thursday afternoon at 3 o'clock.

The topic for discussion in the literary and debating society on August 11, will be "Recent events among the lawmakers at Washington." All men of Empire are invited to attend, and to join the society.

Gymnasium classes are now meeting on Mondays and Thursdays. These classes are the largest in the history of the clubhouse.

GORGONA.

At a dinner and conference at the I. C. C. hotel on Monday night, July 31, the membership committee made plans for a membership campaign, and divided its members into four competing teams, headed by F. G. Swanson, R. C. Shady, Tom Ryan, and C. S. Perry. The team securing the largest number of new members is to be tendered a dinner and "smoker."

On Thursday night, August 3, after the regular gymnasium class, an informal social was given the members, refreshments being served. An organization was formed, with C. Patterson, as president, to conduct informal social affairs of a similar nature, to be held after gymnasium class at intervals of every two weeks. A committee of two was appointed to arrange for the next one.

Mr. N. L. Robinson has contributed a year's subscription to the Geographic Magazine to the Y. M. C A. reading room.

The high bowling scores for the week ending August 5, are, as follows: Duckpins—Haggarty, 117; Bornefeld, 103; Berglund, 103; Duensing, 113, 106. Bigpins—Humphrey, 208, 206.

GATUN.

During the month of July, 52 different men rolled duckpins, 29 rolled tenpins, 19 rolled over 100 in duckpins, 5 rolled 200, or over, in tenpins. There were 72 games of 100, or over, in duckpins. L. Durand won a pennant for the single high score of 231 in tenpins. Luckey and Barte won pennants for 419 points scored in the two-man contest. DePoorter and Bailey tied in duckpins, with 115 points. DePoorter was winner when the tie was played off.

Gymnasium work was started on Tuesday night. Class work will be given twice a week in marching, calisthenics, and recreative games.

The chess and checker club will meet on Friday night. The games of the preliminary tournament will close on Saturday night.

CRISTOBAL.

The literary and debating club has a debate on August 2, "Resolved, that the labor union should be encouraged." The subject for August 9 is "Resolved, that vivisection be continued for the good of humanity."

The regular gymnasium classes meet Tuesday and Thursday nights at 8 p. m., since the close of the league basketball series.

A boys' department tournament in tenpins opened on Friday night, August 4.

The following is the standing of men who completed the "Strawberry" bowling tournament on July 31:

	Won.	Lost.	P. C.
Collins	31	11	.738
Louch	30	12	.714
Barrett	28	14	.667
Blackburn	28	14	.667
Rigney	27	15	.642
Rosteck	27	15	.642
Grover	27	15	.642
Wheeler	24	18	.571
Howard	20	22	.476
Gibson	14	28	.333

Collins and Louch will be awarded mineralite bowling balls.

Last Saturday night, the C and E A team defeated the "all stars," two out of three games in tenpins.

High scores for the week ending August 5 were, as follows:

Duckpins—J. Burgoon, 100; Smith, 104; Wood, 100; Hess, 102, 100, 109; Wheeler, 108, 105, 104, 109; Louch, 100; Jacques, 103; Claherty, 108.

Tenpins—Gibson, 220, 220, 210, 235; Collins, 212, 211; Louch, 204, 204, 219; Furlong, 200, 211; Bullard, 215; Blackburn, 209.

The local tenpin handicap tournament will start this week.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, August 5, 1911. All heights are in feet above mean sea level.

56 Naos Island breakwater		$6,649.41			$51,456.65			$58,106 06	
Total construction cost, Pacific Division		$1,783,178.11			$17,038,668.61			$18,821,846.72	
57 Plant and equipment to be absorbed in construction costs after June 30, 1911								$2,765,795.11	
Total expenditures, Pacific Division								$21,587,641.83	
Total expenditures, constr. and engr'n'g								$123,386,129.78	

Item 24—*Colon Breakwater.* The low cost for the quarter is due to the return to the storehouse of piling and timber, which had been previously charged to the work, but not used.

Item 28—*Dredging Excavation, prism.* Preliminary surveys.

Item 32—*Dredging Excavation, prism.* With the accounts for the month of April, the total cost of the dredging plant had been absorbed into the work; hence no arbitrary for plant is charged in this quarter.

Item 42—*Miraflores Dams and Spillway.* Hydraulic filling. Expenditures represent cost of pipe lines, flumes, etc., 582,732 cubic yards have been deposited in Dam from dredging and hydraulic excavations in lock chamber and in prism below the locks, the total expenditures therefor being charged to "excavation."

Items 53, 54, and 55. These expenditures were incurred prior to the adoption of Miraflores as the site for the lower locks and dams, at the Pacific entrance of the Canal.

Items 25, 30, and 57—*Plant.* The expenditures for plant and equipment are absorbed into construction costs on the basis of estimated total cost of plant, and the estimated quantities of work to be done. The amount under these items represent the balances which are to be absorbed into construction costs after June 30, 1911.

General—When excavated material is used in filling, such as dams, back filling, etc., the cost of dumping only is charged to the items benefited, all other expenses being charged to "excavation."

DAM CONSTRUCTION.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, AUGUST 16, 1911. No. 51.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Equip Tugs for Fighting Fire.

It has been decided to install pumps and nozzles on two of the tugs of the Pacific Division at the Pacific entrance to the Canal, for the better protection against fire of the docks and other buildings at Balboa. At present, only one of the tugs, the *Bolivar*, of the Panama Railroad Company's service, has fire-fighting appliances.

Panama Railroad Relocation.

The contractor, J. B. Hull, who had the contract for excavating a section about one and one-half miles long on the relocated line of the Panama railroad, opposite Las Cascadas, has completed his work. Standard gage track has been laid from Gamboa to the crossing of the Sardanilla River, and, excepting about half a mile in this section, standard gage track has been laid the whole length of the new location between Gamboa and Paraiso. All of the track is not to grade. Work on the trestle over the Sardanilla River has been begun.

A 90-ton steam shovel has been set at work on the cut back of Paraiso replacing the 70-ton shovel that has been operating there. Four 70-ton shovels, and one 90-ton, are now working between Gamboa and Paraiso.

Canal Work in July.

The grand total of Canal excavation to August 1 was 145,486,536 cubic yards, leaving to be excavated 41,727,508 cubic yards, or less than one-fourth of the entire amount for the completed Canal. These figures are in accord with the new estimate of July 1, 1911, when 4,676,278 cubic yards were added to the estimate of July, 1910, to include material in the slides in the banks of Culebra Cut, making the total excavation for the entire Canal 187,214,044 cubic yards.

The total for July was 2,518,982 cubic yards, as compared with 2,406,288 cubic yards in July, 1910, and 2,843,260 cubic yards in July, 1909. All the excavation was "work excavation," there being no "plant excavation."

The dry excavation amounted to 1,566,167 cubic yards, and was principally by steam shovels. The dredges removed 876,115 cubic yards, and 86,700 cubic yards were sluiced, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 490,217 cubic yards. Of this total, 65,022 cubic yards were dry excavation, and the remainder was removed by the dredges in the Atlantic entrance.

The total excavation in the Central Division was 1,360,117 cubic yards, all of which was from the prism.

In the Pacific Division, the total excavation was 668,648 cubic yards, 598,876 cubic yards of which were taken out by the dredges at the Pacific entrance, and 69,772 by the hydraulic excavation plant at Miraflores Locks.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (eleven stations) 6.87 inches.

By "Work" Excavation is meant excavation actually made for one of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc.; that is, it represents material taken from the area to be occupied by the Canal, and constitutes excavation useful for the completed Canal.

By "Plant" Excavation is meant excavation outside of any of the constituent parts of the Canal, such as Prism, Diversions, or Locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as Prism, Diversions, Locks, etc.

Atlantic Terminal Docks.

Work on the second of the docks at the Atlantic terminus of the Canal has been begun, and requisition has been made to the Washington office for materials to be used in this dock, and dock No. 16, already in process of construction. The requisition calls for steel caissons and reinforcing iron, and a requisition to be placed this week, will provide for the I-beams to be used in the floor system. An article in THE CANAL RECORD of May 31 gave an outline of the general project, and a plan of the series of six docks, only two of which will be erected at this time. One of them, dock No. 16, will be accessible for ships on one side only, because the other side will abut on a fill, which will become part of the mainland. Dock No. 17 will be 300 feet west of the face of dock No. 16, and will jut out from the mole, which is being extended from the shore as a means of access to the system of docks.

The caissons for dock No. 16 will be 4 feet in diameter, and the materials required consist of 2,382 intermediate sections, 2,625 ring bands, 2,382 vertical splice plates, 243 bottom sections, 243 vertical splice plates for bottom sections, 243 bottom reinforcing bands, 271,000 button-head rivets, ¾-inch by 2 3-8 inches long; 19,500 countersunk rivets, ¾-inch. The total weight of these plates will be 4,000,000 pounds. The caissons for dock No. 17 must be sunk to greater depth than those for the dock nearer shore, and, therefore, will be 6 feet in diameter. The materials required consist of 2,492 intermediate sections, 2,707 ring bands, 2,492 vertical splice plates, 215 bottom sections, 215 vertical splice plates for bottom sections, 215 bottom reinforcing bands, 379,200 button-head rivets, ¾-inch by 2 3-8 inches long, 25,300 countersunk rivets, ¾-inch. Delivery of the plates, which will be of ½-inch commercial low carbon rolled steel, will be begun by October 15. The plates will be bent and riveted at Cristobal shops. Reinforcing iron for the concrete sheet piling consists of 4,500 pieces of steel bar, 7-8 of an inch square and 18 feet long, approximate weight 210,610 pounds.

Plans for the construction of dock No. 17 have been approved. They provide for a

NOTES OF PROGRESS.

(Continued.)

dock 1,000 feet long and 155 feet wide, instead of 150 feet, as in the preliminary plans, and for open built cylinder substruction, instead of the single row of cylinders with concrete piling bulkhead, as provided in the original plans. The floor system will consist of steel girders embedded in concrete, and will bear a load of 1,000 pounds per square foot. This last change is made to expedite construction, and the widening of the dock is to make it possible to divide the space into symmetrical bays 27 feet wide. It will be paved with brick, instead of concrete, as at first provided. Two depressed railway tracks will extend along the axis of the pier. The dock will be constructed upon 215 steel caissons 6 feet in diameter, built up of sections 5 feet long, and varying in length according to the depth to hard rock. There will be 13,103 feet of caisson below mean tide, and 430 feet above mean tide. The floor area will be 154,078 square feet. The items entering into the bill of cost, are:

Steel caissons, 5,879,604 pounds, 2,707 sections; caisson shoes, 62,172 pounds; concrete to top of caissons, 14,170 cubic yards, top of caissons to floor, 1,576 cubic yards, concrete in floor, 3,805 cubic yards; concrete in curb wall outside of wharf, 25 cubic yards; concrete in beams, 4,796 cubic yards; concrete in haunches, 223 cubic yards; total concrete, 24,595 cubic yards; paving brick, 129,312 square feet; girders, 6,570,182 pounds; I-beams, 78,064 pounds; angles, 188,160 pounds; plates, 7,501 pounds; reinforcing rods, 925,662 pounds; 24 mooring bits, 12,480 pounds; bolts, 9,500 pounds; fender piling, 33,150 linear feet; timber for walling, 20,000 feet; false work, 4,050 feet; permanent track, 4,000 linear feet; reinforcing French rail, 165 tons; 4 Ellis bumping posts.

On dock No. 16, one thousand one hundred feet of false work for the bulkheads have been completed, four of the caissons are down to rock, and four more are under way (these were manufactured on the Isthmus); and the concrete platform for the casting of the reinforced concrete sheet piling has been built. On dock No. 17, the false work necessary for the sinking of the cylinders has been begun.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 67 per cent completed, 150,752 cubic yards, out of a total of 225 000, having been placed at the close of the work on August 12. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
August 7	216	13.00	2
August 8	160	11.00	2
August 9	184	12.00	2

Cash Sale of Commissary and Hotel Books.

The sale for cash of commissary and hotel coupon books to gold and silver employes of Gorgona shops will be continued during the month of August. Books are also sold to silver employes by the deduction from pay roll method. A recent poll indicates that the employes are in favor of the cash method about three to one.

Sanitary Department Changes.

During the absence of Major Robert E. Noble, temporarily detailed for duty in Porto Rico, the position of general inspector in the Sanitary Department will be filled by Dr. M. E. Connor, health officer at Colon and Cristobal. Dr. A. E. Mayner, assistant health officer, Panama, will fill Dr. Connor's place while the latter is engaged in the inspection work, and Dr. Harry Eno, district physician at Pedro Miguel, has been detailed for duty in connection with the office of assistant health officer, Panama.

CONCRETE WORK IN THE LOCKS.

Over 60 per cent of the concrete for all the locks is in place, the amount at the close of the work on August 12, being 2,575,507½ cubic yards, out of a total of approximately 4,284,400. A total of 33 199½ cubic yards of concrete was laid in the locks during the week ending August 12.

GATUN LOCKS.

Over 73 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of the work on August 12, being 1,529,392½ cubic yards, out of a total of 2,085,000.

A statement of the amount of concrete placed in the locks each working day for the week ending August 12, and of the total, follows: and a similar statement for the work in the Spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The Empire Woman's Club held a musicale and informal reception in honor of Mr. and Mrs. A. B. Dickson on Thursday afternoon, August 10, members of the Paraiso and Gorgona women's clubs being present as guests. The following program was given: Piano solo, *Pierette*, Chaminade; Mrs. Shivers. Songs, (*a*) *The charmer*, Strelezki; (*b*) *A china tragedy*; Mrs. Roberts, with violin obligato by Mrs. Decker. Piano solos, (*a*) *Polonaise*, Chopin; (*b*) *Etude No.* 1, Wollenhaupt; Mrs. Regan. Songs, (*a*) *Answer*, Robyn; (*b*) *Tears are pearls*; Mrs. Young. Violin solos, (*a*) *Romanza*, Reis; (*b*) *Spanish dance*, Moskozski; Miss Smith. Presentation of a gift to Mrs. Dickson by the president of the club.

The study course outlined by the club for the coming year will begin at the meeting on the first Tuesday in September.

A called meeting of the Paraiso Woman's Club will be held at the lodge hall on Wednesday afternoon, August 23, to arrange the program of work to be undertaken by the organization for the coming year, and to prepare for the election of officers, which will be held at the first regular meeting on September 6.

Regular meetings of the Gorgona Woman's Club will be resumed on Thursday, September 21, at which time there will be an election of officers.

An euchre club, composed of 35 women, has been organized in Empire, and the initial meeting was held at the home of Mrs. Davies on Thursday afternoon, August 10. The club will meet once a week at the homes of members. Small weekly dues are charged, and the money will be devoted to the purchase of prizes.

Church Notes.

On Wednesday, August 9, the Woman's Altar Guild and members of the parish of St. Ferdinand's Roman Catholic church at Empire, held a reception in the lodge hall in honor of the newly arrived resident priest, the Rev. Father McCarthy of Buenos Aires. The Rev. Father Allot, rector of the parish, gave an address in which he outlined the aims and scope of the parish work.

A children's choir, composed of ten boys and girls, has been organized, with Father McCarthy as director. The children sing at vespers on Friday night, and at the two Masses on Sunday morning.

The Union Christian League at Culebra held an informal reception on Thursday evening, August 10, in honor of the retiring president, Mr. F. C. Freeman. A program, consisting of songs and piano solos, was given. The pastor of the church made an address of farewell, and Mr Freeman responded. There were 75 persons present.

Six-Year Men Formulate Plans for a Society.

At a meeting held at the University Club on Saturday evening, August 12, plans were formulated for a society of employes and ex-employes of the Isthmian Canal Commission, and of the Panama railroad, who have completed six years' continuous service on the Isthmus. The constitution adopted, subject to final approval at the first general meeting of the society, provides for an annual reunion of the members, the publication of a year book, to contain a roster of the members with their current addresses and biographical notes, and the adoption of an emblem of appropriate design. A committee of five was appointed, with authority to select a name for the society and a design for the emblem, solicit members, and make the necessary arrangements for the first general meeting. The members of this committee are: John K. Baxter (chairman), R. E. Wood, W. F. Shipley, C. A. McIlvaine, John J. Meehan.

PERSONAL.

Major Eugene T. Wilson returned to the Isthmus from New York, on the *Santa Marta*, on August 10.

Prof. Emory R. Johnson of the University of Pennsylvania is making a visit of several weeks on the Isthmus, for the purpose of inspecting the Canal work. He was a member of the Walker Isthmian Canal Commission of 1900-01, which made the report in 1902 in favor of selecting Panama as the most desirable route for the construction of the Isthmian Canal. He is an authority on railway and water transportation, and prepared for the report of the Walker Commission, the chapter entitled "The industrial and commercial value of a canal."

Canal Zone Humane Society.

The second annual meeting of the Canal Zone Humane Society was held at the Hotel Tivoli on Sunday afternoon, August 13. The annual report of the secretary showed that the efforts of the organization are directed toward the prevention of cruelty to children, and the prevention of cruelty to animals. Under the first head, the society has been interested in two cases. One of these is the case of a 13-year-old girl, living at Matachin, who was taken from her parents by order of the court, at the request of the society, because she was not properly fed and was surrounded by bad companions. She was cared for temporarily at the orphan asylum of St. Joseph, in the Malambo section of Panama, and is now at an asylum in Albany, N. Y., where she is to be cared for under an endowment of $500, of which $453 was subscribed by residents of Gorgona. The society spent about $150 on this case. A picnic was held in January for the inmates in the Panama asylum for boys.

A notice, in Spanish and English, forbidding drivers to ill treat horses, has been posted at the intersection of the Corozal and Sabanas roads, near Panama; the watering trough near the railroad station in Panama city, formerly dry, is now kept filled, and horses unfit for service have been taken from work, at the instance of the society. The Canal Zone police have been active, and a number of arrests and convictions have been made. The treatment of animals in the settlements in the Canal Zone is reported to be very satisfactory, and there is a marked improvement in the condition of the horses seen on the streets of Panama.

On October 14, 1910, the Ancon Dramatic Club gave a performance under the auspices of the society. This entertainment, which was held at the National Theatre in Panama, resulted in a net profit of $200 for the organization. In its various branches, the expenditures of the society have been about $700 for the past year.

It was decided that the society should place printed cards in Canal Zone villages, calling attention to the work of the organization, and stating that the Canal Zone police have been instructed to investigate any cases that may be reported to them. Cases of neglect and cruelty, noted in the villages, should be reported to the local police, or a statement be made in writing to the secretary of the society at Ancon. It was also decided to send a button to every subscriber. The annual "Treat" to the boys of the orphanage will be given during the Christmas holidays. For the purpose of raising means to carry on the work of the society, a committee will be appointed at the meeting of the board of directors.

The following officers were elected for the term of one year: President, Hon. Frank Feuille; vice-presidents, Colonel W. C. Gorgas, J. P. Fyffe, and Mrs. J. D. Williamson: secretary, A. J. Orenstein; treasurer, F. B. Fearon; directors, Colonel Charles F. Mason, Judge S. E. Blackburn, and Miss J. Macklin Beattie. A meeting of the board of directors, which is composed of the officers and directors, will be held at the Hotel Tivoli on Monday evening, August 21.

Flamenco Island Launch Service.

The launch *Birdena* will make daily trips to Flamenco Island, leaving the Balboa dredging wharf at 7 a. m., should business offer. Passage may be procured from the resident engineer at Balboa.

Public Installation of Kangaroos.

All Kangaroos and families are invited to attend a public installation of officers and informal dance, to be given by Ancon Court, No. 7, I. O. P. K., on August 26, at 7.30 p. m., in Ancon hall.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending August 12, follows:

DATE.	Hours worked.	Cubic Yards.
August 7	6.15	2,588
August 8	7.25	2,626
August 9	6.15	2,035
August 10	....	*644
August 11	2.55	469
August 12	7.10	1,568
Total	30.00	9,930

*Shut down, putting new shaft in No. 12 crusher.

Obituary.

Mrs. John Scott Payne, widow of the late Major J. S. Payne, United States Army, retired, died at Kanuga Club, N. C., on August 11. Mrs. Payne had until recently, made her home on the Isthmus with her son, William H. Payne of the Subsistence Department.

John T. Elsey, an American, 38 years of age, employed in the Atlantic Division, with residence at Cristobal, died at Ancon Hospital on Sunday, July 30, of hæmoglobinuric fever. He had been on the Isthmus five years. He is survived by his wife.

Missing Men.

Any one having knowledge of the whereabouts of Thomas H. Chancellor, last heard from at Cristobal over two months ago, is requested to communicate with John M. G. Watt, Corozal, C. Z.

Information is desired regarding the present whereabouts of William F. French of Boston, a civil engineer, not employed on the Canal work.

LOST—Two black and tan female hounds in the vicinity of Mamei. Will answer to the names of *Lady* and *Bugle*. A liberal reward is offered for their return to Geo. W. Pougher, Gorgona, C. Z.

EXECUTIVE ORDER.

Providing for the Inspection of Steam Vessels.

By virtue of the authority vested in me, I hereby establish the following Order in the Canal Zone:

Section I. Every vessel propelled in whole or in part by machinery, shall be deemed a steam vessel within the meaning of this order.

Section 2. All steam vessels navigating the waters of the Canal Zone, except public vessels of the United States or other countries, shall be subject to the provisions of this order.

Section 3. The Board of Local Inspectors of the Canal Zone shall cause the hull of each steam vessel navigating the waters of the Canal Zone to be carefully inspected at least once every year, and shall satisfy themselves that every such vessel so inspected is of a structure suitable for the service in which she is to be employed, and has suitable accommodations for passengers and crew, and is in a condition to warrant the belief that she may be used in navigation with safety to life, and that all the requirements of the law in regard to fire, boats, pumps, hose, life-preservers, floats, signals, and other things are faithfully complied with, and if they deem it expedient, they may cause the vessel to be put in motion and may adopt any other suitable means to test her efficiency and that of her equipment.

Section 4. Whenever the Board of Local Inspectors shall find on board any vessel subject to the provisions of this order any equipment, machinery, apparatus or appliance which does not conform to the requirements of the law, the Board shall require the same to be placed in proper condition by the owner or master of the vessel, and if the said Board shall find in any such vessel any life-preserver or fire hose so defective as to be incapable of repair, the Board shall require the same to be destroyed in the presence of some person appointed by the Board to represent it.

Section 5. The Board of Local Inspectors shall cause the boilers and all appurtenances of all steam vessels to be carefully inspected before the same shall be used, and at least once every year thereafter, and shall subject all boilers to the hydrostatic test in the ratio of 150 pounds to the square inch to 100 pounds to the square inch of the working steam power allowed. All such vessels shall comply with the following requirements, viz.—

That the boilers are well made, of good and suitable material, design suitable for the service in which employed, and to be equipped with the proper safety appliances and of such construction, shape, condition, arrangement and material that they may be safely employed in the service proposed without peril to life; and the Board of Local Inspectors shall cause an examination to be made to satisfy itself that the requirements of these regulations have been complied with.

Section 6. When the inspection of a steam vessel is completed and the Board of Local Inspectors approve the vessel and her equipment, the Chairman of the Board shall make and subscribe a certificate to the Collector of Revenues in accordance with the form to be prescribed by the Board. Every certificate granted to steamers carrying passengers shall state the number of passengers of each class that any such steamer has accommodations for and can carry with prudence and safety.

If the Board of Local Inspectors refuse to grant a certificate of approval, the Chairman thereof shall make a statement in writing and give his reasons for such disapproval, and shall sign the statement as such Chairman and file the same in the records of the Board, giving a copy thereof to the owner or master of the vessel.

Section 7. All foreign private steam vessels carrying passengers to or from any port or place within the limits of the Canal Zone shall be subject to the provisions of this order, *Provided* that if any foreign passenger steamer of a country which has inspection laws approximating those of the United States has an unexpired certificate of inspection duly issued by the authorities of the country to which the vessel belongs, the said vessel shall not be subjected to an inspection other than that necessary to satisfy the Board of Local Inspectors that the condition of the vessel, her boilers and life saving equipment are as stated in her certificate of inspection; but no such certificate of inspection shall be accepted as evidence of lawful inspection unless like privileges are granted to steam vessels of the United States under the laws of the country to which such vessel belongs.

Section 8. Private steam vessels duly registered in the United States having unexpired certificates of inspection issued by the proper authorities in the United States shall not be subject to inspection hereunder.

Section 9. The Collector of Revenues shall retain on file all original certificates of inspection required to be delivered to him by the Board of Local Inspectors, and shall give to the master or owner of the vessel therein named three certified copies thereof, two of which shall be placed by such master or owner in conspicuous places in the vessel where they will be most likely to be observed by the passengers and others, and there kept at all times framed under glass; and the other shall be retained by such master or owner as evidence of the authority thereby conferred.

Section 10. Before issuing an inspection certificate to any vessel, the Collector of Revenues shall demand and receive from the owner or master of such vessel as compensation for inspection and examination made for the year, the following sums, in addition to the fees for issuing enrollments and licenses now allowed by law:

For each steam vessel of 100 tons or under........................$10.00
For each and every ton in excess of 100 tons........................ 5c.

The fees herein provided for shall cover the cost of the certificate, as well as the inspection and examination of the vessel, which fees shall be for the use and benefit of the Canal Zone treasury.

Section 11. Whenever any passenger is received on board of any steam vessel not having the certified copies of the certificate of approval placed and kept as required by this Order, such vessel shall be liable to a fine of ONE HUNDRED DOLLARS for each passenger so received, to be recovered in the Circuit Court of the Circuit in which the vessel is to be found, and the money so recovered shall be a lien upon the vessel, which may be seized and sold to satisfy the same, as well as all costs of the proceeding.

Section 12. No steamer carrying passengers shall depart from any port or place in the Canal Zone unless it shall have in its service a full complement of licensed officers and a full crew, as in the judgment of the Board of Local Inspectors may be sufficient at all times to manage the vessel.

Section 13. Every steam vessel licensed under the provisions of this Order shall have on board in an accessible place one life-preserver for every person allowed to be carried, in addition to those provided for the crew of such vessel; and if a greater number of passengers than is stated in the certificate is taken on board of any vessel within the waters of the Canal Zone, the master or owner of such vessel shall be liable to any person suing for the same to refund the passage money and TEN DOLLARS for each passenger beyond the number allowed.

Section 14. If any passenger steamer engages in excursions within or from the waters of the Canal Zone, the Board of Local Inspectors shall issue to such steamer a special permit in writing for the occasion, in which shall be stated the additional number of passengers that may be carried and the number and kind of life saving appliances that may be provided for the safety of such additional passengers, and they shall also, in their discretion, limit the route and distance for such excursions.

Section 15. The master of every passenger steamer shall keep a correct list of all passengers received on board the vessel, which record shall be open to the inspection of the Inspectors and the officers of the Customs at all times, and the correct number of passengers shall be furnished to the Inspectors as often as called for.

Section 16. Every master of a passenger steamer who fails through negligence or design to keep a list of passengers as required by the preceding section shall be liable to a fine of ONE HUNDRED DOLLARS, to be recovered in the Circuit Court of the Circuit in which the vessel is to be found.

Section 17. Every steam vessel carrying passengers shall be provided with two good double-acting fire pumps to be worked by hand; each chamber of such pumps shall be of sufficient capacity to contain not less than one hundred cubic inches of water and such pumps shall be placed in the most suitable part of such vessel for efficient service, having suitable well fitted hose to each pump at least one half the vessel in length and kept at all times in perfect order and shipped up and ready for use. On every steamer not exceeding two hundred tons, one such pump may be dispensed with. Each fire pump shall be supplied with water by a suitable pipe connection passing through the side of the vessel so low as to be under water at all times, and no fire pump thus provided shall be placed below the lower deck of the vessel. Every steamer shall also be provided with a pump which shall be of sufficient strength and suitably arranged to test the boilers thereof.

Section 18. Every vessel coming within the provisions of this order shall be provided with such number of life-boats, floats, rafts, life-preservers, line carrying projectiles and best means of propelling them, and drags, as in the judgment of the Board of Local Inspectors will best procure the safety of all persons on board such vessels in case of disaster. And every such vessel shall have the life boats required by this order provided with suitable boat disengaging apparatus, so arranged as to allow such boats to be safely launched while such vessels are under speed or otherwise so as to allow such disengaging apparatus to be operated by one person, disengaging both ends of the boat simultaneously from the tackle by which it may be lowered to the water; and the Board of Local Inspectors shall determine the kind of lifeboats, floats, rafts, life-preservers, line carrying projectiles and means of propelling the same, and drags which are to be used on the vessel, and also the kind and capacity of the pumps for freeing the vessel from water in case of heavy leakage, the capacity of such pumps being suited to the navigation in which the vessel is employed.

Section 19. The owner or master of any such vessel who refuses to provide such lifeboats, floats, rafts, life-preservers, line carrying projectiles and means of propelling them, drags, pumps or appliances which, under the provisions of the preceding sections are required by the Board of Local Inspectors, shall be fined ONE THOUSAND DOLLARS, and the same may be enforced against the owner of the vessel personally or as a lien upon the vessel, which may be seized and sold to satisfy such fine and costs of court.

Section 20. The Board of Local Inspectors shall have the power to enforce the requirements of this Order—first, by not granting a certificate—second, by revoking the certificate already issued to the vessel.

The owner or master of the vessel may appeal from the action of the Board of Local Inspectors to the head of the Department of Civil Administration at any time within ten days after the final action of the board; and the Head of the Department of Civil Administration may modify or set aside the action of the Local Board, and he shall certify his ruling to the board for observance in each case.

Section 21. Whenever a steamer engaged in carrying passengers to or from the Canal Zone enters the waters of the Canal Zone, it shall be the duty of the captain of the port to notify the master or agent of such vessel that the same is subject to the Inspection Laws of the Canal Zone; and after being so notified, it shall be the duty of the said agent or master to make a written request to the Board of Local Inspectors for the inspection of the vessel and her equipment in accordance with the provisions of this Order. Any agent or master of a vessel who fails or refuses to make the written request as herein provided for after receiving the notice above mentioned from the Captain of the Port, shall be liable to a fine of FIFTY DOLLARS upon his conviction in the Circuit Court of the Circuit in which said agent or master is to be found.

Section 22. Any violation of the provisions of this Order, for which a specific punishment is not prescribed herein, shall subject the owner or master of the offending vessel to a fine not exceeding ONE THOUSAND DOLLARS, or by imprisonment in jail not exceeding six months, or both such fine and imprisonment in the discretion of the Court.

Section 23. The fines and penalties imposed under this Order shall constitute a lien on the vessel in each case, and upon judgment for any such fine or penalty execution may issue therefor, as in civil cases, against such vessel, and same shall be sold to satisfy such execution; and the court may order the provisional detention of such vessel to abide the judgment of the court; but a bond, to be approved by the judge of the court, may be given to secure the payment of any judgment that may be rendered, and the vessel shall be released thereon.

Section 24. The Canal Commission may establish rules and regulations not inconsistent herewith for the better enforcement of this Order.

Section 25. This Order shall take effect ninety days after the same shall have been published in THE CANAL RECORD.

WM. H. TAFT

THE WHITE HOUSE,
July 21, 1911.
[No. 1386.]

Ancon Hospital Records.

Six large file cases are being made to increase the filing facilities in the library at Ancon Hospital, three for the index cards of hospital cases treated, and an equal number for the history charts. Heretofore, the history charts only have been kept in the library, but when the new file cases are finished all of the completed index cards will be taken there to be filed. About 107,000 index cards have been filed to date, indicating the treatment of that number of patients in Ancon Hospital during the little more than seven years of Canal construction. Each of the new index file cases contains about 70 boxes, each box having sufficient space to accommodate 1,000 cards, a total of 70,000 cards to the case, or a grand total of 210,000 cards for all three cases. These, with the history chart cases, make a total file capacity of about 425,000 cards and charts.

Porto Bello Crusher.

During the week ending July 29, there were crushed at Porto Bello, for the concrete work at Gatun, 10,636 cubic yards of rock in 27.20 hours. The record for the week ending August 5 was 10,698 cubic yards in 29.49 hours. A statement of the work done in the week ending August 12, follows:

DATE.	Hours worked.	Cubic Yards.
August 7	5.23	2,176
August 8	4.15	1,731
August 9	3.39	1,487
August 10	2.32	1,238
August 11	3.22	1,441
August 12	4.25	1,895
Total	23.36	9,968

The salesroom of the Ancon market is to be enlarged, separate sections are to be arranged for gold and silver employes, and a grocery department is to be added.

LABOR FORCE AND QUARTERS IN JULY.

The total force at work on the Canal and railroad on July 26 was 34,681, as compared with 32,690 at the end of June, and with 36,450 in July, 1910. Canal employes numbered 27,740, and Panama railroad, 6,941. The number of "gold," or white American employes in July, 1911, was 4,250, as compared with 4,380 in July, 1910. The force report follows:

QUARTERS.

On August 1, there were 23,438 occupants of Commission quarters. Of this number, there were 9,228 white Americans, including 5,261 men, 2,028 women, and 1,939 children. There were 5,478 Europeans, of whom 4,891 were men, 242 were women, and 345 were children. There were 8,515 negroes, of whom 5,998 were men, 1,102 were women, and 1,415 were children.

The above figures include 28 Asiatics at Balboa, and four at Porto Bello.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

The moving picture schedule for the week ending August 26 is, as follows: Monday, Corozal; Tuesday, Empire; Wednesday, Culebra; Thursday, Gatun; Friday, Cristobal; Saturday, Gorgona.

The Hearons Sisters Concert Company of New York City will arrive August 18, and will give a series of entertainments, as follows:

Empire, Saturday, August 19; Gatun, Monday, August 21; Gorgona, Tuesday, August 22; Cristobal, Thursday, August 24; Porto Bello, Friday, August 25; Empire, Sunday, August 27; Corozal, Monday, August 28; Culebra, Tuesday, August 29; Gatun, Wednesday, August 30; Cristobal, Sunday, September 3; Corozal, Thursday, September 7; Gorgona, Saturday, September 9; Culebra, Sunday, September 10.

CULEBRA.

The following high scores were rolled during the week in duckpins: Huttelmaier, 124, 113, 105; Palmer, 111, 111; Fox, 106, 102; Bronson, 111; Cornthwaite, 100; Brown, 100; Fay, 100.

The game of volleyball, between the married men and bachelors, in the gymnasium on Friday evening, resulted 2 to 1 in favor of the bachelors.

The local handicap bigpin series will begin August 20. Entrants must hand in their fee before the first ball is rolled. Rules for the game will be posted as soon as the committee has made out the handicaps.

EMPIRE.

The following high scores were bowled on the alleys during the past week: Tenpins—Huson, 201; Anderson, 206; Giavolla, 202; Goolsby, 201; Pinney, 205; Parkis, 213. Duckpins—Pinney, 103, 113; Reiman, 107, 117; Lang, 100; Payne, 104; Dakin, 100, 102; Snapp, 108; Marshall, 110.

The topic for discussion in the literary and debating society on August 10 will be "Individuality."

There will be an informal song service on Sunday evening, August 20, at 9 o'clock.

The basketball game played on Saturday, August 12, between the engineer's office and the gymnasium team, resulted in a victory for the former by a score of 32 to 29.

GORGONA.

A boys' gymnasium class has been formed, and will meet every Monday and Thursday at 5.10 p. m. A regular course of calisthenics, mat, and apparatus work will be given. Interest is manifested in the men's gymnasium class, and the number is increasing at each meeting. Monday nights, the class is preceded by a talk on some subject in hygiene or personal care of the health. On Thursday night, August 14, another social gathering will be held after the gymnasium class.

GATUN.

The Uniformed Rank of the Knights of Pythias held a drill at the clubhouse last Thursday night. Any member of the Y. M. C. A. wishing to learn military tactics with this drill class, is at liberty to take part at the weekly meetings.

The Ancon bowling team came to Gatun on Saturday night and met defeat in three straight games of duckpins.

CRISTOBAL.

The afternoons for ladies will, hereafter, be Wednesdays and Fridays, from 2 to 5 o'clock. All ladies are invited to use the bowling alleys on the above afternoons. Rubber soled, or leather soled shoes without heels, may be used on the alleys.

All men interested in a handball league are requested to hand their names in to the desk by Saturday night, August 19.

An open meeting of the literary and debating club will be held on Wednesday, August 23. The program will consist of stories, songs, contests, and refreshments.

High scores for the week ending August 12 are, as follows:

Duckpins—Herrington, 110; Hess, 107; Collins, 101; Smith, 104; Claherty, 108, 105, 102; Bruggee, 106.

Tenpins—Furlong, 221, 213, 209, 201; Atkins, 226; Barrett, 234, 209, 204, 200; Burns, T., 200; Louch, 212, 201, 200, 200; Bullard, 202; Sterner, 207; Gibson, 200.

PORTO BELLO.

The Porto Bello chess club has commenced a series of match games between two teams named "The checkmates," consisting of Hanbury, Tuttle, McDevitt, Colberg, Gaskill and Rogers; and "The checkers," consisting of Morgan, Corrigan, Mackintosh, Goodfellow, Wright and Schreiber. Each player will play one game with each player on the opposing team. The winners will be tendered a banquet by the losing team.

The following vessels arrived at, or departed from, the port of Balboa during the week ending August 12:

Arrivals—August 6, *Pachitea*, from Callao; August 7, *Mexico*, from Valparaiso; August 9, *San Juan*, from San Francisco; August 11, *Barracouta*, from San Francisco; August 12, *Stanley Dollar*, from San Francisco.

Departures—August 6, *Lansing*, to Port Harford; August 8, *Ecuador*, to Guayaquil; August 9, *Huasco*, to Valparaiso; August 10, *Acapulco*, to San Francisco; *Peru*, to Guayaquil; August 11, *Riverside*, to San Francisco; August 12, *Manavi*, to Buenaventura; *Pachitea*, to Callao.

Materials for Sale.

There is on hand at the storehouse for obsolete material, at Mount Hope, C. Z., an assortment of various classes of material. Sales have been effected, from time to time, of articles that would be serviceable for use on plantations and roadbuilding projects by parties living in the Republic of Panama. The articles on hand can be grouped under the following general classes:

Hand tools—carpenter, blacksmith, and tinner's.
Fittings and plumber's supplies.
Light and heavy hardware.
Track material.
Shop tools.
Stationery and printer's supplies.
Office, hotel, and household furniture.
Oils.
Marine supplies.
Surveyor's supplies.

Also, the following plant and equipment stock:

Hand blowers.
Rock channelers.
McCully rock crushers.
Air cylinders.
Rivet heaters.
Hot water heater.
Fanning mill.
Unloader ballast plows.
Hay rake.
Wheel scrapers.
French locomotives.
Types of engines from 12 to 75 horse power.
Numerous old French boilers, representing six different types.

Work of Unloaders in Central Division.

The following statement shows the number of Lidgerwood cars unloaded by the Central Division during the month of July, 1911:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	3	1,000	20,000
Miraflores	3	735	14,700
Bas Obispo	4	1,029	21,590
Total	10	2,764	56,290

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line; the Panama Railroad Company's dates being subject to changes

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* call at Santiago de Cuba, on both outward and homeward voyages.

The Leyland line steamer *Etonian* sails for Port Limon and New Orleans on, or about, August 26.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; ships for New York via Kingston on Thursdays at 11 a. m.; for Bocas del Toro on Mondays at 6 p. m.

CANAL RECORD

Volume IV. ANCON, CANAL ZONE, WEDNESDAY, AUGUST 23, 1911. No. 52.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of July is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of Canal work in all departments and divisions.

Removal of Native Town of Old Balboa.

The native town, known as Old Balboa, near the Pacific entrance to the Canal, will soon have entirely disappeared, the site being required for dock improvements. All the leases of building lots in the settlement, made by the Canal Commission, have been cancelled, and the work of tearing down and removing the buildings has begun. The former holders of lot leases have been offered land in other localities, notably, West Culebra, Golden Green, near Empire, and Cowpens, upon which to rebuild, and where the offers are accepted, the Canal Commission undertakes to transport their building materials free. Originally, there were about 66 houses in the settlement, all privately owned, but not more than 25 per cent of the owners were actual residents. Of the residents, some had lived in the village for 25 years, or more.

The land on which the native town of Old Balboa stands was formerly part of a rural property aggregating 57 hectares, belonging jointly to José Isabel Cano and Buenaventura Correoso. It was sold to the first French Canal Company on March 19, 1883, for 15,000 Colombian pesos, but there was a reservation made of 2,500 square meters, the designation of which was left to the French company. A part of this tract, which is represented, more or less, by the site of the native village, has been acquired by the Canal Commission, and negotiations are in progress for the purchase of the remainder.

After the French began work at the Pacific entrance, they imported a number of Colombian laborers from Cartagena, who settled the place under the name of Cartagenita (Little Cartagena.) The place, however, was officially designated La Boca (the mouth) from its proximity to the southern entrance to the Canal, and it was so known up to April 30, 1909, when, by direction of the President of the United States, it was changed to Balboa. Since that time, it has been locally called "Old Balboa," to distinguish it from the American settlement known as "East Balboa," which has been built up about midway between Old Balboa and Panama. From a commercial standpoint, the native town of Old Balboa never had any importance, its trade being limited to a few Chinese stores and native shops, which supplied the Canal laborers and others living there, as well as a few squatters in the bush on the west side of the Canal.

Cement as an Iron Preservative.

Tests are to be made by the Commission to determine the value of cement mortar, applied to iron plates by the "cement gun," as a preservative of iron. Twelve plates, 63-8 by 14 inches, have been coated with a 1 to 3 mortar of cement and sand, after they were cleaned to grey metal by the sand blast process. Six of these have been covered with a ½-inch coating, and the remaining six with a one-inch coat on one side, and a 1½-inch coat on the other. Three plates of each kind have been sent to Balboa, and three to Cristobal, where they will be kept immersed in salt water to test the mortar method of preventing corrosion. Two plates of each kind will be taken from the salt water bath at the end of three months, and one-half of the coating will be removed to determine the condition of the metal. The duration of the test for the balance of the plates will be determined later.

Construction of North Guide Wall at Miraflores Locks.

Preparations are under way for the construction of the north guide wall at the Miraflores Locks. There is a small amount of excavation remaining to be done before the concrete work can proceed, particularly near the south end, but its removal will be only a matter of a few days. The first steps in the wall construction will be the building of a series of concrete piers, which will be sunk to bed rock at depths varying from 30 to 50 feet. The piers will be removed three in a row, similar to the bents of a trestle, and will be spaced 27 feet from center to center, with a total width of wall of 58 feet. The rows will be 15 feet apart, and, as the total length of the guide wall is 1,200 feet, about 250 piers will be required. Each cylinder will have a diameter of 7½ feet, and will be built by sinking 6-foot vertical, hollow, reinforced concrete sections, one on top of the other, in practically the same manner as the foundation piers for the new Panama railroad dock at Balboa are being constructed. The ground within the cylinders will be removed by bucket and shovel, and, as fast as the earth is taken out, the piers will progress downwards. When completed, the interior of the cylinders will be filled with concrete, making solid columns. Each length is notched, forming a shoulder, so that when placed on its fellow. there must be an exact fit. The piers will be tied together, both longtitudinally and crosswise, with reinforced concrete girders, having a depth of seven feet, and width of 2 5 and 3 feet, respectively.

The girders will support a reinforced concrete cellular structure, composed of chambers 54 feet wide and 13½ feet long in the clear, the walls ranging in thickness from 14 to 27 inches. The cells will be filled with loose rock and will be provided with two 18-inch openings in the sides of the panels and two other openings in the cross walls, all situated near the bottom, so that the water which has collected may be permitted to flow out in case the lake is emptied. The entire structure will be covered over and will support the tracks for the electric towing apparatus.

A Transportation Record in Culebra Cut.

On August 14, nine 35-car small dump trains, and twelve 27-car large dump trains were handled to Gatun; fifty-one 21-car Lidgerwood trains were handled to Chagres district dumps, making a total of 72 trains, 1,710 cars, and 57,357 cubic yards handled out of the north end of Culebra Cut on that date, which is the largest number of trains ever handled in one day out of that end of the Cut.

Work of Steam Shovel 257, P. R. R. Relocation.

For five consecutive months, February to June, 1911, inclusive, steam shovel No. 257, working in borrow pits on the Gatun ridge, Panama railroad relocation, made the best record for excavation on the Isthmus. In July, 1911, it was beaten by steam shovel No. 262 at work in the borrow pit at Monte Lirio on the relocation, which excavated 60,790 cubic yards in 25 days, of which 10,000 yards were earth, and the remainder rock. This shovel was run by F. H. Meisner, as engineer, with F. Cressey as craneman for a part of the month, and C. A. Wolfe, Jr., as craneman for the remainder.

The record of steam shovel No. 257 for the six months ending July 31 was, as follows:

MONTH.	Days worked.	Total by car record. Cu. yds.	CU. YDS. BY CROSS SEC.		
			Earth.	Rock.	Total.
February...	23	60,210	1,345	57,550	58,895
March.....	27	67,900	5,400	64,200	69,600
April......	24	61,100	....	62,540	62,540
May.......	26	72,030	....	70,030	70,030
June.......	26	65,260	....	58,850	58,850
July.......	25	62,540	....	57,270	57,270
Total....	151	389,040	6,745	370,440	377,185

The average per day for 151 days is 2,498 cubic yards, cross section measurement.

NOTES OF PROGRESS.

(Continued.)

During the six months noted, the shovel was run by J. H. LaRowe, and E. E. Austin was craneman. To make such a record, a steam shovel must be well served by cars, because "waiting for cars" is one of the elements of loss in the operation of a shovel. In this case, steam shovel No. 257 was served by three 25-car trains. These dump cars were 12-yard Olivers, but were figured as 10 cubic yards to secure daily car measurement report.

Sale of French "Scrap."

Representatives of several dealers in scrap metal are on the Isthmus, making investigations preparatory to bidding for the purchase of French "scrap" still remaining along the line of the Canal. Bids will be opened at the Washington office on September 5, and will be for the whole amount of "scrap" not already taken up on the property papers of the Commission, and credited to the French scrap account. It includes abandoned locomotives, dump cars, tanks, barges, boilers, girders, dredges, sheet iron, parts of old machinery, and miscellaneous junk. This material will be sold as it lies, all the expense of removal and transportation to be borne by the contractor, the rate per ton to be charged by the Panama railroad for transportaion to the seaports being $2.25 per ton of 2,000 pounds. Three years will be allowed in which to remove it.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is about 68 per cent completed, 151,700 cubic yards, out of a total of 225,000, having been placed at the close of the work on August 19. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
August 14	120	12.00	2
August 15	152	14.00	2
August 16	180	14.00	2
August 17	100	9.00	2
August 18	172	10.30	2
August 19	224	15.00	2
Total	948	74.30	2
Previously reported	150,752		
Grand total	151,700		

Porto Bello Crusher.

A statement of the rock crushed at Porto Bello quarry during the week ending August 19, follows:

DATE.	Hours worked.	Cubic Yards.
August 14	3.05	1,317
August 15	3.00	1,294
August 16	2.38	1,089
August 17	2.55	1,217
August 18	2.35	1,078
August 19	3.15	1,233
Total	17.28	7,228

Sailing of the Ancon.

The sailing date of the *Ancon* has been set for Friday, August 25, 1911, at 3 p. m.

Removal of Houses in Gatun Lake Region.

Vacant Commission quarters and labor barracks in the Gatun lake region are being dismantled as rapidly as the material in them is disposed of by private sale, or can be used by the Commission in the reerection of buildings elsewhere. It is thought that there will be but a few Commission buildings left in the lake area after January 1, 1912.

At Bohio, Mamei, San Pablo, and Tabernilla, 25 or 30 buildings have already been sold or dismantled. The schoolhouse at Bohio has been torn down, because, in view of the approaching abandonment of the town on account of the filling of Gatun Lake, it has been decided not to continue the school there. Arrangements will be made for the instruction of the children elsewhere. Practically all quarters at Mamei have been taken down, in order to avoid the further expenditure of money for sanitary work at that point. There were only five white families in the place, and these were transferred to other localities.

CONCRETE WORK IN THE LOCKS.

About 61 per cent of the concrete for all the locks is in place, the amount at the close of the work on August 19, being 2,607,839½ cubic yards, out of a total of approximately 4,284,400. A total of 32,332 cubic yards of concrete was laid in the locks during the week ending August 19.

GATUN LOCKS.

A statement of the amount of concrete placed in the locks each working day for the week ending August 19, and of the total, follows; and a similar statement for the work in the Spillway of Gatun Dam is published elsewhere in this issue. The construction plant works 12 hours daily, and the auxiliary plant 9 hours.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*	*Cu. Yds.*
August 14	1,540	32.10	6	592	8.40	2	150	2,282
August 15	1,436	26.40	8	292	5.40	2	92	1,820
August 16	1,198	20.04	6	396	6.30	2	172	1,766
August 17	1,082	18.14	6	522	8.40	2	40	1,644
August 18	1,708	29.46	8	732	9.40	2	130	2,570

Previously reported	......	......	......	......	......	......	......	1,529,392½
Grand total	......	......	......	......	......	......	......	1,542,407½

*The 491 yards shown for the portable mixers are reinforced concrete, and were placed on the following days: August 14th, 90; August 15th, 105; August 16th, 48; August 17th, 81; August 18th, 71½; August 19th, 95½.

PEDRO MIGUEL LOCKS.

Concrete work in the locks at Pedro Miguel is over 84 per cent completed, 707,371 cubic yards, out of a total of 837,400, having been placed at the close of work on August 19. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			⅓-cubic yard mixer.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

MIRAFLORES LOCKS.

Over 26 per cent of the concrete for the system of two twin locks at Miraflores was in place on August 19, the total amount on that date being 358,061 cubic yards, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			⅓-cubic yard mixer.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Large stone.

HOSPITAL POULTRY FARM.

Production of Eggs During the First Eighteen Months of Operation—Squab Raising.

The Ancon Hospital poultry farm has been in existence since January, 1910, starting with 200 Brown Leghorn hens and 15 cocks. In the following April, 100 hens and 10 cocks of the Rhode Island Red variety were added to the yard; one month later, a consignment of 230 Plymouth Rock hens and cocks was received, and in April, 1911, an addition of 100 fowls, imported from the States, was made to the Brown Leghorn family.

During the first 18 months of operation, namely, from January 1, 1910, to July 1, 1911, a total of 53,465 eggs, equivalent to about 4,445 dozen, was produced at the farm, of which the Leghorns laid 29,329 eggs, the Reds, 9,094, and the Plymouth Rocks, 15,042. The monthly average per hen for the same period—18 months—divided in their classes was, as follows: Brown Leghorns, 8.2 eggs; Rhode Island Reds, 7.7 eggs; Plymouth Rocks, 6.5 eggs. The monthly averages have ranged among the Leghorns from 2.8 eggs in September, 1910, to 14.5 in March, 1910; among the Reds, from 6.3 eggs in June, 1911, to 10.5 in April, 1910; among the Plymouth Rocks, from 4.8 eggs in December, 1910, to 9 in June, 1910. Nearly all the high averages were made shortly after the arrival of the fowls from the States, and upon their freedom from the confinement consequent to their trip. The Brown Leghorn family has proved a shade the best as egg producers.

In the 18 months ending June 30, 1911, seventy-two Brown Leghorns, 46 Reds, and 72 Plymouth Rocks died from various causes, leaving on hand at the end of June, 283 Leghorns, 78 Reds, and 146 Plymouth Rocks, a total of 507 hens and cocks. This includes 40 pullets of the Leghorn family raised on the farm, and now in the egg producing class. In addition, about 50 fowls have, at various times, been delivered to the hospital kitchen.

Chicken pox, dysentery, a diptheritic affection of the throat, and swellings over the eye, have been the cause of considerable mortality among the poultry, and inroads from these, and other diseases, must be constantly guarded against. The raising of young chicks after they are hatched has been attended with difficulties, and this feature of the poultry farm work is being given less attention. The incubators, introduced last year, could not be used with any degree of success.

The following table shows the number of dozen of eggs produced, the cost of running the poultry farm, and the approximate cost of the eggs per dozen, by months, for the seven months ending July 31, 1911:

	No. of Dozen.	Total Cost.	Cost per dozen. Approx.
January	287	$36.97	$0.13
February	243	28.33	11¾
March	247	28.81	11¾
April	281	29.16	10½
May	299	29.94	10
June	235	32.34	13¼
July	223	25.15	11¼

The average cost per dozen for the whole period mentioned has been about 11½ cents. The prevailing price of eggs at the commissary is 27 cents per dozen, indicating, on the basis of that figure, a saving of about 15½ cents per dozen, or about $280 for the seven months' period.

Last year, 48 pairs of pigeons were introduced at the poultry farm for the raising of squabs, and five more pairs were received from the Ancon Hospital laboratory, where they had been held for experimental purposes. They suffer less from disease than do the hens, and the original number remains practically intact. Fourteen squabs have been marked for raising. The birds are mainly of the Plymouth Rock Homer variety. The results from squab raising during the seven months ending July 31, 1911, are shown in the following table:

	Number.	Total Cost.	Approx. Cost per Squab.
January	2	$2.92	$1.46
February	10	1.70	.17
March	12	1.70	.14
April	5	1.70	.34
May	13	3.12	.24
June	33	3.12	.09½
July	4	2.85	.71
Total	79	$17.11	$0.21½

The prevailing price for squabs is about 35 cents apiece.

PERSONAL.

Mr. H. H. Rousseau will sail for the States on his annual leave of absence, on the *Panama*, on August 24.

Mr. Tom M. Cooke will sail on Thursday, August 24, on the *Panama*, on his annual leave of absence in the States.

Captain C. W. Barber, accompanied by Mrs. Barber and their son, returned to the Isthmus on the *Panama*, on August 18.

Free Lecture.

The fourth of the course of free lectures for the people of Colon will be delivered by Dr. M. E. Connor in the schoolroom of Christ Church on Thursday evening, August 31. The lecture will be illustrated with lantern slides. The series was begun in May, and the subjects thus far dealt with are sanitation, tuberculosis, and the care of the teeth. Following the lecture, there will be vocal and instrumental music.

Chauffeurs.

The Board of Local Inspectors will hold an examination for chauffeurs' licenses at the Administration Building, Ancon, on Wednesday, August 30, at 2 p. m. All applicants are required to have their application blanks properly filled out and endorsed before entering the examination. For information, address Board of Local Inspectors, Ancon, C. Z.

To All Masons.

The Pedro Miguel Masonic Club requests your attendance at the funeral services of the late brother John C. Blair, to be held at Ancon on Sunday afternoon, August 27, at 2 o'clock. The Masonic burial rites will be conferred by Sojourners' Lodge, No. 874, of Cristobal. A special train will leave Colon at 11 a m., and, returning, will leave Panama at 5 p m., observing the regular passenger schedule in transit. A committee will meet the special train as an escort to the chapel.

CLAUD HOLLICK,
Secretary and Treasurer.

PARAISO, C.Z., August 21 1911.

Missing Man.

Any one having information regarding the whereabouts of R. B. Winters, who is supposed to have come to the Isthmus of Panama about two years ago, is requested to communicate with the American Legation, Panama.

EXECUTIVE ORDER

Against the Promotion of Fights Between Bulls, Dogs, or Cocks.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

SECTION 1. Any person who sets on foot, instigates, promotes, or carries on any fights between cocks or other birds, or any dog fight, or bull fight, or fight between other animals; or who does any act as assistant, umpire, or principal in furtherance of any fight between any such animals, shall be punished by a fine not to exceed FIFTY DOLLARS, or by imprisonment not to exceed THIRTY DAYS, or by both such fine and imprisonment, in the discretion of the court.

SECTION 2. This Order shall take effect thirty days from this date.

WM. H. TAFT.

THE WHITE HOUSE,
August 4, 1911.
[No. 1392.]

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending August 19, follows:

DATE.	Hours worked.	Cubic Yards.
August 14	5.00	2,146
August 15	4.50	2,317
August 16	5.40	1,972
August 17	6.00	2,221
August 18	6.40	2,582
August 19	5.35	2,010
Total	33.45	13,248

Obituary.

John C. Blair, an American, employed as a carpenter in the Pacific Division, fell from the center wall at the Pedro Miguel Locks to the lock floor, a distance of about 30 feet, at noon, Wednesday, August 16, sustaining injuries which resulted in his death at Ancon Hospital on the following day. He was about 45 years of age, was married, and had been on the Isthmus one year and four months. His wife, living at present at Head Wallace Bay, Nova Scotia, and a son, who is in the employ of the Panama Railroad Company, with residence at Colon, survive him. He was a member of a Scranton (Pa.) lodge of the Independent Order of Odd Fellows, and also of the Masonic fraternity.

Semore McArthur, an American, employed in the Mechanical Division, with residence at Tabernilla, died at Ancon Hospital on Monday, August 14, of chronic nephritis and organic disease of the heart. He was 49 years of age, had been in the Canal service for about five years, and is survived by his wife, now on the Isthmus.

The death of James Monroe Kreiter, who was employed in the printing office of the Quartermaster's Department on the Isthmus, 1908–1910, occurred at his home in Washington, D. C., on August 6, aged 55 years. He was a native of Pennsylvania, and removed from that state to Washington about 17 years ago, procuring employment—first with the *Washington Times*, and later with the *Washington Post*. He was a member of Columbia Typographical Union, and, in August, 1901, represented the Philadelphia union at the international convention held in Birmingham, Ala. Two sons, Robert E. P., and James M., Jr., survive him. The death of his wife occurred a few months ago.

CANAL WORK IN JULY.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., August 15, 1911.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of July, 1911:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	65,022	1,343,189	147,956	1,556,167
Work excavation, wet	Cubic yards	425,195	16,928	520,692	962,815
Total work excavation	Cubic yards	490,217	1,360,117	668,648	2,518 982
Plant excavation, dry	Cubic yards	....	....	....	....
Plant excavation, wet	Cubic yards	....	....	....	....
Total plant excavation	Cubic yards	....	....	....	....
Total Canal excavation	Cubic yards	....	....	....	....
Material placed in dams	Cubic yards	526,943	....	94,237	621,180
Concrete placed in locks and dams	Cubic yards	76,981	....	52,746	129,727
Explosives used	Tons (Gross)	74.13	204 64	47.62	326.39
Rock drilled	Feet	59,923	375,374	88,701	523,998
Tracks removed	Miles	....	7.06	....	7.06
New tracks laid	Miles	2.39	13.89	4.68	20.96
Rock crushed	Cubic yards	43,352	....	61,362	104,714
Cement used	Barrels	75,090	321	59,453	134,864
New roads built	Miles	....	....	....	....
Water mains laid	Feet	3,324	150	80	3,554
Sewers laid	Feet	1 989	....	27	2,016
Open drains and ditches dug	Feet	38,227	1,000	13,537	52,764
Average daily force	....	7,020	7,567	4,434	19,021
Average rainfall	Inches	10.62	5.96	6.74	6.87

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The contracts for work under this subdivision are to be inspected by the force of the General Purchasing Officer in the United States. The erection has, up to the present time, been done by the division engineers. The field work consisted of supervision of tests of rising stem valves at Gatun, and inspecting and checking the position of fixed irons in the masonry of the different locks.

LOCK GATES AND PROTECTIVE DEVICES.

Under the contract with the McClintic-Marshall Construction Company, the mill and shop inspection has been in progress in the United States, the technical work being in charge of a force organized directly under this office. The shop work has made good progress, up to July 15 a total of 28,000 tons of structural material having been accepted. The first eight leaves for Gatun and Pedro Miguel, namely, the upper guard gates, 54 feet 8 inches high, have been practically completed in the shop and shipped. Eight of the 77-foot leaves for the upper and middle gates of Gatun upper lock have been practically completed in the shop, and the greater part of the material has been accepted. For the safety gates and lower gates of Gatun upper lock, 85 per cent of the shop work was completed, and more than half accepted. Of the upper and middle gates at Pedro Miguel, 79 feet high, 30 per cent of the shop work was done. Up to July 15, eight thousand four hundred and eighty-six tons of material had been shipped to the Isthmus.

In the field no work has yet been done toward erecting the gates at Pedro Miguel. At Gatun upper lock, the erection of one leaf of the upper guard gate has reached its full height, with the exception of the top girder, and a few of the intercostal frames; and sheathing has made good progress. The other leaf in the same gate has been erected six panels high, including sheathing, while the corresponding leaves in the twin lock have been erected to the height of four panels and partially sheathed.

Progress has also been made in adjusting the bearing plates in the hollow quoins which are babbitted in place in the reaction castings which transmit the thrust to the masonry. The adjustment, in general, has been very good.

OPERATING MACHINERY AND ELECTRICAL INSTALLATION.

The inspection force reporting directly to this office has cared for the technical matters relating to the inspection, as follows:

(1) For the rising stem valve and cylindrical valve machinery purchased under circular No. 614: The machine work is progressing rapidly, and it is anticipated that the two sample machines will be given factory test some time during August. Certain of the motors and limit switches to go with these machines have been received on the Isthmus, and will be tested as soon as all are available for the purpose.

(2) For the rack railway material purchased under circular No. 619: The manufacture of material for the different classes under this circular has been in progress, with the exception of Classes 5 and 6, for which award has not yet been made.

(3) For the gate operating and miter forcing machines purchased under circular No. 627: The first of these has not yet reached a stage at which inspection is necessary. Inspection has begun on the sample machines of the second class.

(4) For the gates and girder hoisting machines for the emergency dams: The organization will be expanded to include this inspection so soon as need shall arise. As yet, no manufacture of material has begun.

EMERGENCY DAMS.

A skeleton organization for the inspection, in the United States, of the material for the emergency dams to be purchased under circular No. 616 has been organized in the United States, reporting in technical matters directly to this office. As yet, the work has consisted in checking shop drawings made by the contractor.

AIDS TO NAVIGATION.

During the month, 146 acres of land have been cleared near Frijoles and Mamei for sites for beacons and references for buoys; 50,720 lineal feet of trochas have been cut, and the necessary surveys and profile taken. The average cost of clearing for the month has been about $13.50 per acre. The construction of the steel concrete forms for the range towers for the Atlantic and Pacific Divisions is under way at the Gorgona shops.

Atlantic Division.

GATUN LOCKS.

Excavation—Crane excavation in the lower lock, and shovel excavation for obtaining clay for back fill, were continued. A total of 5,994 cubic yards was removed by crane, and 13,383 cubic yards by shovel. On July 31, the total excavation amounted to 5,888,648 cubic yards, of which 5,035,328 cubic yards were removed from the prism. The excavation in the locks was 99.75 per cent completed.

Back fill—Back filling behind the side walls of the upper, middle, and lower locks, and in the center wall of the upper lock, was continued. The quantity placed during July aggregated 63,041 cubic yards, increasing the total to 606,617 cubic yards. On July 31, the back filling was 37.56 per cent completed.

Receiving and Issuing Material—The consumption of rock during the month exceeded the receipts by 19,813 cubic yards, and the consumption of sand exceeded the receipts by 8,655 cubic yards. The receipts of cement exceeded the consumption by 5,713 barrels.

Mixing and Placing Plants—Both plants, and all portable mixers, were kept in satisfactory operation during the month.

Power Plant and Pumps—The operation of the power plant and pumps was satisfactory.

Iron and Steel Work—During the month, 218.4 tons of fixed steel, 83.7 tons of reinforcing rails, and 36,889 feet of reinforcing rods were placed, and 420 linear feet of electrical track were laid.

Concrete Work—There was an increase of 15,740½ cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 25 working days was 2,842 cubic yards, as compared with a daily average during June of 2,127 cubic yards. The total amount of concrete placed during the month was 71,045½ cubic yards, including 5,370½ cubic yards of large stone. The bucket measure-

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	11.34	8.50
Average number of hours per day worked, per strand of cableway laying concrete and large stone (actual working time)	6.23	....
Average number of mixers per day	7.00	2.00
Average hourly output per mixer (actual working time) cu. yds.	60.78	75.76
Average amount of concrete and large stone laid per hour, per strand of cableway (actual working time) cu. yds.	30.19	....
Large stone laid, cu. yds	2,894½	2,476
Concrete laid, cableways, cu. yds.	35,684	....
Concrete laid, through chute into dump cars, cu. yds.	12,172	....
Concrete laid, derricks, cu. yds.	....	2,030
Concrete laid, dump cars, cu. yds	....	14,838
Concrete laid, portable mixers	....	1,476½
Total amount of concrete and large stone laid, cu. yds.	50,750½	20,820½

ment exceeded the place measurement by 525½ cubic yards. Of the total concrete, 8,611½ cubic yards were placed in the upper lock, 20,214 cubic yards in the middle lock, and 42,220 cubic yards in the lower lock. The concrete work for the entire lock system was 71.72 per cent completed at the end of July.

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 526,943 cubic yards. An arbitrary reduction of 40,000 cubic yards was made for shrinkage in the low sections of the Dam not covered by monthly cross section. One-third of this was charged against dry fill, and two-thirds against wet fill. At the end of the month, the net yardage in place was 14 819,977 cubic yards.

Hydraulic Fill—The dredges increased the hydraulic fill by 324,947 cubic yards. The total hydraulic fill in place July 31 was 7,736,939 cubic yards.

Dry Fill—Material received from the Central Division, the Locks, Mindi, and steam shovel No. 134, amounting to 201,996 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place, 7,083,038 cubic yards.

GATUN SPILLWAY.

Excavation—In preparing foundations of the Spillway dam, 903 cubic yards of rock were removed by hand. On July 31, the total Spillway excavtion amounted to 1,584,866 cubic yards.

Concrete—The work of placing concrete was continued, the amount placed during the month aggregating 5,935 cubic yards, which increased the total to 149,681 cubic yards. The concrete work for the Spillway was 66.5 per cent completed.

HARBOR AND CHANNEL SECTION.

Excavation Below Sea Level at Mindi—During the month, two steam shovels removed 3,190 cubic yards of earth and 54,935 cubic yards of rock from the Canal prism. In addition, 1,000 cubic yards of earth were sluiced by the pumping plant.

Dredging from the Ocean to Mindi—Four dredges removed 399,470 cubic yards of earth and 24,725 cubic yards of rock from the Canal prism. In addition, dredge *No. 86* placed 124,949 cubic yards in the Colon fill. On July 31, forty feet of water could be carried from zero to zero plus 2,000 feet; 35 feet to mile 3 plus 3,600 feet; 30 feet to mile 4 plus 750 feet; 20 feet to mile 5 plus 2,438.9 feet, at the junction with the French canal.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working days—hours	8.00
Average number of hours worked per day	4.70
Average number of cubic yards per hour of working day	216.80
Average number of cubic yards per working hour	369.20
Maximum day's output, (6 hours 13 minutes) cu. yds	2,437.00
Average day's output (25 days) cu. yds	1,734.00
Average hourly output, (169 hours 51 minutes) cu. yds	255.20
Total output for the month, cu. yds	43,352.00

SAND, STONE, AND CEMENT SERVICE.

In connection with this service, plant steamed 6,265 miles, handled 545 barges, and carried 2,425 passengers.

WEST BREAKWATER COLON.

Fifty-two thousand and five cubic yards of material were excavated, of which amount 50,201 cubic yards were placed in the breakwater, and 1,804 cubic yards in track fill. The double track trestle was extended 607 linear feet. On July 31, the trestle extended 5,972 feet from shore. The total amount of rock dredged and dumped on the west breakwater to July 1, was 619,152 cubic yards. During the month, 24,725 cubic yards were dredged and dumped, increasing the total to 643,877 cubic yards. The amount of dry fill placed to August 1 was 406,069 cubic yards.

NOMBRE DE DIOS.

During the month, 50 barges containing 24,513 cubic yards of sand, were shipped to Gatun.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended, as required, to facilitate construction work. Work was continued on the Colon municipal improvements.

Central Division.

During the month of July, the total amount of material excavated in the Central Division was 1,360,117 cubic yards, of which 158,901 cubic yards were classified as earth, and 1,201,216 cubic yards as rock. Of this quantity, 1,337,833 cubic yards were removed by steam shovels, and contractors removed 16,928 cubic yards by sluicing and 5,356 cubic yards by hand. The total—1,360,117 cubic yards—consisted of primary excavation for the Canal prism.

The daily average number of steam shovels at work during the month was 40.70, and the total number of shovel days was 1,017½, as compared with 40.92 shovels at work during the month of June, with 1,064 shovel days.

For comparison with the work done by steam shovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W'k'g days.	Av. yards per shovel day.
		Rock.	Earth.			
	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
1910: July	1,318 873	1,027,669	291,204	42.84	25	1,231.40
1911: July	1,337 833	1,194,420	143,413	40.70	5	1,314.82

Rainfall at Empire: 1910, 12.60 ins.: 1911, 4 00 ins.

The above table shows the average output per shovel to be 6.77 per cent greater in July, 1911, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in July, 1911—1,337,833 cubic yards—was the highest record in that section for the month of July, the previous high record for the month having been in July, 1909, when 1,200,828 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division, according to the revised estimate of July 1, 1911, was 101,801,296 cubic yards, and up to August 1, 1911, 78,698,352 cubic yards had been removed, leaving 23,102,944 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures, it will be seen that 77.31 per cent of all excavation in the Central Division had been completed up to the close of the month of July, and 22.69 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed, and that to be completed, at the close of July operations, was, as follows:

CULEBRA SECTION.	Cu. Yds.
Completed	66,852,698
To be completed	22,591,307

CHAGRES SECTION.	Cu. Yds.
Completed	11,845,654
To be completed	511,637

From the above figures, it will be seen that the Culebra section, locally known as the "Culebra Cut," was 74.74 per cent completed, with 25.26 per cent to be completed; the Chagres section was 95.86 per cent completed, with 4.14 per cent to be completed.

During the month, 53,466 cubic yards of material were hauled from the Canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad. The total amount of spoil from the Central Division used for this purpose, at the close of the month, was 3,883,603 cubic yards. The Central Division also delivered at Gatun 203,718 cubic yards of rock and earth for use in the construction of the Dam, making the total for this purpose at the end of July, 3,992,836 cubic yards.

The daily average number of laborers at work in the whole division during the month was 6,784, and the daily average number of gold employes, 783.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 147,956 cubic yards.

Filling and Embankment—During July, 14,865 cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 275,717 cubic yards. The back fill at Pedro Miguel was increased by 14,705 cubic yards, the total in place at the end of the month amounting to 298,030 cubic yards.

At Miraflores, 54,415 cubic yards were added to the dry fill in the toes, and 24,957 cubic yards to the hydraulic fill in the core of the west dam, making the totals at the end of the month, 870,914 cubic yards, and 607,689 cubic yards, respectively. The back fill was increased by 340 cubic yards, the total aggregating 174 941 cubic yards at the end of the month.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day, worked laying concrete and large stone (actual working time)	5.32	5.26
Average number of mixers per day	....	5.12
	Cu. Yds.	Cu. Yds.
Average hourly, output per mixer (actual working time)	....	27.99
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)	53.62	....
Large stone laid	4.00	35.00
Concrete laid	7,126.00	12,741.00
Total concrete laid	7,130.00	12,776.00

Permanent plant consisted of two chamber cranes, placing.

Auxiliary plant consisted of three 2-cubic yard, and three ½-cubic yard mixers; auxiliary placing plant consisted of ½-cubic yard mixers, dumping directly into forms, averaging 2.08 units per day, and locomotive cranes and derricks, averaging 2.84 units per day.

Pedro Miguel Locks—The general back filling behind the east and west walls was continued, as was also the filling in of the middle wall with crushed stone and sand. During the month, the amount of iron placed aggregated 153,362 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 19,906 cubic yards, as compared with 18,243 cubic yards during June. The concrete was placed, as follows: Four thousand two hundred and fifty-eight cubic yards in the east wall; 7,302 cubic yards in the center wall; 5,445 cubic yards in the west wall; 1,232 cubic yards in the floors, and 1,669 cubic yards in the southwest wing wall.

Miraflores Locks—The McClintic-Marshall Construction Company completed the erection of chamber crane No. 4. The company also dismantled berm crane "E" at Pedro Miguel, and commenced the reerection of same on the east side of Miraflores Locks. Chamber crane No. 2 began laying concrete in the middle wall on July 13, the concrete being supplied by the two 2-cubic yard mixers which constitute the auxiliary mixing plant located in the east wall. Dry excavation in the lower lock was continued, and one steam shovel was engaged in excavating for the middle wall, north of the upper head wall. Filling was continued in the east and west toes of the west dam. During the month, the amount of iron placed aggregated 167,026 pounds.

Concrete Work—The total amount of concrete and large stone laid was 32,840 cubic yards, as compared with 26,536 cubic yards during June. The concrete was placed, as follows: Seven thousand three hundred and twelve cubic yards in the east wall; 6,700 cubic yards in the center wall; 17,729 cubic yards in the west wall, and 1,099 cubic yards in the floors.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	6.46	6.40
Average number of mixers per day	4.20	3.88
	Cu. Yds.	Cu. Yds.
Average hourly output per mixer (actual working time)	53.50	23.59
Average amount of concrete and large stone laid per hour, per berm, or chamber crane (actual working time)	59.20	....
Large stone laid	....	....
Concrete laid	27,003.00	6,366.00
Total concrete laid	27,003.00	6,366.00

Auxiliary mixing plant consisted of 2-cubic yard mixers, averaging 0.64 units per day, and ½-cubic yard mixers, averaging 2.6 units per day. Auxiliary placing plant consisted of ½-cubic yard mixers, discharging directly into forms, averaging 2.6 units per day, and cranes and derricks, averaging 0.32 units per day.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

Dredge.	Type.	Work.		Plant.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds,	Cu. Yds.	
Cardenas	Dipper	80,000	....	3,547	....	83,547	Place measurement
Marmot	Ladder	69,886	....	54,307	....	124,193	Place measurement
Badger	Ladder	89,769	....	....	....	89,769	Place measurement
Mole	Ladder	16,025	5,675	....	....	21,700	Scow measurement
Culebra	Suction	189,565	....	23,883	....	213,448	Scow measurement
Total	....	445,245	5,675	81,737	....	532 657

Grand Total	....	515,017	5,675	81 737	....	602,429	

*Excavated from Canal prism, south of Miraflores lock site.

Chamé Sand Excavation—Approximately 32,300 cubic yards of sand were excavated at Punta Chamé, and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended, as required, to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

	Hours.
Length of working day (hours)	8.00
Average number of hours per day (actual working time)	6.72
Average number of cubic yards crushed per hour of working day	306.81
Average number of cubic yards crushed per working hour	365.45
Total output for the month	61,362.00

Relocation of Panama Railroad.

During the month, 357,135 cubic yards of material were excavated, increasing the total excavation at the close of the month to 7,853,942 cubic yards, and 379,050 cubic yards of material were placed in embankment, increasing the total for this purpose to 13,575,436 cubic yards.

The daily average number of steam shovels at work was 8.72, and the total number of working days was 25.

For comparison with the work done by steam shovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1910:	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
July	197,069	69,365	127,704	7.44	25	1,059
1911:						
June	370 440	254,910	115,530	9.71	26	1,467
July	338,760	251,930	86,830	8.72	25	1,554

During the month, 901 feet of temporary trestle were driven, and work on bridges and culverts was continued. One thousand five hundred and ninety-eight linear feet of 70-pound track were relaid by 90-pound track, the total of 70-pound and 90-pound track at the end of the month being 134,698 linear feet, and 42,043 linear feet, respectively. The force averaged 2,125 men, in addition to those employed by contractors.

Quartermaster's Department.

LABOR.

Arrangements were made by the recruiting agent of the Commission in Barbados to recruit men from the small islands adjacent to Barbados. Two shipments of 50 and 146 men, respectively, were received during the month, and were assigned to the Panama railroad relocation. From latest advices received, it is probable that the full quota of one thousand men asked for, can be obtained.

QUARTERS.

There was a further decrease in the number of applications for family quarters, there being 596 applications on the No. 2 list, as compared with 623 for the preceding month. Two additional type-5 houses at Gorgona were converted into use as nonhousekeeping quarters.

MATERIAL AND SUPPLIES.

Inventories were taken in all the storehouses of the Quartermaster's Department at the close of the fiscal year 1911. The sum total of the stock on hand was $4,503,643.60, being a decrease of $187,390.50 from the stock on hand at the close of the fiscal year 1910. As, during the fiscal year 1911, nearly $1,000,000 worth of material was taken over from outside departments and the Panama railroad, the total reduction in stock amounted to about $1,200,000.

Supplies during the month were delivered by 30 steamers, the total weight of cargo aggregating 28,065 tons, exclusive of 774,115 feet, board measure, Douglas fir lumber; 135,384 feet, board measure, yellow pine lumber; 111,016 feet, board measure, white oak lumber, and 44,000 cross-ties. The total value of material received during the month was $445,306.12.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels showed a net profit of $2,918.16. The operation of the Hotel Tivoli showed a net profit of $2,920.57, and there was a net profit on restaurants, penitentiary, tugs, and dredges, of $132.11. The net profit on subsistence operations was $5,970.84.

Department of Civil Administration.

COURTS.

During the month 11 civil and 34 criminal cases were disposed of in the Circuit Courts; and 72 civil and 545 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for July amounted to $407,397.91, and the fees to $1,811.02. Receipts from stamp and card sales, and newspaper postage aggregated $6,010.99. The total collection of revenues made by the division was $17,205.26, and the collection on account of court fines, costs and fees, $2,439.45.

Twenty-nine vessels entered at, and 31 vessels cleared, from the port of Ancon; and 18 vessels entered at, and 21 vessels cleared, from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 561, of whom 494 were men and 67 women. Forty-two nationalities were represented. The total number of arrests for the month was an increase of 89, as compared with June. Nine convicts were committed to the penitentiary, and 13 were discharged, leaving 144 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $3,011.72, and the value of their work on Canal Zone roads $2 703.90

DIVISION OF FIRE PROTECTION.

Thirteen fires were reported in the Canal Zone during the month, as compared with seven in June. The damage to Commission property was $18.50.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,456,113 gallons, and in Colon 921,804 gallons.

The usual inspection and maintenance work of this division was performed during the month.

Department of Sanitation.

The total number of deaths from all causes among employes was 56. These were divided, as follows: From disease, 41, and from violence, 15, giving the annual average per thousand of 10.29 and 3.77, respectively.

The annual average death rate per thousand among employes for the month of July in previous years since American occupation was, as follows:

1904	6.24
1905	31.54
1906	64.71
1907	35.09
1908	14.68
1909	8.10
1910	11.80

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and nonemployes, was 26.53.

The annual average death rate per thousand for the month of July among the same class of population for previous years was, as follows:

1905	58.14
1906	67.72
1907	41.46
1908	29.11
1909	18.29
1910	22.48

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 10.37; blacks, 10.27, giving a general average of 10.29. For the same month during 1909, the annual average death rate per thousand from disease was: Whites, 4.13; blacks, 6.65, giving a general average of 6.01; and for the same month during 1910: Whites, 9.51; blacks, 9.16, giving a general average of 9.25.

Among employes during the month, deaths from the principal diseases were, as follows: Nephritis, acute and chronic, 5; lobar pneumonia, 10; hæmoglobinuric fever, 1; malaria fever, E. A., 8; tuberculosis, 4; typhoid fever, 2, leaving a balance of 11 deaths from all other diseases, and 15 deaths from external violence.

Thirty-nine cases of diptheria were reported during the month, 20 from the Canal Zone, 15 from Panama, and 4 from Colon, with four deaths. Generally speaking, the type of the disease continued mild.

One case of bubonic plague was taken from the S. S. *Guatemala* of the Pacific Steam Navigation Company, at the Quarantine station, Culebra Island, on July 24, and the patient is recovering. This person had lived on shore at Callao four days prior to his embarkation, and probably contracted the infection during that time, as he was taken sick two days later.

No cases of yellow fever, smallpox, or plague originated on the Isthmus during the month.

Respectfully,
Geo. W. Goethals, *Chairman.*

Paraiso Pythians.

Paradise Lodge, No. 4, Knights of Pythias, Paraiso, held a "social evening" for members and their families on Thursday, August 17. The newly organized company of the Uniformed Rank has its drill on Friday evenings at the lodge hall. The uniforms and equipment of the company have been received, and the organization has the use of an empty building belonging to the Commission for its armory.

Pilots, Masters, Mates, and Engineers.

A meeting of the Board of Local Inspectors will be held on Wednesday, August 30, at 8 a. m., at the Administration Building, Ancon, at which time applicants for licenses as pilots, masters, mates, or engineers, who have submitted applications on the prescribed form, may appear for examination.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

On Wednesday, August 16, a "smoker" for men was held in the gymnasium. The program consisted of motion pictures, card tricks by Julius Kersuben of Balboa, and wrestling bouts between Burrell of Cristobal and Meyer of Corozal, Polson and McSparran of Cristobal, and Burrell and Polson of Cristobal. The attendance was about 100.

CULEBRA.

The following high scores were rolled during the week in duckpins: Huttlemaier, 101; Palmer, 103, 105; Mitched, H., 104; Sickler, 105.

The gymnasium classes meet every Monday and Thursday nights from 5.15 to 6 p. m. A gymnasium class for Wednesday nights from 8 to 8.45 will begin its meetings on August 30, in which all classes of gymnastic work will be given. After 8.45, basketball and other games will be played.

A local tournament in volleyball will be organized soon.

EMPIRE.

The following high scores were bowled on the alleys during the past week. Tenpins—Giavelli, 243, 201, 187; Drake, 209; Pinney, 220; Huson, 194, 207; Parkis, 226, 208, 196; Gustavson, 200. Duckpins—Reiman, 101, Pulsifer, 101; Pinney, 113, 107 113, 115; Huson, 105; Danielson, 108; Land, 102.

The Hearons Sisters Concert Company will give a sacred concert on Sunday night, August 27.

On Friday, August 25, under the auspices of the literary and debating society, there will be held an old fashioned spelling bee. The contestants will be chosen from the audience. Both ladies and gentlemen are invited to attend and participate.

The orchestra from the National Conservatory of Music, Panama city, will give the following program at the "open house" on Saturday night, August 26: "Cavalleria Rusticana"; "Blue Danube" waltz; march, from the "Midsummer Night's Dream"; intermezzo; "Adoration"; barcarolle, from the "Tales of Hoffman"; waltz, from "Chocolate Soldier"; closing march.

An order will be sent in soon for new books for the library. Members are requested to leave names of books desired at the desk.

GORGONA.

The hygiene class in connection with gymnasium work was successfully opened on Monday night, August 14, when an informal talk was given by Mr. Hopkins, followed by a discussion by members of the class. These discussions will be held every Monday night preceding the regular gymnasium class, and a different phase of personal care and hygiene will be taken up each time. All men are invited.

A mock trial was held on Thursday night after gymnasium class. This is the second of a series of similar entertainemnts. Refreshments were served.

The pool tournament which recently closed, resulted in a tie of four men: Robitoy, Sherwood, Hill, and Orr. This will be played off before the award is made.

The high bowling scores for the week ending August 26 are, as follows: Duckpins—Duensing, 104, 104, 107; Davis, 104; Dunlop, 100, 104, 101, 118, 108, 101; Davenport, 108; Carlisle, 104; Niles, 103; Haggerty, 117, 103, 102. Tenpins—Haldeman, 209; Lowe, 206; Kenney, 212.

GATUN.

The Ancon bowling team played a second series of games of duckpins at Gatun on Saturday night. Ancon won the first, and Gatun the last two games.

The wrestling class meets once each week. Ten men are now taking lessons under Fred Huber's instructions.

Volleyball games are creating a great deal of interest between divisions of the gymnasium class at its meetings on Tuesday and Friday nights.

CRISTOBAL.

The subject discussed by the literary and debating club on Wednesday night was "Resolved, that John D. Rockefeller is a public benefactor." The affirmative won. The subject for debate on Wednesday night, August 23, will be "Resolved, that United States senators should be elected by direct vote of the people." Affirmative, Messrs. Weaver and Hubbard; negative, Messrs. Cristopherson and Putnam.

On Saturday, August 26, all the boys in the Cristobal boys' department will be taken over to Toro Point, whence they will walk to Fort San Lorenzo.

The gymnasium classes usually held on Thursday will meet on Friday on account of the Hearon Sisters. entertainment on Thursday night.

Mr. Thos. Burns and Dr. W. A. Blackburn have been elected captains of the Cristobal teams in the Isthmian tenpin league.

The following high scores were made during the week ending August 19: Tenpins—Louch, 232, 219, 202; Burn, W., 213; Blackburn, 203; Wallace, 211, 210; Collins, 209, 203, 201; Peterson, 201; Atkins, 205; Rosteck, 202. Duckpins—Wheeler, 112, 111; Hess, 103, 101; Beard, 101.

The bowling games with the Marines from Camp Elliott on August 19 resulted, as follows:

Camp Elliott.				Cristobal.			
Martins	153	150	149	Wallace	130	164	189
Wayman	161	129	150	Wheeler	133	136	149
Swartz	157	180	125	Rosteck	151	202	179
Simpson	139	139	122	Collins	138	189	143
Weigolt	142	125	122	Louch	187	176	156
Total	752	723	668	Total	739	867	816

CAMP ELLIOTT.

On Saturday evening, August 12, the bowling team from Cristobal was defeated by the Marines on the Camp Elliott alleys by the score of 2,223 to 2,354.

OFFICIAL CIRCULARS.

Labor Day.

Culebra, C. Z., August 16, 1911.

Circular No. 401:

Labor Day, Monday, September 4, 1911, will be observed as a holiday throughout the Canal Zone, and, as far as possible, all work will be suspended on that day.

Geo. W. Goethals, *Chairman.*

Rate Authorizations.

Culebra, C. Z., August 21, 1911.

Circular No. 299-n:

A rate of 50 cents an hour is authorized for blacksmiths, boilermakers, car repairers, carpenters (car, house, and ship), machinists, painters, pipefitters, and planing mill hands.

The designation of car repairer at 65 cents an hour is amended to read: "Car repairer, special."

Geo. W. Goethals,
Chairman and Chief Engineer.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal Colon, and Balboa, during the week ending August 19:

Prinz Sigismund, August 13, from New York, with 200 barrels crude carbolic acid, and 91 bales cotton waste for stock.

Peru, August 15 from San Francisco, with 1 case machinery for stock.

Turrialba, August 17, from New Orleans, with 114 pieces white oak lumber, 1,502 bundles yellow pine lumber, 1,189 pieces yellow pine lumber, 34 rolls cotton duck, 401 bales hay, for stock; 756 pieces white oak lumber, 4,319 pieces yellow pine lumber, 100 pieces castings, for Mechanical Division; 9 cases castings for Central Division.

Ancon, August 17, from New York, with 44,950 barrels cement for Atlantic and Pacific Divisions.

Panama, August 18, from New York, with 47 cases babbitt metal, 10 pieces steel beams, 800 pails lubricating grease, 400 bundles shovels, 6 cases stationery, 150 rolls roofing paper, 100 cases sapolio, 20 bales rubber hose, 31 bundles pipe, 30 bundles padboard, 60 kits shellac, for stock; 6 cases rubber boots for Pacific Division; 6 kegs purifier for Atlantic Division; 5 cases steel castings, 6 barrels journal, 6 pieces castings, 31 cases incandescent lamps, for Mechanical Division; 11 barrels blue stone and zincs for Panama Railroad Company; 320 packages drugs and glassware for Sanitary Department; and a miscellaneous cargo, the whole consisting of 2,140 packages, weighing 150 tons.

Tanagra, August 19, from New York, with 25,165 barrels cement for Atlantic and Pacific Divisions.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Corozal, C. Z., on Sunday, August 27, 1911, at 7.30 p. m. The program follows:

1. March—*Love of Liberty*	Scouton
2. Selection—*The Girl of My Dreams*	Hoschna
3. Waltz—*Gaite*	Waldteufel
4. Overture—*Fest*	Leutner
5. Intermezzo—*Dawn of Love*	Bendix
6. (*a*) Popular March—*On, Wisconsin*	Purdy
(*b*) Two Step—*Casey Jones*	Newton
7. Idyll—*Garden of Roses*	Pratt
8 Sextet from Lucia	Donizetti
9. Medley Selection—*Headlights*	Schulz
10. March—*Ideal*	Reeves

Charles E. Jennings, *Musical Director.*

The next concert will be given at Gatun, C. Z., on September 3, at 5 p. m.

Found—The person who left a fountain pen at the railroad station in Panama on Sunday, August 13, can obtain the same by addressing W. Jackson, Gatun, giving a description of the pen in question.

COMMISSARY DEPARTMENT.

The open hours at Culebra commissary are from 8 a. m. to 1 p. m., and from p. m. 3 to 7 p. m. All other commissaries are open from 8 a. m. to 1 p. m., and 3 p m. to 7 p. m. with the exception of the Cristobal commissary, which is open from 8 a. m. to 12.30 p. m., and from 2 p. m. to 7 p. m.

Retail prices of cold storage provisions for the week beginning August 22.
